## Weekly Heat-related Illness Surveillance Report

July 1, 2015

Reporting for 06/23/15 through 06/29/15

**National Weather Service Forecast:** No hazardous heat forecast.  
**Heat Advisories Declared During the Previous Week:** 1  
**Total Heat Advisories Declared This Year:** 2

Heat Indexes are calculated for temperatures above 80°F with humidity of 43% or greater.

**Note on Emergency Department Data:** The results from the query used in ESSENCE, an electronic biosurveillance system, to track heat-related illnesses may be an overestimation of the actual burden of illness related to the hot weather. This overestimation is due to the nature of the query, which includes the term dehydration, a condition that may be caused by factors other than heat.

**Note on EMS Data:** This data is based on EMS pre-hospital care reports where the EMS provider has selected “Heat Exhaustion/Heat Stroke” and/or “Hyperthermia” as a primary or secondary impression a patient’s illness. This impression is solely based on the signs and symptoms seen by the provider, not on any diagnostic tests. Since these numbers do not include all primary or secondary impressions that may be seen with heat exposure the actual numbers may be low. This data is reported for trending purposes only.

**Emergency Department Chief Complaints Regarding Heat-Related Illness**

Date	Number of Chief Complaints Regarding Heat-related Illnesses State of Maryland
June 23	73
June 24	44
June 25	39
June 26	41
June 27	25
June 28	27
June 29	22

ESSENCE chief complaint query contains the following terms: hyperthermia, heat, dehydration and sunburn

There were no chief complaint clusters identified during the week.

**Geographical and Age Group Distribution of Emergency Department Chief Complaints Regarding Heat-related Illnesses for June 23 through June 29, 2015**

\*Geographical distribution of emergency department chief complaints is based on patients' jurisdictions of residence. The "Other Region" category includes patient records without a ZIP code and patients who reside outside of Maryland.

There were no heat-related deaths reported this week.

There have been a total of 0 heat-related deaths during our reporting period this summer.

For media inquiries, please contact the Office of Communications: [410-767-6490](tel:410-767-6490)

**Heat Advisory criteria:** The National Weather Service will issue a Heat Advisory when the heat index value is expected to reach 105 to 109 degrees within the next 12 to 24 hours. A Heat Advisory may be issued for lower criteria if it is early in the season or during a multiday heat wave. NWS will issue an Excessive Heat Warning when the heat index value is expected to reach or exceed 110 degrees within the next 12 to 24 hours. An Excessive Heat Warning may be issued for lower criteria if it is early in the season or during a multiday heat wave.
