

## Unintentional Drug- and Alcohol-Related Intoxication Deaths in Maryland, 2026

**Preliminary data through 1<sup>st</sup> quarter: January-March**

Release Date: July 2026

This report contains counts of unintentional drug- and alcohol-related intoxication deaths\* occurring in Maryland through the first quarter of 2026. Counts are also shown for the same period of 2013-2025 to allow for review of trends over time. Counts for 2025 and 2026 are not complete and are subject to change.

Since an intoxication death may involve more than one substance, counts of deaths related to specific substances do not sum to the total number of deaths.

\*Deaths resulting from recent ingestion or exposure to alcohol or other types of drugs, including heroin, prescription opioids, prescribed and illicit forms of fentanyl (including carfentanil), cocaine, benzodiazepines, phencyclidine (PCP), methamphetamines and other prescribed and unprescribed drugs.
