Weekly Heat-related Illness Surveillance Report

August 28, 2019

Reporting for August 20, 2019 to August 26, 2019

National Weather Service Forecast: No current advisories
Heat Advisories Declared During the Previous Week: 0
Total Heat Advisories Declared This Year: 6

Heat Indexes are only calculated for temperatures above 80°F with humidity of 43% or greater

Note on Emergency Department Data: The results from the query used in ESSENCE, an electronic biosurveillance system, to track heat-related illnesses may be an overestimation of the actual burden of illness related to the hot weather. This overestimation is due to the nature of the query, which includes the term dehydration, a condition that may be caused by factors other than heat.

Note on EMS Data: These data are based on EMS pre-hospital care reports where the EMS provider has selected "Heat Exhaustion/Heat Stroke" and/or "Hyperthermia" as a primary or secondary impression a patient's illness. This impression is solely based on the signs and symptoms seen by the provider, not on any diagnostic tests. Since these numbers do not include all primary or secondary impressions that may be seen with heat exposure the actual numbers may be low. These data are reported for trending purposes only.

Emergency Department Chief Complaints Regarding Heat-related Illness

Date	Number of Chief Complaints Regarding Heat-related Illnesses State of Maryland
August 20	94
August 21	58
August 22	61
August 23	41
August 24	43
August 25	33
August 26	24

**Note: ESSENCE chief complaint query for heat-related illness contains the following terms: hyperthermia, heat, dehydration and sunburn*

There were no chief complaint clusters identified during the week.

Geographical Distribution of Emergency Department Chief Complaints Regarding Heat-related Illnesses for August 20, 2019 through August 26, 2019

**Geographical distribution of emergency department chief complaints is based on patients' jurisdictions of residence. The "Other Region" category includes patient records without a ZIP code and patients who reside outside of Maryland.*

Age Group Distribution of Emergency Department Chief Complaints Regarding Heat-related Illnesses for August 20, 2019 through August 26, 2019

Report continued on next page...

Total Number of Heat-related Deaths	Jurisdiction*	Age Group	Gender
20	Anne Arundel**+	18-44 Years Old	Male
	Montgomery	18-44 Years Old	Female
	Prince George's	18-44 Years Old	Male
	Wicomico	45-64 Years Old	Male
	Cecil	45-64 Years Old	Female
	Prince George's	45-64 Years Old	Male
	Prince George's	45-64 Years Old	Male
	Worcester	45-64 Years Old	Female
	Baltimore City	45-64 Years Old	Male
	Anne Arundel **	65+ Years Old	Male
	Harford**	65+ Years Old	Male
	Anne Arundel	65+ Years Old	Male
	Baltimore City	65+ Years Old	Male
	Talbot	65+ Years Old	Male
	Baltimore County	65+ Years Old	Female
	Baltimore County	65+ Years Old	Male
	Baltimore City	65+ Years Old	Male
	Frederick	65+ Years Old	Male
	Prince George's	65+ Years Old	Female
	Anne Arundel	65+ Years Old	Female

**Refers to the jurisdiction where the death occurred. **Refers to a newly listed death ^Refers to updated information from OCME
**+Refers to a newly listed death occurring during the excessive heat event (7.17-7.22.19)*

There were three heat-related deaths reported this week. One death occurred during the excessive heat event (7.17-7.22.19). None of these deaths are presumed nor suspected homeless individuals.

There have been twenty heat-related deaths during the reporting period. It is not determined if one of the deaths is presumed or suspected to be a homeless individual. Seven of these deaths occurred during the recent excessive heat event (7.17-7.22.19)

Heat Advisory criteria: The National Weather Service will issue a Heat Advisory when the heat index value is expected to reach 105 to 109 degrees within the next 12 to 24 hours. A Heat Advisory may be issued for lower criteria if it is early in the season or during a multiday heat wave. NWS will issue an Excessive Heat Warning when the heat index value is expected to reach or exceed 110 degrees within the next 12 to 24 hours. An Excessive Heat Warning may be issued for lower criteria if it is early in the season or during a multiday heat wave.

Suspected Homeless Death Data: Office of the Chief Medical Examiner (OCME) Field Investigators use the U.S. Department of Health and Human Services (HHS) homeless definition to determine suspected homeless deaths. Homeless deaths are listed as suspected due to the limited information available to the Field Investigators at the time of investigation, which may result in some misclassifications.
