

Adolescents who received a Wellness Checkup in the Last Year	
<b>SHIP website description</b>	This indicator reflects the percentage of adolescents (ages 13-20 years old) enrolled in Medicaid (320+ days) who received at least one well child visit during the past year. Adolescents are at heightened risk for a variety of poor health outcomes associated with: violence (homicide/suicide/intimate partner); injuries (motor vehicle/occupational/sports related); substance use and abuse; sexually transmitted infections, including HIV; unplanned pregnancies and homelessness. Well child visits provide the opportunity for health care providers to engage in primary, secondary, and tertiary prevention of poor health outcomes associated with these factors resulting in prevention, early detection, and treatment for issues that can otherwise have a life-long devastating impact on individuals.
<b>Source</b>	Maryland Medicaid Service Utilization
<b>Numerator</b>	Adolescent enrollees (13-20) meeting the Medicaid eligibility criterion who had a well-care visit in the same year (2010 - 2014).  Beginning in 2015, the age range changed; as a result, data reported for 2015 and onward cannot be trended with previous years of data. Adolescent enrollees (12-
<b>Denominator</b>	All children aged 13 to 20 years enrolled in Medicaid for at least one day and for 320 or more days during the calendar year (2010 - 2014).  Beginning in 2015, the age range changed; as a result, data reported for 2015 and onward cannot be trended with previous years of data. All children aged 12 to 21 years enrolled in Medicaid for at least one day and for 320 or more days during the calendar year (2015 - ).
<b>Threshold</b>	7
<b>Censorship (if below threshold)</b>	Rate not reported. Counts not reported.
<b>Calculation and metric</b>	(Numerator/Denominator) *100= Single-Year Calculation
<b>Race/ethnicity categories (on SHIP chart)</b>	All races/ ethnicities (aggregated) African American Hispanic White Asian

<b>Other</b>	<p>"In 2016, data from 2012 to 2014 were re-run using an updated data set. Updated rates differ from past values posted on this website.</p> <p>Reporting on race became optional after 2013; individuals enrolling in the Medicaid program 2014 onward may not have reported race. For individuals who enrolled in the Medicaid program prior to 2014, their reported race in 2012 through 2014 was imputed to their files for 2014, 2015, and onward.</p> <p>Beginning in 2015 the age range was increased to include adolescents aged 12 - 21 years, as a result, data reported for 2015 and onward cannot be trended with previous years of data."</p>
