# Personal Statements: What Drives Applicants?

---

Providers identified **advocacy, social responsibility, personal background, and community building** as their top personal motivations. These providers are intentional when selecting their positions, looking for opportunities that can fulfill these drives.

*"It has been an honor to treat patients in underserved communities because when I look at many of my patients, I see myself... the daughter of immigrants who struggled to pay for food, utilities, and housing. Many of my patients express the joy and comfort that they feel when they realize that I will be taking care of them. Once a patient is comfortable with their medical provider, this results in increased compliance and ultimately improved overall health."*

# Personal Statements: What Applicants Give to the Communities They Serve

They seek to **provide high-quality care** by practicing **cultural competency** and **compassionate care**. They aim to **help patients navigate healthcare systems** through **patient education** and **connection to resources**. Above all else, they express a **long-term commitment to serving the greatest need, improving health outcomes, and increasing healthcare access**.

*"In the emergency room, the most frequent problems I encounter include inability to access or afford medication, inability to establish care with a primary care doctor or specialist, housing instability, difficulties accessing substance recovery centers, among many more....I try to make social support a regular part of my medical practice and advocate for the patient with the social resources available in the hospital."*

# 2024 General Assembly Report

# 2024 General Assembly Report

---

## Feedback:

- A. General Outline
- B. Background
- C. Activities
- D. Recommendations

## Draft Recommendations

---

**Recommendation 1:** The State should incorporate workforce development benefits into the AHEAD Model. The goals of the Maryland Loan Repayment Programs closely align with the innovative Centers for Medicare and Medicaid Services payment model as they share the goal of improving health outcomes and ensuring equitable access to health care for all Marylanders. The Council recommends that negotiations with the Federal Government include authority for the Health Services Cost Review Commission to fund loan repayment through rate setting.

**Recommendation 2:** The General Assembly should broaden current MLARP PPA authorizing language to clearly allow and invite funding sources such as private contributions, employer match programming, special state funds (such as Cigarette Restitution Fund and cigarette tax revenue), and other sources such as potential augmentation from implementation of the AHEAD model (January 2026 implementation) and options for donations via the Board of Physicians' licensure renewals.

## Draft Recommendations

---

**Recommendation 3:** The General Assembly should remove [Article - Health – General §24–1706](#) which requires regulations establishing maximum # participants and minimum/maximum amount of award in each priority area. The intention of specific regulations related to minimum and maximum participants and amounts is unknown, and the instructions are unclear regarding individual or aggregate awards.

**Recommendation 4:** The General Assembly should alter the requirement for an annual MLARP Advisory Council for Physicians and Physician Assistants report; [Article - Health - General §24–1708 \(g\)](#) to require a report every three (3) years to better allow the Council to fulfill its mandates and provide robust reporting.

## Draft Recommendations

---

**Recommendation 5:** The General Assembly and Governor should include an operational budget allocation to cover Office of Health Care Workforce Development staffing for recruiting and retaining Maryland’s healthcare workforce. Ideally, authorizing language should specifically state this allowable function of the MLARP Funds, earmarking funds for administrative needs of the program.

**Recommendation 6:** MLRP/ the Department should consider incorporating a process to pre-approve eligible practice sites (similar to the U.S. Health Resources and Service Administration’s National Health Service Corps), to more easily allow for broadening of the resource infrastructure and accommodate larger health system needs.
