# MARYLAND

## Regions and Political Subdivisions

The services and facilities of the Maryland Department of Health (MDH) are operated on a non-discriminatory basis. This policy prohibits discrimination on the basis of race, color, sex, or national origin and applies to the provisions of employment and granting of advantages, privileges and accommodations.

The Department, in compliance with the Americans With Disabilities Act, ensures that qualified individuals with disabilities are given an opportunity to participate in and benefit from MDH services, programs, benefits and employment opportunities.

Wes Moore  
Governor  
State of Maryland

Aruna Miller  
Lt. Governor  
State of Maryland

# MARYLAND VITAL STATISTICS ANNUAL REPORT 2024

## **DEFINITIONS AND EXPLANATORY NOTES**

Data contained in this report are presented on a county of residence basis, regardless of where the vital event occurred, unless specifically noted otherwise. Birth, death and fetal death data include information for all Maryland residents, regardless of whether the birth or death occurred in Maryland, the remainder of the United States, or certain foreign countries that report vital event data to Maryland. Information on marriages and divorces is limited to events occurring in Maryland.

### **DEFINITIONS**

**Age-adjustment:** A methodology used to compare rates among populations with differing age distributions. The direct method of age-adjustment was used to calculate the rates in this report. Using this methodology, the crude death rate for each age group is multiplied by the proportion of the standard population within that age group; the sum of the products is the age-adjusted rate. Age-adjusted rates in this report are standardized to the projected 2000 U.S. population and are expressed as rates per 100,000 population. Publications prior to 1999 present adjustments to the 1940 standard U.S. population. **Age-adjusted rates should not be compared to crude rates or to adjusted rates calculated using a different standard population.**

**Age-specific birth rate:** Number of births to mothers of a specific age per 1,000 females in that age group.

**Age-specific death rate:** Number of deaths in a specific age group per 1,000 or 100,000 population in the same age group.

**Crude birth rate:** Number of live births per 1,000 population.

**Crude death rate:** Number of deaths from all causes per 1,000 or per 100,000 population. Death rates for specific causes are per 100,000 population.

**General fertility rate:** Total number of births per 1,000 females aged 15-44.

**Fetal death\*:** The death of a product of human conception, before its complete expulsion or extraction from the mother, regardless of the duration of the pregnancy, as indicated by the fact that, after the expulsion or extraction, the fetus does not breathe or show any other evidence of life, such as heartbeat, pulsation of the umbilical cord, or definite movement of voluntary muscle.

**Fetal mortality rate\*:** Number of reportable\* fetal deaths per 1,000 total births. Total births include live births plus fetal deaths of twenty or more weeks' gestation.

**Infant death:** Death occurring to a person under one year of age.

**Infant mortality rate:** Number of infant deaths per 1,000 live births.

**Length of pregnancy:** A measure of the duration of gestation in completed weeks as estimated by the attending physician.

**Live birth\***: The complete expulsion or extraction of a product of human conception from the mother, regardless of the period of gestation, if, after the expulsion or extraction, it breathes or shows any other evidence of life, such as heartbeat, pulsation of the umbilical cord, or definite movement of voluntary muscle, whether or not the umbilical cord is cut or the placenta is attached.

**Life expectancy:** The average number of years of life remaining for an individual of a particular age group.

**Low birth weight:** A live birth weighing less than 2,500 grams (5.5 pounds).

**Maternal mortality rate:** Number of maternal deaths per 100,000 live births. Identified using ICD-10 underlying cause of death codes: A34, O00-O95, and O98-O99.

**Neonatal death:** Death occurring to an infant under 28 days of age.

**Neonatal mortality rate:** Number of neonatal deaths per 1,000 live births.

**Perinatal death:** In this report, defined as the death of a fetus of 28 or more weeks' gestation or of an infant less than 7 days of age. Other commonly used definitions for perinatal death range from 20 to 28 weeks' gestation through seven to 28 days of life.

**Perinatal death rate:** In this report, defined as the number of perinatal deaths divided by the number of fetal deaths of 28 or more weeks' gestation plus the number of live births times 1,000. See perinatal death.

**Postneonatal death:** Death occurring to an infant between 28 days and one year of age.

**Postneonatal mortality rate:** Number of postneonatal deaths per 1,000 live births.

---

\*The definitions of live birth and fetal death are set by law in Section 14 (a) of Article 43 of the Maryland Code, 1957 Edition – Supplement. Fetal deaths are reportable for filing purposes only if the death occurs after a period of gestation of twenty or more completed weeks (Section 21 (a) of Article 43 supra). Therefore, the fetal deaths included in this report are only those of twenty or more weeks gestation.

## **EXPLANATORY NOTES**

### **Population**

The U.S. Census Bureau's Population Estimates Program produces annual estimates by race, sex, age, and Hispanic ethnicity for national, state and county populations. The population estimates in this report for Maryland are from the Vintage 2024 estimates (released June 2025), which include population estimates for July 1, 2020, through July 1, 2024. These estimates were derived from data on births, deaths, net migration (domestic and international), and a population base incorporating the 2020 Census, Vintage 2020 estimates, and 2020 Demographic Analysis estimates. Estimates by race, Hispanic origin, sex, and age group are prepared for all states and counties. Single year age estimates at the county level were provided by the U.S. Census Bureau Population Division through a data request. Further information on the preparation of population estimates may be found on the U.S. Census Bureau website at <http://www.census.gov/popest/>.

Population estimates in the Maryland Vital Statistics Annual Reports prior to 2021 were based on "bridged-race" estimates prepared by the National Center for Health Statistics (NCHS) in collaboration with the U.S. Census Bureau. "Bridging" the 31 racial categories used since Census 2000 to the four single race categories specified in the 1977 U.S. Office of Management and Budget (OMB) standards (Asian or Pacific Islander, Black or African American, American Indian or Alaska Native, White) was done to make race information in State birth and death records compatible with Census population estimates. Beginning in 2021, NCHS no longer provided "bridged-race" estimates to states. Rather NCHS now reports single-race categories according to the standards on race and ethnicity set by the OMB in 1997. A notable change to single-race categories – that is, categories for which only one race is reported – included the addition of a "Two or more races" or multi-race category in which two or more races are aggregated. Maryland VSA adopted these new standards beginning with the 2021 Annual Report and for reports going forward.

### **Cause of Death**

The tenth revision of the International Classification of Diseases (ICD-10) has been used to code the causes of death reported on death certificates since 1999. The ICD is a classification system for mortality data developed by the World Health Organization and other international centers to promote comparability in the collection, classification, processing, and presentation of mortality statistics. The ICD-10 is

periodically revised to reflect advances in medical science. ICD-10 replaced ICD-9, which was used with 1979-98 data.

ICD-10 differs substantially from ICD-9. ICD-10 includes expanded detail for many conditions, transfers conditions between classifications, incorporates the use of alphanumeric instead of numeric codes, modifies coding rules and modifies tabulation lists. Because of these changes, the presentation of mortality data by cause of death is substantially different, and discontinuities in trend data between ICD revisions are likely to exist for certain causes of death. Additional information on the history of the classification of diseases and the causes of death may be found at [http://www.cdc.gov/nchs/data/misc/classification\\_diseases2011.pdf](http://www.cdc.gov/nchs/data/misc/classification_diseases2011.pdf)

### **Age-adjusted Death Rates**

As described on page ix of this report, age-adjustment is the process used to compare rates among populations with differing age distributions. Age-adjustment is used to eliminate the confounding effect of differences in age distributions among groups or overtime.

Beginning with data year 1999, all federal agencies adopted the year 2000 projected U.S. population as the standard for age-adjusting death rates. The year 2000 population replaced at least three different population standards used in earlier years. The use of these multiple standards resulted in difficulties comparing data prepared by agencies using different standards and caused confusion among data users. Use of the 2000 standard was recommended to promote uniformity of data among agencies and to eliminate the need to calculate mortality rates using more than one standard. All age-adjusted rates presented in the Maryland Vital Statistics Annual Report have been calculated using the year 2000 standard population. Age-adjusted rates prepared using the year 2000 standard cannot be compared with rates calculated using other standards.

### **Race and Hispanic Origin**

Several charts and tables in this report show data categorized by race and Hispanic origin. It is important to note that Hispanic origin is an ethnicity classification and can occur concurrently with any race. All birth data in the report are based on the race and Hispanic origin of the mother. In cases of death data, the race and Hispanic origin of the decedent is used. Thus, data for individuals of Hispanic origin are displayed across race categories excluding those specified as “Non-Hispanic.” Alternatively, categories labeled “Hispanic” are inclusive of all persons of Hispanic origin regardless of reported race. Therefore, an overlap exists between categories labeled “Hispanic” and those which include data on Hispanic individuals organized by race.

***VITAL  
STATISTICS  
HIGHLIGHTS***

# Highlights of 2024

## Population

- The estimated **population** of Maryland in 2024 was 6,263,220.
- The racial and ethnic distribution of the 2024 Maryland population was as follows: 46.4% Non-Hispanic White, 30.1% Non-Hispanic Black, 7.2% Non-Hispanic Asian or Pacific Islander, 2.8% Non-Hispanic Multi-race, 0.2% Non-Hispanic American Indian and, 13.3% Hispanic.

## Life expectancy

- The **life expectancy** for an infant born in 2024 was 79.9 years.

## Births

- There were 65,778 **live births** to Maryland residents in 2024, a 0.3% increase from 2023 (65,578).
- The overall **birth rate** was 10.5 births per 1,000 population. The **birth rate** for women of Hispanic origin was 18.2 per 1,000 population, approximately double the rate for Non-Hispanic White (8.7) or non-Hispanic Black (9.7).
- Births to **teen mothers (less than 20 years)** accounted for 3.2% of all births. Births to mothers under the age of 18 accounted for 0.9% of all births.
- The **teen birth rate** was 10.3 per 1,000 women ages 15-19 years in 2024, a 4.6% decrease from 2023 (10.8). The overall rate has fallen nearly 39.1% over the past decade.
- 13.3% of births were to women who had completed fewer than **12 years of education**. Approximately 39% of all Hispanic births were to mothers with fewer than 12 years of education.

- Fourth and higher order births accounted for 11.9% of all births in 2024, no change from 2023.
- Sixty-nine percent (69.3%) of live births were to women who began **prenatal care** during the **first trimester** of pregnancy, and 7.1% were to women who received late (third trimester) or no prenatal care. Non-Hispanic Black and Hispanic women were 2.1 and 2.9 times, respectively, more likely to receive late or no prenatal care when compared to Non-Hispanic White women.
- The incidence of **low birth weight** (birth weight <2,500 grams) was 8.9% in 2024, which is slightly higher than the 2023 percentage (8.6%). The percentage of low-birth-weight infants was 6.5% for Non-Hispanic White infants, 13.3% for Non-Hispanic Black infants and 7.8% for Hispanic infants.
- The incidence of **very low birth weight** (birth weight <1,500 grams) was 1.5% in 2024, no change from the 2023 percentage. The percentage of very low birth weight infants was 0.9% for Non-Hispanic Whites, 2.5% for Non-Hispanic Blacks and 1.4% for Hispanics.
- Plural births accounted for 3.2% of total births. Over half (56.1%) of infants of multiple gestation pregnancies had birth weights below 2,500 grams.
- Ten percent (10.5%) of infants were delivered prior to 37 completed weeks of **gestation**. This figure was 8.8% for Non-Hispanic Whites, 13.7% for Non-Hispanic Blacks and 10.1% for Hispanics.
- Among infants born in 2024, 35.6% were delivered by **cesarean section**, a slight increase from 2023 (34.9).

- For **place of birth**, 91.2% of all births to Maryland residents occurred within the state, 4.9% occurred in the District of Columbia and 4.0% in other states.

### **Fetal and infant deaths**

- The **fetal death rate** was 6.1 per 1,000 total deliveries, a 9.0% decrease from 2023 (6.7). The rate was 5.7 for Non-Hispanic Whites, 8.9 for Non-Hispanic Blacks, and 4.3 among Hispanics.
- The **infant mortality rate** was 5.5 per 1,000 live births in 2024, which was lower than the 2023 rate (5.7). The rate was 3.2 among Non-Hispanic Whites, 8.5 among Non-Hispanic Blacks and 5.7 among Hispanics.
- The **neonatal mortality rate** was 3.9 per 1,000 live births in 2024, which was slightly higher than the 2023 rate (3.8). The rate was 2.3 among Non-Hispanic Whites, 5.8 among Non-Hispanic Blacks and 4.2 among Hispanics.
- The **postneonatal mortality rate** was 1.6 per 1,000 live births, a 15.8% decrease from 2023 (1.9). The rate was 0.9 among Non-Hispanic Whites, and 2.7 among Non-Hispanic Blacks, which was lower than the 2023 Non-Hispanic Black rate (3.7).

### **Maternal deaths**

- There were 70 **maternal deaths** over a five-year period from 2020 and 2024. Approximately 45.7% of maternal deaths were among non-Hispanic Black women, 40% among non-Hispanic White women and 12.9% among Hispanic women.

### **Deaths**

- There were 53,267 **deaths** among Maryland residents in 2024, compared with 53,425 in 2023, a 0.3% decrease.
- The **crude death rate** was 850.5 per 100,000 population in 2024, compared

with 864.4 in 2023.

- The overall **age-adjusted mortality rate** was 683.0 per 100,000 population in 2024. The overall age-adjusted mortality rate for Non-Hispanic Blacks was 1.2 times higher than the rate for Non-Hispanic Whites and 2 times higher than the rate for Hispanics.
- The **ten leading causes of death**, in rank order, were diseases of the heart, malignant neoplasms, cerebrovascular diseases, accidents, chronic lower respiratory diseases, diabetes mellitus, Alzheimer's disease, septicemia, nephritis, nephrotic syndrome and nephrosis, and influenza and pneumonia. For the first time since 2020, COVID-19 is no longer among the ten leading causes of death.
- **Diseases of the heart** continue to be the leading cause of death in 2024. It accounted for 21.5% of all deaths. The age-adjusted mortality rate was 143.6 per 100,000 population in 2024. The death rate from Diseases of the heart decreased 4.1% between 2023 and 2024.
- **Malignant neoplasms** were the 2nd leading cause of death in 2024, responsible for 21.0% of all deaths. The age-adjusted mortality rate for malignant neoplasms was 136.7 per 100,000 population, which is slightly lower than the 2023 rate of 137.8.
- **Cerebrovascular diseases** were the 3rd leading cause of death in 2024. It accounted for 6.4% of all deaths. The age-adjusted mortality rate was 43.3 per 100,000 population, similar to the 2023 rate of 43.4.
- **Accidents** were the 4th leading cause of death in 2024 accounting for 6.1% of all deaths. The age-adjusted mortality rate was 46.7 per 100,000 population. This is a 12.9% decrease from the rate in 2023 (53.6).

- **Chronic lower respiratory diseases** were the 5th leading cause of death in 2024, responsible for 3.5% of all deaths. The age-adjusted mortality rate was 23.0 per 100,000 population, slightly lower than the 2023 rate of 24.1.
- **Diabetes** was the 6th leading cause of death in 2024, responsible for 3.4% of all deaths. The age-adjusted mortality rate was 22.4 per 100,000 population, which was slightly lower than the 2023 rate of 23.0. The diabetes rate among Non-Hispanic Blacks was nearly 2 times that of Non-Hispanic Whites.
- **Alzheimer's disease** was the 7th leading cause of death. It accounted for 2.3% of all deaths. The 2024 age-adjusted mortality rate was 16.0, a slight increase when compared to the 2023 rate of 15.4 per 100,000 population.
- **Septicemia** was the 8th leading cause of death in 2024. It accounted for 1.9% of all deaths. The age-adjusted mortality rate was 12.4 per 100,000 population in 2024, unchanged from 2023.
- **Nephritis, nephrotic syndrome and nephrosis** was the 9th leading cause of death in 2024, responsible for 1.4% of all deaths. The age-adjusted mortality rate was 9.3 per 100,000 population, which 5.5% lower than the 2023 rate of 9.8.
- **Influenza and Pneumonia** was the 10th leading cause of death in 2024, responsible for 1.4% of all deaths. The age-adjusted mortality rate was 9.3 per 100,000 population, which is slightly higher than the 2023 rate of 9.2.
- For **area of occurrence**, 93.5% of all deaths among Maryland residents occurred within the state. Approximately 2.9% occurred in the District of Columbia and 3.6% occurred in other states or countries.

## **Marriages**

- There were 33,687 marriages in Maryland in 2024. The highest percentages of marriages were among persons aged 25-29 years (24.4%) and 30-34 years (21.1%).

## **Divorces**

- There were 17,175 divorces in Maryland in 2024.

\*Fetal mortality rates are per 1,000 live births plus fetal deaths by race of mother.

\*\*Includes races categorized as "unknown" or "other".

\*\*\*Rates based on <20 events in the numerator are not presented since such rates are subject to instability.

\*\*\*\*Includes all deaths to persons of Hispanic origin of any race.

\*Perinatal deaths are fetal deaths occurring at 28 or more weeks gestation plus infant deaths occurring among infants under 7 days of age. Perinatal mortality rates are per 1,000 live births plus fetal deaths of 28 or more weeks gestation.

\*\*Includes races categorized as 'unknown' or 'other'.

\*\*\*Rates based on <20 events in the numerator are not presented since such rates are subject to instability.

\*\*\*\*Includes all deaths to persons of Hispanic origin of any race.

\* Age-adjusted to the 2000 U.S. standard population.

\*\* Excludes sexes and/or races categorized as 'unknown' or 'other'.

\*\*\* ICD-10 codes appear in appendix.

\*\*\*\* Includes all deaths to persons of Hispanic origin of any race.

\*\*\*\*\* Rates based on <20 events in the numerator are not presented since such rates are subject to instability.

**TABLE 38A. THE TEN LEADING CAUSES\* OF DEATH\*\* BY AGE, MARYLAND, 2024.**

\*ICD-10 codes appear in appendix.

\*\*\*\*Includes all deaths to persons of Hispanic origin of any race.

\*\*Leading causes are shown only if there were five or more total deaths in a given age group.

\*\*\*\*\*Rates based on <20 events in the numerator are not presented since such rates are subject to instability

\*\*\*Includes races categorized as 'unknown' or 'other'.

**TABLE 40. NUMBER OF VIOLENT DEATHS AMONG ADOLESCENTS AGES 10-19 YEARS BY CAUSE OF DEATH AND RACE AND HISPANIC ORIGIN, REGION AND POLITICAL SUBDIVISION, MARYLAND, 2024.**

# ***APPENDIX***

**List of 113 selected causes, Injury by firearms, Drug-induced deaths, Alcohol-induced deaths, Injury at work and Enterocolitis due to *Clostridium difficile*, and COVID-19**

---

Cause of death (Based on the *International Classification of Diseases, Tenth Revision, Second Edition, 2004*)

---

All causes

Salmonella infections (A01-A02)  
Shigellosis and amebiasis (A03,A06)  
Certain other intestinal infections (A04,A07-A09)<sup>1</sup>  
Tuberculosis (A16-A19)  
    Respiratory tuberculosis (A16)  
    Other tuberculosis (A17-A19)  
Whooping cough (A37)  
Scarlet fever and erysipelas (A38,A46)  
Meningococcal infection (A39)  
Septicemia (A40-A41)  
Syphilis (A50-A53)  
Acute poliomyelitis (A80)  
Arthropod-borne viral encephalitis (A83-A84,A85.2)  
Measles (B05)  
Viral hepatitis (B15-B19)  
Human immunodeficiency virus (HIV) disease (B20-B24)  
Malaria (B50-B54)  
Other and unspecified infectious and parasitic diseases and their sequelae (A00,A05,A20-A36,A42-A44,A48-A49,A54-A79,A81-A82,A85.0-A85.1,A85.8,A86-B04,B06-B09,B25-B49,B55-B99)  
Malignant neoplasms (C00-C97)  
    Malignant neoplasms of lip, oral cavity and pharynx (C00-C14)  
    Malignant neoplasm of esophagus (C15)  
    Malignant neoplasm of stomach (C16)  
    Malignant neoplasms of colon, rectum and anus (C18-C21)  
    Malignant neoplasms of liver and intrahepatic bile ducts (C22)  
    Malignant neoplasms of trachea, bronchus and lung (C33-C34)  
    Malignant melanoma of skin (C43)  
    Malignant neoplasm of breast (C50)  
    Malignant neoplasm of cervix uteri (C53)  
    Malignant neoplasms of corpus uteri and uterus, part unspecified (C54-C55)  
    Malignant neoplasm of ovary (C56)  
    Malignant neoplasm of prostate (C61)  
    Malignant neoplasms of kidney and renal pelvis (C64-C65)  
    Malignant neoplasm of bladder (C67)  
    Malignant neoplasms of meninges, brain and other parts of central nervous system (C70-C72)  
    Malignant neoplasms of lymphoid, hematopoietic and related tissue (C81-C96)  
        Hodgkin's disease (C81)  
        Non-Hodgkin's lymphoma (C82-C85)  
        Leukemia (C91-C95)  
        Multiple myeloma and immunoproliferative neoplasms (C88,C90)  
        Other and unspecified malignant neoplasms of lymphoid, hematopoietic and related tissue (C96)

**List of 113 selected causes, Injury by firearms, Drug-induced deaths, Alcohol-induced deaths, Injury at work and Enterocolitis due to *Clostridium difficile*, and COVID-19**

---

Cause of death (Based on the *International Classification of Diseases, Tenth Revision, Second Edition, 2004*)

---

All other and unspecified malignant neoplasms (C17,C23-C24,C26-C31,C37-C41,C44-C49,C51-C52,C57-C60,C62-C63,C66,C68-C69,C73-C80,C97)  
In situ neoplasms, benign neoplasms and neoplasms of uncertain or unknown behavior (D00-D48)  
Anemias (D50-D64)  
Diabetes mellitus (E10-E14)  
Nutritional deficiencies (E40-E64)  
    Malnutrition (E40-E46)  
    Other nutritional deficiencies (E50-E64)  
Meningitis (G00,G03)  
Parkinson's disease (G20-G21)  
Alzheimer's disease (G30)  
Major cardiovascular diseases (I00-I78)  
    Diseases of heart (I00-I09,I11,I13,I20-I51)  
        Acute rheumatic fever and chronic rheumatic heart diseases (I00-I09)  
        Hypertensive heart disease (I11)  
        Hypertensive heart and renal disease (I13)  
        Ischemic heart diseases (I20-I25)  
            Acute myocardial infarction (I21-I22)  
            Other acute ischemic heart diseases (I24)  
            Other forms of chronic ischemic heart disease (I20,I25)  
                Atherosclerotic cardiovascular disease, so described (I25.0)  
                All other forms of chronic ischemic heart disease (I20,I25.1-I25.9)  
        Other heart diseases (I26-I51)  
            Acute and subacute endocarditis (I33)  
            Diseases of pericardium and acute myocarditis (I30-I31,I40)  
            Heart failure (I50)  
            All other forms of heart disease (I26-I28,I34-I38,I42-I49,I51)  
    Essential hypertension and hypertensive renal disease (I10,I12,I15)  
    Cerebrovascular diseases (I60-I69)  
    Atherosclerosis (I70)  
    Other diseases of circulatory system (I71-I78)  
        Aortic aneurysm and dissection (I71)  
        Other diseases of arteries, arterioles and capillaries (I72-I78)  
    Other disorders of circulatory system (I80-I99)  
Influenza and pneumonia (J09-J18)  
    Influenza (J09-J11)  
    Pneumonia (J12-J18)  
Other acute lower respiratory infections (J20-J22,U04)  
    Acute bronchitis and bronchiolitis (J20-J21)  
    Other and unspecified acute lower respiratory infections (J22,U04)  
Chronic lower respiratory diseases (J40-J47)  
    Bronchitis, chronic and unspecified (J40-J42)  
    Emphysema (J43)  
    Asthma (J45-J46)  
    Other chronic lower respiratory diseases (J44,J47)

**List of 113 selected causes, Injury by firearms, Drug-induced deaths, Alcohol-induced deaths, Injury at work and Enterocolitis due to *Clostridium difficile*, and COVID-19**

---

Cause of death (Based on the *International Classification of Diseases, Tenth Revision, Second Edition, 2004*)

---

Pneumoconioses and chemical effects (J60-J66,J68)  
Pneumonitis due to solids and liquids (J69)  
Other diseases of respiratory system (J00-J06,J30-J39,J67,J70-J98)  
Peptic ulcer (K25-K28)  
Diseases of appendix (K35-K38)  
Hernia (K40-K46)  
Chronic liver disease and cirrhosis (K70,K73-K74)  
    Alcoholic liver disease (K70)  
    Other chronic liver disease and cirrhosis (K73-K74)  
Cholelithiasis and other disorders of gallbladder (K80-K82)  
Nephritis, nephrotic syndrome and nephrosis (N00-N07,N17-N19,N25-N27)  
    Acute and rapidly progressive nephritic and nephrotic syndrome (N00-N01,N04)  
    Chronic glomerulonephritis, nephrosis and nephropathy not specified as acute or chronic, and renal sclerosis unspecified (N02-N03,N05-N07,N26)  
    Renal failure (N17-N19)  
    Other disorders of kidney (N25,N27)  
Infections of kidney (N10-N12,N13.6,N15.1)  
Hyperplasia of prostate (N40)  
Inflammatory diseases of female pelvic organs (N70-N76)  
Pregnancy, childbirth and the puerperium (O00-O99)  
    Pregnancy with abortive outcome (O00-O07)  
    Other complications of pregnancy, childbirth and the puerperium (O10-O99)  
Certain conditions originating in the perinatal period (P00-P96)  
Congenital malformations, deformations and chromosomal abnormalities (Q00-Q99)  
Symptoms, signs and abnormal clinical and laboratory findings, not elsewhere classified (R00-R99)  
All other diseases (Residual)  
Accidents (unintentional injuries) (V01-X59,Y85-Y86)  
    Transport accidents (V01-V99,Y85)  
        Motor vehicle accidents (V02-V04,V09.0,V09.2,V12-V14,V19.0-V19.2,V19.4-V19.6,V20-V79,V80.3-V80.5,V81.0-V81.1,V82.0-V82.1,V83-V86,V87.0-V87.8,V88.0-V88.8,V89.0,V89.2)  
        Other land transport accidents (V01,V05-V06,V09.1,V09.3-V09.9,V10-V11,V15-V18,V19.3,V19.8-V19.9,V80.0-V80.2,V80.6-V80.9,V81.2-V81.9,V82.2-V82.9,V87.9,V88.9,V89.1,V89.3,V89.9)  
        Water, air and space, and other and unspecified transport accidents and their sequelae (V90-V99,Y85)  
    Nontransport accidents (W00-X59,Y86)  
        Falls (W00-W19)  
        Accidental discharge of firearms (W32-W34)  
        Accidental drowning and submersion (W65-W74)  
        Accidental exposure to smoke, fire and flames (X00-X09)  
        Accidental poisoning and exposure to noxious substances (X40-X49)  
        Other and unspecified nontransport accidents and their sequelae (W20-W31,W35-W64,W75-W99,X10-X39,X50-X59,Y86)  
Intentional self-harm (suicide) (U03,X60-X84,Y87.0)  
    Intentional self-harm (suicide) by discharge of firearms (X72-X74)

**List of 113 selected causes, Injury by firearms, Drug-induced deaths, Alcohol-induced deaths, Injury at work and Enterocolitis due to *Clostridium difficile*, and COVID-19**

---

Cause of death (Based on the *International Classification of Diseases, Tenth Revision, Second Edition, 2004*)

---

Intentional self-harm (suicide) by other and unspecified means and their sequelae  
(U03,X60-X71,X75-X84,Y87.0)

Assault (homicide) (U01-U02,X85-Y09,Y87.1)

Assault (homicide) by discharge of firearms (U01.4,X93-X95)

Assault (homicide) by other and unspecified means and their sequelae  
(U01.0-U01.3,U01.5-U01.9,U02,X85-X92,X96-Y09,Y87.1)

Legal intervention (Y35,Y89.0)

Events of undetermined intent (Y10-Y34,Y87.2,Y89.9)

Discharge of firearms, undetermined intent (Y22-Y24)

Other and unspecified events of undetermined intent and their sequelae (Y10-Y21,Y25-Y34,Y87.2,Y89.9)

Operations of war and their sequelae (Y36,Y89.1)

Complications of medical and surgical care (Y40-Y84,Y88)

Injury by firearms (U01.4,W32-W34,X72-X74,X93-X95,Y22-Y24,Y35.0)
