August 24, 2021

Proposed questions for public comment

1. Should Pathways applicants focus on specific chronic disease(s) or be permitted to focus on broader health disparities that exist, as defined in the Maryland Health Equity Resource Act?
2. What sources of data do programs/applicants currently access? What data metrics currently reported by programs are most relevant for the future Pathways grantees?
3. What forms of Technical Assistance should the CHRC provide to potential applicants and grantees?
4. Should Pathways applicants develop strategies to address non-medical Social Determinants of Health (SDOH)? If so, are there specific SDOH to highlight in the Call for Proposals?
5. How should applicants be required to demonstrate the genuine engagement of the community in the shared decision-making processes of the grant?
6. What should be the review/selection criteria for the Pathways Call for Proposals?
