Maryland Department of Health - Tap Water Consumption Survey

Survey Methodology*

A total of 1,004 residents were surveyed using an online survey panel. A survey of this size yields a margin of error of +/-3%, with a confidence level of 95%. Surveys were offered in English (99%) and Spanish (1%) languages. Security measures precluded individuals from completing the survey more than once.

The sample was recruited and balanced to match the demographic characteristics of Maryland residents.

Probolsky Research is a woman and Latina-owned market and opinion research firm with corporate, election, government, non-profit, and special interest clients.

**Due to rounding, totals shown on charts may not add up to 100%*

Literature Review

Recent pushes towards reduction in child and adult obesity rates have led to an increase in consumption of plain water over alternatives such as sugar-sweetened beverages (SSBs). Plain water includes tap water, water from fountains and water coolers, and bottled water (An & McCaffrey, 2016). However, while plain water consumption, in general, has been increasing, the growth in tap water consumption has not been equivalent. From 2011-2016, results from the National Health Nutrition and Examination Survey (NHNES) indicate a 20.65% increase in bottled water consumption, but only an 8.86% growth in tap water consumption over the same period (Vieux, 2020). Data suggests that adults who avoid tap water drink less plain water in general, but significantly more bottled water and SSBs (Rosinger, 2022). While Americans are turning to water as a healthier alternative, consumption of other beverages such as coffee (57%), soft drinks (56%), juices (50%), and energy drinks (27%) are still prevalent (Buchholz, 2023).

Plain water consumption varies depending on the nature of the sample; the average water consumption is about 44 ounces of plain water per day (CDC, 2022), and about two-thirds of consumption occurs at home (Sebastian et al., 2011). There are, however, strong demographic influences on water consumption. Black and Hispanic adults typically consume less plain water than non-Hispanic White adults (Vieux et al., 2020). Plain water consumption is also lower in older adults, lower income, and lower education individuals (CDC, 2022).

Plain water consumption varies between tap water and bottled water. The American Water Works Association (2023) reported that 32% of adults never drink water from their faucet as opposed to only 7% who never drink bottled water. Daily tap water consumption is approximately 40% among adults and 47% for daily bottled water consumption. Tap water consumption over bottled water is typically higher among NH White adults, higher income, and higher educated individuals (Brooks et al., 2017; Vieux et al., 2020).

The difference in tap versus bottled water consumption seems to be driven largely by trust rather than economic factors. Those who perceive bottled water as safer are less likely to consume tap water (Colburn & Kavouras, 2021). Public trust in tap water safety continually gets challenged by studies and water crises across the nation. Tap water avoidance was declining before the catastrophic Flint Water Crisis, but started to increase again, particularly for children, in the years to follow. Compared to before the Flint crisis, avoidance of tap water among adults increased by 40% and 63% among children (Rosinger, 2021). The Environmental Working Group Tap Water Database, a resource for individuals to search for their water quality, conducted a survey among visitors to the site and found that 40% of visitors won't or can't drink water from the tap (Stoiber, 2022). Further, those who do not trust the safety of their tap water in one study were more than 4.8 times more likely to use bottled water as their primary source of plain water (Hu, Morton, & Mahler, 2011).

It is not surprising that there is concern over tap water safety given the crises and regular releases to the public about water quality studies nationally and locally. For example, a recent publicly released study by the United States Geological Survey (2023) indicated that nearly half of the tap water in the country may contain at least one type of monitored PFA (per and poly-fluoroalkyl substances). PFAs are long-lasting chemicals in the environment that are associated with harmful health effects in humans and animals (Environmental Protection Agency, 2023). One study found that public awareness of violations of the Safe Water Health Act is associated with a 14% increase on average in bottled water sales, and these sales remain elevated after the violation occurred (Allaire et al., 2019). It, therefore, appears to be a challenge to maintain public trust both during and following a water crisis, even a minor water boiling advisory for a local municipality.

There is, however, variation among groups in trust in tap water. A sponsored study by the American Water Works Association (2023), found that 71% of adults with a public water supply rated their water as safe. Safety evaluations vary by sample and demographic characteristics. Non-Hispanic White adults tend to feel safer drinking tap water than Hispanic and Black adults (AWWA, 2023; Javidi & Pierce, 2018). These findings are consistent across multiple studies and may reflect a general distrust of public health and government or negative experiences with water sources in the past among these populations (Colburn &

Kavouras, 2021; Patel et al., 2020). There is some evidence that men are more trusting of tap water as well, though not as consistent and pervasive as racial and ethnic differences (AWWA, 2023).

Much like plain water consumption in general, evaluations of the safety of tap water have a positive relationship with income (AWWA, 2023) and education, but foreign-born individuals' distrust of tap water is higher (Patel et al., 2020).

Some of the variations in tap water trust may be explained by geographic location. As water quality, taste, smell, and appearance can vary significantly by municipality it is not surprising that tap water safety has significant variations. One nationwide study found that adults in southern regions reported lower perceptions of tap water safety than those in the northeast (AWWA, 2023). Probolsky Research through multiple studies on tap water evaluations has found that qualities such as taste, smell, color, or residue can significantly impact perceptions of safety and willingness to drink tap water. Taste specifically has been found to be correlated with perceptions of tap water safety (Colburn & Kavouras, 2021). However, the prevalence and popularity of water filtration, which has steadily climbed to 77% (73% in 2020) may be a way to combat this (Carollo, 2022). The water purifier market size was \$5.39 billion and is projected to reach \$9.10 billion by 2029 (Fortune Business Insights, 2022).

Interestingly, there may be a relationship between perceptions of tap water safety and communication with water utilities as an AWWA (2023) found that those who had received communication from their water utility were more than three times as likely to evaluate the safety of their water as better over a five-year period. There appears to be a relationship between utilities communicating about water testing and safety and the public's overall perception. An informed public may be more trusting when they understand the rigorous testing that public water sources are subject to. Probolsky Research found in one study that 36% of respondents were less likely to drink bottled water in the future knowing that it is often rebottled tap water and 48% were less likely to buy bottled water knowing it is less regulated than tap water. When informed about rigorous testing that public water sources undergo for tap water, 58% were more confident in the water quality. Households who receive more communication from their water companies about their water quality are more likely to be satisfied with their home's water quality (US Department of Housing and Urban Development, 2022). In general, the public seems to be unaware of the safety procedures and processes of public water systems. One study found that nearly 50% of adults were not able to identify what entity (Environmental Protection Agency) was responsible for protecting and regulating tap water (Stoiber, 2022).

Resistance to tap water may also stem in part from the convenience factor of bottled water because it is readily portable and available for purchase in many locations. For Latinx populations, there is a strong preference for bottled water convenience, regardless of the economic burden (Colburn & Kavouras, 2021). The significant cost of bottled water does not seem to be a significant deterrent to consumption as there is an inverse relationship between tap water consumption and income. Reusable water bottles are growing in popularity as US consumers are becoming more environmentally focused in their everyday behaviors. Data shows that approximately 60% of US adults own a reusable water bottle and the industry of reusable water bottles is expected to grow to a 12.61-billion-dollar industry by 2030 (Ruiz, 2023). We must interpret this with caution as bottled water consumption has massively grown over time (Ridder, 2023). The presence of a reusable water bottle does not necessarily equate to tap water consumption as consumers may be refilling their bottles from purchased water from larger gallon(s) containers. The environmental factors associated with bottled water may be an opportunity to increase tap water consumption.

When it comes to concerns about fluoridation, specifically in public water systems, there is a long history of controversy and debate (Schwarcz, 2017). Organizations like the Fluoride Action Network (Connett, 2012) exist for the purpose of discounting the necessity and safety of water fluoridation. Concerns about risk of cancer (Jones, 2022), lower intelligence (Weeks, 2019), and government conspiracies to dispose of toxic materials (Schwarcz, 2017) have been longstanding and pervasive throughout the history of public water fluoridation in the United States. Perceived harms of water fluoridation include general concerns about chemicals in the body, dangerous effects on the body, side effects, dental fluorosis, behavioral and cognitive disorder development such as ADHD or autism, skeletal fluorosis and arthritis, cancer, and damage to the neurological, immune, digestive, circulatory, or respiratory system (Podgorny & McLaren, 2015). While these negative opinions may not be pervasive, data suggests that 32% of the population is

unsure if community water fluoridation is safe (Mork & Griffin, 2015). Interestingly, however, many of the studies pertaining to fluoride perceptions among the public have been conducted on samples outside of the United States such as Canada, Australia, and South Korea. When searching for water fluoridation, users will find a plethora of conflicting and mixed findings on its safety making it a confusing public health concern to navigate for the average American as nearly 9 out of 10 adults struggle with health literacy (National Library of Medicine, 2023).

The concerns about chemicals in the water may stem beyond fluoride, but instead, there are larger concerns about lead, chlorine and chloramines, bacteria and viruses, and pesticides/herbicides (Carollo, 2022).

In consideration of gaining buy-in from the public on community water fluoridation, studies have been limited. One study demonstrated that messaging that focused on oral health benefits such as prevention of cavities and oral health cost savings was effective in supporting fluoridation, but personal beliefs and family/physician recommendations were also predictive of support (Kemp et al., 2021). Some evidence suggests that when provided evidence that fluoridated water is safe to drink, many will do so, provided that the taste, appearance, and smell are satisfactory (Scherzer et al., 2013). There is overall more evidence and research needed to assess how Americans today view fluoridated water and how that is affecting their tap water consumption.

From this literature review, we draw the following general conclusions that will inform our survey development:

- Consumption of tap water and bottled water consumption varies by race/ethnicity, income, and education, but more is needed to understand these differences in the state of Maryland specifically and what may be driving those differences.
- Tap water consumption appears to be largely driven by perceptions of safety and further testing on perceptions of water safety and what messages can overcome those concerns is needed.
- Perceptions of water fluoridation have been understudied in the United States and further research is needed to understand how pervasive distrust is and what messaging can overcome this distrust.
- Environmental and cost factors may be a way to reach audiences, particularly younger audiences who have less disposable income and are more environmentally conscious.
- The barrier to persuading the public that tap water is safe may not be in fluoride but in other substances such as lead, chlorine, and bacteria.

Study Insights

Tap Water Consumption

The results of the survey largely support what was indicated in our literature review. Overall, water represents a significant portion of overall beverage consumption for most Maryland residents. This is reflective of a general societal trend towards reduced consumption of sugar-sweetened beverages. This presents an advantage to the Maryland Department of Health – Office of Oral Health (OOH) as most residents do not need to be convinced to switch from other beverages to water. Instead, the focus of future campaigns can center on tap water consumption specifically.

Tap water consumption among residents presents a challenge to overcome but does not present among our sample to be a massive public health crisis. Just over half of residents report drinking tap water from their home at least daily and 80% report using their tap water to regularly make other beverages such as coffee or juice. Relatively equal to the amount of daily tap water consumption is daily bottled water consumption. It may be the case that residents are using both bottled and tap water, though there is certainly evidence that some are exclusively bottled water drinkers. Bottled water consumption may be high among tap water drinkers for its convenience and accessibility outside of the home.

Concern over the safety of tap water remains the most significant barrier for OOH to address to increase tap water consumption. Among those who drank tap water less than weekly, lack of trust was the top reason (54%). Among those who prefer bottled water, 71% cited that it was because of a personal perception that bottled water is safer than tap water. While it is generally true that tap water has more restrictions and accountability on regulations and safety testing than bottled water, only 20% of residents correctly identified this. A majority (53%) also believed that bottled water is safer than their home's tap water.

In general, a majority of residents are satisfied with the quality of their tap water. This satisfaction is higher among residents who are older, male, Asian/Pacific Islander, and White. We also see that as household income increases so does satisfaction with water quality. We see a similar trend as education increases. Most residents do not believe their tap water is unsafe to drink, with 25% agreeing that their water is unsafe. As with most questions across the survey, this trend was more pronounced among younger, Black/Hispanic, lower-income, and less educated residents. There is, however, a level of concern about tap water safety as well as uncertainty surrounding what tap water may contain and if it is truly safe for consumption.

In an open-ended question asking what would make respondents more confident and likely to drink tap water most of the responses tie into safety. Residents want to see testing and safety reports for their water, they want assurances from health organizations, safety guarantees, increased transparency, and regulations. Most of these responses can be boiled down to informing and persuading residents that tap water is indeed safe for consumption.

Demographic Trends

There were several groups where tap water consumption was lower and concerns surrounding tap water were stronger. These groups align with the findings of the literature review.

In general, tap water consumption, mistrust in tap water, and trust in community water fluoridation are lower among Black, Hispanic/Latino, and Multiracial residents. We see these same trends occurring in lower-income households, less educated residents, and residents who are younger. To some extent, we also see this with individuals who are foreign-born as well. This may be due to beliefs about water stemming from their native country.

Community Water Fluoridation

Community water fluoridation is the central focus of OOH's initiative to increase tap water consumption. Many residents (73%) were aware of community water fluoridation; this awareness was higher among residents who were older, White, of higher household income, and homeowners. There is larger support or uncertainty about community water fluoridation than dissent. Only 19% of residents disagreed that fluoridated tap water is safe to drink and only 20% agreed that they would not drink fluoridated tap water. Fluoride was infrequently mentioned in open-ended responses as a major concern of contaminant. There is, however, a little more concern about whether water fluoridation is unhealthy as 34% agreed that they were afraid that it might be unhealthy (32% neither agreed nor disagreed). There seems to be some distinction made for some residents between *safety* and *health* when it comes to community water fluoridation. It will be important to not just communicate about the safety of water fluoridation but also that

there are no adverse health effects as the public has been faced with conflicting information about fluoride and its effects.

What remains an additional opportunity for education about water fluoridation is the oral health benefits. When asked if they agreed that drinking fluoridated water prevents cavities, only 43% agreed with another 36% who neither agreed nor disagreed. Interestingly, cavity prevention benefits did not vary by dental insurance coverage or frequency of dental cleanings. This suggests that dental professionals or dental insurance companies may not be discussing the oral health benefits of water fluoridation with patients. Further, most fluoride education messaging is focused on children as they benefit the most from fluoride exposure. However, residents with children in the home were less likely to agree with these statements. Fluoride treatments are typically recommended only for children; dental insurance companies often only cover fluoride treatments for children and cutoff coverage sometime between the ages of 12-18. This may suggest to residents that fluoride does not have oral health benefits for adults, and this is an important piece of messaging for encouraging regular tap water consumption.

Message Testing

Several messages were tested to determine their influence on residents' likelihood of drinking tap water over bottled water. Among the full sample, the top three performing messages were:

Message 1: "Maryland water systems meet all federal and state standards for water quality. This includes the testing for harmful contaminants including lead, copper, fecal coliform bacteria, e. coli bacteria, and many others."

Message 2: "Some studies have found that bottled water can cost an average household about 2,000 times more than tap water."

Message 3: "Drinking fluoridated tap water is recommended by nearly all public health, medical, and dental health organizations because it keeps teeth strong and reduces cavities by about 25% in both children and adults with no adverse health effects."

The most effective message (57%) overall was Message 1, informing residents that Maryland water meets water quality standards and tests for harmful contaminants. This message was the strongest of the messages tested for the groups where an increase in tap water consumption has the greatest need as well including residents who are younger, Black, Latino, less educated, and have lower household income. Given the high concerns about the safety of tap water, particularly among these groups, it is unsurprising that assurances of testing and safety standards were of high resonance.

The second most effective message, Message 2 (54%), pertained to the cost differential between bottled and tap water. Our literature review revealed that among low-income households bottled water consumption is higher despite the increased cost. The mistrust in tap water felt by these residents is more powerful than the cost savings associated with drinking tap water over bottled water. This message did have a strong resonance with low-income households, however, perhaps because pointing out the significant cost difference was enough to put into more concrete terms how much bottled water increased their costs. This message did resonate with Black, Latino, and young individuals as well, though not as strongly as some of the other messages. For example, for young (18-29) or Black residents, message 3 pertaining to health benefits was more powerful (by a small margin).

The third most effective message, Message 3 (51%) resonated across most audiences. The assurances of both safety because of recommendations by health organizations coupled with the oral health benefits resonated strongly across the different groups, including those who are more hesitant about drinking tap water. This aligns with other questions in the survey that assurances by health organizations are important to residents.

Opportunities

The top priority for OOH to increase tap water consumption among residents is to primarily educate and convince residents that tap water is safe to drink. This will come with increased transparency and communication from health organizations, such as the Maryland Department of Health, and frequent information about testing and safety from water providers. Residents need the assurance of safety on a consistent and regular basis. Given the low readership of Annual Water Quality reports, this is not enough to persuade residents that their tap water is safe.

Home water filters are an opportunity for OOH to address many concerns of residents with their tap water quality. Currently, about half of residents use some kind of filter for their tap water, most commonly through a pitcher or as part of their refrigerator. In an open-ended question about what would make residents more confident in and likely to drink their tap water, 8% said that having a filter would increase their likelihood. While a small percentage, for most residents, safety is the driving force behind skepticism of tap water consumption. Filters are an opportunity to increase tap water consumption because 69% agreed that using a filter for their tap water would make it safer (an additional 23% neither agreed nor disagreed). This is a large proportion of the population that may be convinced with messaging educating on the efficacy of filters in improving the safety and cleanliness of tap water. Additionally, taste is a significant reason why some residents will not drink their tap water. Among open-ended responses, 9% indicated that an improvement in their tap water taste would increase their likelihood of drinking it. Additionally, among those who were unsatisfied with their home's water quality, 67% indicated that taste was one of the reasons. Filters are an opportunity to address this concern as 58% agreed that using a filter for their tap water would make it taste better, with an additional 31% who neither agreed nor disagreed. As a low-cost option, particularly when compared to the cost of exclusive bottled water consumption, promoting the safety and taste benefits of water filters for households is a potential avenue for tap water consumption increases.

Given the lack of knowledge of the oral health benefits of community water fluoridation, even among those who regularly visit the dentist, OOH messaging should focus on getting this message out. This may include campaigns directly from OOH, but also by engaging oral health professionals such as dentists and dental hygienists to encourage discussion with patients about the benefits of fluoridated tap water.

The data suggest that this three-pronged strategy may be effective in increasing tap water consumption among Maryland residents. Future communications strategies should accomplish the following goals:

- Educating and assuring the public of tap water safety through frequent communication and health expert endorsements
- Informing residents of the benefits of tap water consumption through education campaigns and engagement with oral health professionals
- Providing solutions for concerns beyond assurances such as the use of filters for ensuring safety and improved water quality/taste

Questions Raised from the Research

- Is mistrust in tap water and concerns over safety stronger in Maryland because of the proximity and salience of recent public water safety events? How would these results compare nationwide or to a state such as Michigan where water safety is top-of-mind?
- What information would be persuasive for overcoming fluoride skepticism, particularly for those who are not strongly for or against community water fluoridation? What is the distinction between fluoride safety and fluoride healthiness and what messages would be effective in combating misinformation for both?
- Are dentists/hygienists sharing information about the benefits of fluoride with patients? What are dental professionals' opinions of tap water, its safety, and community water fluoridation? Do they

have any reservations about discussing fluoride benefits with patients given the controversy for some individuals?

- Will water quality reports from agencies help or hurt trust? Do residents, in general, have the knowledge to appropriately evaluate these reports for safety? Overcoming low-education residents' skepticism of tap water safety is a key challenge that the data suggests, but will providing them with this information only confuse or push them further towards distrust because of an inability to understand the complex relationship between chemicals and water and safety?

Project: Maryland Department of Health – Tap Water Consumption Survey
Field Dates: October 11 - 17, 2023
Universe: Maryland residents
Language: English and Spanish
N = 1,004
Margin of Error = +/-3.2%

Introduction:

You are invited to participate in a research study to investigate Maryland residents' attitudes and behaviors about drinking water. You were invited to participate as a resident, and we will be surveying approximately 1,000 individuals. This study is being conducted by the Maryland Department of Health and Probolsky Research, an independent research firm. Our purpose in conducting this research is to provide insight to the Office of Oral Health, academic researchers, and industry professionals.

Study Procedures:

If you participate in this study, you will be asked to complete an online questionnaire. This questionnaire will ask some initial questions to determine your eligibility to participate in the study. Once your eligibility is determined, you will be asked to complete additional questions regarding your attitudes and behaviors toward drinking water.

This survey should take approximately 25 minutes of your time. Compensation for your participation will be provided directly by the survey panel provider that you are using to participate in this survey. Your participation will be anonymous, and you will not be contacted again in the future.

You do not have to be in this study if you don't want to. If you agree to be in the study, but later change your mind, you can exit the survey at any time. There are no penalties or consequences if you do not want to participate.

Risks:

We believe there are no known risks associated with this research study. There is no cost to participate in this study.

Benefits:

You may not directly benefit from this research. However, we hope that your participation in the study will provide valuable insight to public health professionals and industry leaders.

Protection of Personal Information:

The following procedures will be used to protect the confidentiality of your data. The researchers will keep all study records (including study data) in cloud servers that are password protected and encrypted. Any computer hosting files or study data will be password protected to prevent access by unauthorized users. Research records will be identified only by anonymous ID numbers. No member of the research team will have access to information that could identify you as a respondent. At the conclusion of this study, researchers may publish their findings or share them with other agencies. Information will be presented in summary format and you will not be identified in any publications or presentations.

Contact Information:

We are happy to answer any questions you have about this study. If you have further questions about this project, or if you have a research-related problem, you may contact Probolsky Research at info@probolskyresearch.com or by phone at (202) 559-0270. If you have any questions about your rights as a research participant, you may contact Gay Hutchen at the Maryland Department of Health Institutional Review Board (IRB) by phone at 410-767-8448 or email at gay.hutchen@maryland.gov.

If you wish to participate in this study based on the above terms, please continue to the survey by advancing the page.

1. Which category best describes your age?

18-29	22.0%
30-39	20.9%
40-49	18.1%
50-64	18.6%
65+	20.3%

2. Which category best describes your gender?

Male	46.9%
Female	53.0%

3. How would you describe yourself?

Asian or Pacific Islander	5.5%
Black or African-American	32.9%
Latino/Hispanic & Multiracial/Other	9.2%
White/Caucasian	52.5%

4. Which of the following represents your total household income?

Less than \$50,000	29.7%
\$50,000-\$100,000	31.0%
\$100,000+	36.4%
Prefer not to answer	3.0%

5. How is water supplied to your home?

Public or private agency	86.2%
Well	13.8%

We would like to now ask you some questions about water. For the purposes of this survey, the term “water” will be used to refer to water in general; this includes all kinds of water you may drink such as tap water, bottled water, water from a fountain, water cooler, etc. The term “tap water” refers to water that comes out of the faucets in your home or the water dispenser in your refrigerator. The term “bottled water” refers to water that is purchased from a store or other business establishment that does not come directly through water lines in your home.

6. Approximately what percentage of your beverage consumption is water?

Less than 25%	8.9%
25%-50%	30.5%
More than 50%	60.4%
I do not drink water	0.3%

7. Approximately what percentage of your water consumption comes from **tap water**?

Less than 25%	44.5%
25%-50%	19.1%
More than 50%	33.0%
I do not drink water	3.4%

8. How often do you drink tap water from your home (i.e., water that comes from the faucet)?

Multiple times per day	31.8%
Daily	20.7%
Multiple times per week	9.0%
Weekly	4.4%
Monthly	2.1%
Less often than monthly	13.1%
Never	18.9%

9. How often do you drink bottled water? This includes water from single-use bottles or larger purchased containers of bottled water.

Multiple times per day	33.2%
Daily	20.6%
Multiple times per week	12.7%
Weekly	10.5%
Monthly	7.5%
Less often than monthly	11.7%
Never	3.9%

[ASK IF Q8 = "MONTHLY, LESS OFTEN THAN MONTHLY OR NEVER"]

10. Why do you not drink tap water in your home more frequently? Select all that apply.

I don't trust the tap water in my home	53.9%
I prefer bottled water	52.8%
I don't like the taste	45.2%
I just don't like to drink water	4.4%
Other	7.6%
None of the above	1.7%

[ASK IF Q10 = "I PREFER BOTTLED WATER"]

11. Why do you prefer bottled water to tap water? Select all that apply.

I think bottled water is safer than tap water	70.7%
I am concerned about chemicals in tap water	53.6%
Bottled water is more convenient than tap water	36.5%
Other	7.2%

None of the above	1.1%
--------------------------	-------------

[ASK IF Q8 = "MULTIPLE TIMES PER DAY, DAILY, MULTIPLE TIMES PER WEEK, OR WEEKLY"]

12. What reasons describe why you drink tap water from your home. Select all that apply.

It is more convenient or accessible than bottled water	61.2%
Tap water is cheaper	57.0%
To reduce my use of single-use plastic bottles	47.9%
I think my tap water tastes better (or just as good) as bottled water	25.0%
I trust my tap water more than bottled water	12.7%
Other	6.8%
None of the above	3.9%

13. Do you use tap water in your home to regularly make other beverages such as coffee, tea, or juice?

Yes	79.6%
No	20.4%

14. In general, are you satisfied or dissatisfied with the quality of tap water in your home?

DISSATISFIED [NET]	16.5%
<i>Very dissatisfied</i>	6.6%
<i>Somewhat dissatisfied</i>	9.9%
Neither satisfied nor dissatisfied	19.6%
SATISFIED [NET]	64.0%
<i>Somewhat satisfied</i>	33.2%
<i>Very satisfied</i>	30.8%

[ASK IF Q14 = "DISSATISFIED"]

15. What aspects of your home's tap water quality are you dissatisfied with? Select all that apply.

Taste	67.3%
Concerns of toxins, contamination, or chemicals	64.8%
Smell	37.6%
Rust/Residue	33.3%
Color	17.0%
Cost	6.1%
Other	4.2%
None of the above	0.0%

16. Do you currently use any kind of filtration system for your tap water such as a water pitcher, home filtration system, or faucet filter attachment?

Use filter	50.9%
Do not use filter	49.1%

[ASK IF Q16 = "YES"]

17. What kind of filtration system do you use in your home? Select all that apply.

Water pitcher with filter that you refill such as a Brita	48.3%
Filtration system that is part of your refrigerator/freezer	38.6%
Device that you attach to your faucet or under your sink directly	23.9%
Reusable water bottle that filters your water	5.7%
Other	7.0%
Unsure	1.6%

[ASK IF Q19 = "DEVICE THAT YOU ATTACH TO YOUR FAUCET OR UNDER YOUR SINK DIRECTLY"]

18. What specific type of filtration system do you have?

Reverse osmosis	32.0%
UV	18.9%
Gravity	8.2%
Unsure	41.0%

For the following statements, please indicate the extent to which you agree or disagree.

19. I am concerned with the safety of my home's tap water.

DISAGREE [NET]	40.1%
<i>Strongly disagree</i>	20.9%
<i>Somewhat disagree</i>	19.2%
Neither agree nor disagree	23.0%
AGREE [NET]	36.8%
<i>Somewhat agree</i>	24.1%
<i>Strongly agree</i>	12.7%

20. I think my home's tap water is unsafe to drink.

DISAGREE [NET]	56.1%
<i>Strongly disagree</i>	35.1%
<i>Somewhat disagree</i>	21.0%
Neither agree nor disagree	19.1%
AGREE [NET]	24.8%
<i>Somewhat agree</i>	16.5%
<i>Strongly agree</i>	8.3%

21. I think bottled water is safer than my home's tap water.

DISAGREE [NET]	19.7%
<i>Strongly disagree</i>	8.1%

<i>Somewhat disagree</i>	11.6%
Neither agree nor disagree	27.6%
AGREE [NET]	52.8%
<i>Somewhat agree</i>	26.0%
<i>Strongly agree</i>	26.8%

22. I like the taste of tap water in my home.

DISAGREE [NET]	33.6%
<i>Strongly disagree</i>	18.3%
<i>Somewhat disagree</i>	15.3%
Neither agree nor disagree	24.4%
AGREE [NET]	41.9%
<i>Somewhat agree</i>	24.8%
<i>Strongly agree</i>	17.1%

23. The tap water in my home has an unpleasant odor, color, or residue.

DISAGREE [NET]	65.8%
<i>Strongly disagree</i>	44.9%
<i>Somewhat disagree</i>	20.9%
Neither agree nor disagree	13.9%
AGREE [NET]	20.2%
<i>Somewhat agree</i>	12.8%
<i>Strongly agree</i>	7.4%

24. I think that using a filter for my tap water makes it safer.

DISAGREE [NET]	8.4%
<i>Strongly disagree</i>	3.8%
<i>Somewhat disagree</i>	4.6%
Neither agree nor disagree	22.9%
AGREE [NET]	68.7%
<i>Somewhat agree</i>	37.6%
<i>Strongly agree</i>	31.1%

25. I think that using a filter for my tap water makes it taste better.

DISAGREE [NET]	10.7%
<i>Strongly disagree</i>	3.4%
<i>Somewhat disagree</i>	7.3%
Neither agree nor disagree	31.2%

AGREE [NET]	58.2%
<i>Somewhat agree</i>	29.7%
<i>Strongly agree</i>	28.5%

[ASK IF Q19 OR Q20 = "AGREE"]

26. Which of the following, if any, are you concerned may be in your home's tap water? Select all that apply.

Bacteria and viruses	64.6%
Chlorine and chloramines	53.5%
Lead	51.9%
Pesticides and herbicides	44.1%
Pharmaceuticals	23.1%
PFOs/PFAs	17.2%
VOCs	12.5%
Other	6.8%
None of the above	8.3%

27. True or false: Bottled water has more safety regulations than tap water.

True	34.6%
False	20.4%
Unsure	45.0%

28. Before taking this survey, were you aware that local water providers add fluoride to public tap water systems, also known as community water fluoridation?

Yes	72.5%
No	27.5%

For the following statements, please indicate the extent to which you agree or disagree.

29. I think that fluoridated tap water is safe to drink.

DISAGREE [NET]	19.2%
<i>Strongly disagree</i>	6.8%
<i>Somewhat disagree</i>	12.4%
Neither agree nor disagree	31.4%
AGREE [NET]	49.5%
<i>Somewhat agree</i>	29.9%
<i>Strongly agree</i>	19.6%

30. I think that drinking fluoridated tap water prevents cavities.

DISAGREE [NET]	21.1%
<i>Strongly disagree</i>	9.1%

<i>Somewhat disagree</i>	12.0%
Neither agree nor disagree	36.0%
AGREE [NET]	43.0%
<i>Somewhat agree</i>	29.4%
<i>Strongly agree</i>	13.6%

31. I'm afraid that putting fluoride in the water supply might be unhealthy.

DISAGREE [NET]	34.5%
<i>Strongly disagree</i>	15.9%
<i>Somewhat disagree</i>	18.6%
Neither agree nor disagree	31.6%
AGREE [NET]	33.9%
<i>Somewhat agree</i>	23.8%
<i>Strongly agree</i>	10.1%

32. I would not drink tap water that has been fluoridated.

DISAGREE [NET]	46.8%
<i>Strongly disagree</i>	24.1%
<i>Somewhat disagree</i>	22.7%
Neither agree nor disagree	33.2%
AGREE [NET]	20.1%
<i>Somewhat agree</i>	11.4%
<i>Strongly agree</i>	8.7%

[ASK IF Q5 = "WATER PROVIDED BY A GOVERNMENT OR PRIVATE AGENCY"]

33. Have you received any communication about water quality, safety, or testing measures from your water provider in the last year?

Yes	22.9%
No	77.1%

[ASK IF Q5 = "WATER PROVIDED BY A GOVERNMENT OR PRIVATE AGENCY"]

34. Have you read the Annual Water Quality Report from your water system?

Yes	14.1%
No	76.3%
Unsure	9.6%

[ASK IF Q34 = "YES"]

35. After reading the Annual Water Quality Report from your water system, which of the following did you experience? Select all that apply.

I understood what the report was saying	45.9%
I felt more confident in the safety of my tap water	37.7%
I looked up more information about my tap water	33.6%
I researched parts of the report that I found concerning	24.6%
I felt less confident in the safety of my tap water	19.7%
I stopped or reduced my tap water consumption	15.6%
None of the above	3.3%

36. Bottled water requires approximately 2,000 times more energy to produce than tap water. In other words, the process of bottling and transporting water requires the use of more energy to produce plastic bottles, supply oil/gas for trucks, recruit and employ human labor, etc. Does knowing this information make you more likely or less likely to drink tap water instead of bottled water in the future?

MORE LIKELY [NET]	37.8%
<i>Much more likely</i>	18.4%
<i>Somewhat more likely</i>	19.4%
Makes no difference to me	44.8%
LESS LIKELY [NET]	17.4%
<i>Somewhat less likely</i>	10.6%
<i>Much less likely</i>	6.8%

37. Drinking fluoridated tap water is recommended by nearly all public health, medical, and dental health organizations because it keeps teeth strong and reduces cavities by about 25% in both children and adults with no adverse health effects. Does knowing this information make you more likely or less likely to drink tap water instead of bottled water in the future?

MORE LIKELY [NET]	51.1%
<i>Much more likely</i>	21.5%
<i>Somewhat more likely</i>	29.6%
Makes no difference to me	38.3%
LESS LIKELY [NET]	10.6%
<i>Somewhat less likely</i>	6.3%
<i>Much less likely</i>	4.3%

38. Bottled water is less regulated than tap water. In many cases, it is bottled in states with less regulation on chemicals and fewer, less strict requirements for testing. Does knowing this information make you more likely or less likely to drink tap water instead of bottled water in the future?

MORE LIKELY [NET]	45.3%
<i>Much more likely</i>	18.9%
<i>Somewhat more likely</i>	26.4%
Makes no difference to me	37.5%
LESS LIKELY [NET]	17.2%
<i>Somewhat less likely</i>	12.0%

<i>Much less likely</i>	5.2%
-------------------------	------

39. In a blind taste test, research found that most people could not tell the difference between the taste of bottled water and tap water. Does knowing this information make you more likely or less likely to drink tap water instead of bottled water in the future?

MORE LIKELY [NET]	37.3%
<i>Much more likely</i>	15.6%
<i>Somewhat more likely</i>	21.7%
Makes no difference to me	54.8%
LESS LIKELY [NET]	7.9%
<i>Somewhat less likely</i>	5.0%
<i>Much less likely</i>	2.9%

40. Some studies have found that bottled water can cost an average household about 2,000 times more than tap water. Does knowing this information make you more likely or less likely to drink tap water over bottled water in the future?

MORE LIKELY [NET]	53.7%
<i>Much more likely</i>	25.8%
<i>Somewhat more likely</i>	27.9%
Makes no difference to me	35.6%
LESS LIKELY [NET]	10.8%
<i>Somewhat less likely</i>	6.6%
<i>Much less likely</i>	4.2%

41. Maryland water systems meet all federal and state standards for water quality. This includes the testing for harmful contaminants including lead, copper, fecal coliform bacteria, e. coli bacteria, and many others. Does knowing this information make you more likely or less likely to drink tap water over bottled water in the future?

MORE LIKELY [NET]	56.9%
<i>Much more likely</i>	26.7%
<i>Somewhat more likely</i>	30.2%
Makes no difference to me	35.4%
LESS LIKELY [NET]	7.8%
<i>Somewhat less likely</i>	4.4%
<i>Much less likely</i>	3.4%

42. Who do you trust to provide you with information about the **safety** of drinking your household's tap water? Select all that apply.

State or local health agencies or officials (e.g., Maryland Department of Health, your local health department)	58.7%
Public health organizations (e.g., CDC, National Institutes of Health)	50.6%

Environmental Protection Agency	42.7%
State or local government officials (e.g., mayors, legislators)	29.5%
Medical organizations (e.g., American Dental Association, American Medical Association, American Academy of Pediatrics)	28.8%
My home's water supplier	27.0%
Your doctor	26.9%
News organizations (e.g., newspapers, television news broadcast, radio news)	18.8%
Public service announcements on TV and other media	18.0%
Your dentist	17.9%
Family and friends	12.5%
Social media	7.6%
Other	1.3%
None of the above	8.5%

43. Who do you trust to provide you with information about the **benefits** of drinking your household's tap water? Select all that apply.

State or local health agencies or officials (e.g., Maryland Department of Health, your local health department)	53.4%
Public health organizations (e.g., CDC, National Institutes of Health)	47.9%
Medical organizations (e.g., American Dental Association, American Medical Association, American Academy of Pediatrics)	36.1%
Environmental Protection Agency	33.0%
Your doctor	30.0%
State or local government officials (e.g., mayors, legislators)	27.1%
Your dentist	22.8%
My home's water supplier	20.8%
Public service announcements on TV and other media	17.4%
News organizations (e.g., newspapers, television news broadcast, radio news)	15.1%
Family and friends	10.1%
Social media	5.7%
Other	1.0%
None of the above	9.7%

44. How would you like to receive information about the safety and benefits of drinking your household's tap water? Select all that apply.

State health department website	48.7%
Print materials such as fact sheets mailed to my home	37.9%
Communication from my home's water supplier	35.9%
Public service announcements on TV	31.4%
State health department social media account	26.9%
News organizations	22.8%

Public service announcements on the radio	20.7%
Print materials provided by my medical provider or dentist	19.0%
Other	1.1%
None of the above	9.1%

45. What would make you more confident in and likely to drink tap water?
[OPEN-END RESPONSE]

Quality and safety reports/Independent testing	12.2%
Taste/Smell/Appearance	9.2%
Treatments or filtration systems/Home filters	8.2%
Assurances by medical professionals, medical/health organizations, government	5.1%
Safety guarantees/Confidence in safety	4.9%
Knew it was free from chemicals/Clean	3.5%
Home water testing/Self-testing for homes	2.0%
Increased transparency/Information about how water is cleaned, treated, or tested	1.9%
Increased testing	1.6%
Increased regulations/Information about regulations and compliance	1.6%
General information	1.3%
Infrastructure updates	1.2%
Information from survey was helpful	1.2%
Information about health benefits	0.9%
Cost	0.8%
Information about source of water/Conditions of source	0.7%
Remove fluoride	0.6%
Information about why it is better than bottled water	0.5%
Already confident in drinking tap water	20.3%
Other	5.8%
Nothing/Don't know	16.7%

46. Are there any children under the age of 18 living in your household?

Children in home	37.2%
No children in home	62.5%
Prefer not to answer	0.4%

[ASK IF Q46 = "YES"]

47. Do your children drink tap water from your home?

Yes	63.7%
No	36.3%

48. Do you own or rent your home?

Own	59.5%
Rent	35.2%
Other	5.4%

49. Which best describes your type of residence?

Single-family home	61.6%
Apartment building	17.8%
Condominium or Townhome	18.3%
Mobile home	0.9%
Other	1.4%

50. What is the highest level of education you have completed?

Less than a high school diploma	2.4%
High school degree or equivalent	38.1%
Associate's degree	12.6%
Bachelor's degree	26.8%
Master's degree	14.8%
Doctorate or Professional degree	5.2%

51. Were you and your parents born in a U.S. state or territory?

My parents and I were both born in U.S. state of territory	78.6%
I was born in a U.S. state or territory, but at least one parent was born outside of the U.S.	12.3%
Both myself and my parents were born outside of the U.S.	9.2%

52. Have you had dental insurance coverage for the past year?

Yes	78.4%
No	21.6%

53. How many times have you had an in-office dental cleaning in the past year?

No cleanings	34.4%
One cleaning	26.5%
Two cleanings	39.1%

Graphic Analysis/Presentation

METHODOLOGY

	Survey Details
Mode	Online
Language	English and Spanish
Length	10 minutes
Target Respondents	Maryland residents
Survey Fielding	October 11 – 17, 2023
Survey Participants	1,004

Sample

The sample was developed from online survey panels of Maryland residents.

Data Collection Explained

All participants completed the online survey and security measures precluded individuals from completing the survey more than once. Participants could choose to complete the survey in English (99%) or Spanish (1%).

*. *Due to rounding, totals shown on charts may not add up to 100%*

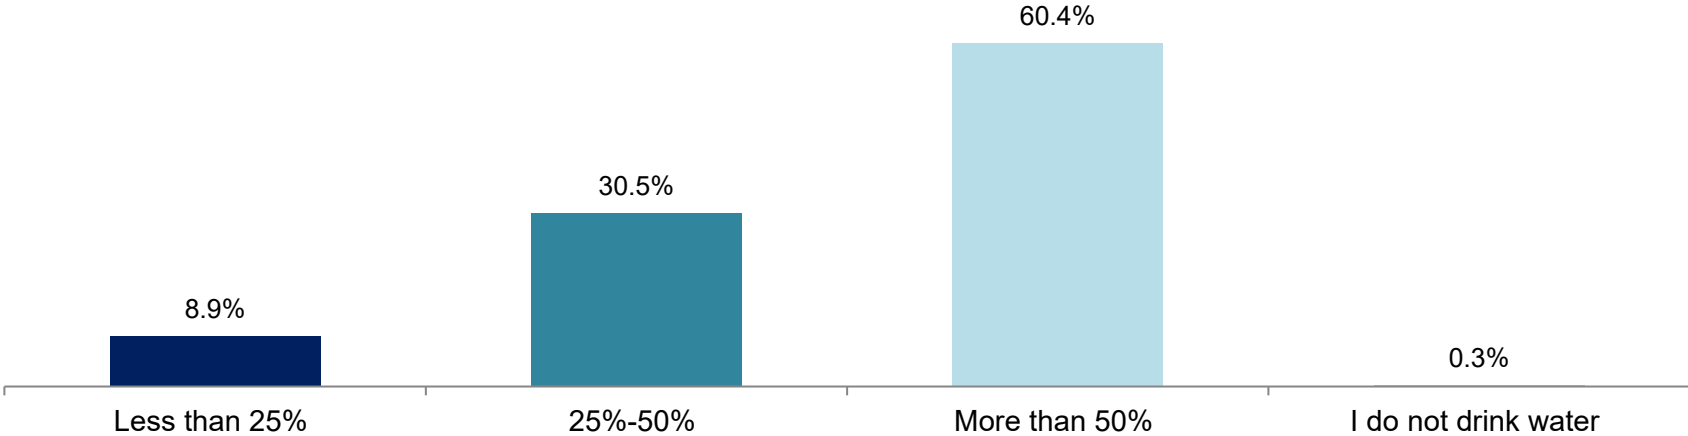

KEY FINDINGS

1. **Maryland residents are consuming water**, reflective of societal trends of reduced sugar-sweetened beverage consumption. **More than half report drinking tap water at least daily** and 80% report using it to make other beverages such as coffee or juice.
2. Among those not consistently drinking tap water, **an overall lack of trust in its safety was a consistent theme** along with perceptions of (or uncertainty of) bottled water as safer than tap water. **One in four residents believed that their home's tap water was unsafe to drink**. Among those concerned about tap water safety, bacteria/viruses (65%), chlorine/chloramines (54%), and lead (52%) were the top contaminant concerns.
3. A strong majority of residents **are aware of community water fluoridation (73%) and about half think that fluoridated water is safe to drink**, another one-third are unsure of its safety. Only 43% agreed that community water fluoridation provided oral health benefits.
4. The most effective messaging strategies overall were **Maryland's compliance with water quality regulations (57%), cost comparisons to bottled water (54%), and oral health benefits (51%)**, though there are differences by demographics on messaging effectiveness.
5. Residents **crave more information about their water's safety** and would most trust information from state, local, or public health agencies through website postings and mailed fact sheets.
6. Overall **distrust in tap water** and unwillingness to drink it is consistently **higher among residents who are Black, Latino/Hispanic, or multiracial, low-income, and less-educated**.

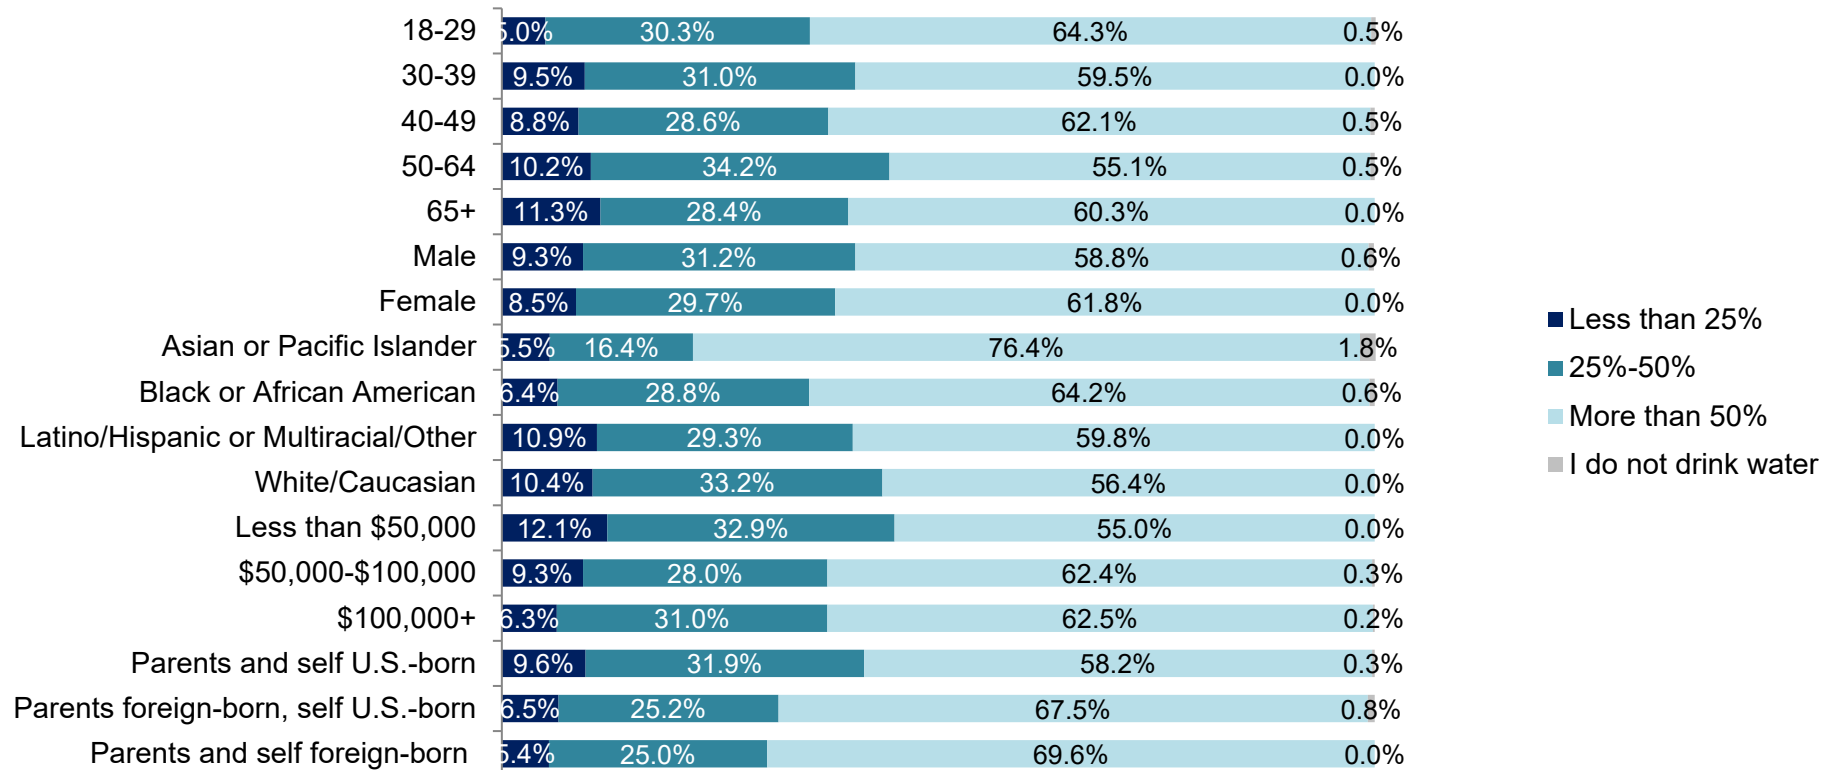

60% of residents said that water comprises more than 50% of their beverage consumption

Q9: Approximately what percentage of your beverage consumption is water?

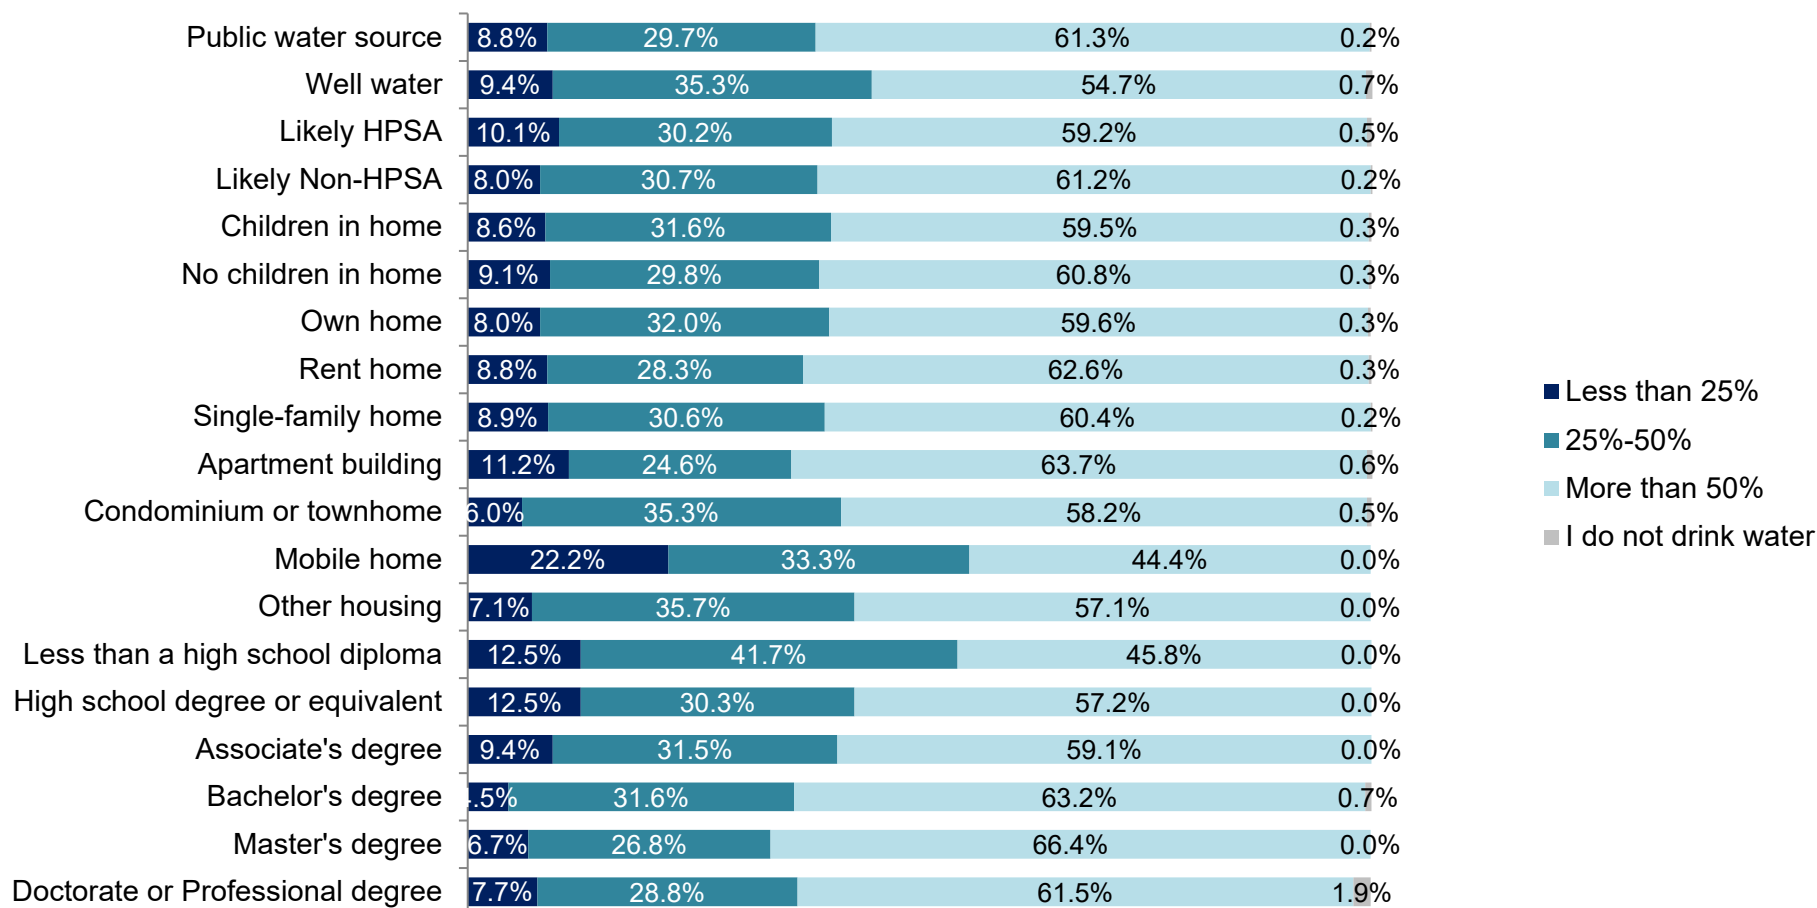

Water consumption is relatively equal across age, gender, race, and income with some slight increases among Asian and higher-income residents

Q9: Approximately what percentage of your beverage consumption is water?

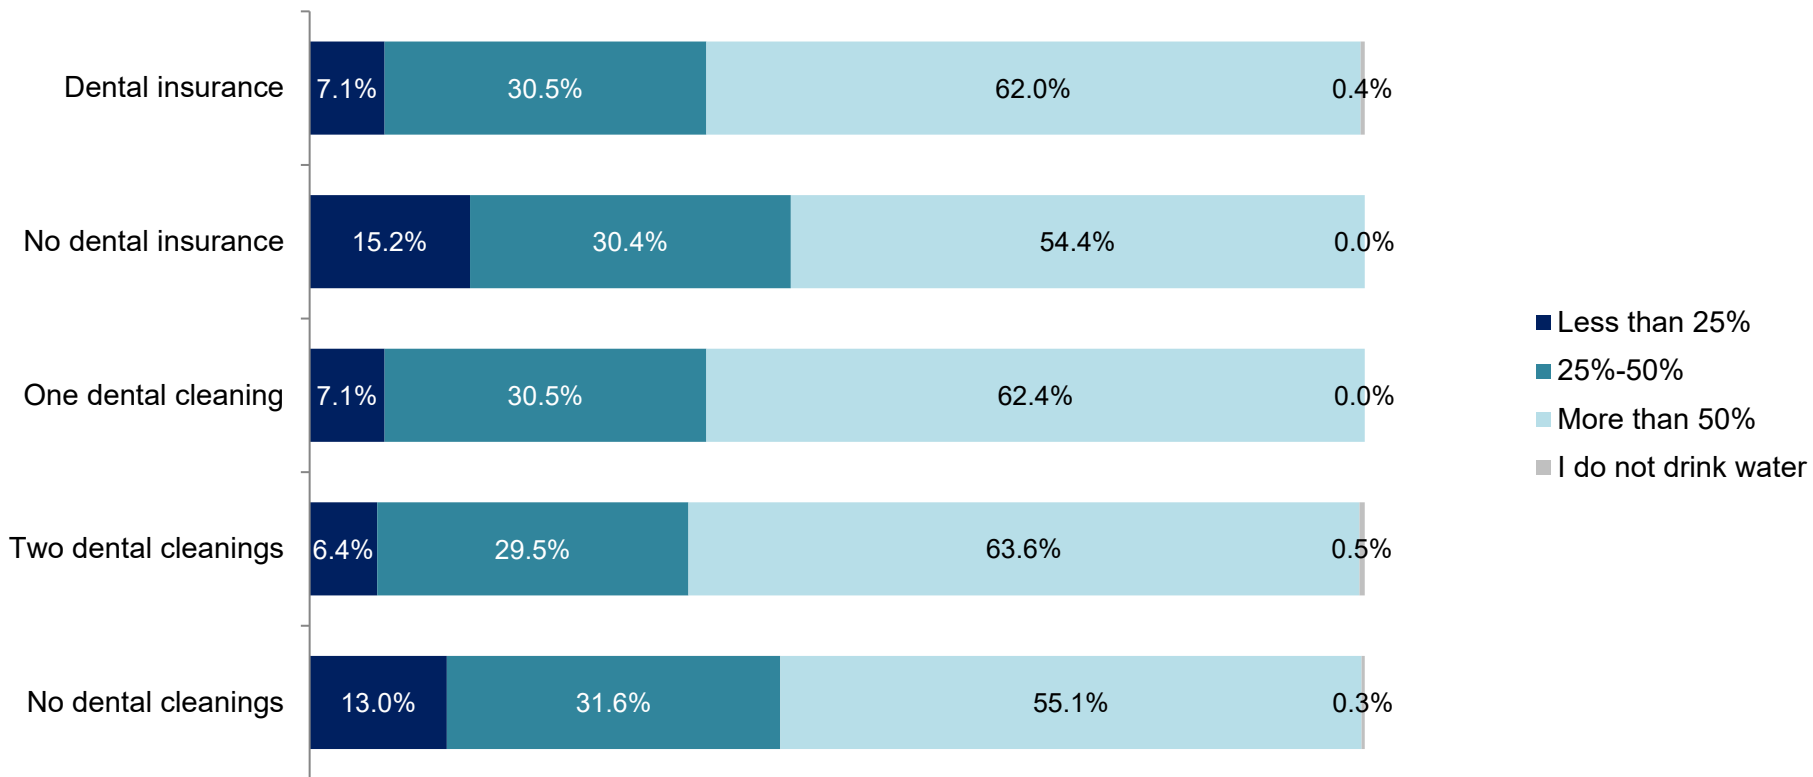

Water consumption is relatively balanced among water source or HPSA area residents; Less-educated residents drink less water

Q9: Approximately what percentage of your beverage consumption is water?

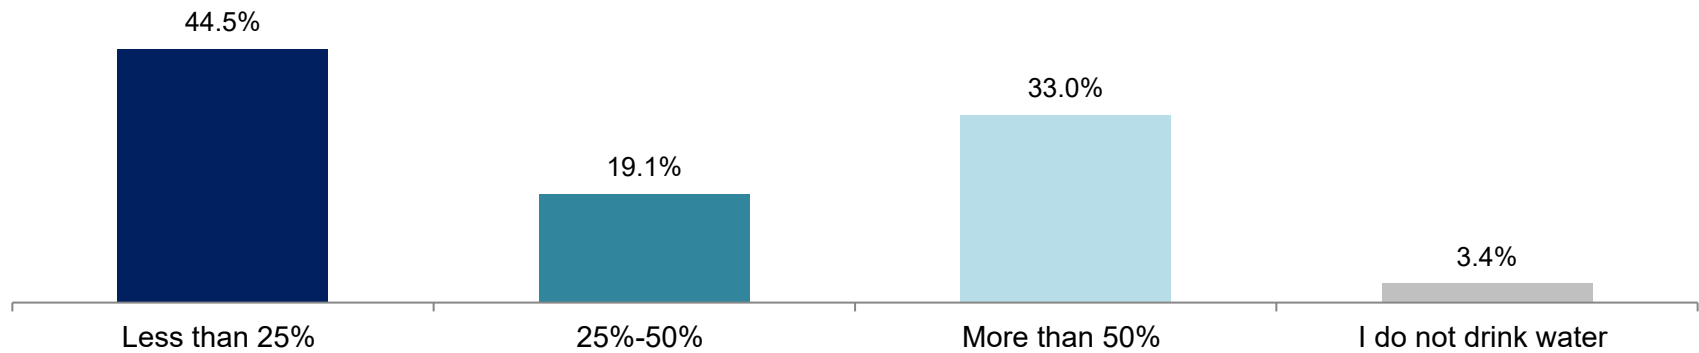

Those with dental insurance drink more water than uninsured

Q9: Approximately what percentage of your beverage consumption is water?

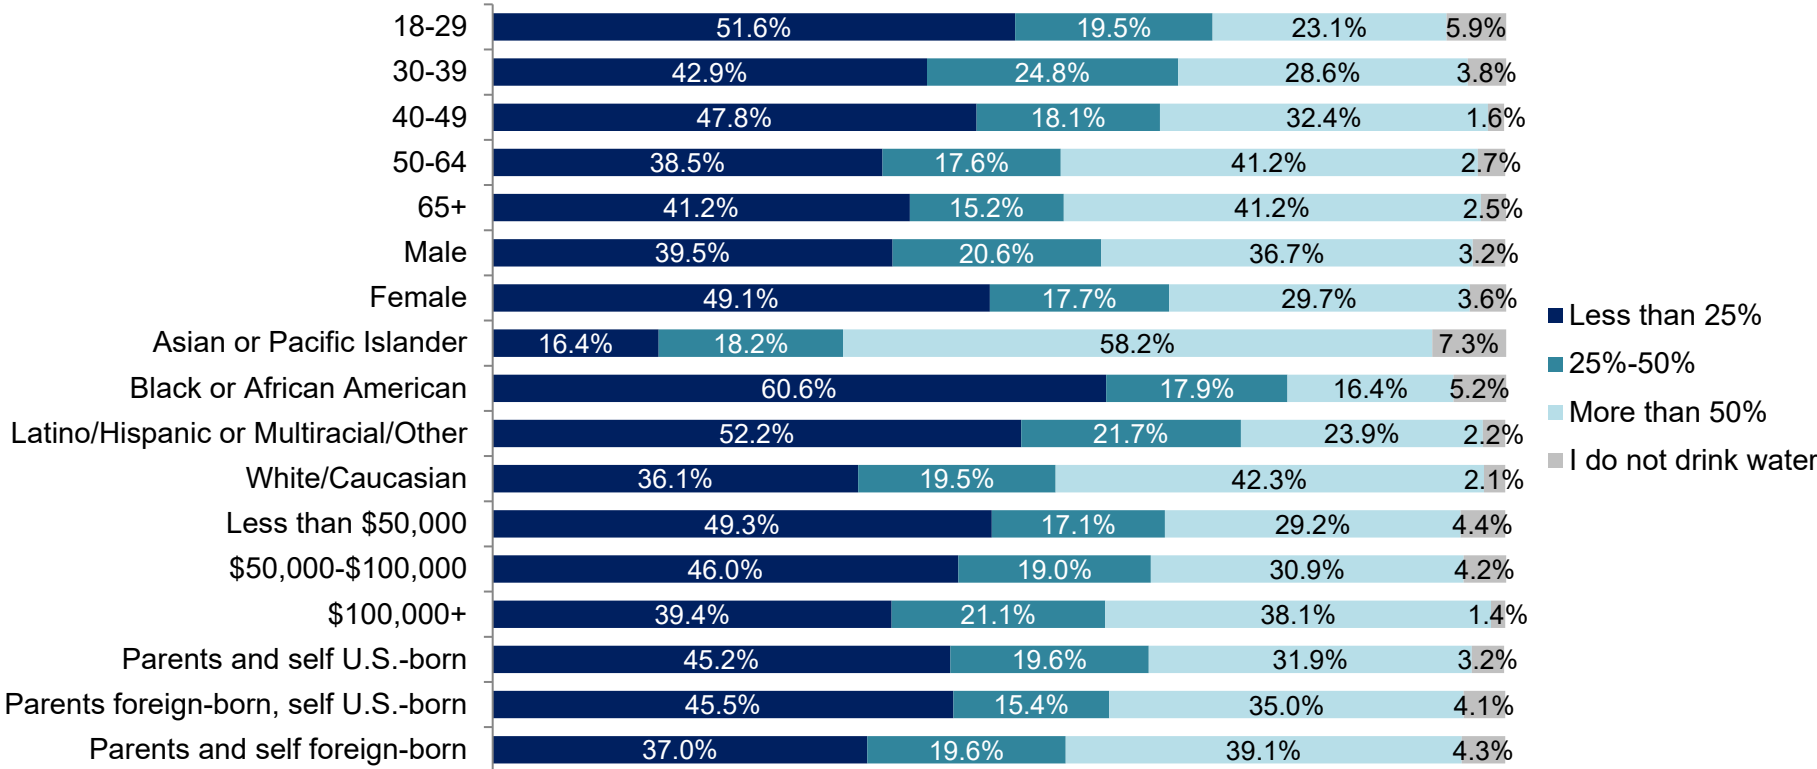

1/3 of residents' water consumption is more than 50% tap water

Q10: Approximately what percentage of your water consumption is tap water?

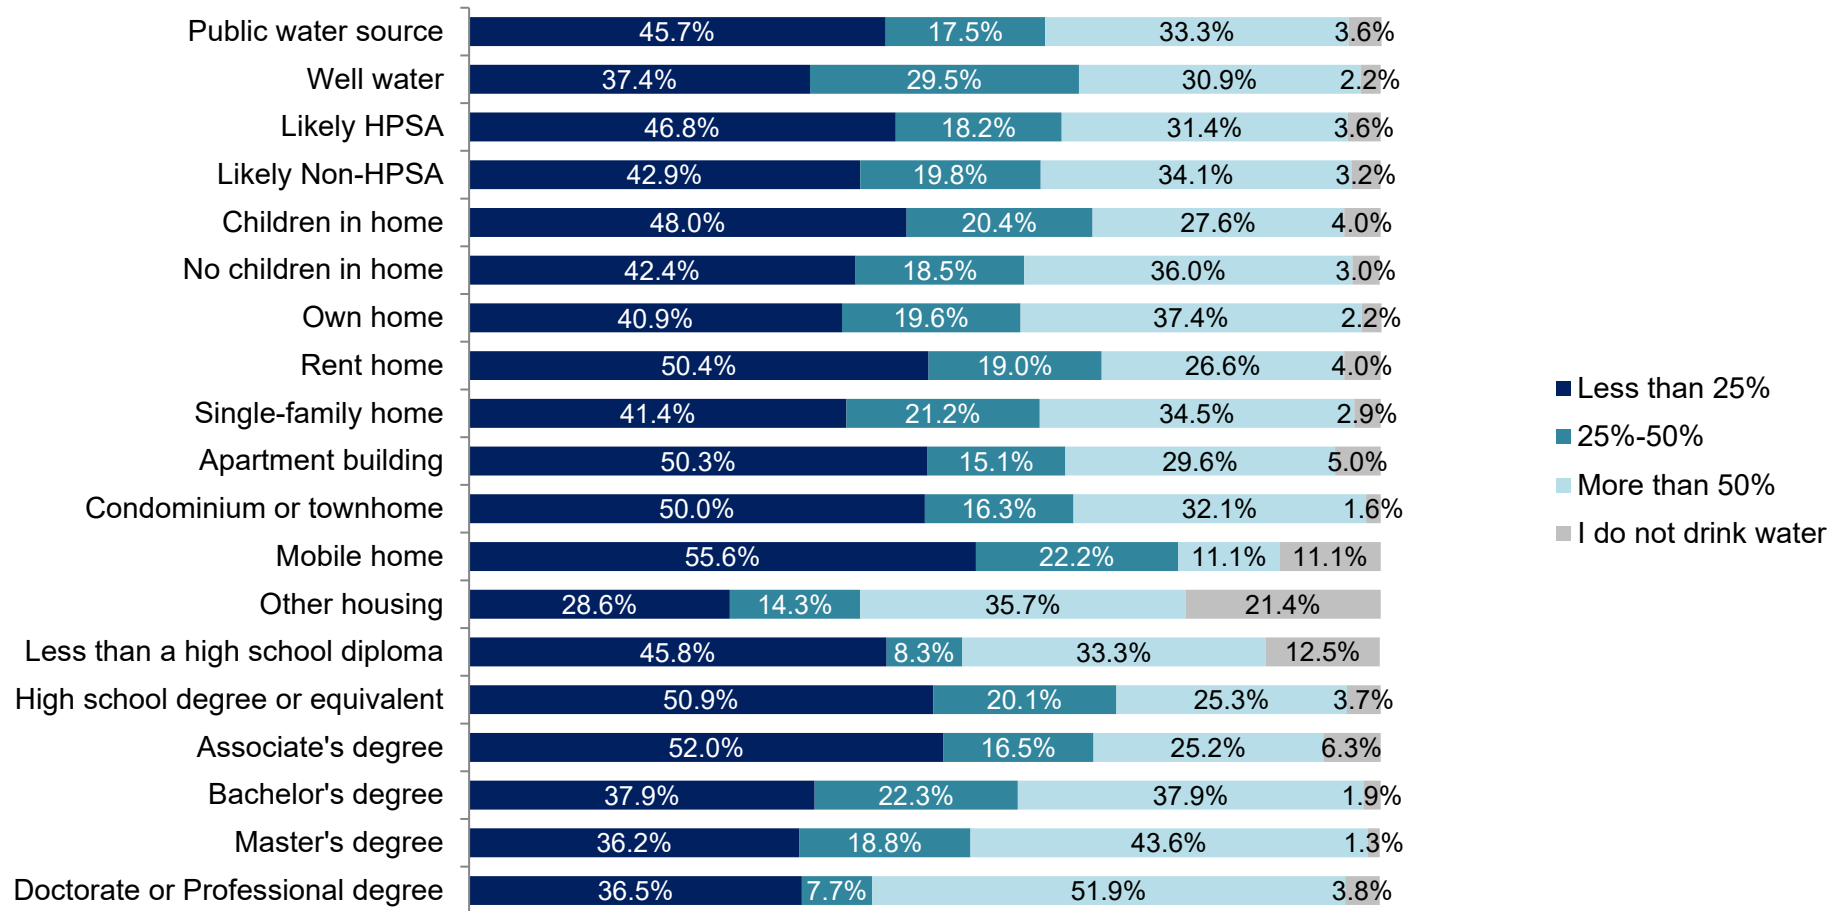

Tap water consumption is higher among residents who are older, female, Asian, White, or higher-income

Q10: Approximately what percentage of your water consumption is tap water?

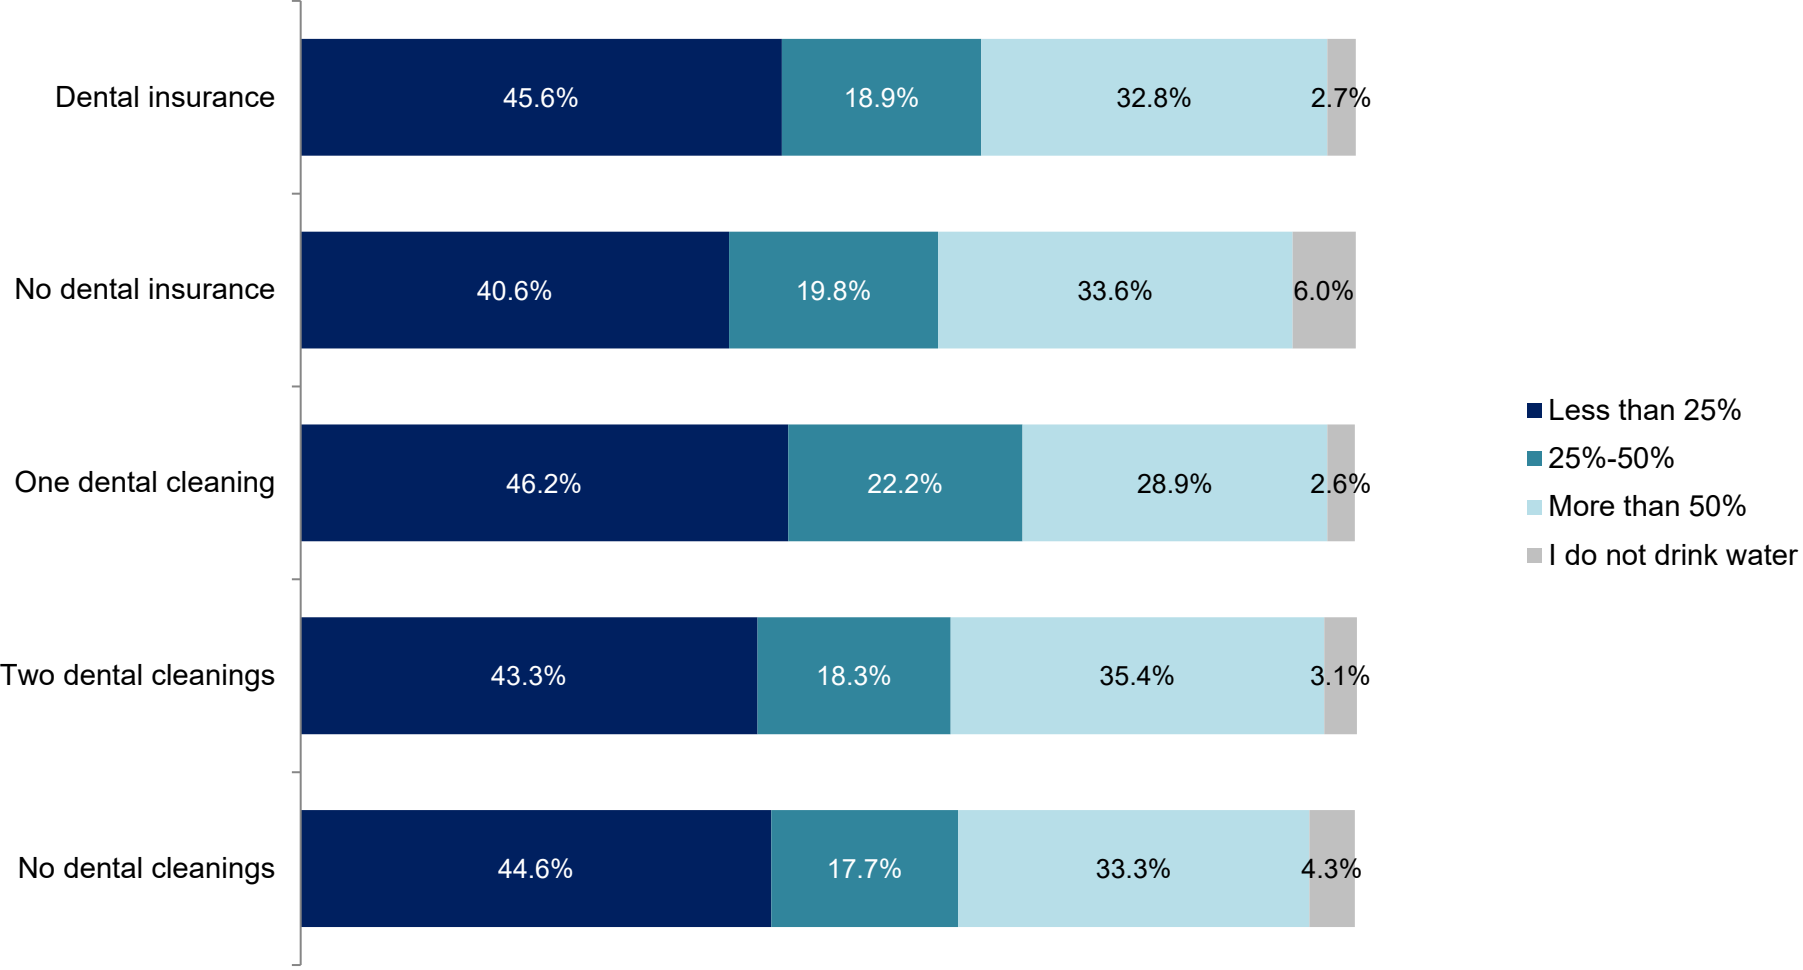

Tap water consumption is higher among residents who are college-educated or living in single-family homes

Q10: Approximately what percentage of your water consumption is tap water?

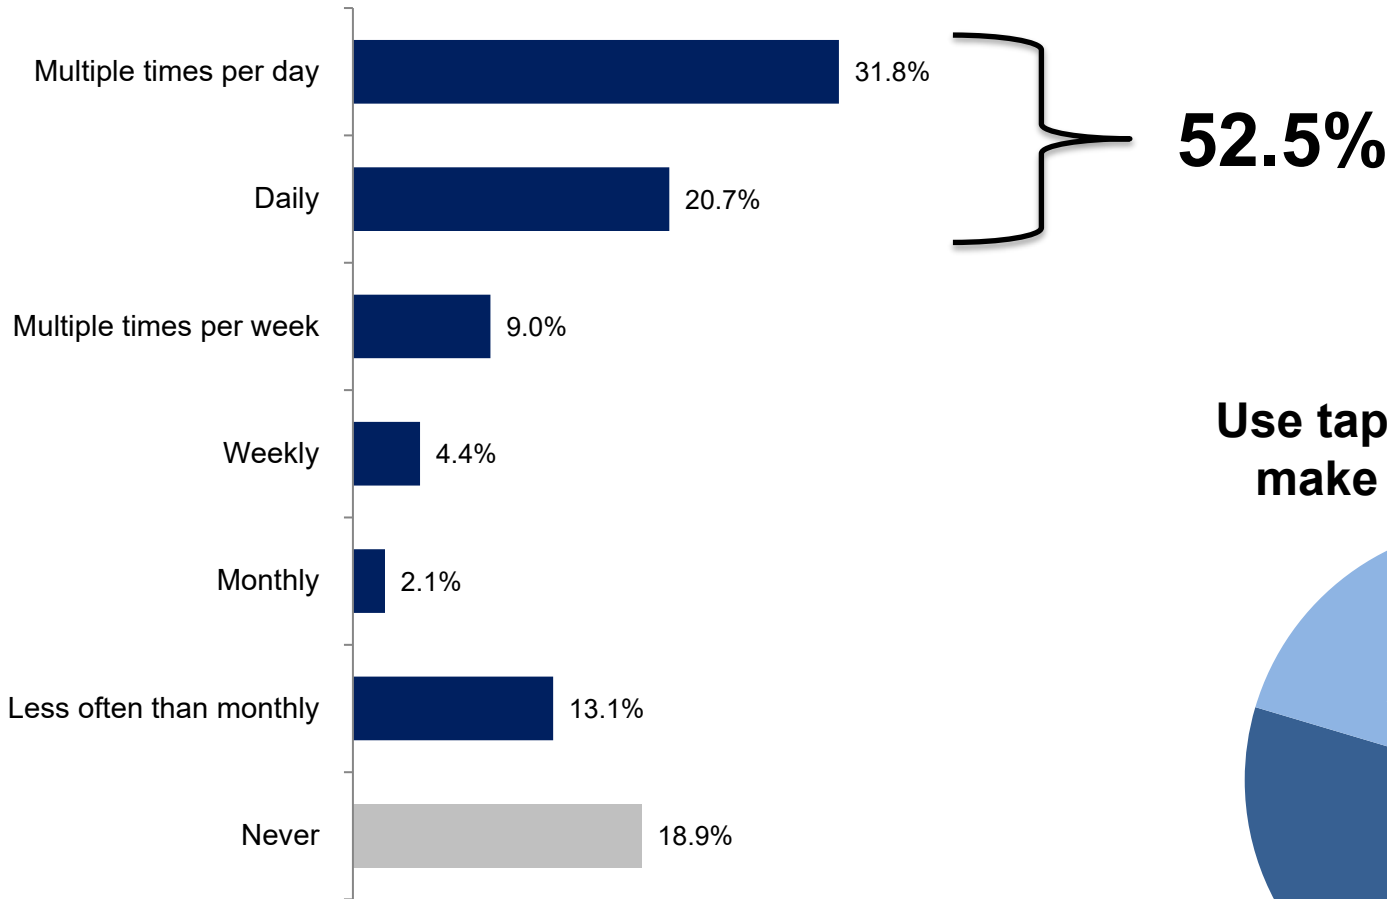

There are no significant differences in tap water consumption based on dental insurance coverage

Q10: Approximately what percentage of your water consumption is tap water?

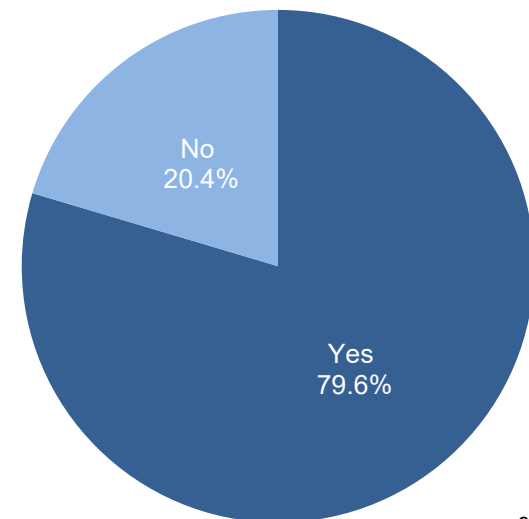

53% of residents are drinking tap water at least daily from their homes; however, 80% are using tap water to make other beverages regularly

Q11: How often do you drink tap water from your home (i.e. water that comes from the faucet)?

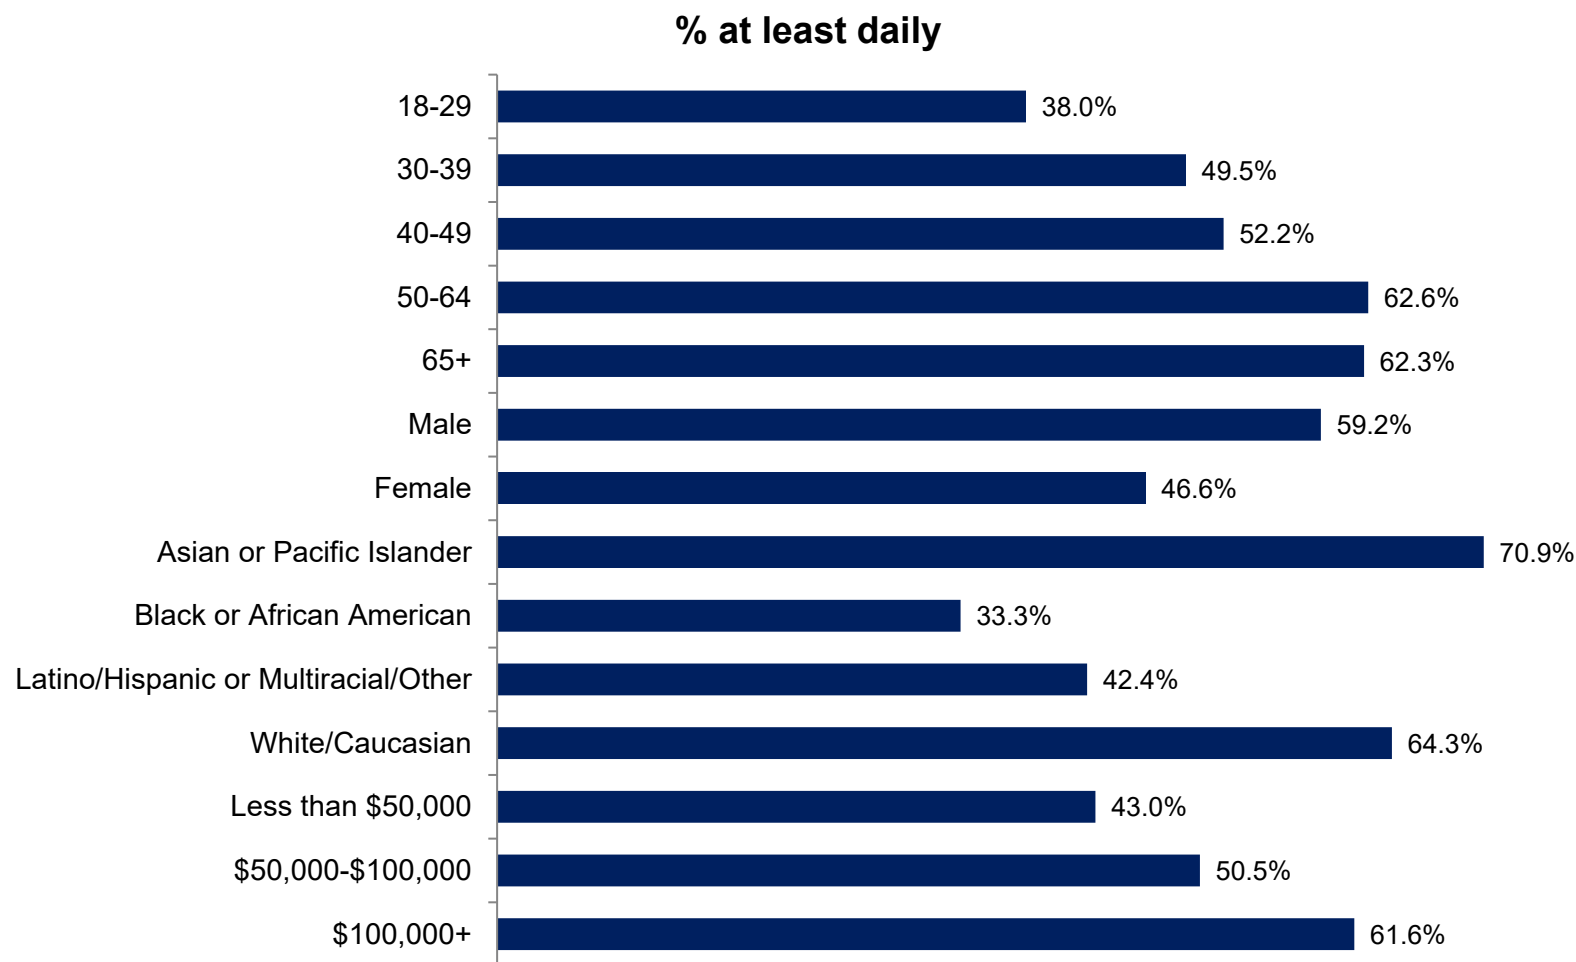

Use tap water to regularly make other beverages

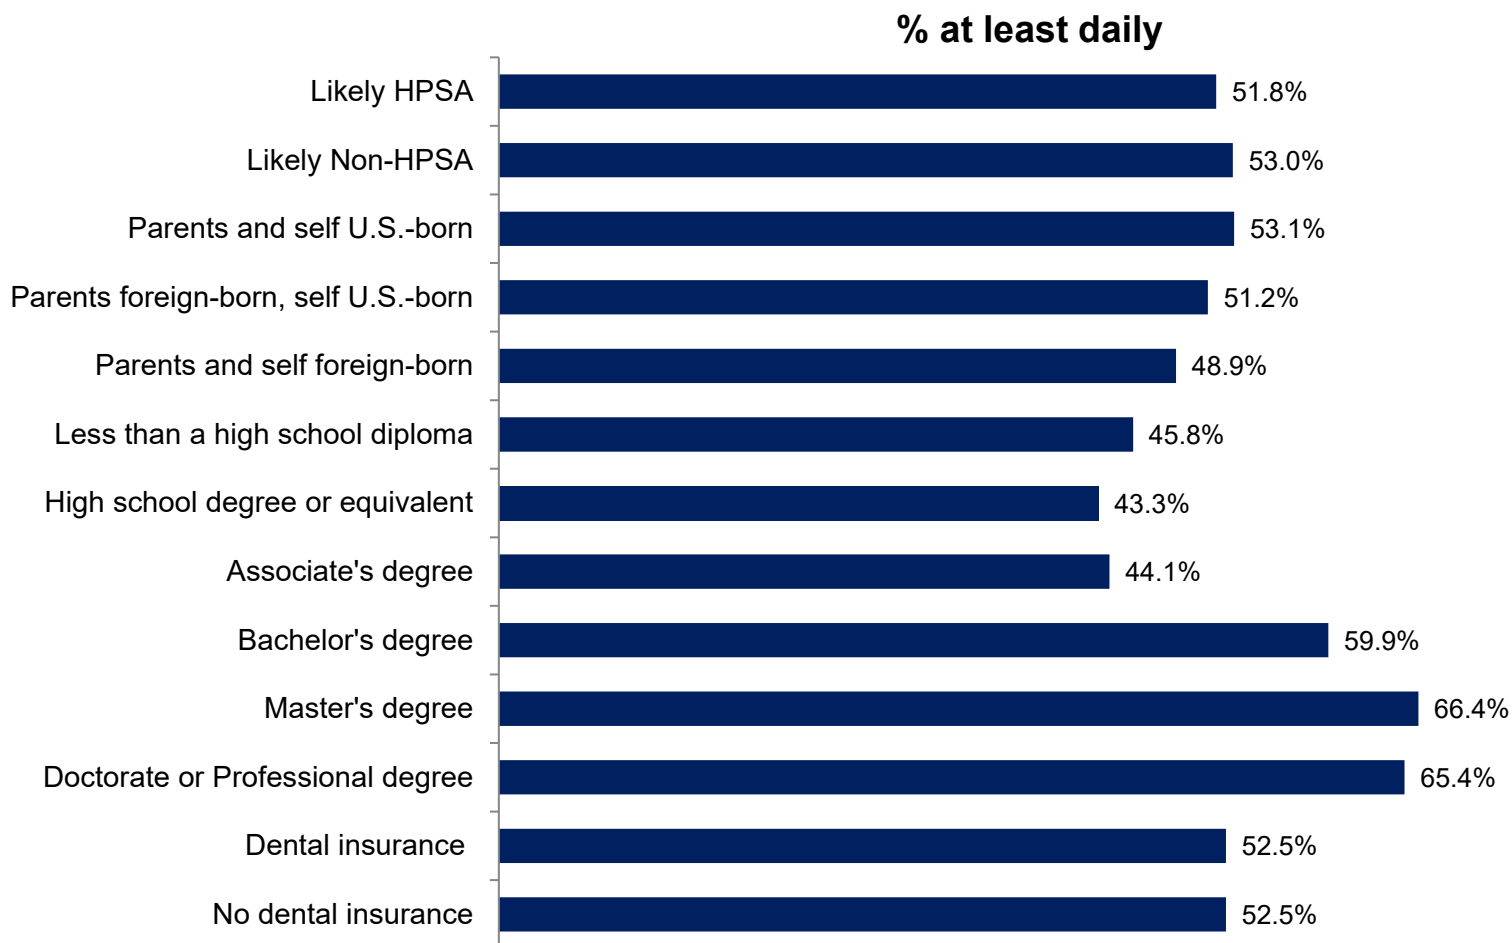

Daily tap water consumption is higher among residents who are male, Asian/Pacific Islander, White, or high-income

Q11: How often do you drink tap water from your home (i.e. water that comes from the faucet)?

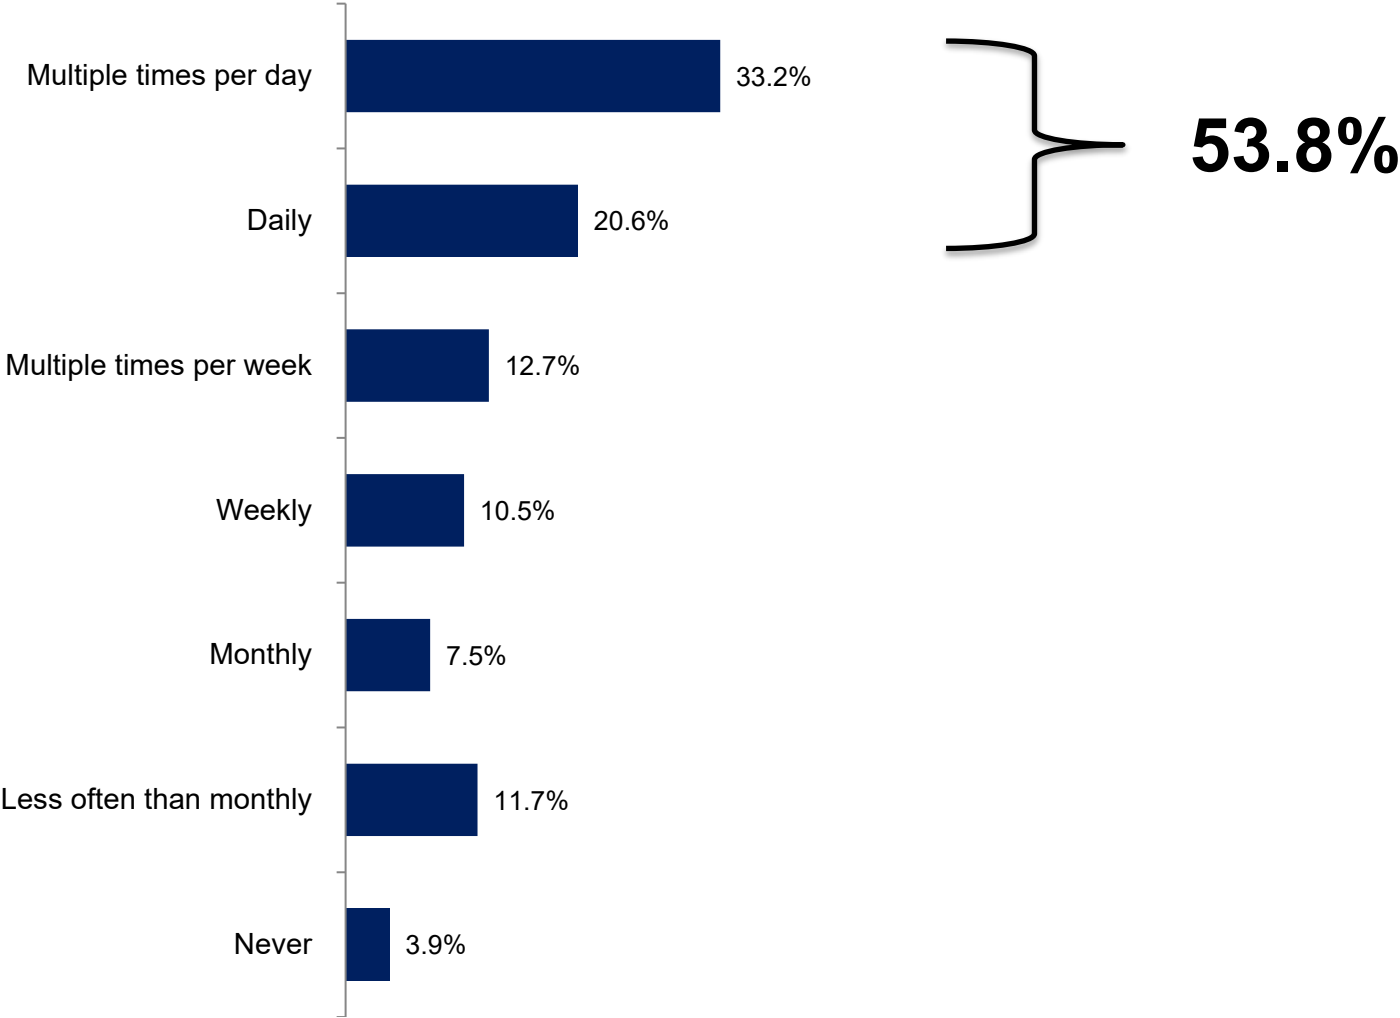

Daily tap water consumption is higher among residents who are more educated but does not vary by HPSA location, birth origin, or dental insurance coverage

Q11: How often do you drink tap water from your home (i.e. water that comes from the faucet)?

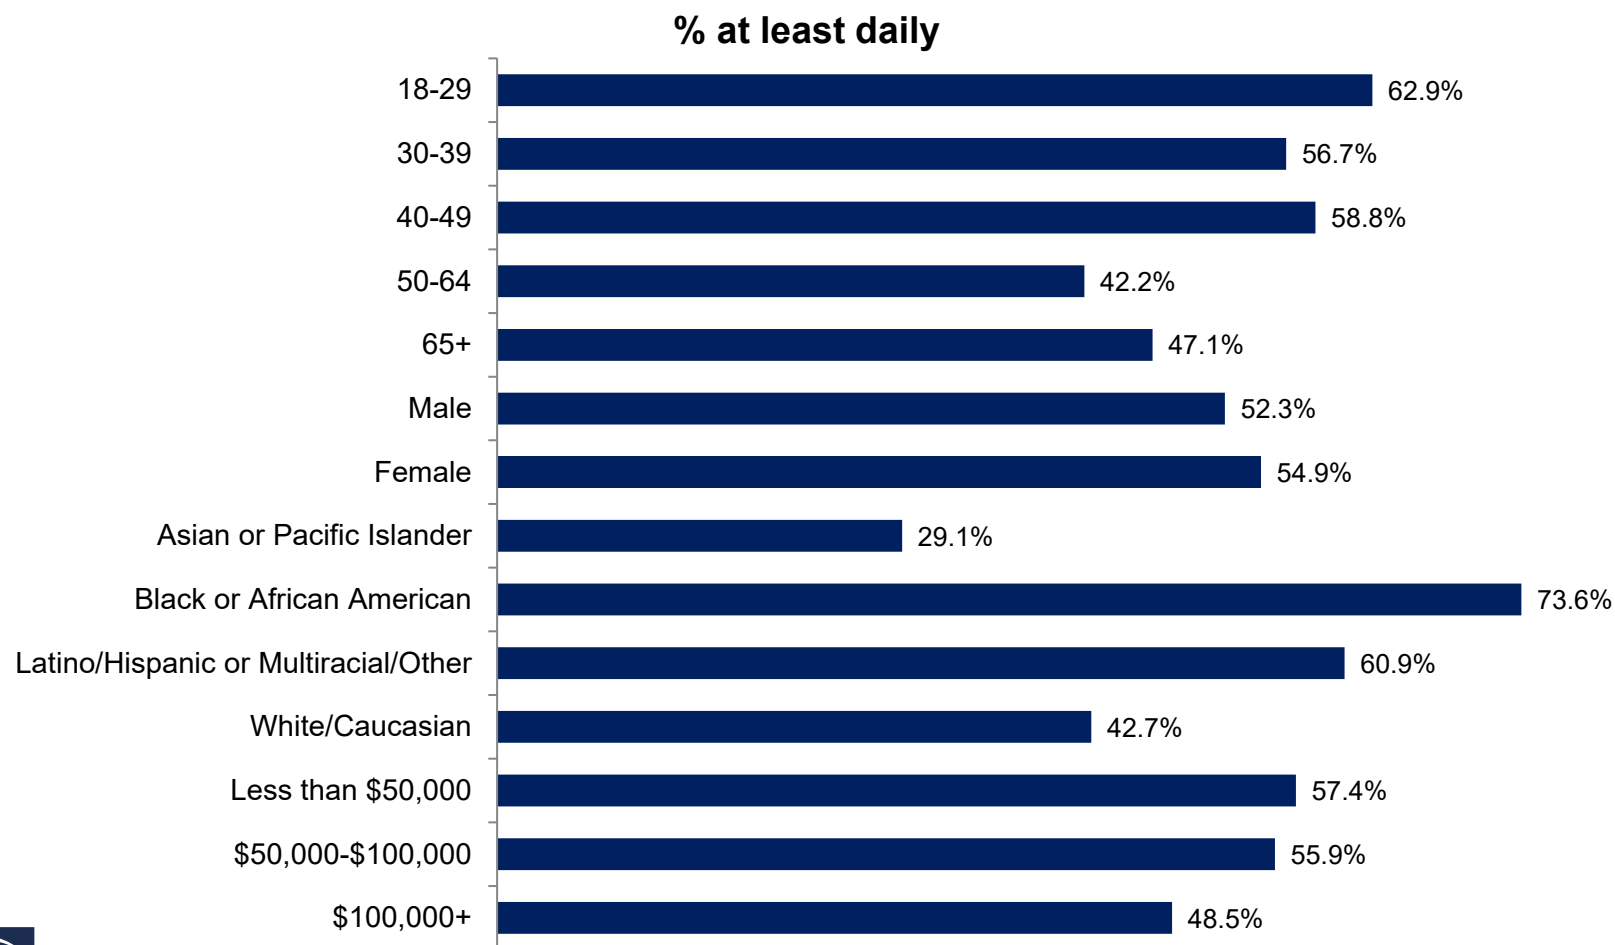

54% of residents are drinking bottled water at least daily

Q12: How often do you drink bottled water? This includes water from single-use bottles or larger purchased containers of bottled water, or large multi-gallon bottles of water for use over time.

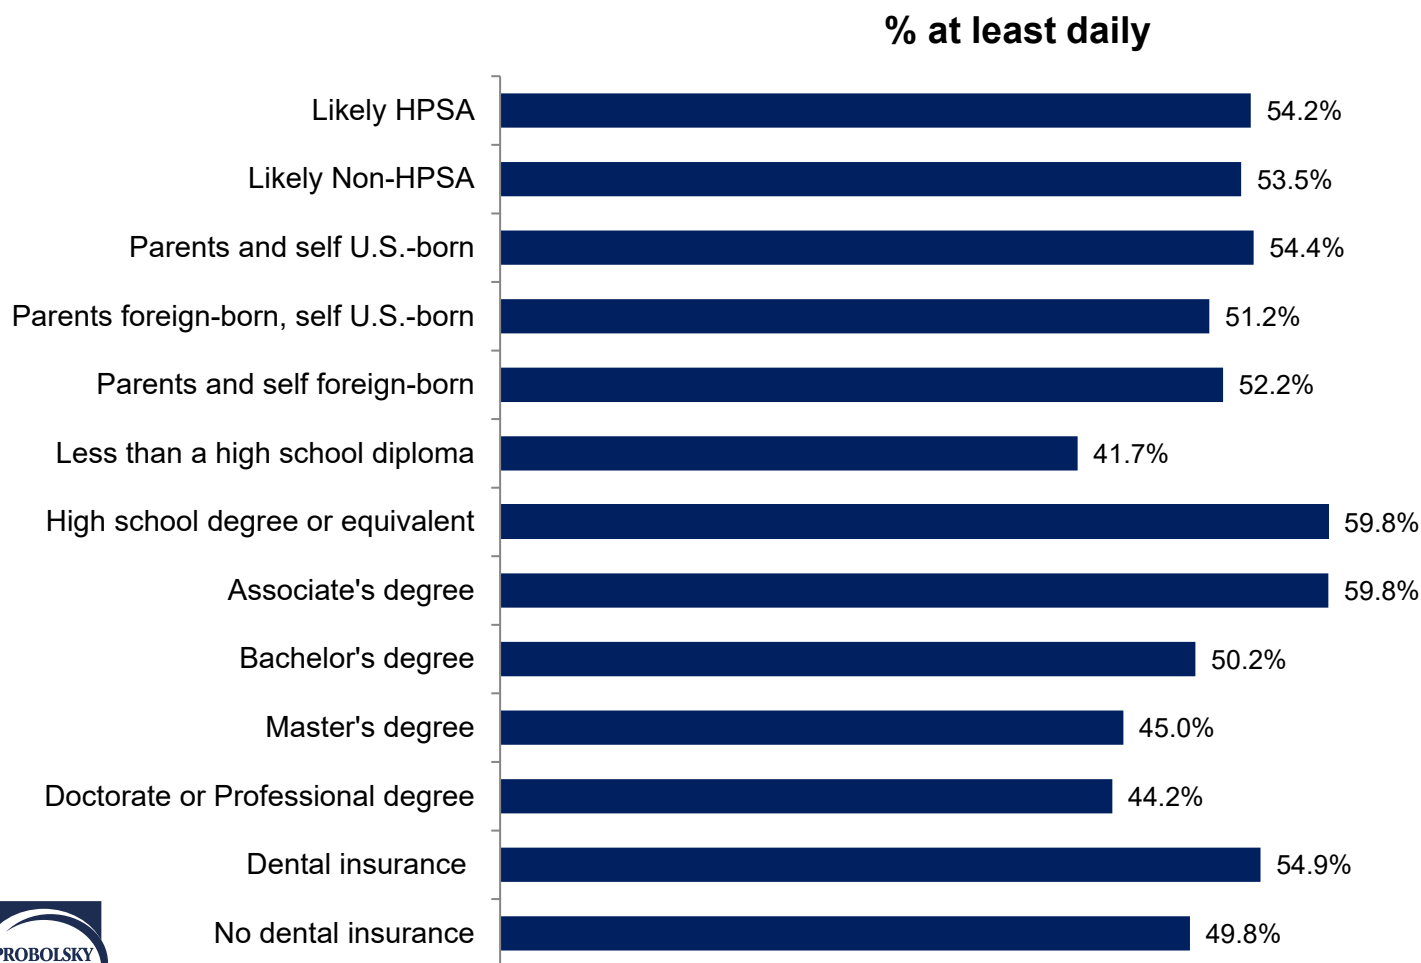

Daily bottled water consumption is higher among residents who are younger or Black/African American

Q12: How often do you drink bottled water? This includes water from single-use bottles or larger purchased containers of bottled water, or large multi-gallon bottles of water for use over time.

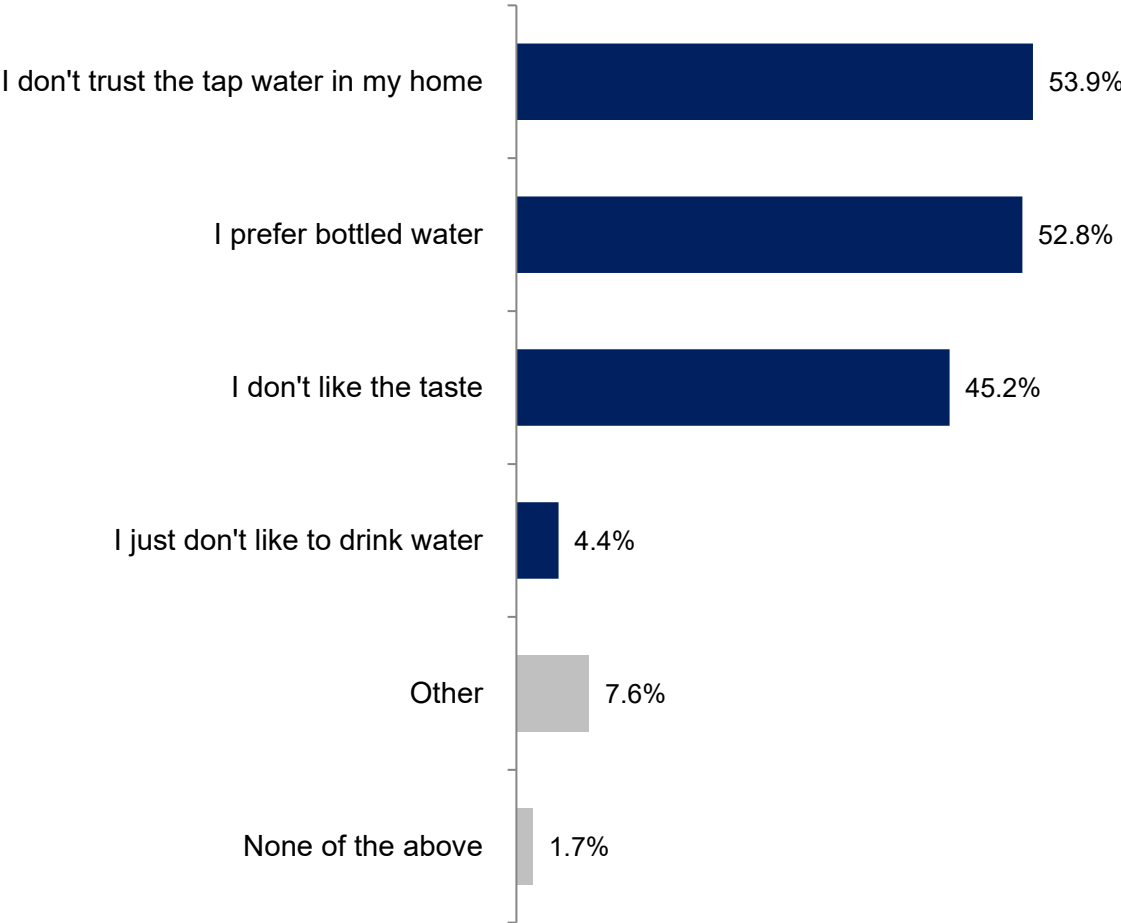

Daily bottled water consumption does not have significant variation by HPSA, birth origin, or dental insurance coverage; It does decrease slightly among higher-educated residents

Q12: How often do you drink bottled water? This includes water from single-use bottles or larger purchased containers of bottled water, or large multi-gallon bottles of water for use over time.

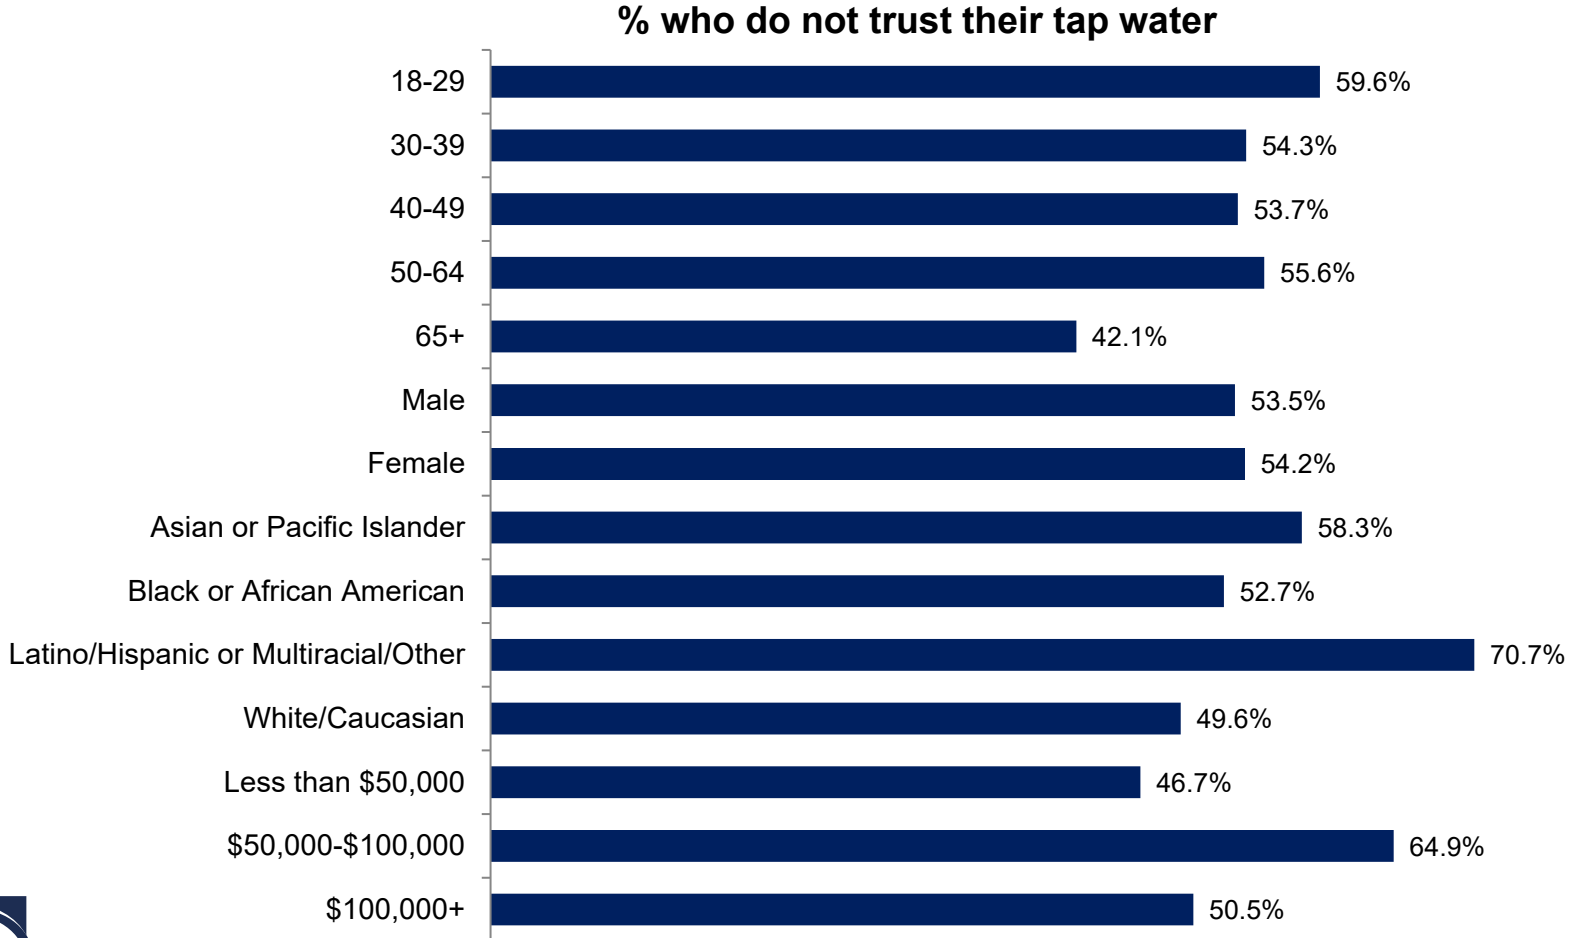

Lack of trust is the top reason (54%) that residents don't drink the tap water in their home

Q13: Why do you not drink tap water in your home more frequently? Select all that apply.
[ASK AMONG THOSE WHO DRINK TAP WATER LESS FREQUENTLY THAN WEEKLY]

Distrust in home tap water is higher among residents who are younger, Latino/Hispanic or multiracial, or \$50,000-\$100,000 household income

Q13: Why do you not drink tap water in your home more frequently? Select all that apply.
[ASK AMONG THOSE WHO DRINK TAP WATER LESS FREQUENTLY THAN WEEKLY]

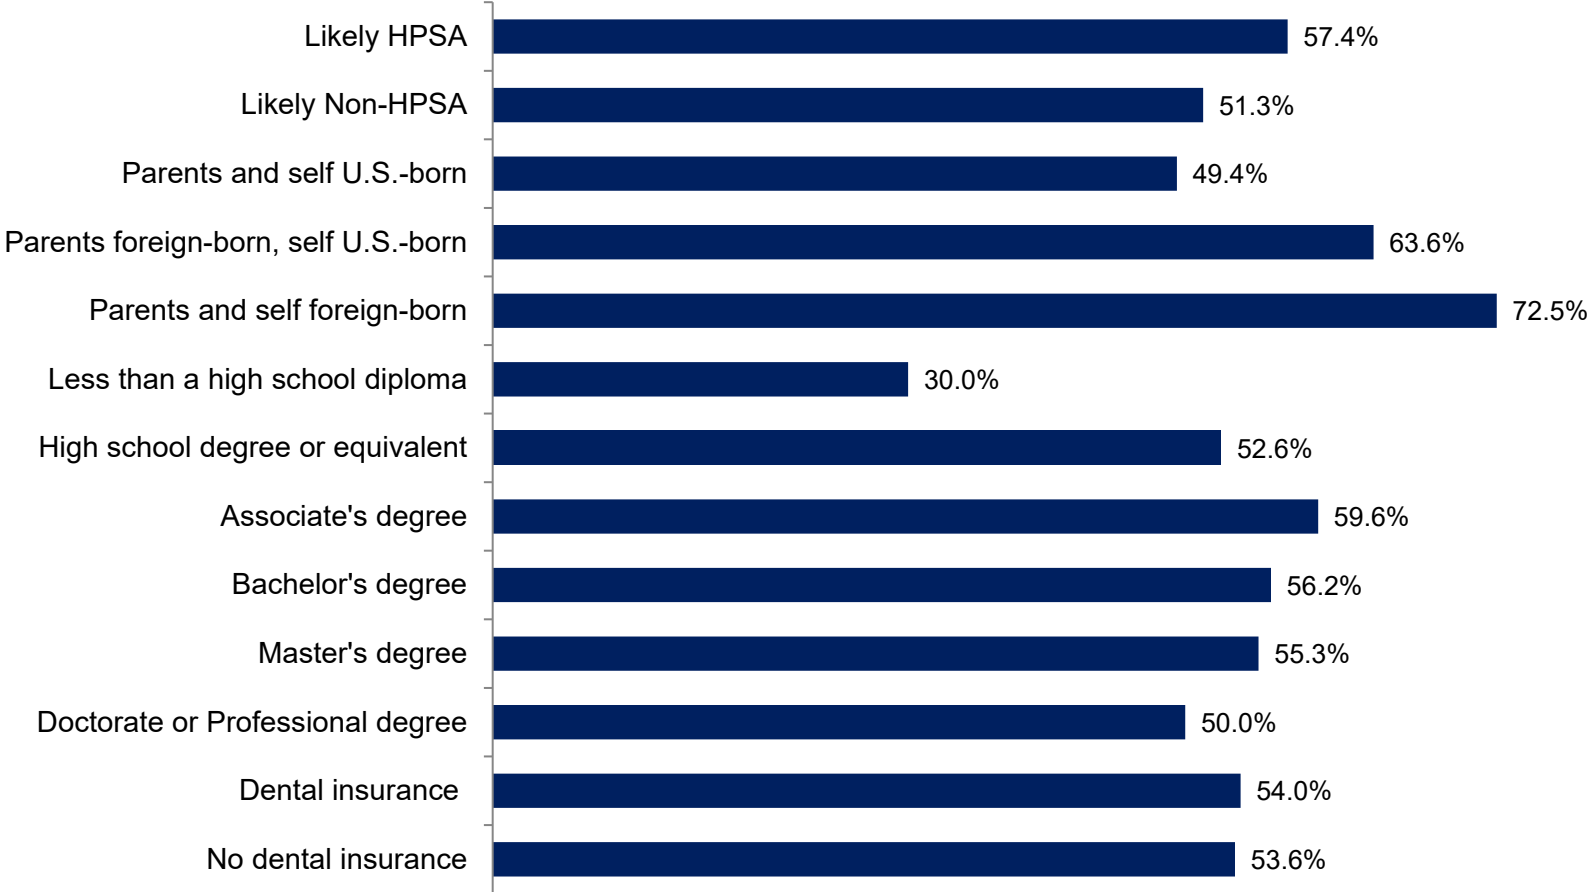

N = 185; differences should be interpreted with caution due to small sample size

Distrust in home tap water is higher among residents who are foreign-born or first generation

Q13: Why do you not drink tap water in your home more frequently? Select all that apply.
 [ASK AMONG THOSE WHO DRINK TAP WATER LESS FREQUENTLY THAN WEEKLY]

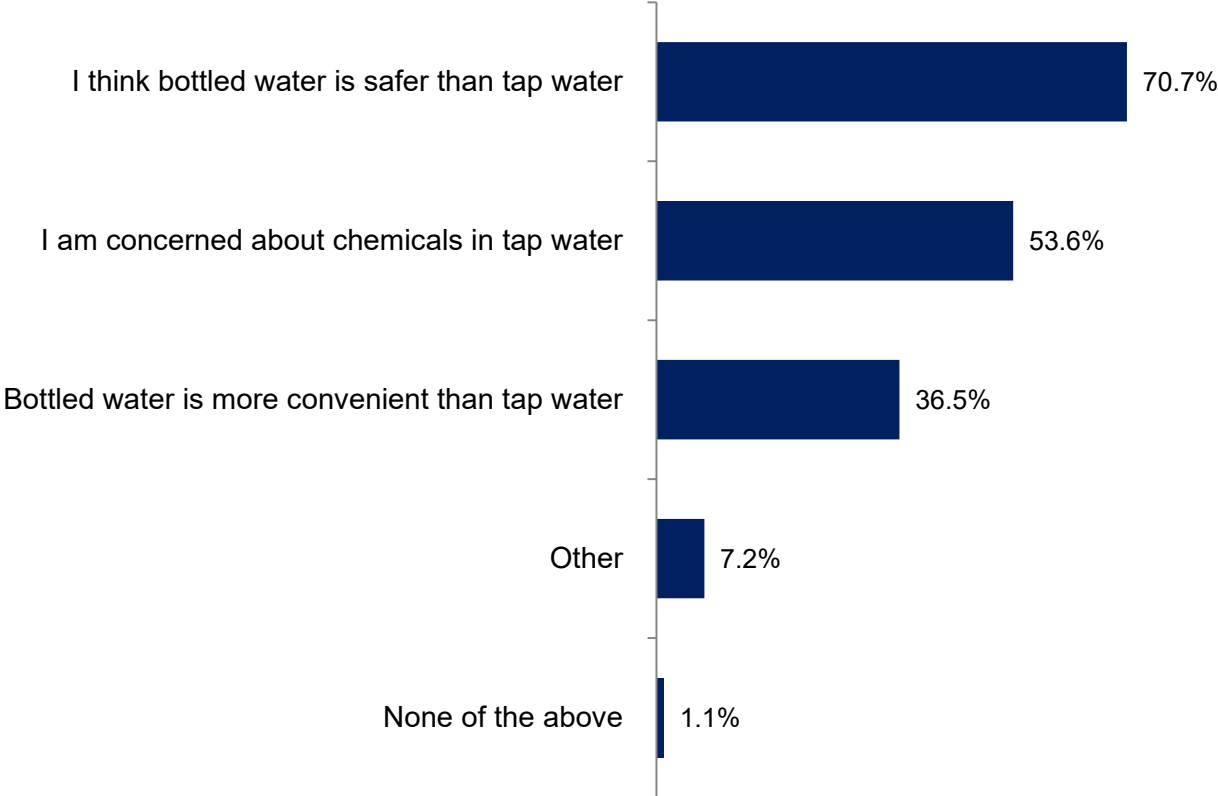

% who do not trust their tap water

N = 185; differences should be interpreted with caution due to small sample size

Concerns over tap water safety and a belief that bottled water is safer than tap water are the top reasons for bottled water preference

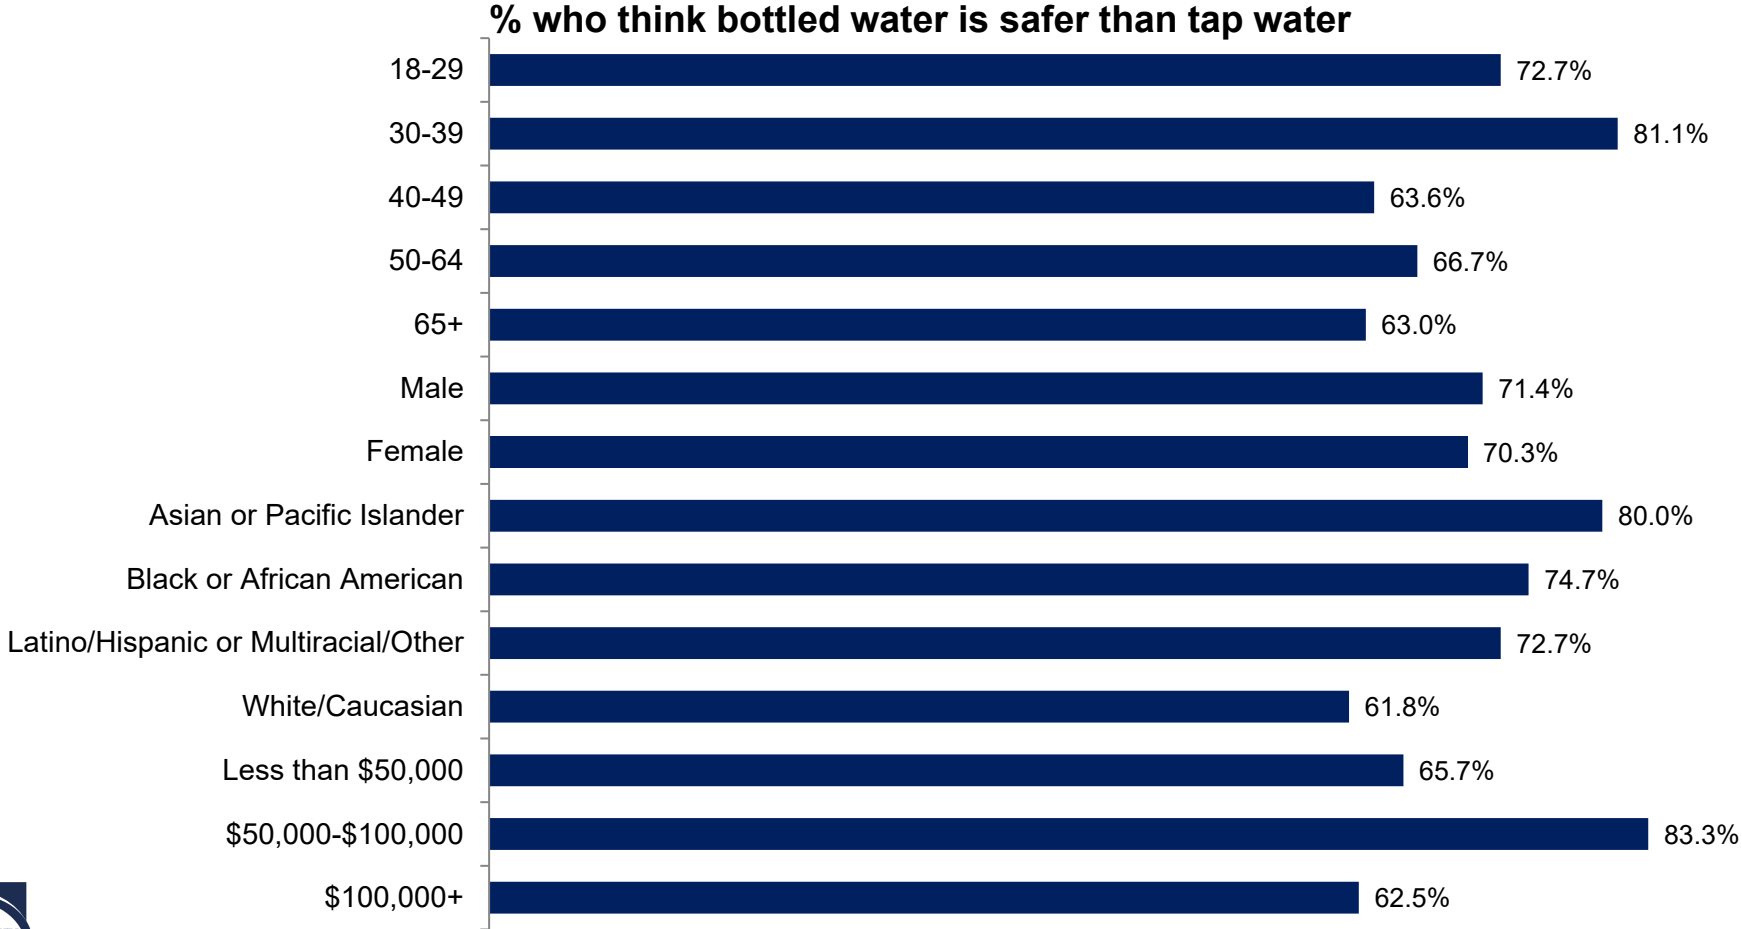

Q14: Why do you prefer bottled water to tap water? Select all that apply.
[ASK AMONG THOSE WHO SELECTED "I PREFER BOTTLED WATER" IN Q13]

N = 181; differences should be interpreted with caution due to small sample size

Perceptions of bottled water safety over tap water are higher among residents who are younger, non-White, or \$50,000-\$100,000 household income

Q14: Why do you prefer bottled water to tap water? Select all that apply.
[ASK AMONG THOSE WHO SELECTED "I PREFER BOTTLED WATER" IN Q13]

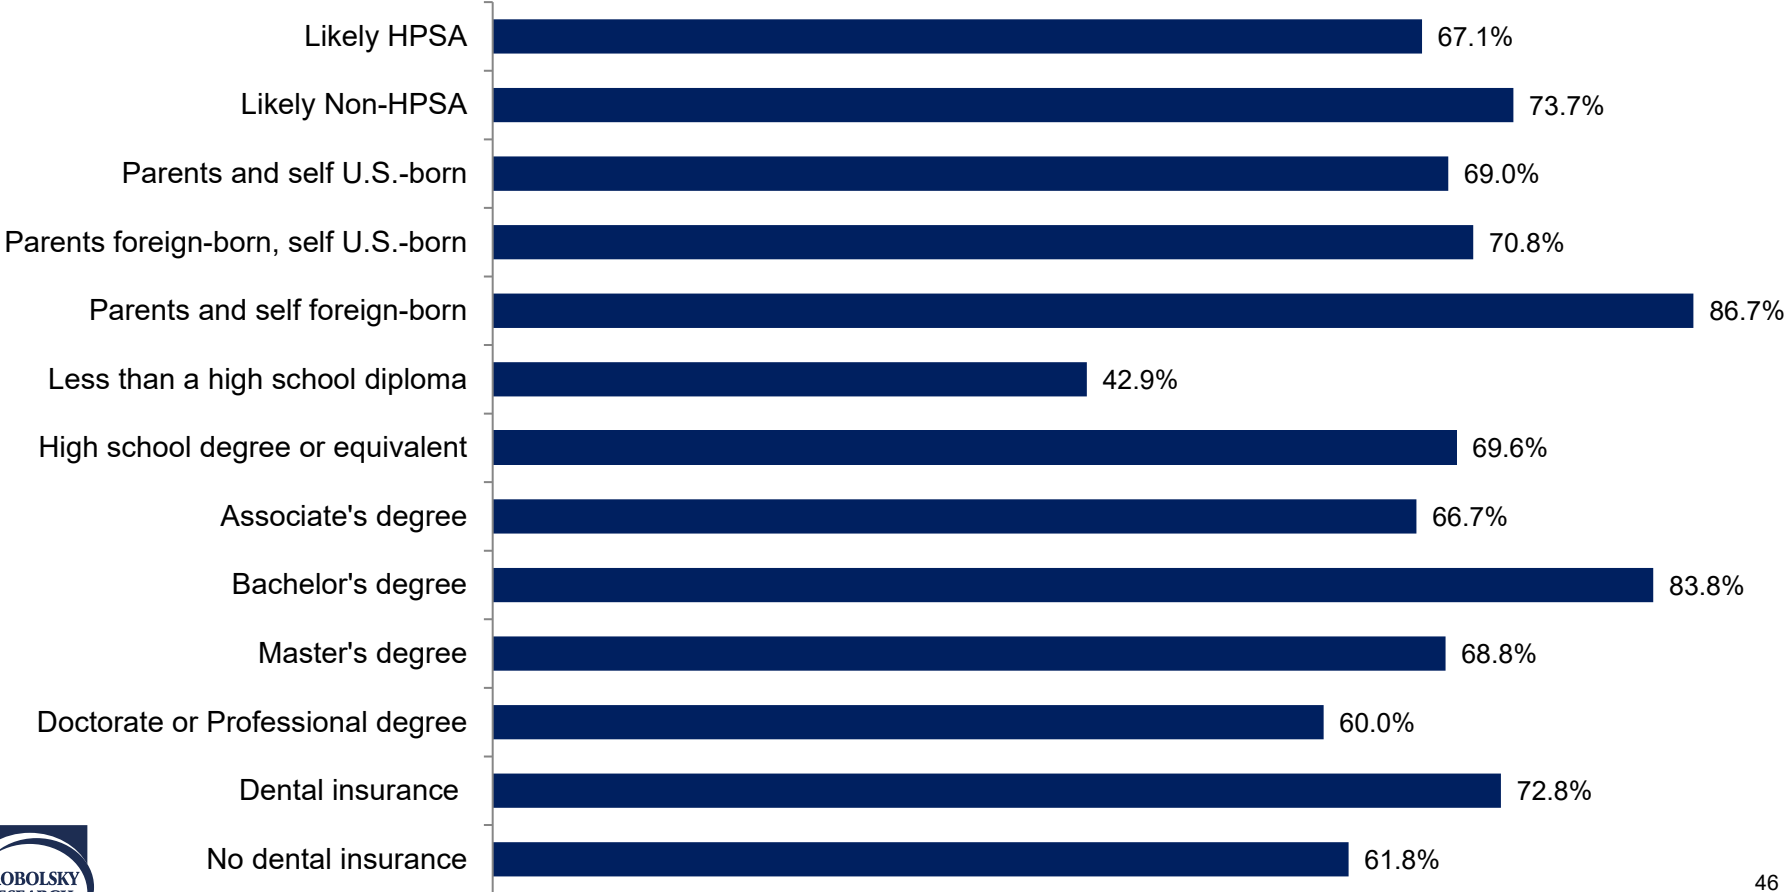

N = 181; differences should be interpreted with caution due to small sample size

Perceptions of bottled water safety over tap water are higher among residents who are foreign-born or college-educated (without graduate education)

Q14: Why do you prefer bottled water to tap water? Select all that apply.
 [ASK AMONG THOSE WHO SELECTED "I PREFER BOTTLED WATER" IN Q13]

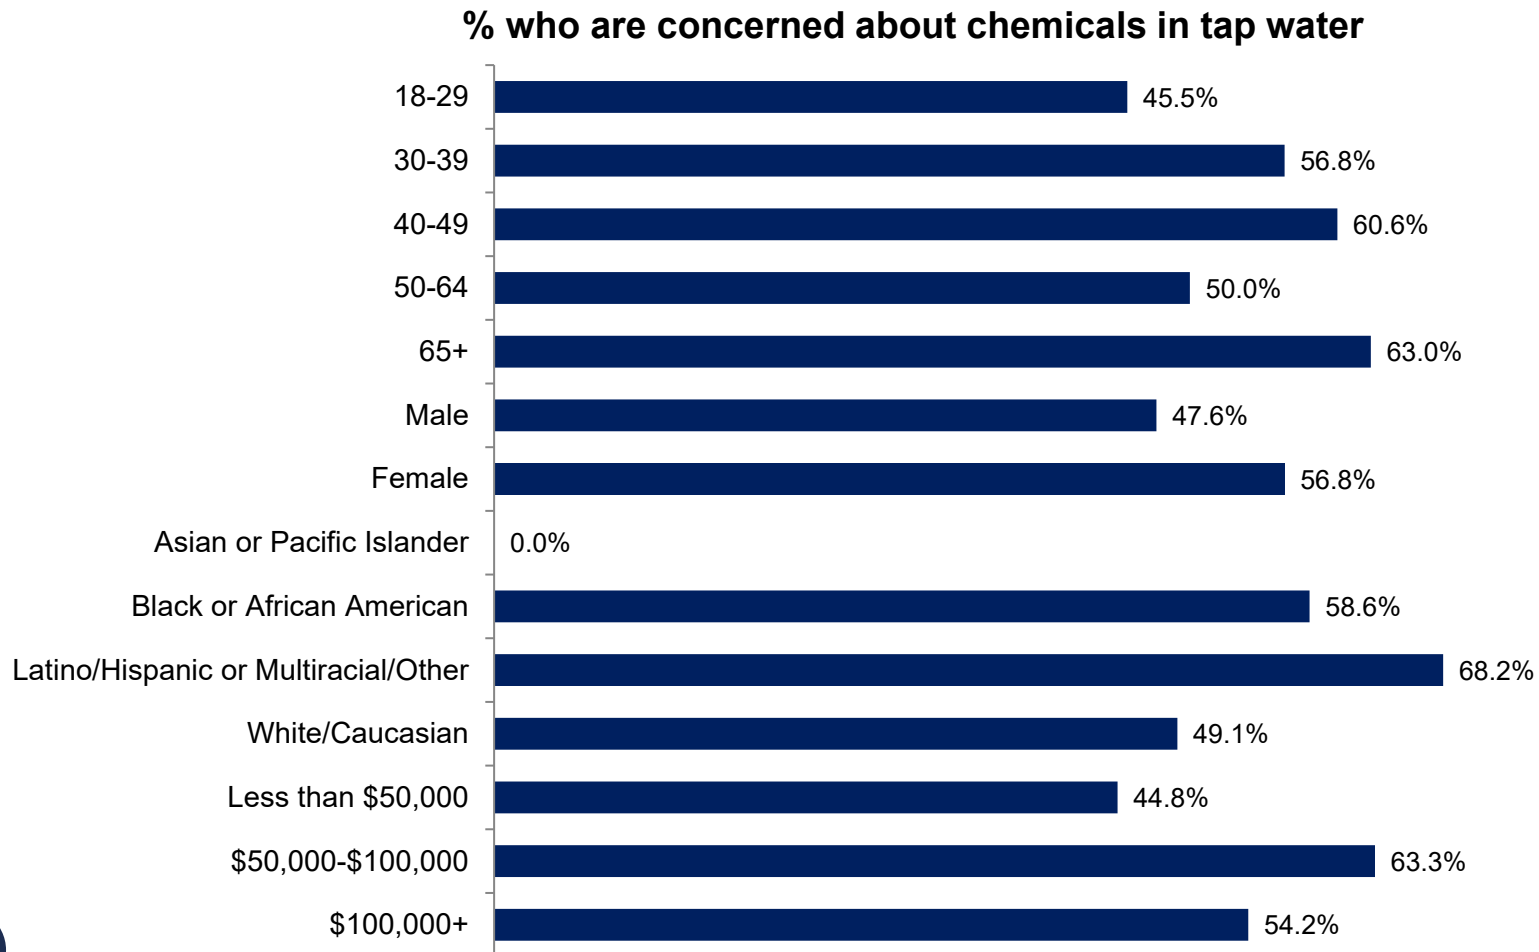

% who think bottled water is safer than tap water

N = 181; differences should be interpreted with caution due to small sample size

Preference for bottled water over tap water because of concerns of chemicals are higher among residents who are female, Latino/Hispanic/multiracial, or \$50,000-\$100,000 household income

Q14: Why do you prefer bottled water to tap water? Select all that apply.
[ASK AMONG THOSE WHO SELECTED "I PREFER BOTTLED WATER" IN Q13]

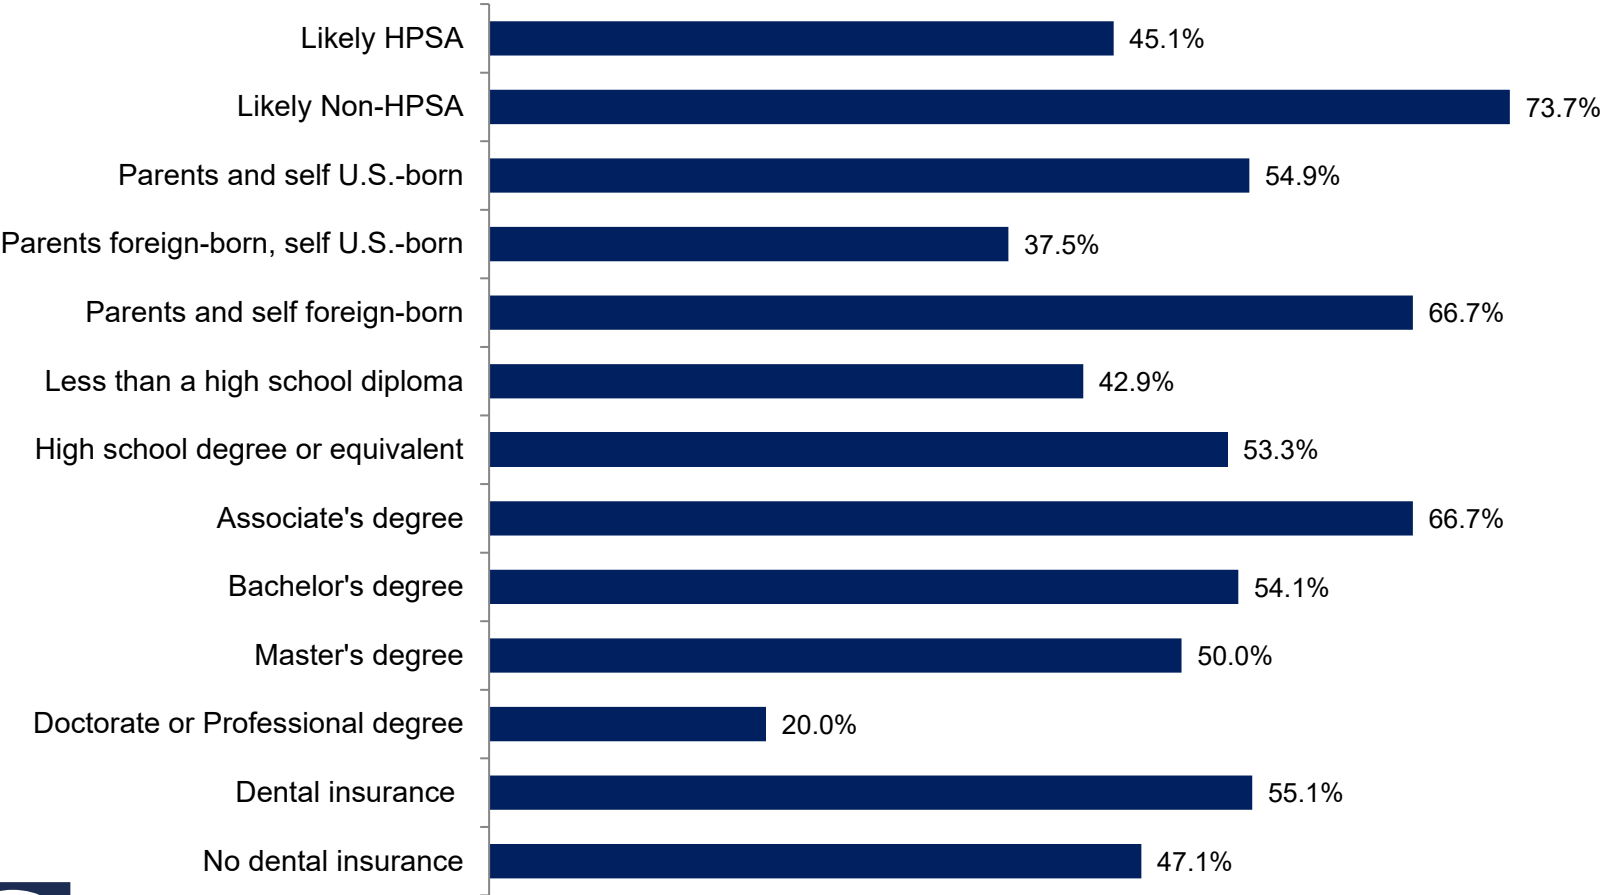

N = 181; differences should be interpreted with caution due to small sample size

Preference for bottled water over tap water because of concerns of chemicals are higher among residents who are non-HPSA or foreign-born

Q14: Why do you prefer bottled water to tap water? Select all that apply.
[ASK AMONG THOSE WHO SELECTED "I PREFER BOTTLED WATER" IN Q13]

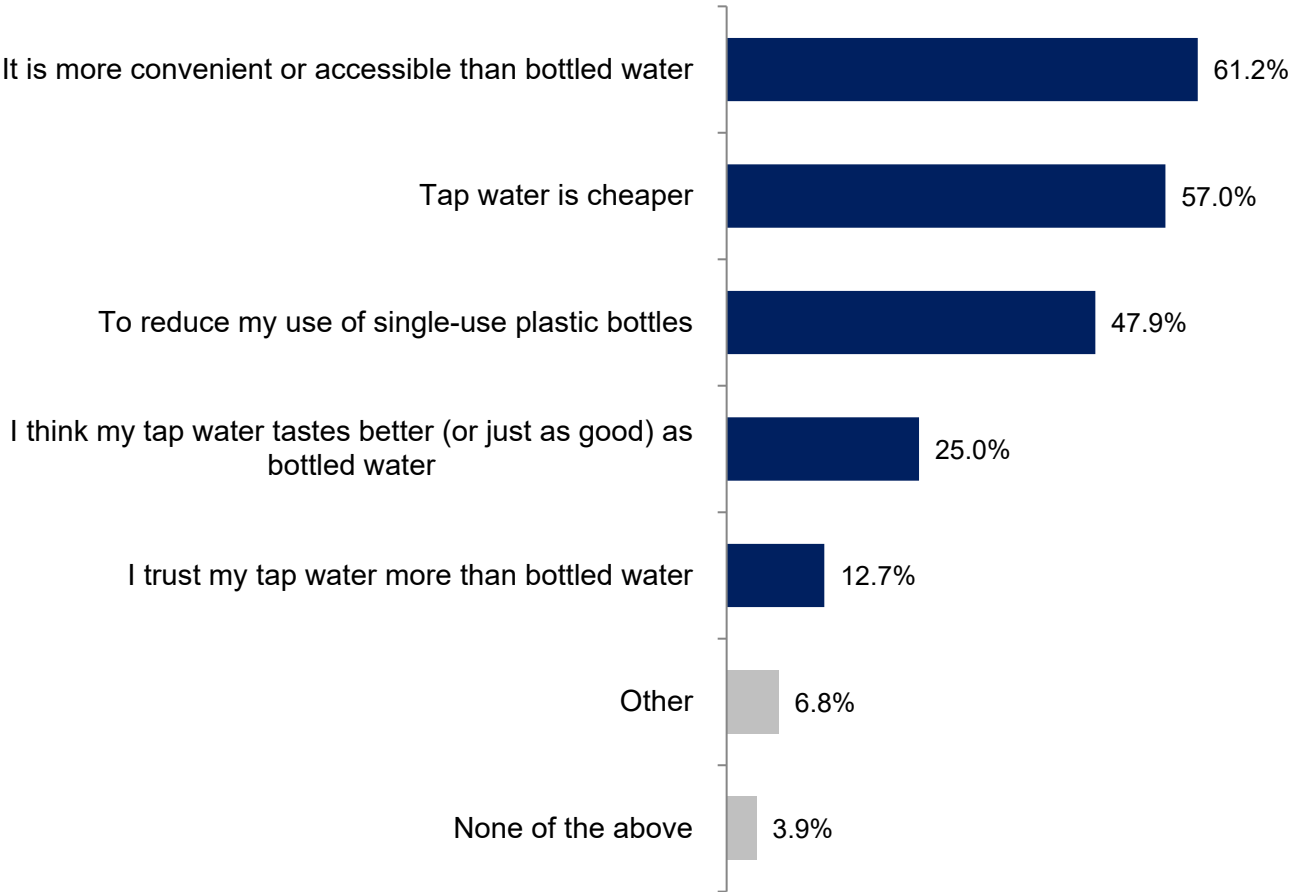

% who are concerned about chemicals in tap water

N = 181; differences should be interpreted with caution due to small sample size

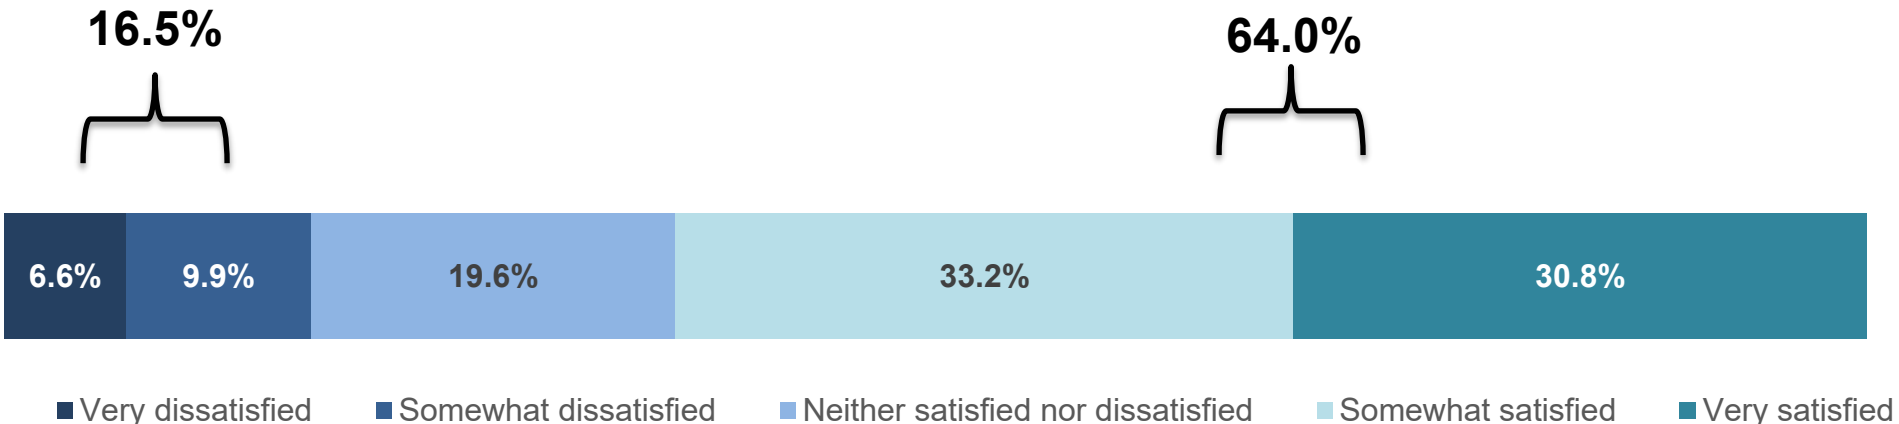

Convenience and cost are the top reasons for drinking tap water from their homes

Q15: What reasons describe why you drink tap water from your home? Select all that apply.
[ASK AMONG THOSE WHO DRINK TAP WATER AT LEAST WEEKLY]

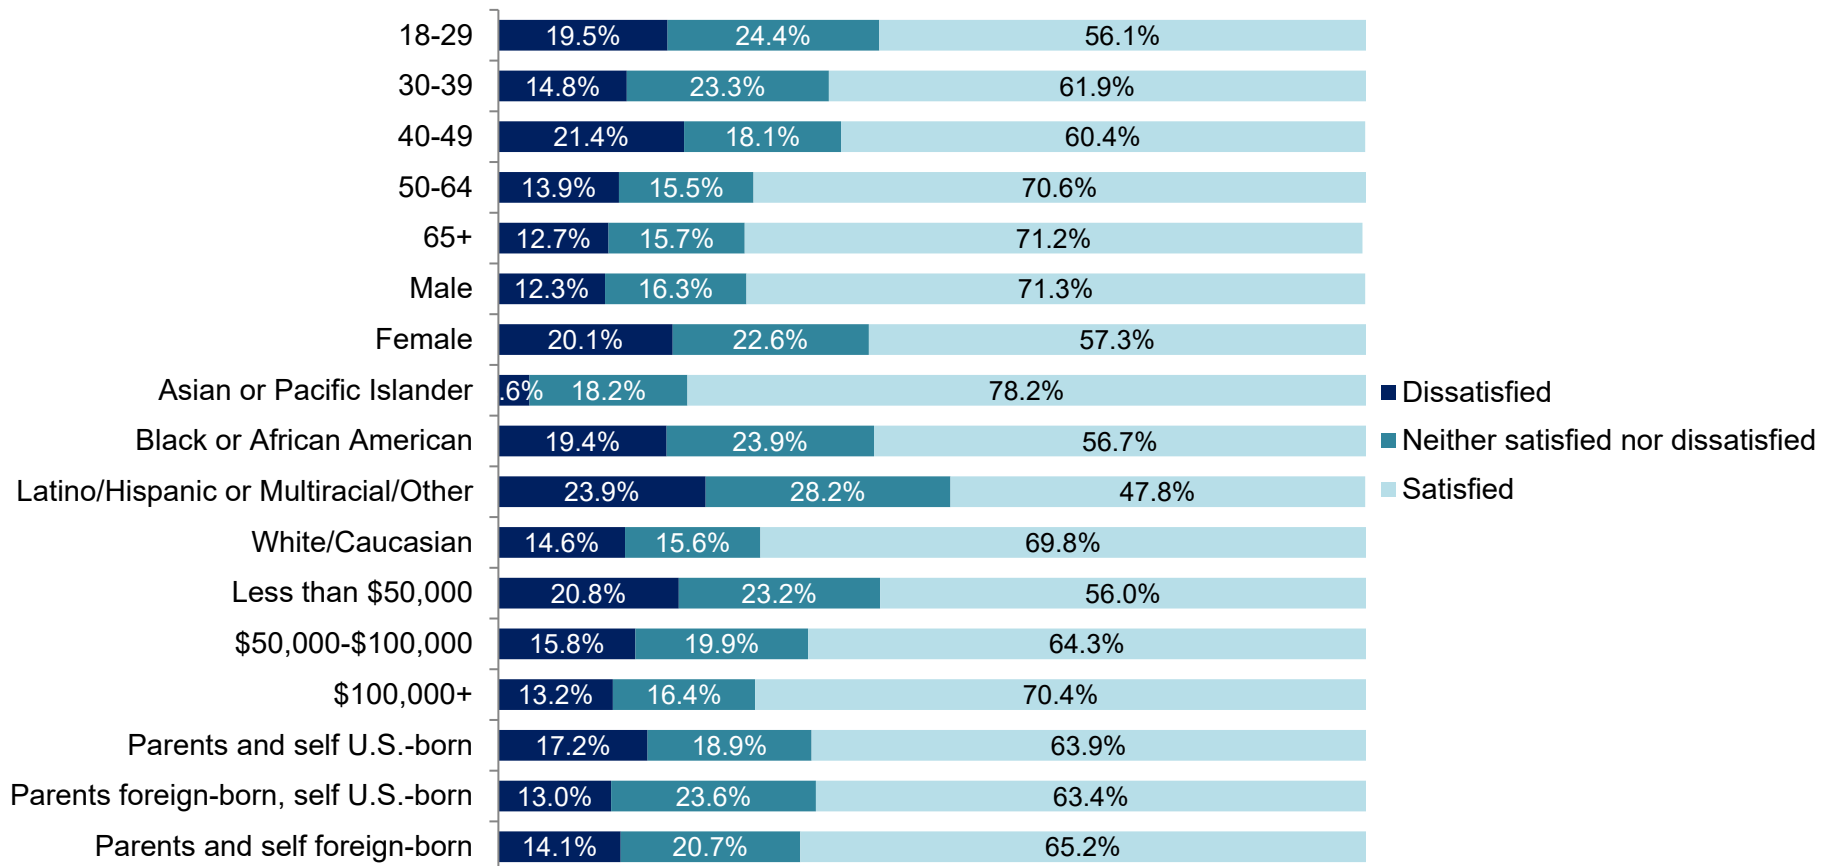

In general, 64% of residents are satisfied with the tap water quality in their homes

Q17: In general, are you satisfied or dissatisfied with the quality of tap water in your home?

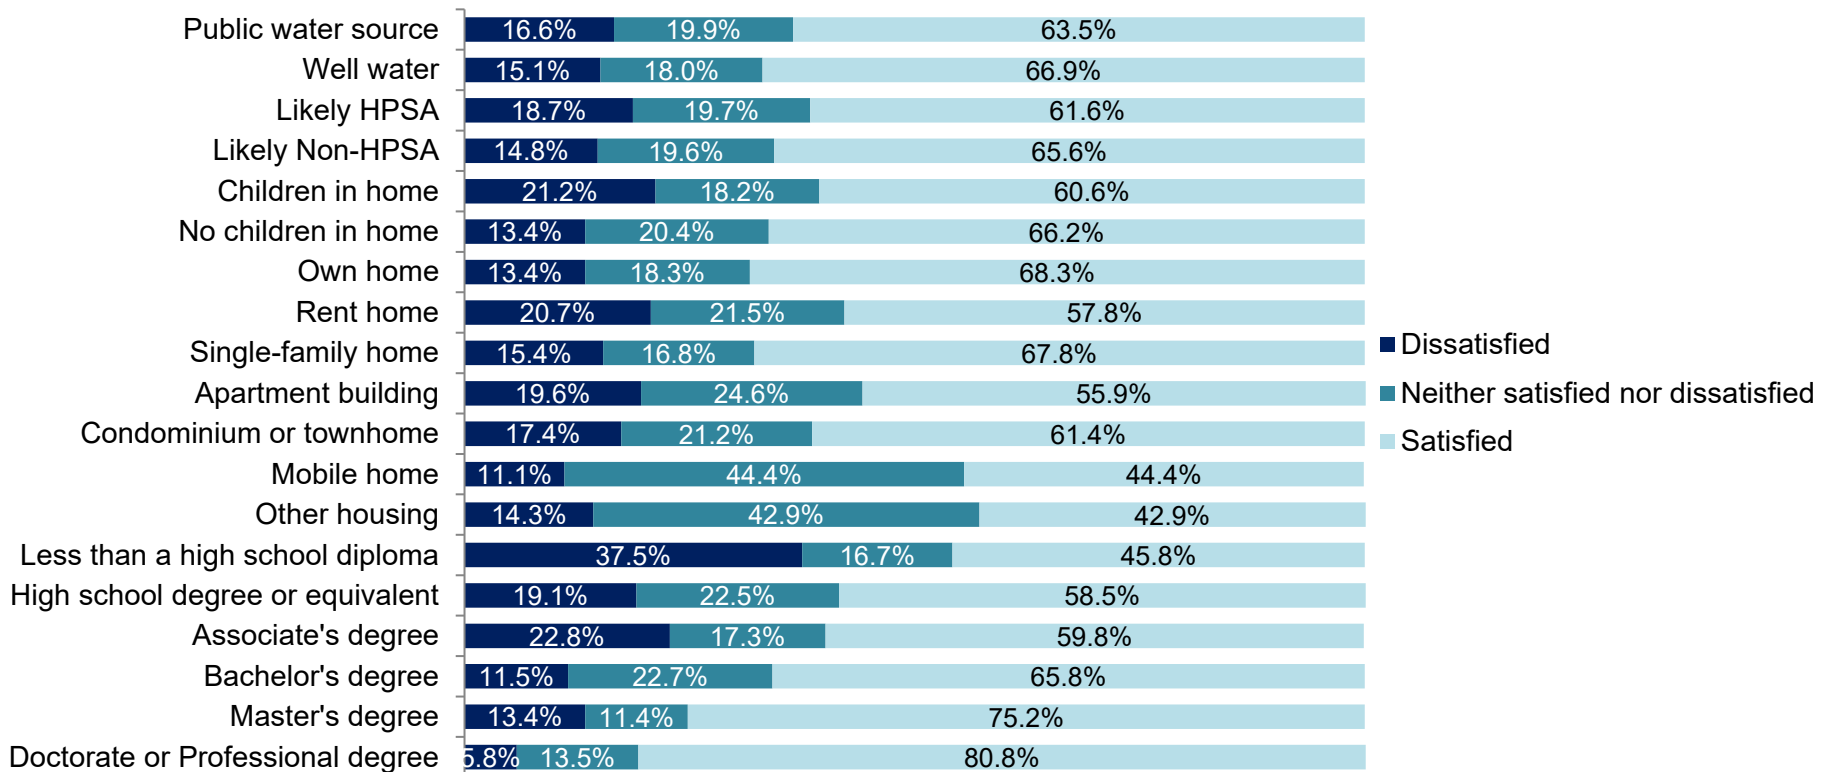

Satisfaction with home tap water quality is higher among residents who are older, male, White, Asian, or higher-income

Q17: In general, are you satisfied or dissatisfied with the quality of tap water in your home?

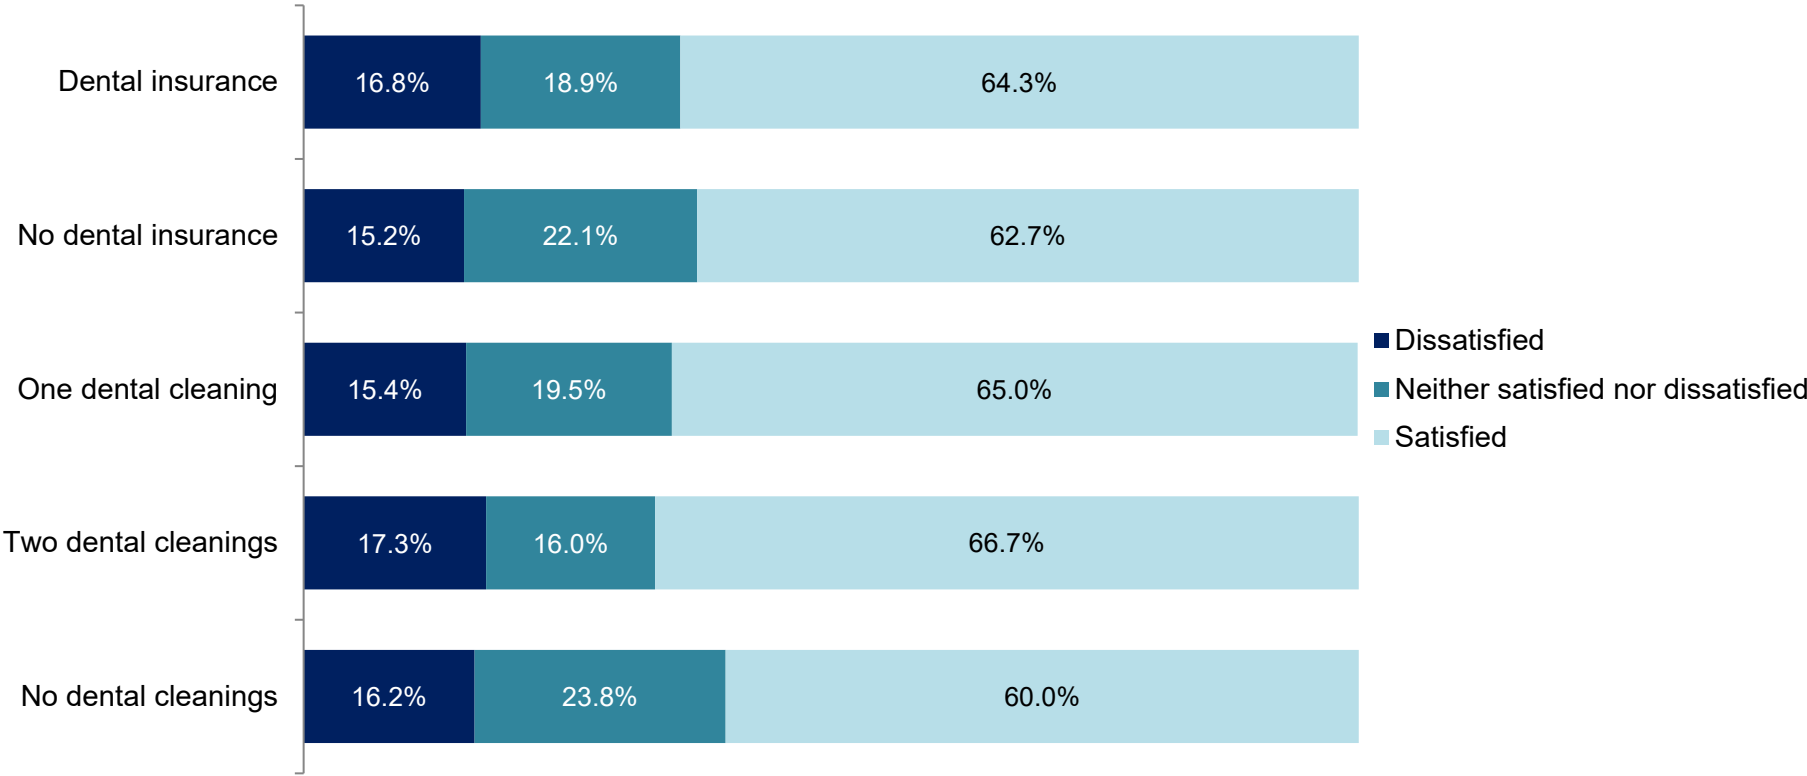

Satisfaction with home tap water quality is higher among residents who are college-educated or homeowners

Q17: In general, are you satisfied or dissatisfied with the quality of tap water in your home?

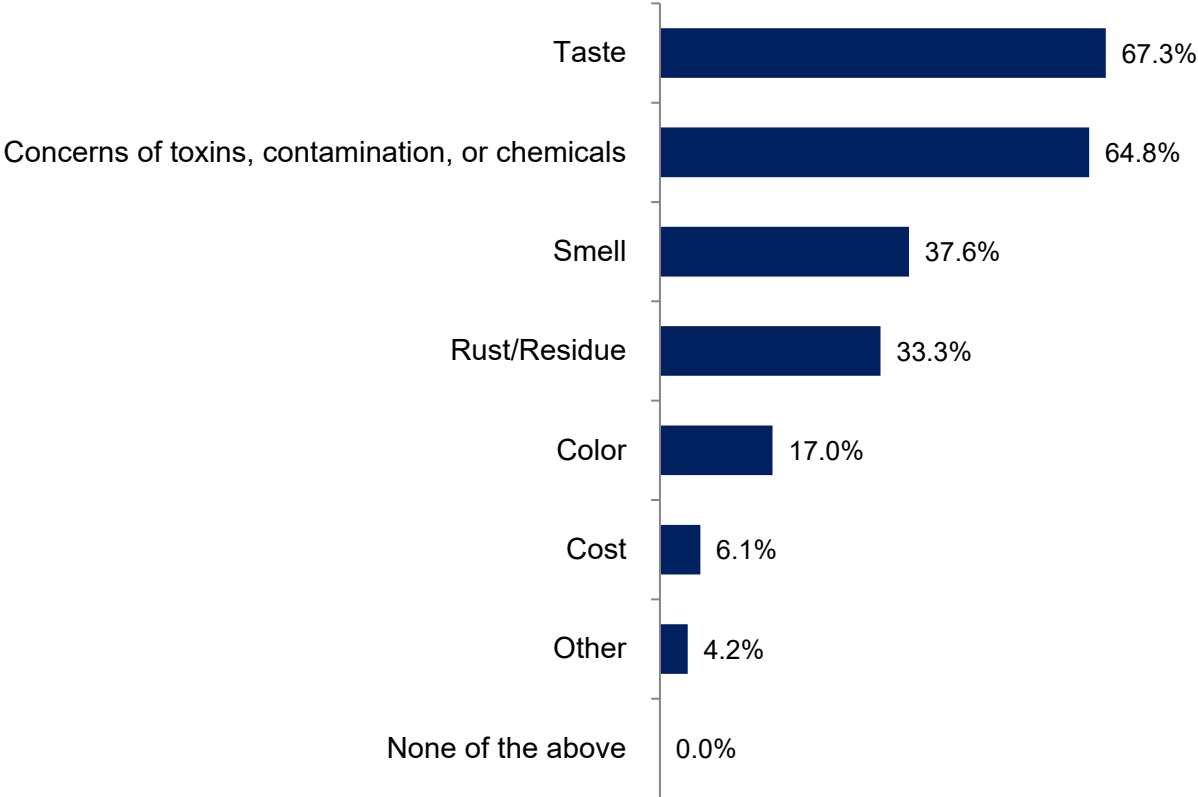

There is little difference in satisfaction with home tap water quality among those with dental insurance and dental cleaning frequency

Q17: In general, are you satisfied or dissatisfied with the quality of tap water in your home?

Taste and concerns about toxins, contamination, or chemicals are the top reasons why residents are dissatisfied with their home's tap water quality

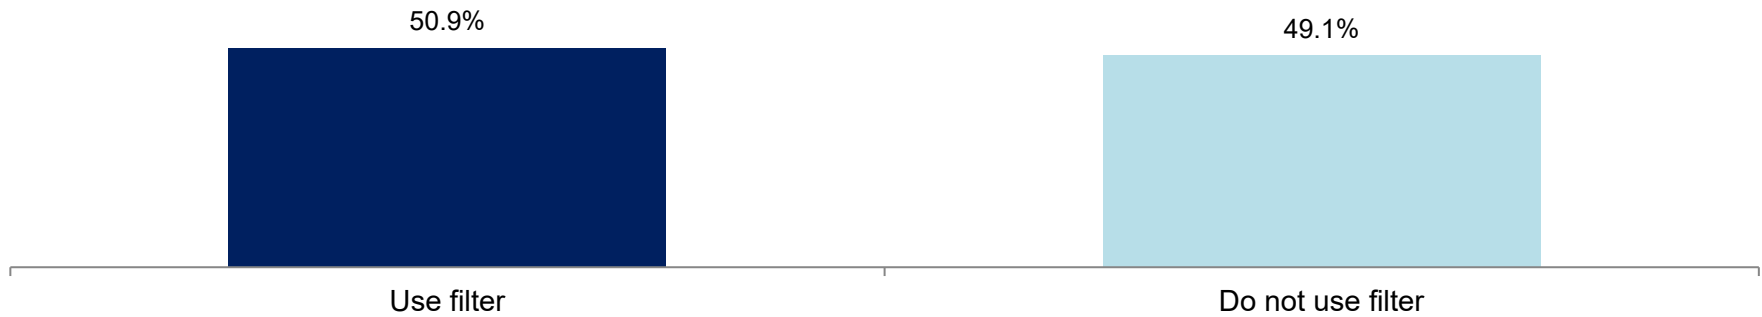

Q18: What aspects of your home's tap water quality are you dissatisfied with? Select all that apply.
[ASK AMONG RESPONDENTS WHO WERE DISSATISFIED WITH WATER QUALITY]

N = 165; differences should be interpreted with caution due to small sample size

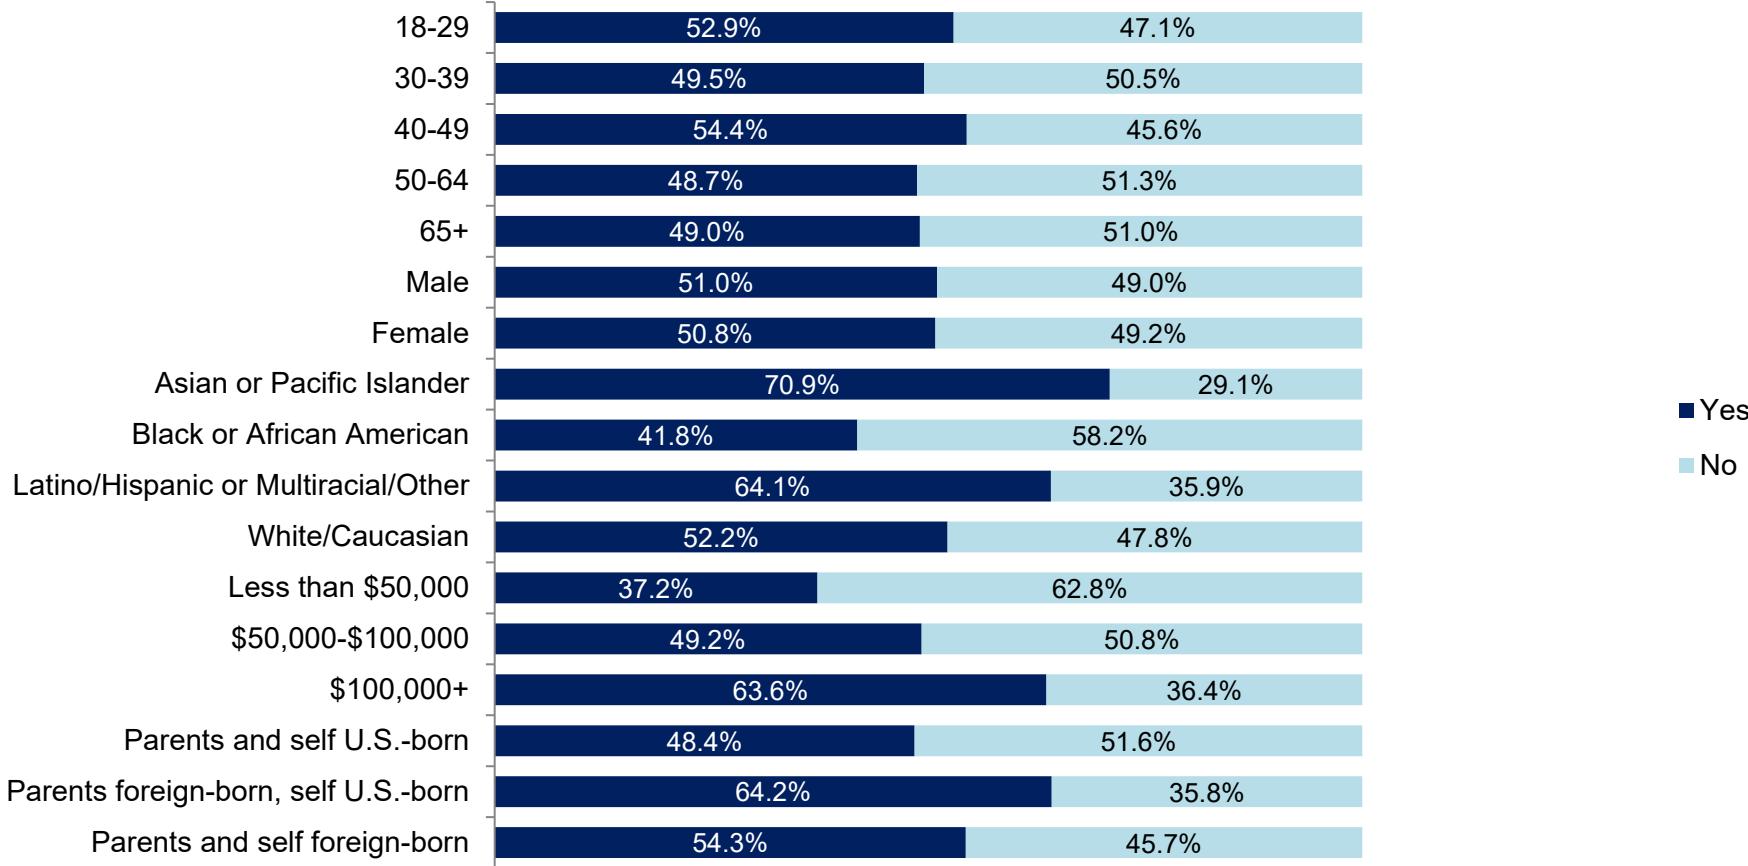

About half of Maryland residents are using some kind of water filtration system in their homes

Q19: Do you currently use any kind of filtration system for your tap water such as a water pitcher, home filtration system, or faucet filter attachment?

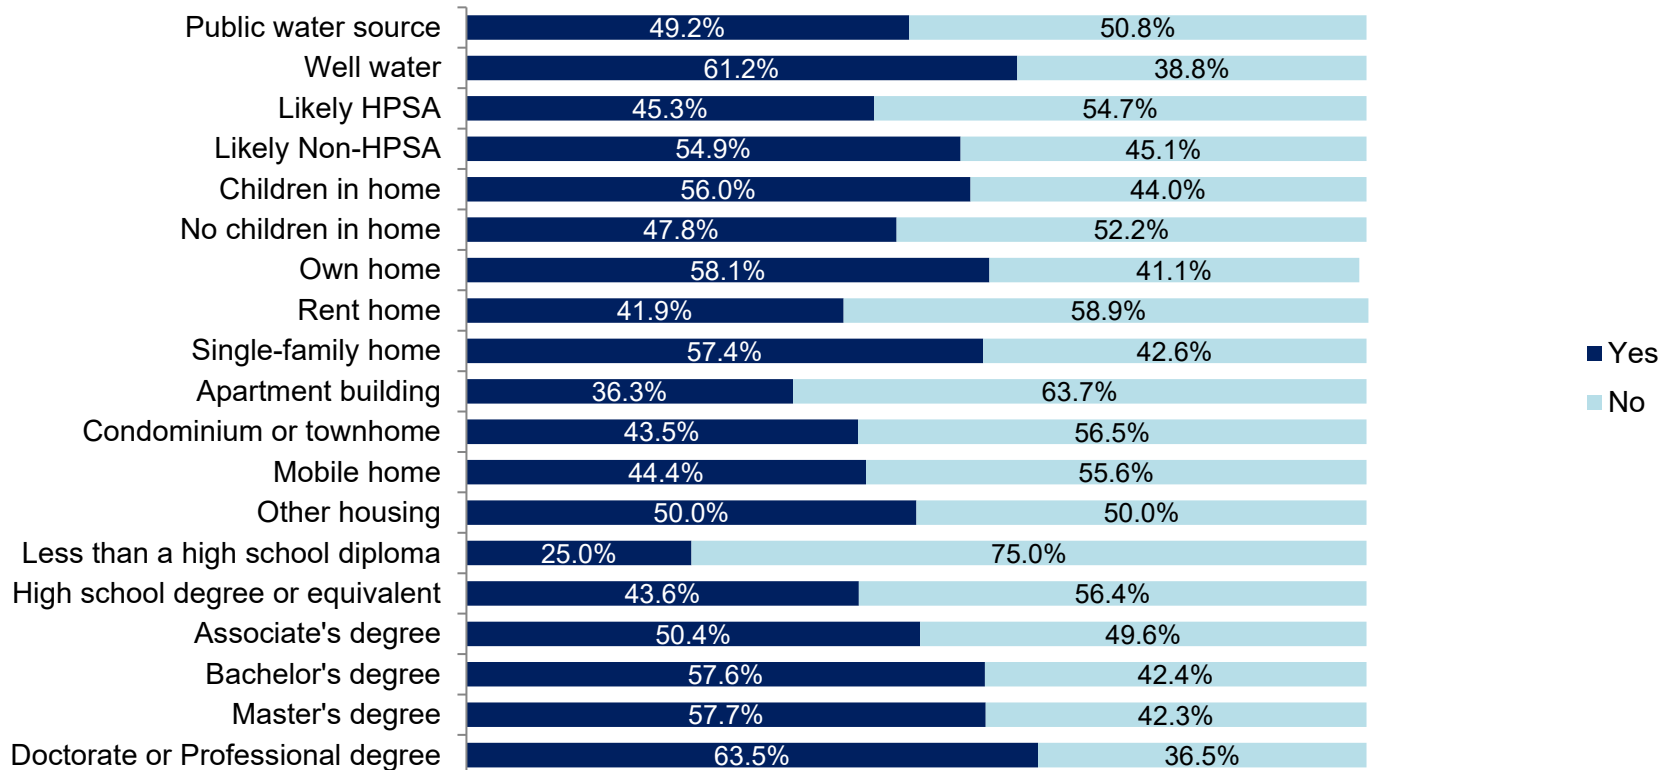

Filtration usage is higher among Asian, White, or high-income residents

Q19: Do you currently use any kind of filtration system for your tap water such as a water pitcher, home filtration system, or faucet filter attachment?

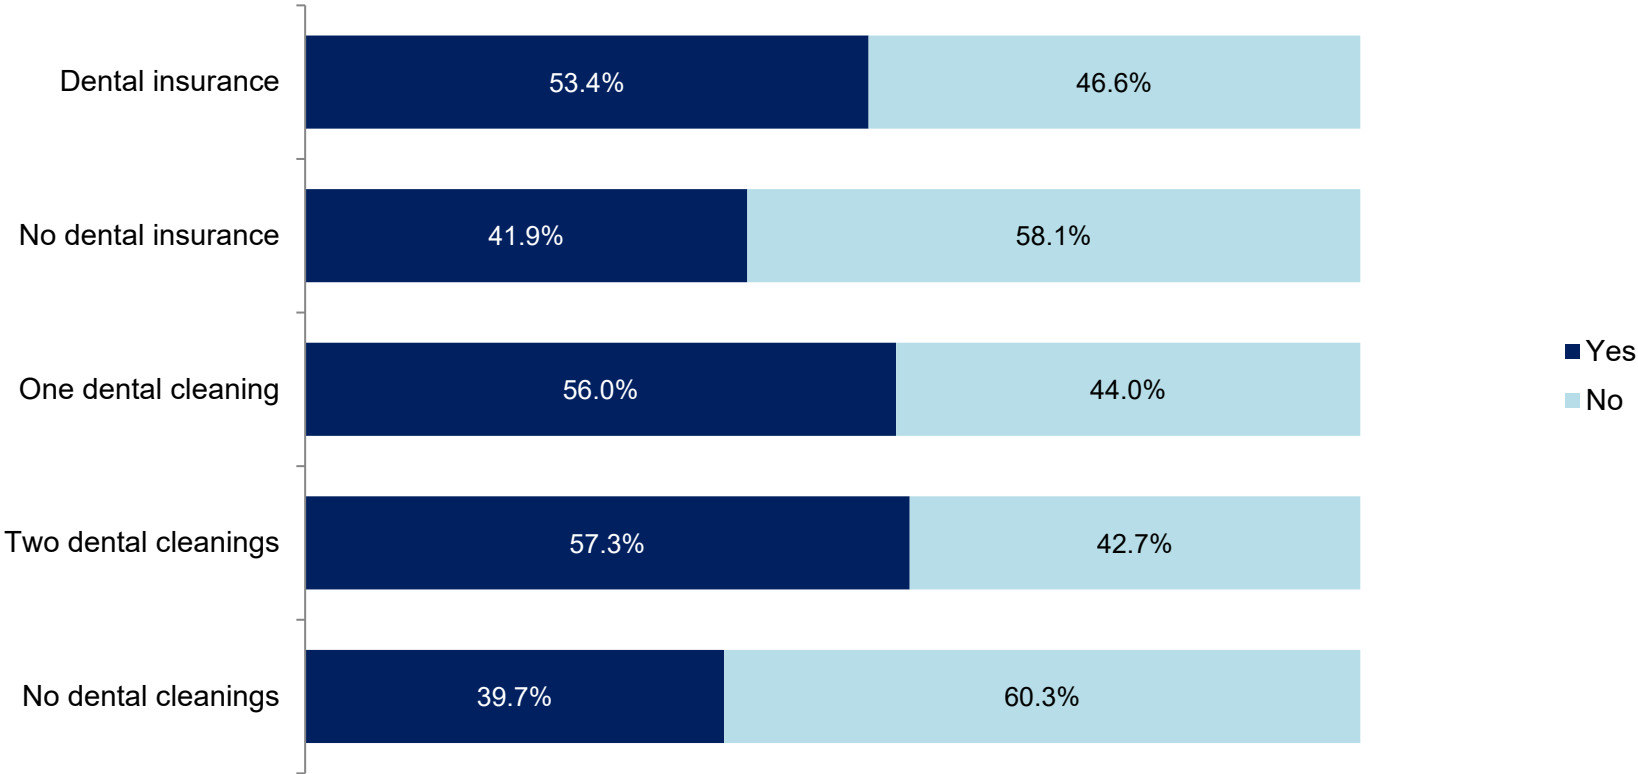

Filtration usage is higher among college-educated and homeowners

Q19: Do you currently use any kind of filtration system for your tap water such as a water pitcher, home filtration system, or faucet filter attachment?

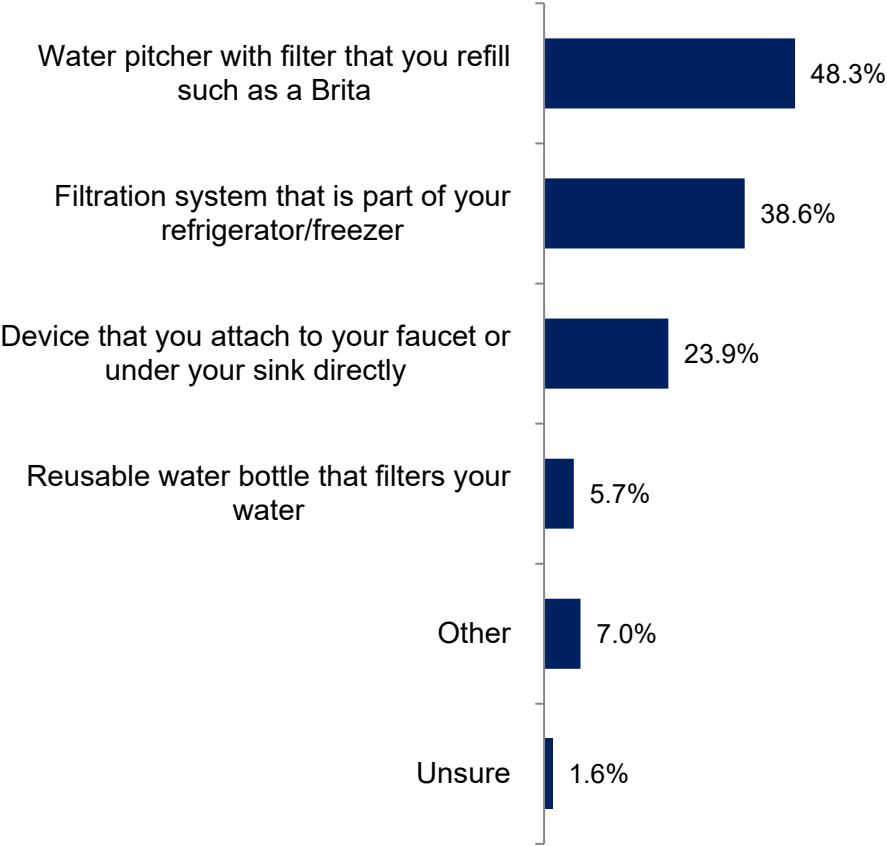

Filtration usage is higher among those with dental insurance coverage or regular cleanings

Q19: Do you currently use any kind of filtration system for your tap water such as a water pitcher, home filtration system, or faucet filter attachment?

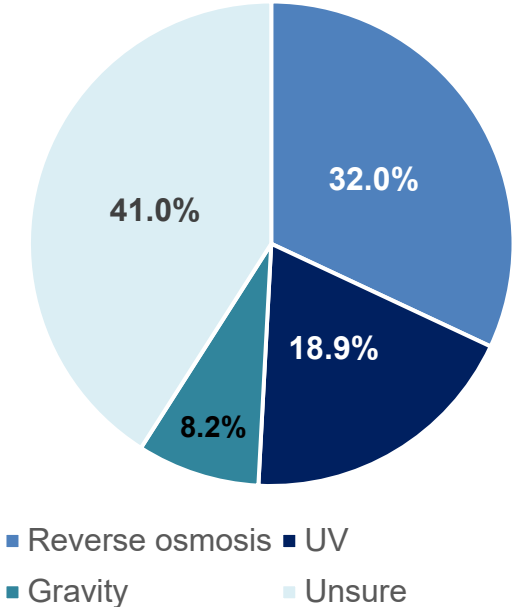

Water pitcher and refrigerator filter systems are the most used filtration options; 41% who use under-the-sink filters do not know the specific kind of filter

Q20: What kind of filtration system do you use in your home? Select all that apply.

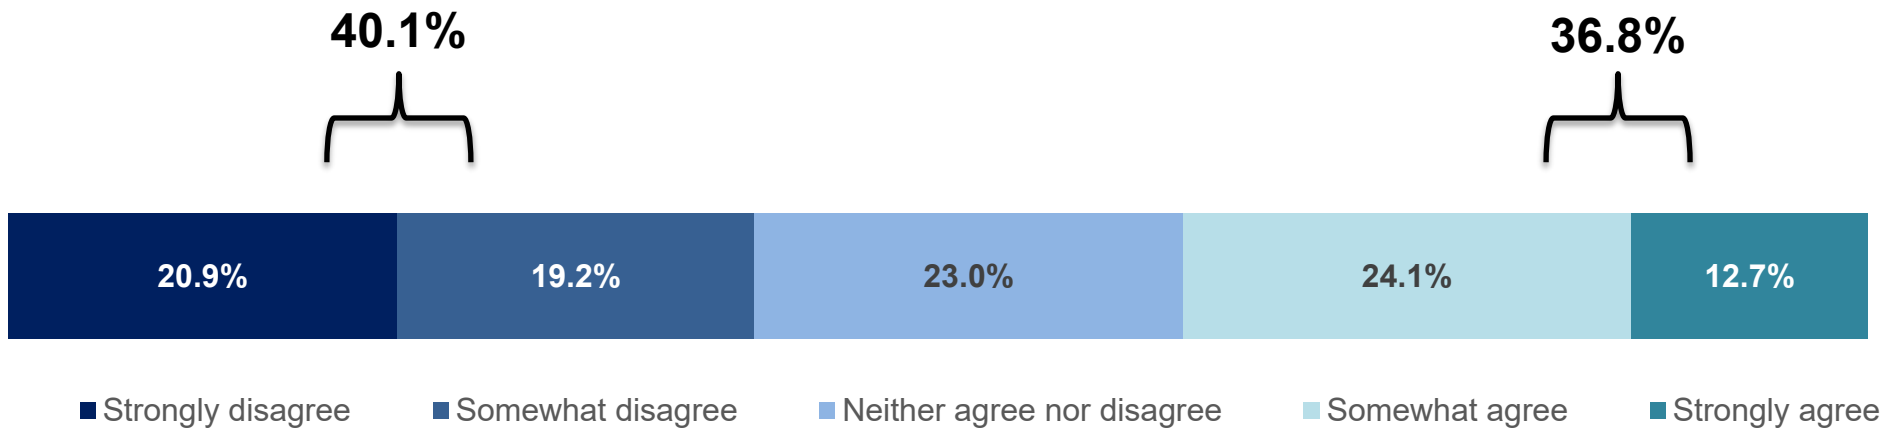

Under the sink filter type

37% are concerned with the safety of their home's tap water

For the following statements, please indicate the extent to which you agree or disagree.

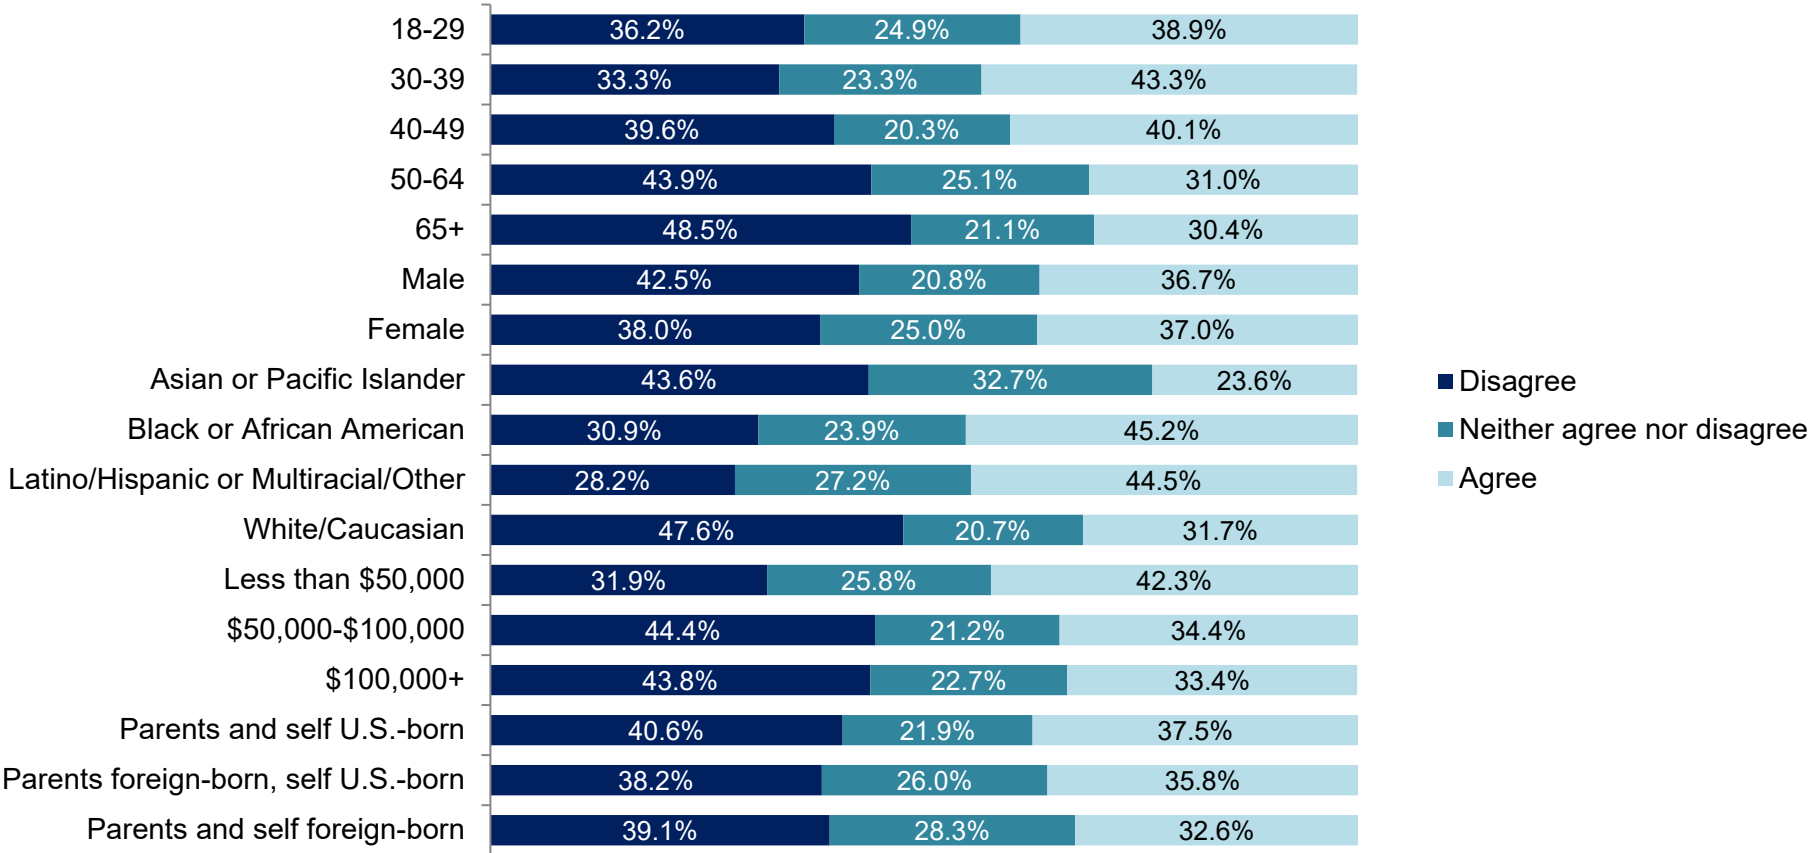

Q22: I am concerned with the safety of my home's tap water.

Concern with the safety of home tap water is higher among residents who are younger, Black, Latino/multiracial, or lower-income

For the following statements, please indicate the extent to which you agree or disagree.

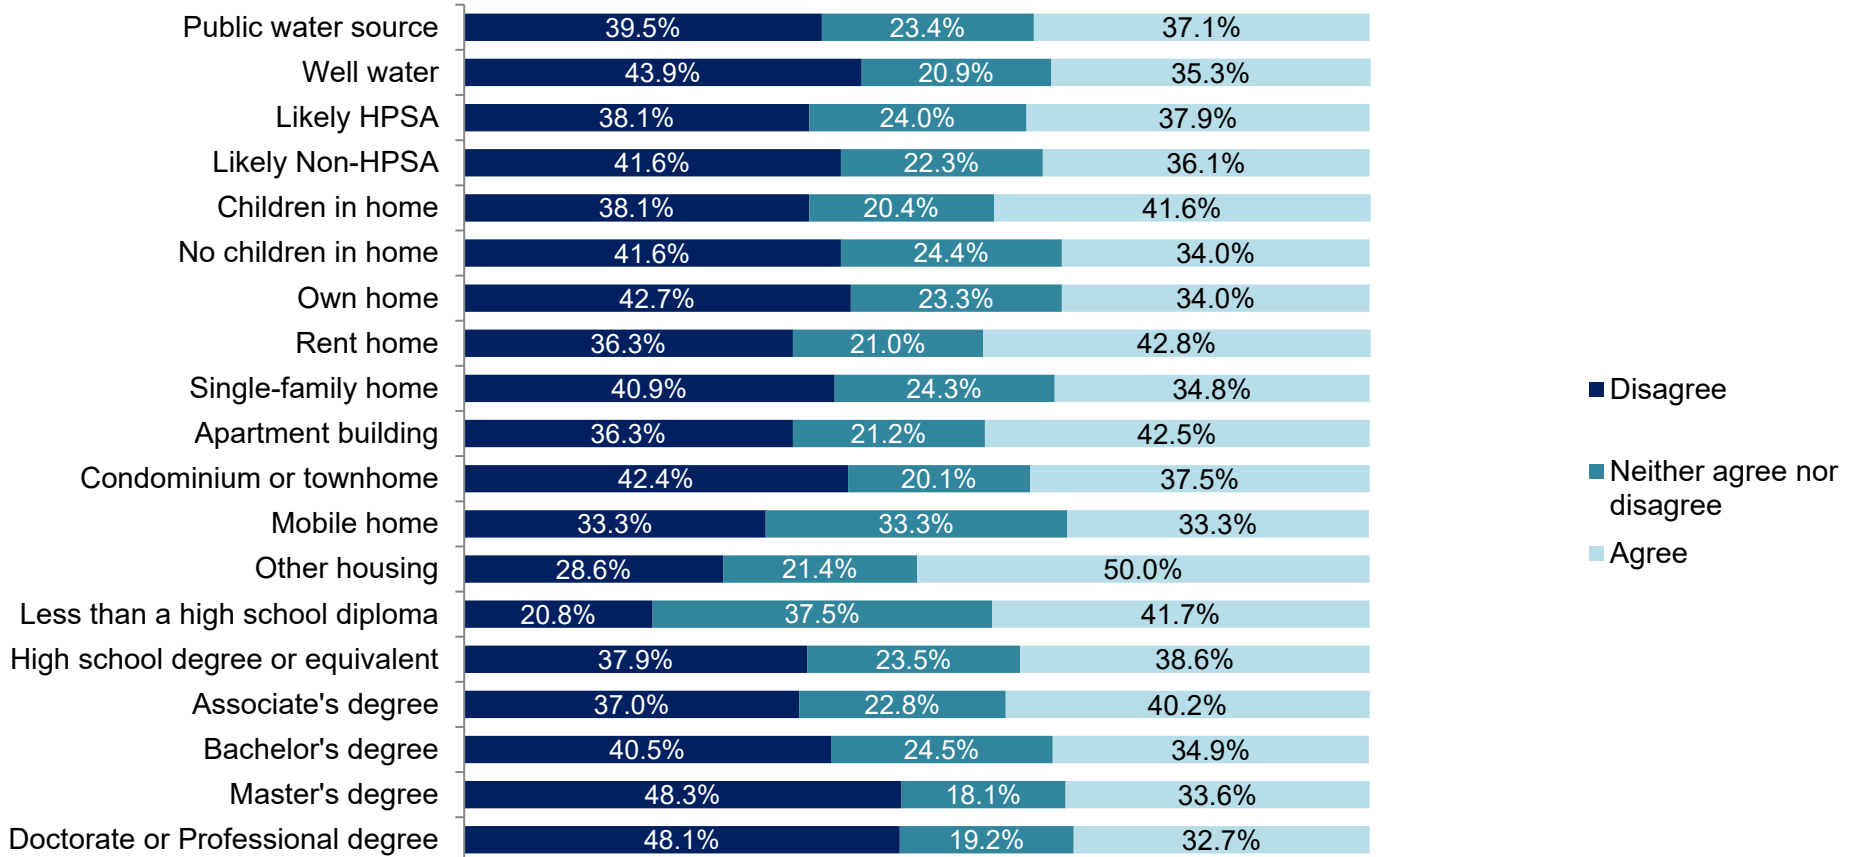

Q22: I am concerned with the safety of my home's tap water.

Concern about home tap water safety is higher among less-educated residents

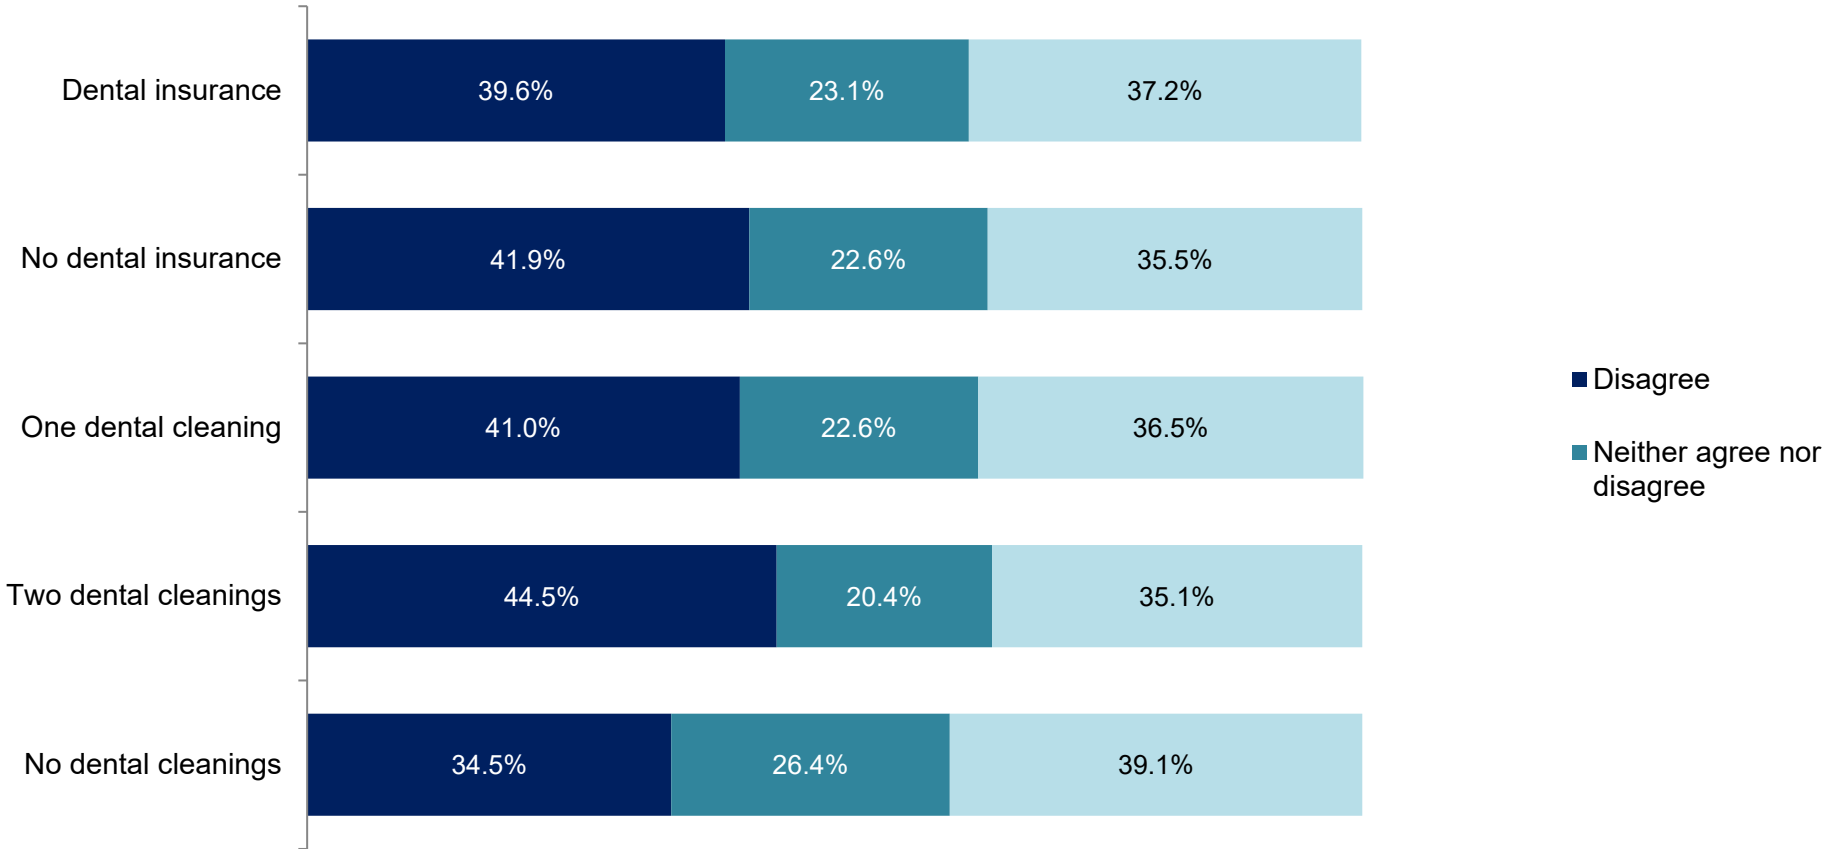

For the following statements, please indicate the extent to which you agree or disagree.

Q22: I am concerned with the safety of my home's tap water.

Tap water safety concerns are relatively equal by dental insurance coverage

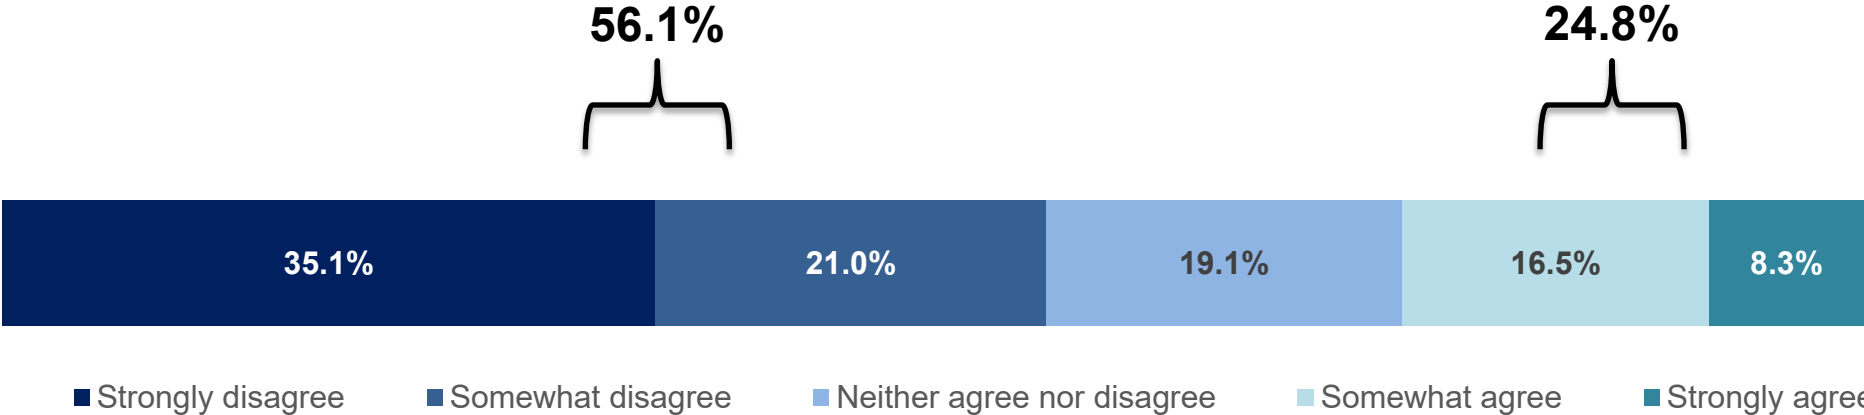

For the following statements, please indicate the extent to which you agree or disagree.
Q22: I am concerned with the safety of my home's tap water.

25% think their home's tap water is unsafe to drink

For the following statements, please indicate the extent to which you agree or disagree.

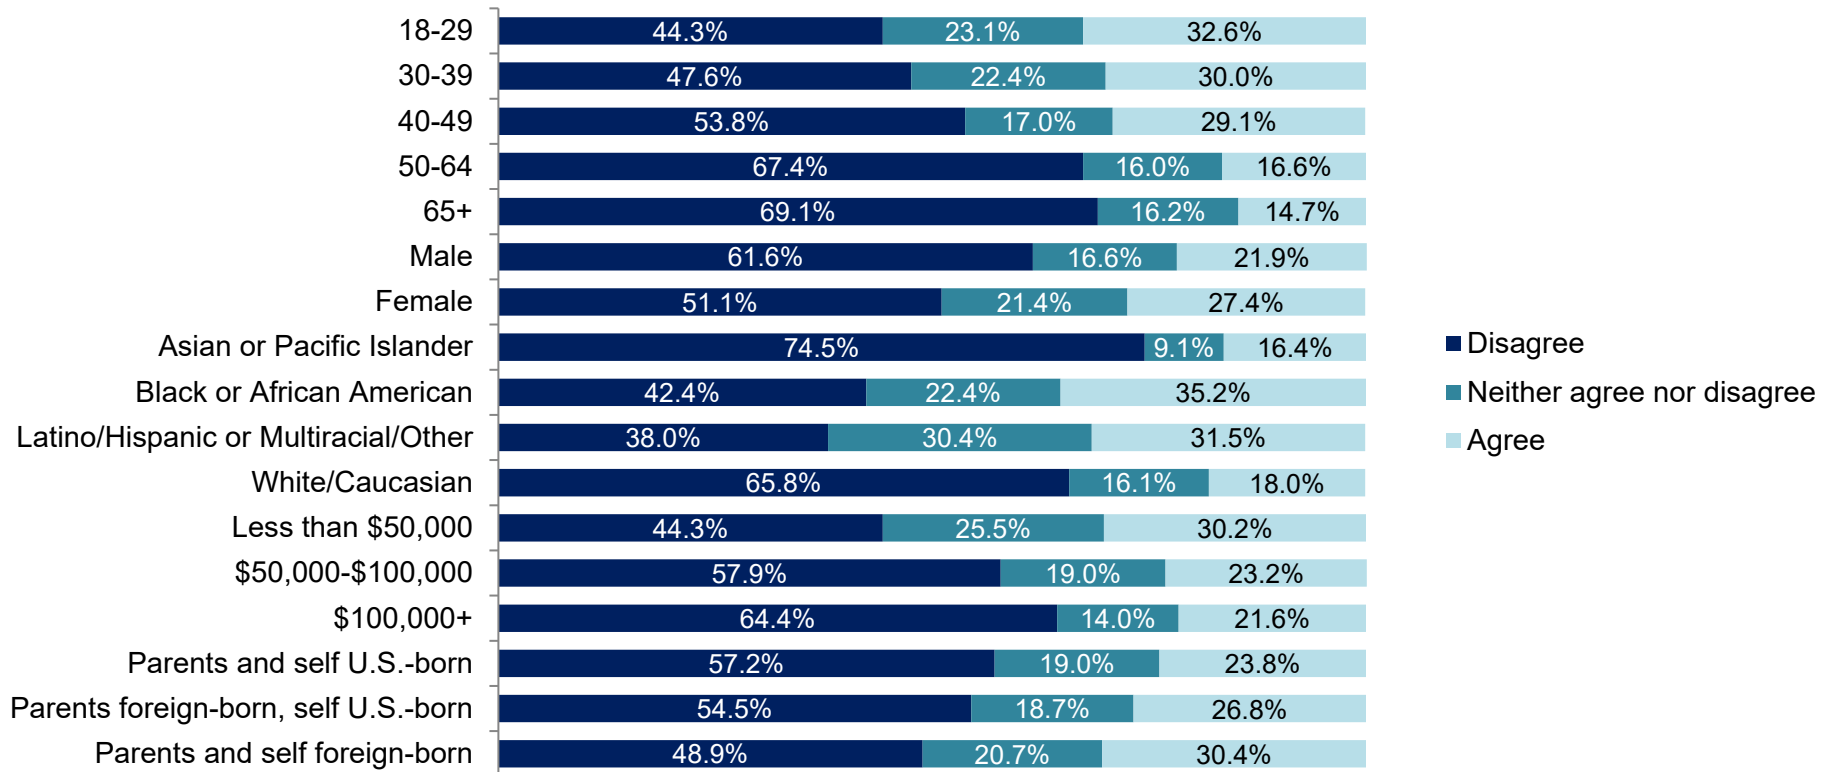

Q23: I think my home's tap water is unsafe to drink.

Residents who are younger, Black, Latino/multiracial, or lower-income are more likely to think their tap water is unsafe to drink

For the following statements, please indicate the extent to which you agree or disagree.

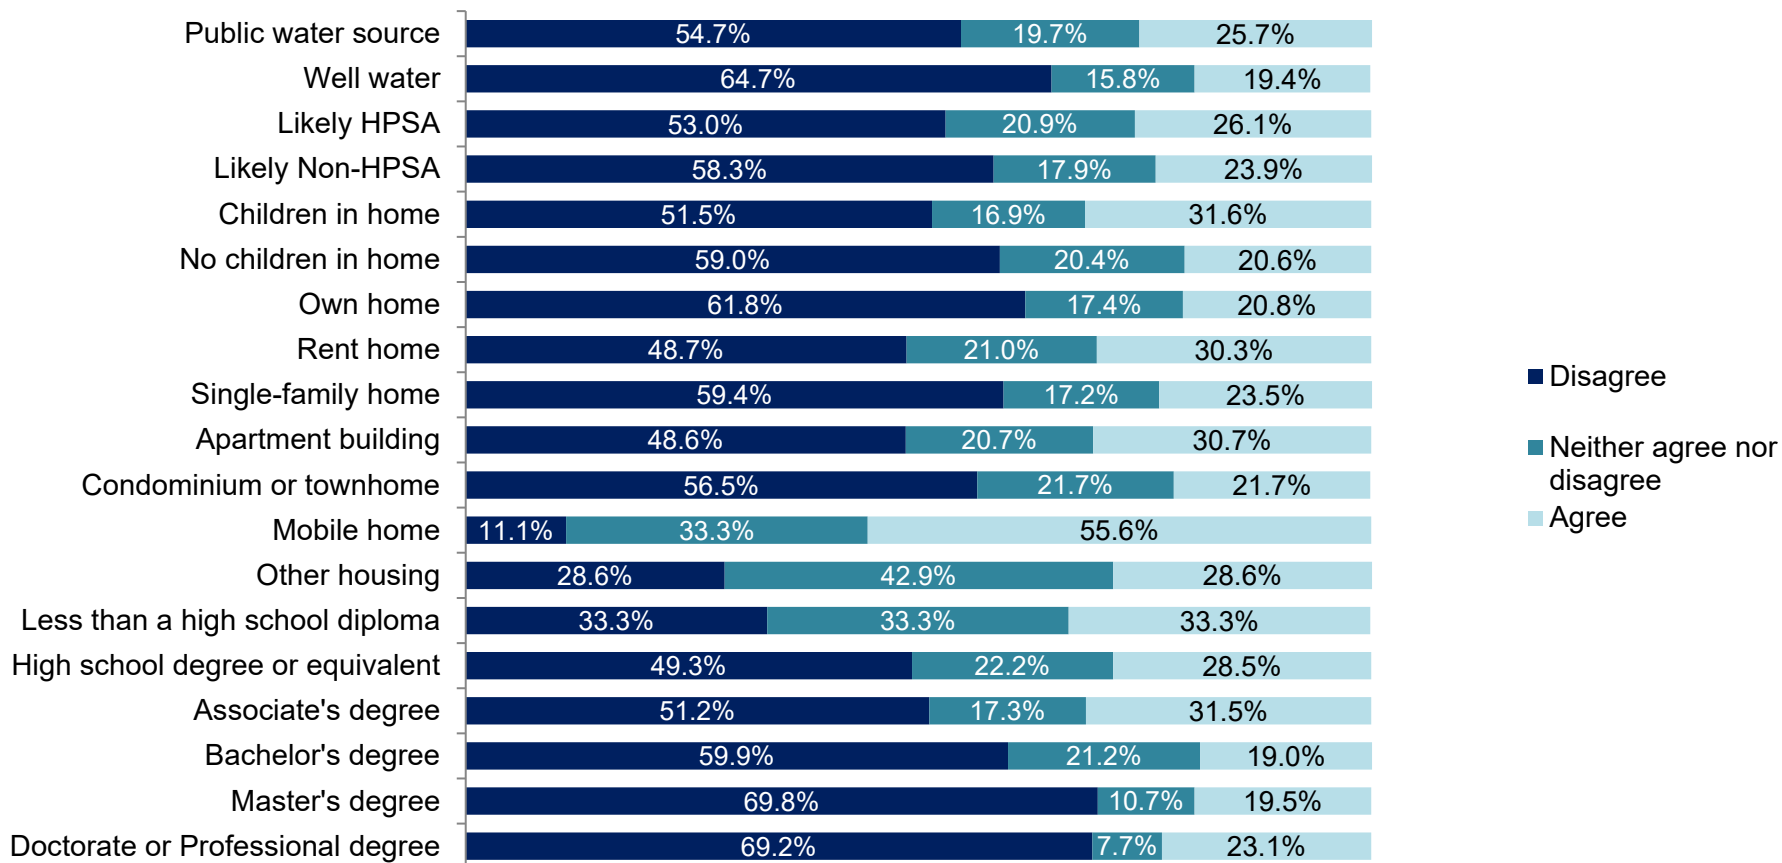

Q23: I think my home's tap water is unsafe to drink.

Residents who have well water, own their homes, or are college-educated are less likely to think their tap water is unsafe to drink

For the following statements, please indicate the extent to which you agree or disagree.

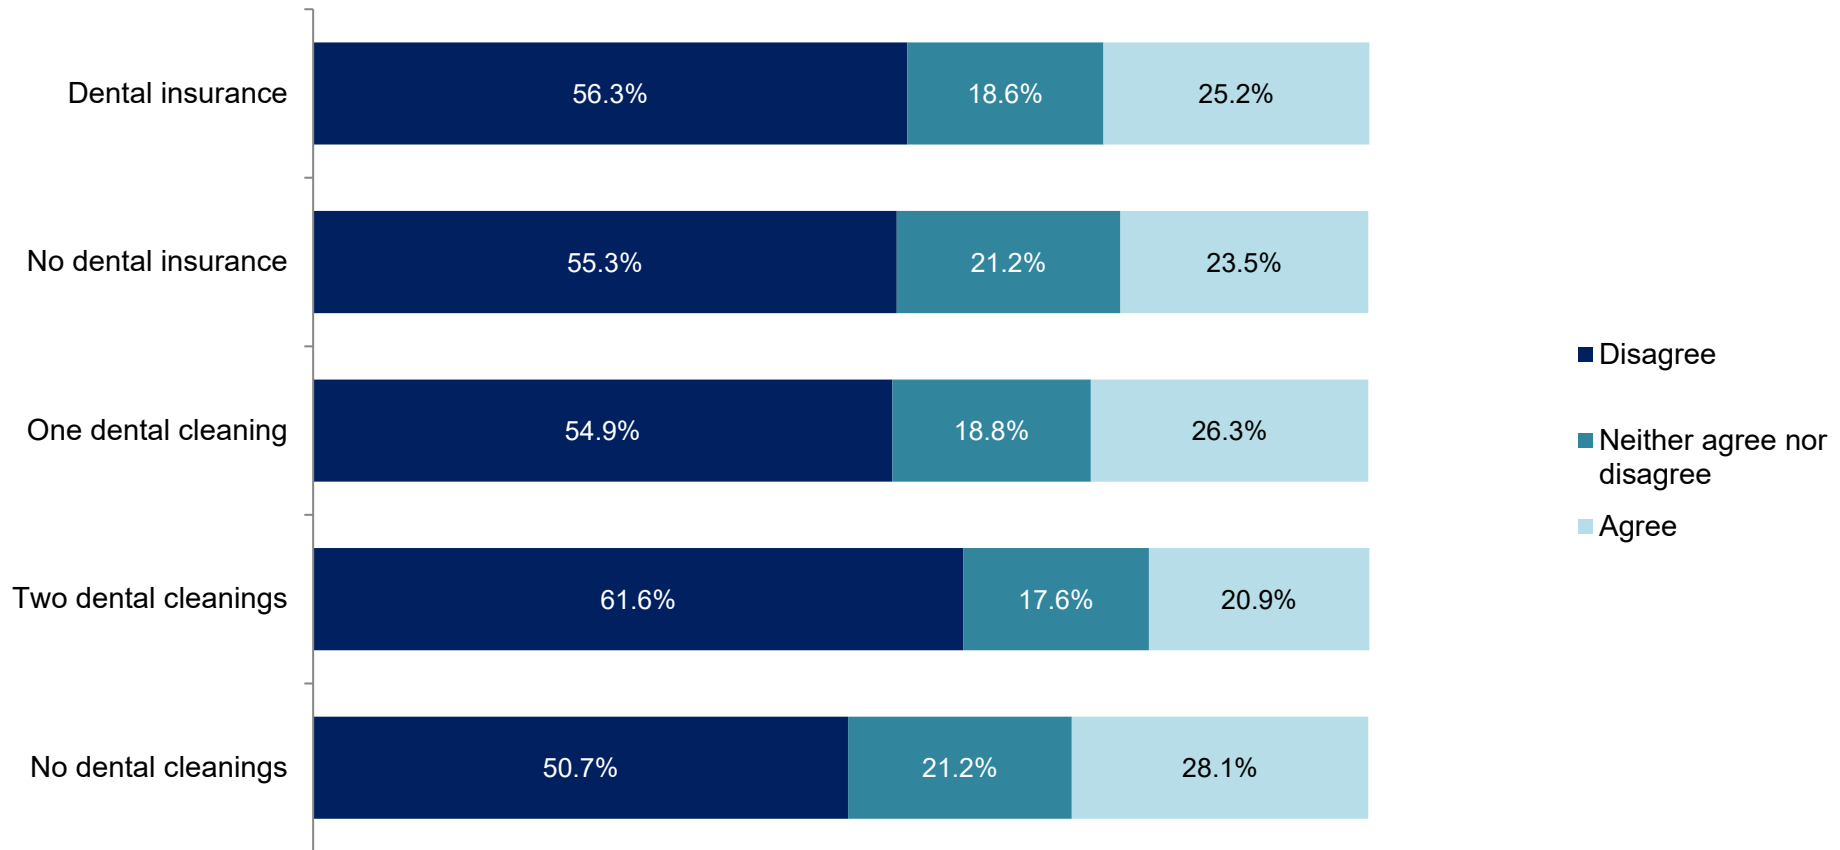

Q23: I think my home's tap water is unsafe to drink.

Perceptions of tap water safety are relatively equal by dental insurance coverage; residents with regular dental cleanings are less likely to think tap water is unsafe

For the following statements, please indicate the extent to which you agree or disagree.

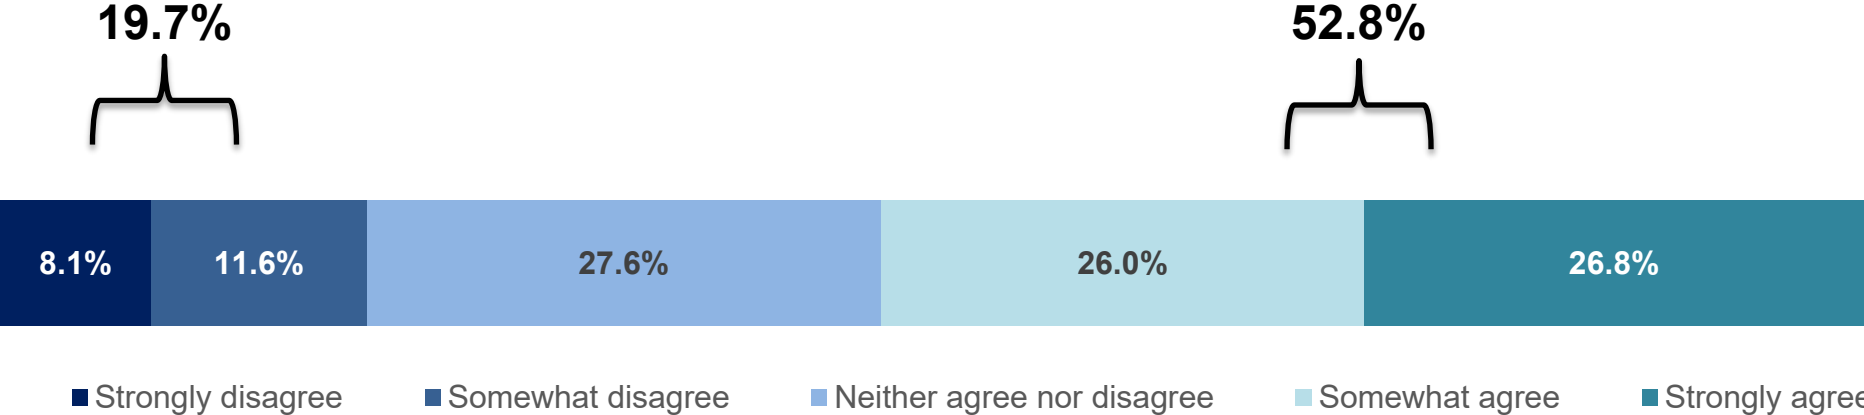

Q23: I think my home's tap water is unsafe to drink.

53% think bottled water is safer than their home's tap water

For the following statements, please indicate the extent to which you agree or disagree.

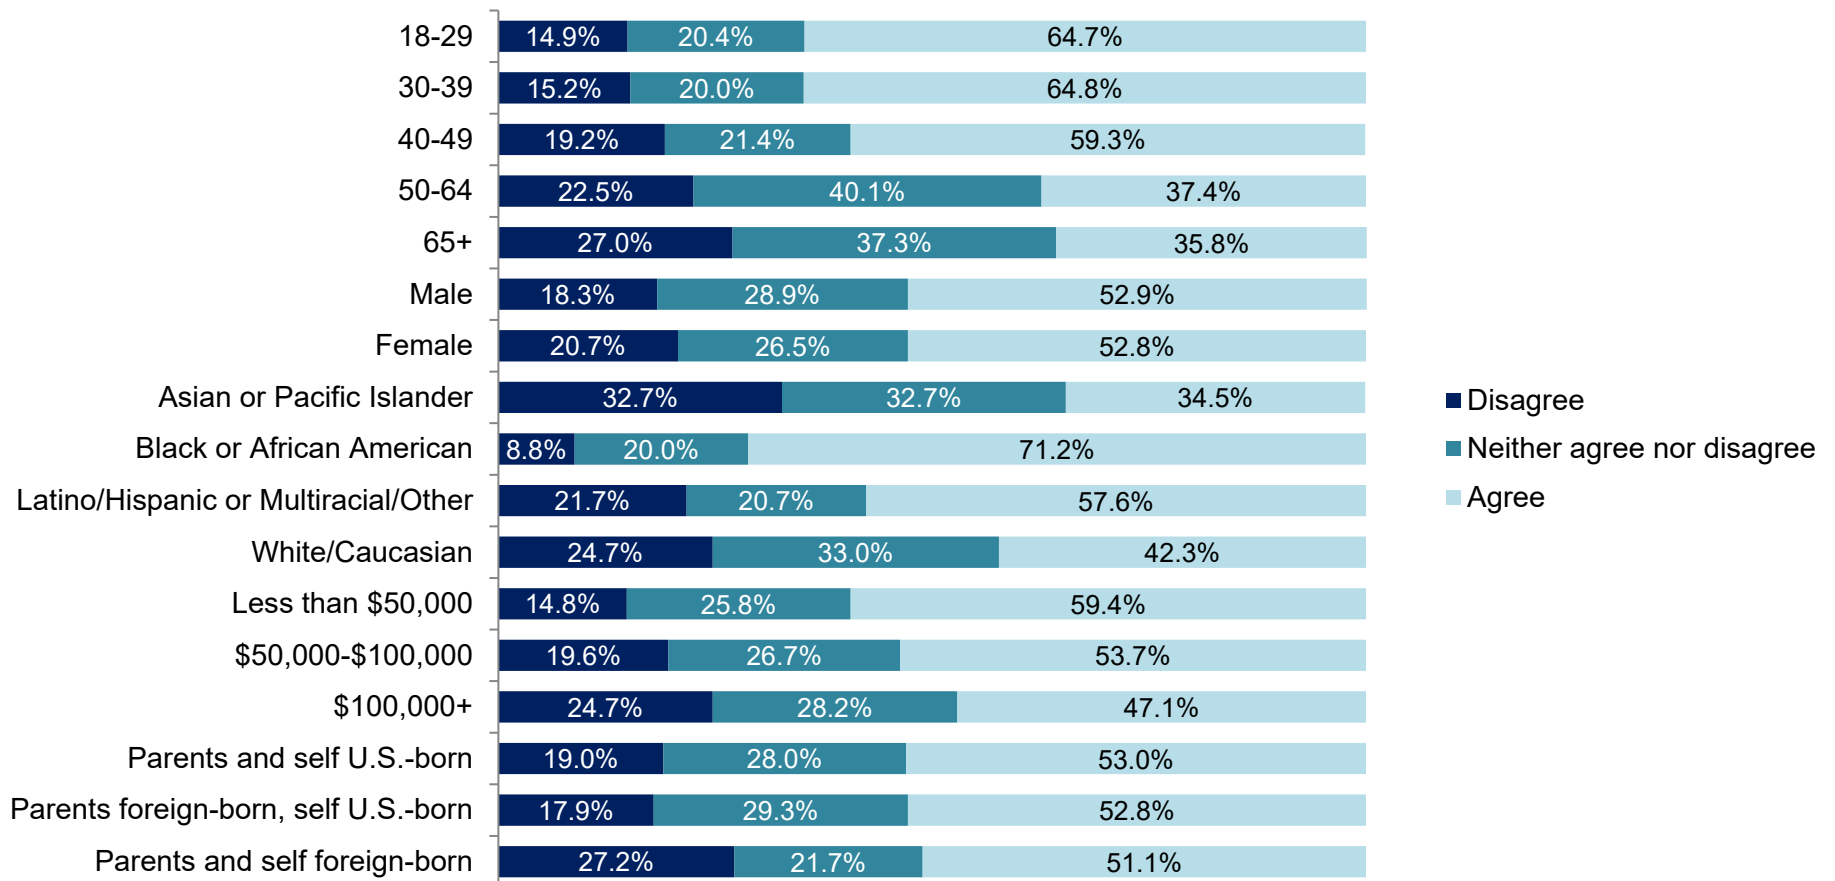

Q24: I think bottled water is safer than my home's tap water.

Belief that bottled water is safer than tap water is higher among residents who are younger, Black, or lower-income

For the following statements, please indicate the extent to which you agree or disagree.

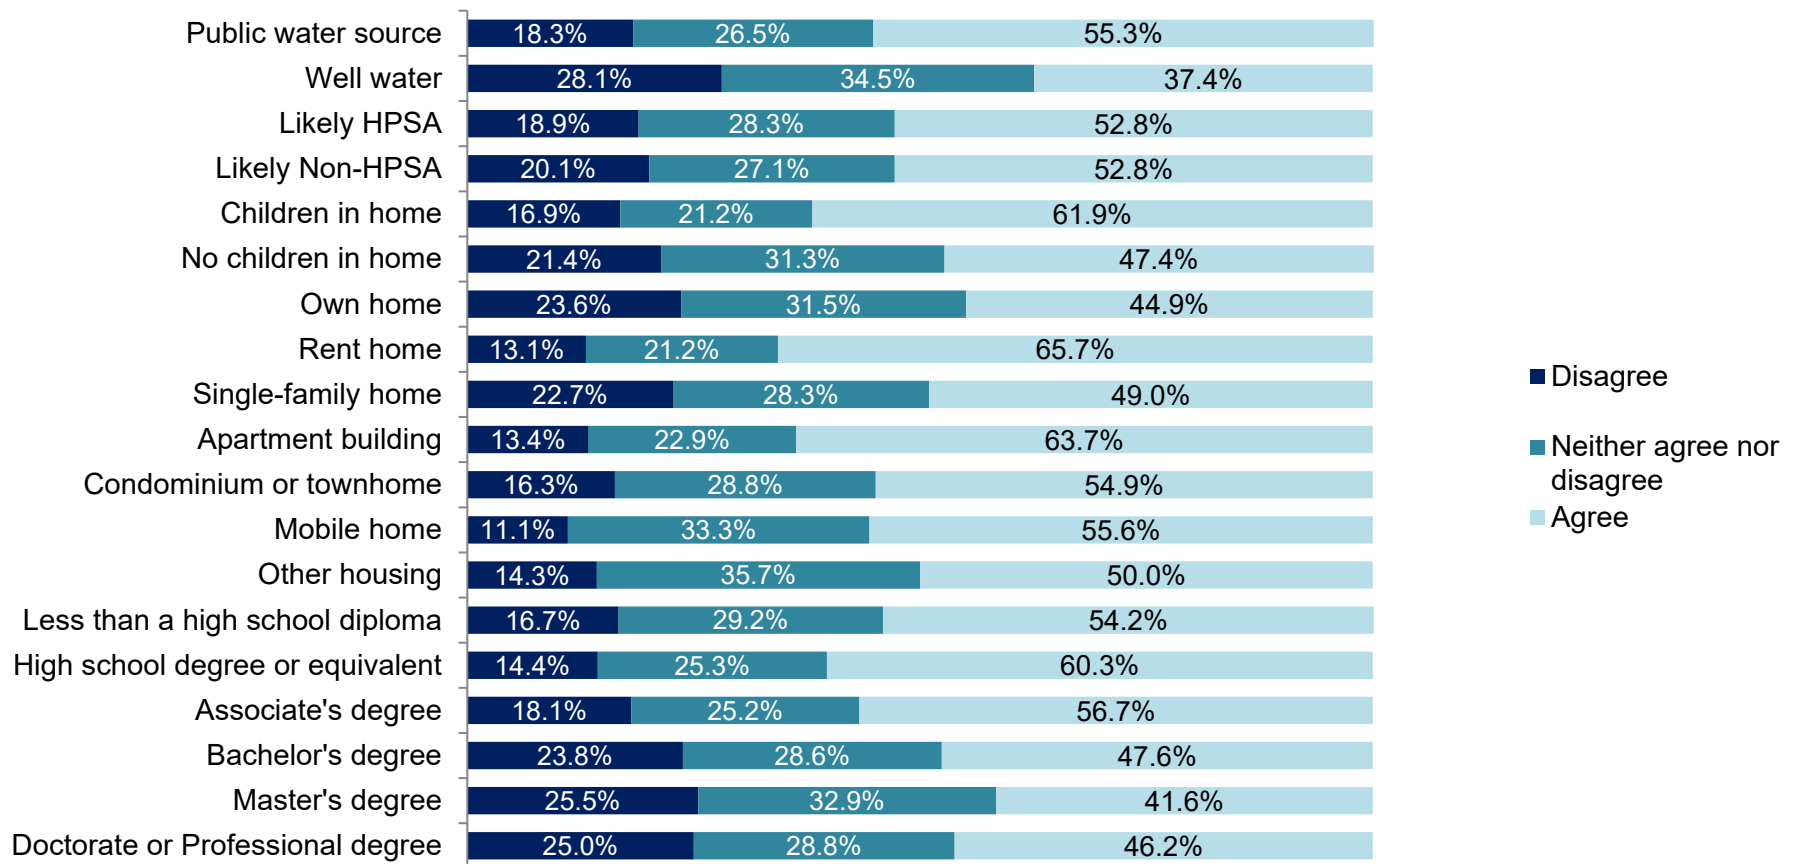

Q24: I think bottled water is safer than my home's tap water.

Belief that bottled water is safer than tap water is higher among residents with public water, renters, and lower-education

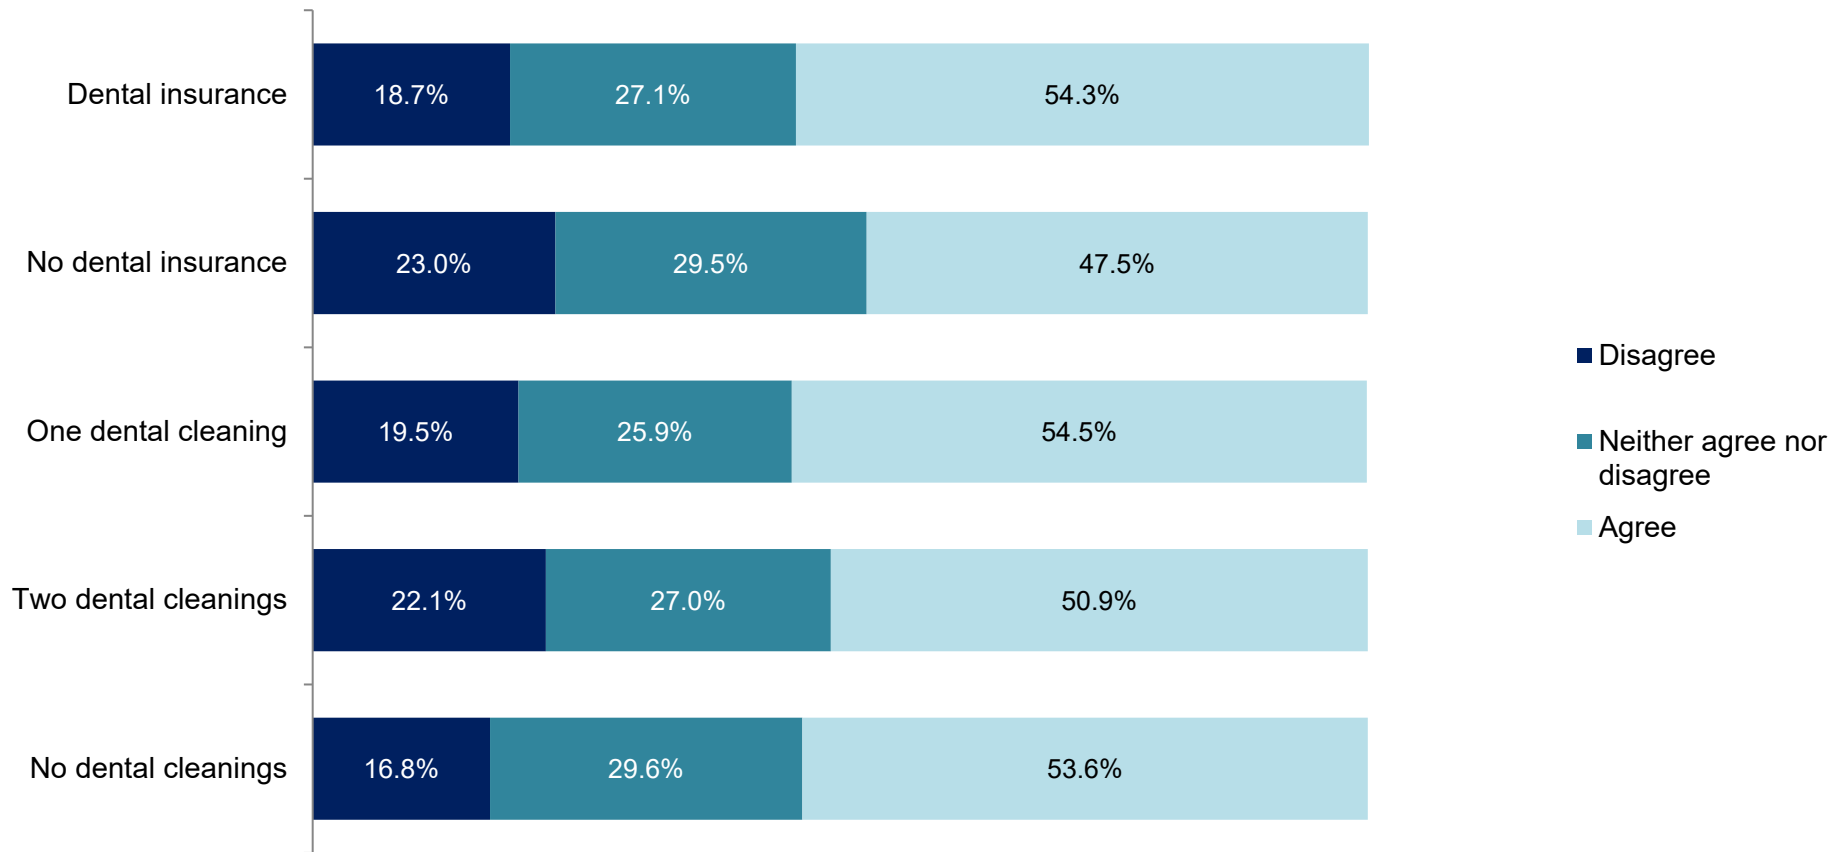

For the following statements, please indicate the extent to which you agree or disagree.

Q24: I think bottled water is safer than my home's tap water.

Comparisons of safety between bottled water and tap water are relatively equal by dental insurance coverage

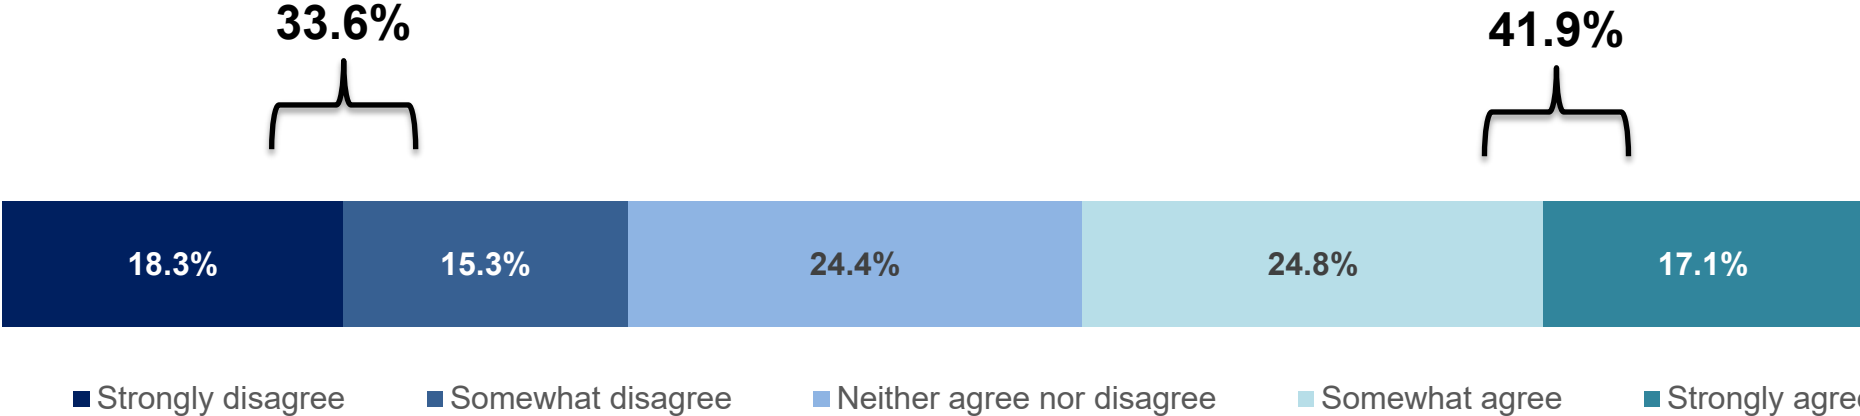

For the following statements, please indicate the extent to which you agree or disagree.
Q24: I think bottled water is safer than my home's tap water.

34% dislike the taste of tap water in their home

For the following statements, please indicate the extent to which you agree or disagree.

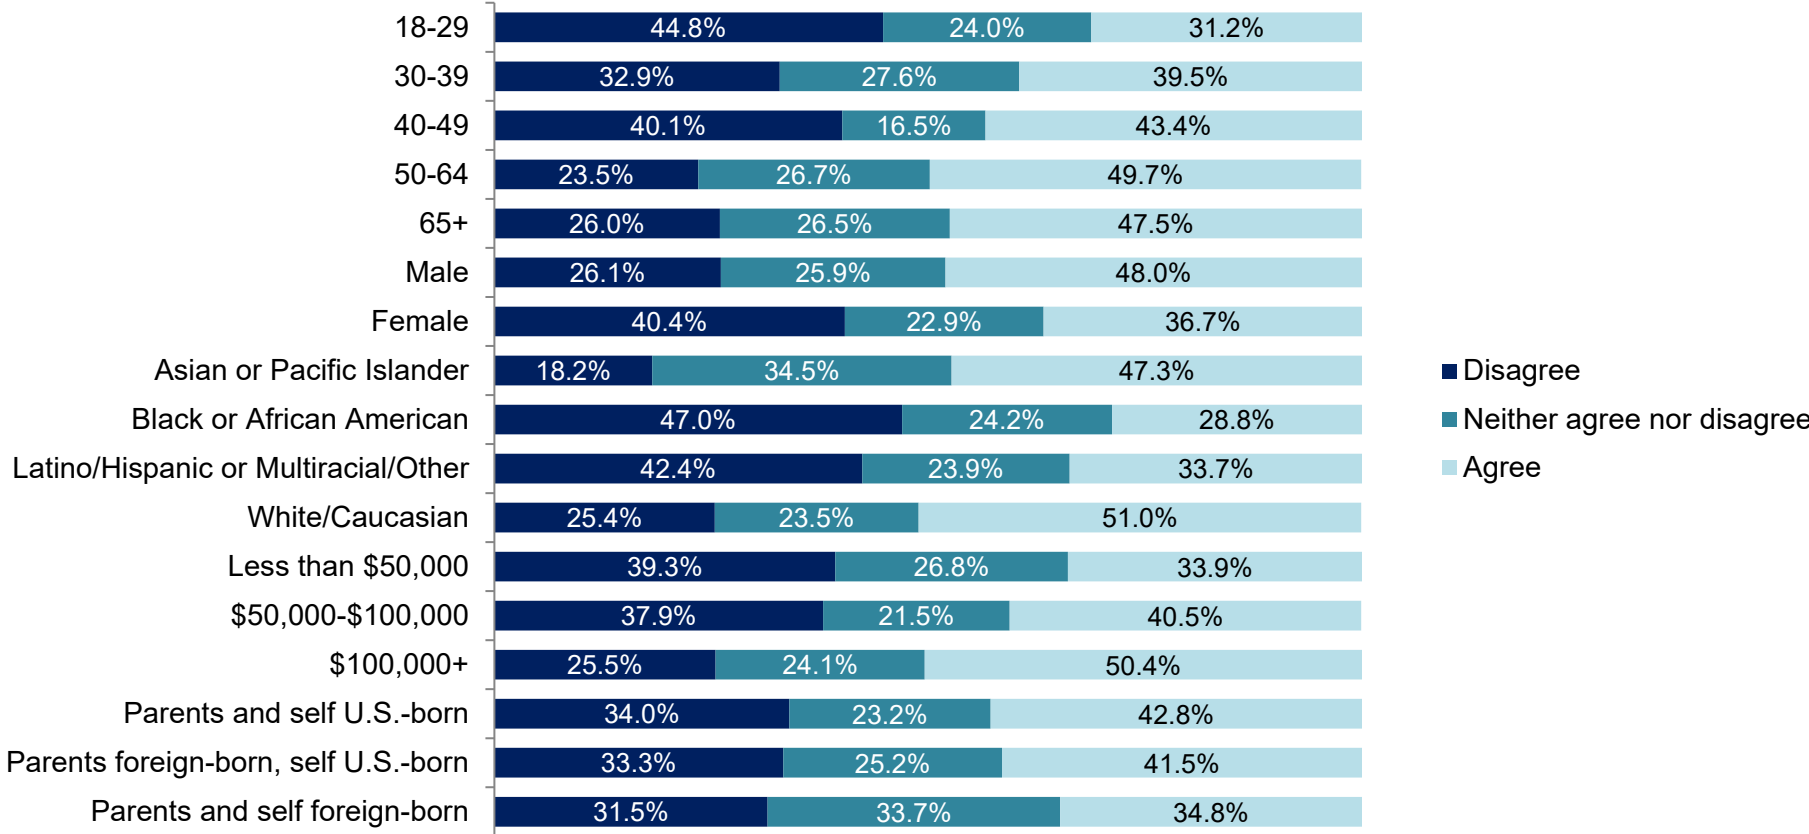

Q25: I like the taste of tap water in my home.

Residents who are older, male, Asian, White, or higher-income like the taste of their tap water more

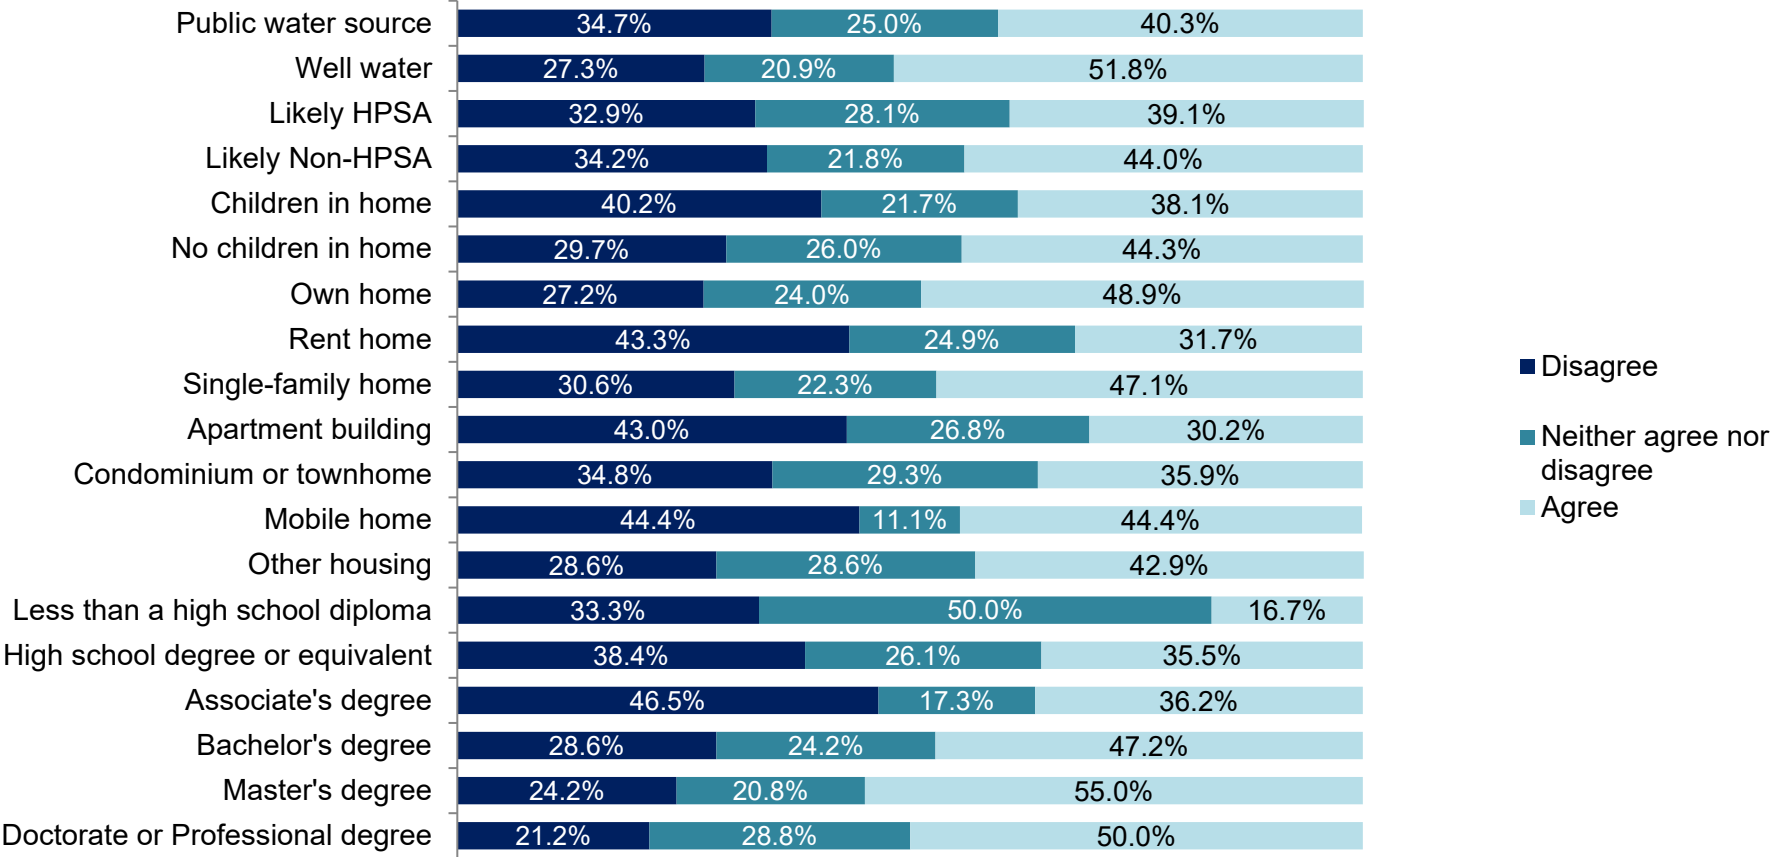

For the following statements, please indicate the extent to which you agree or disagree.

Q25: I like the taste of tap water in my home.

Residents who have well water, own their homes, or are more educated are more likely to like the taste of their home's tap water

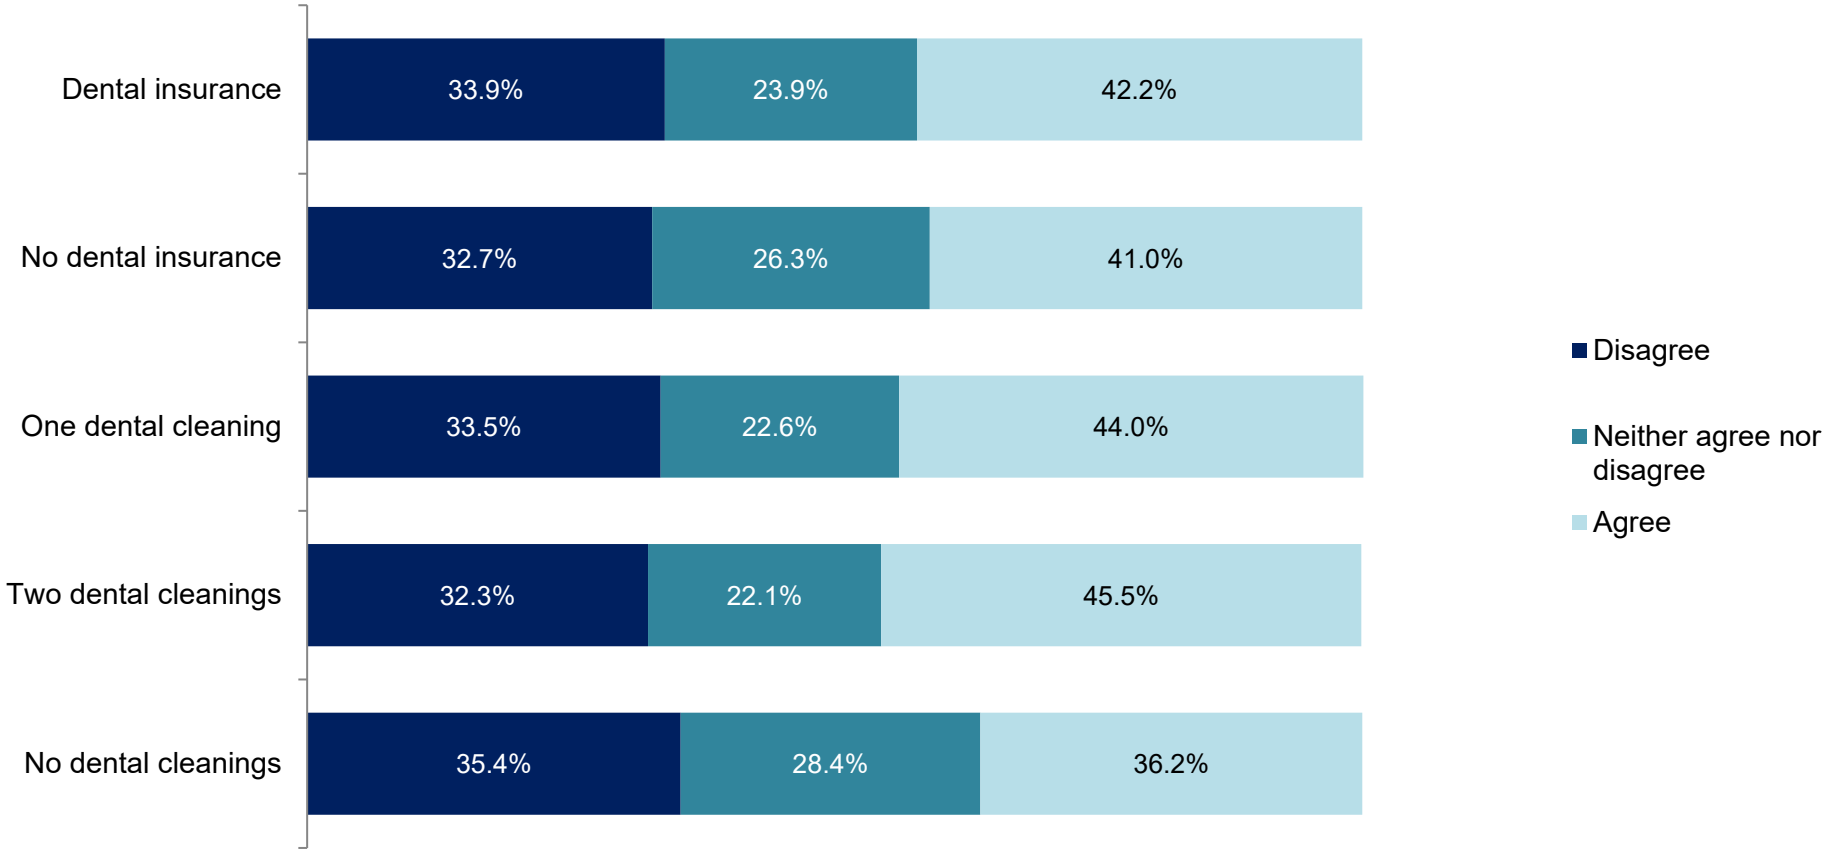

For the following statements, please indicate the extent to which you agree or disagree.
 Q25: I like the taste of tap water in my home.

There are no large differences in liking the taste of tap water by dental insurance or cleaning frequencies

For the following statements, please indicate the extent to which you agree or disagree.

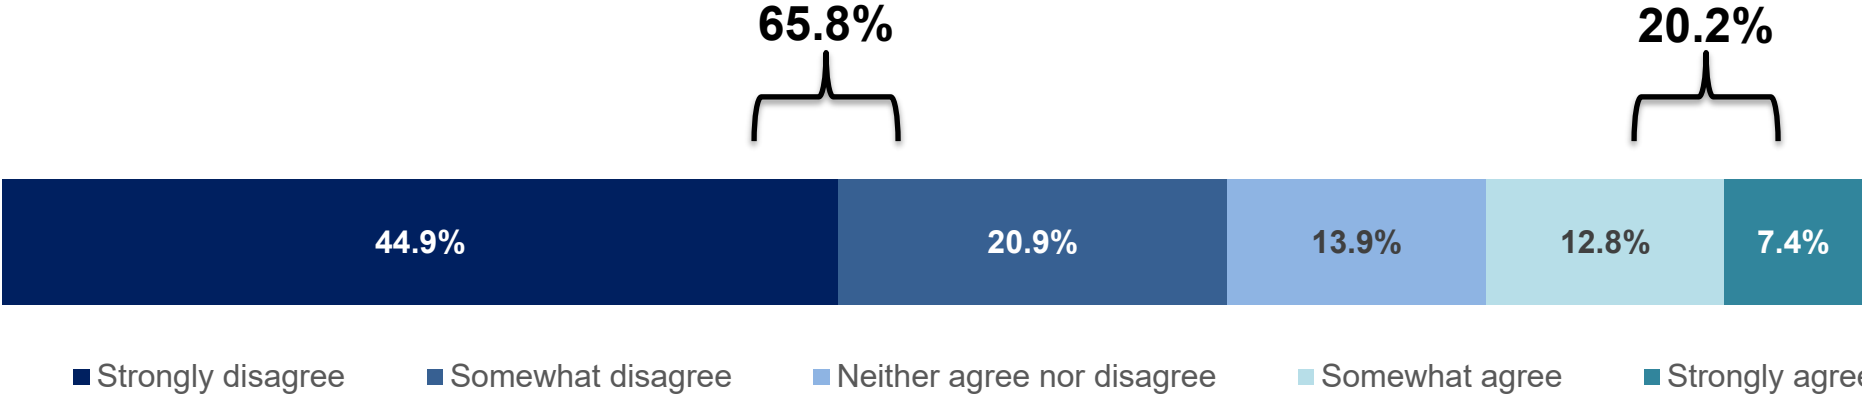

Q25: I like the taste of tap water in my home.

20% think the tap water in their home has an unpleasant odor, color, or residue

For the following statements, please indicate the extent to which you agree or disagree.

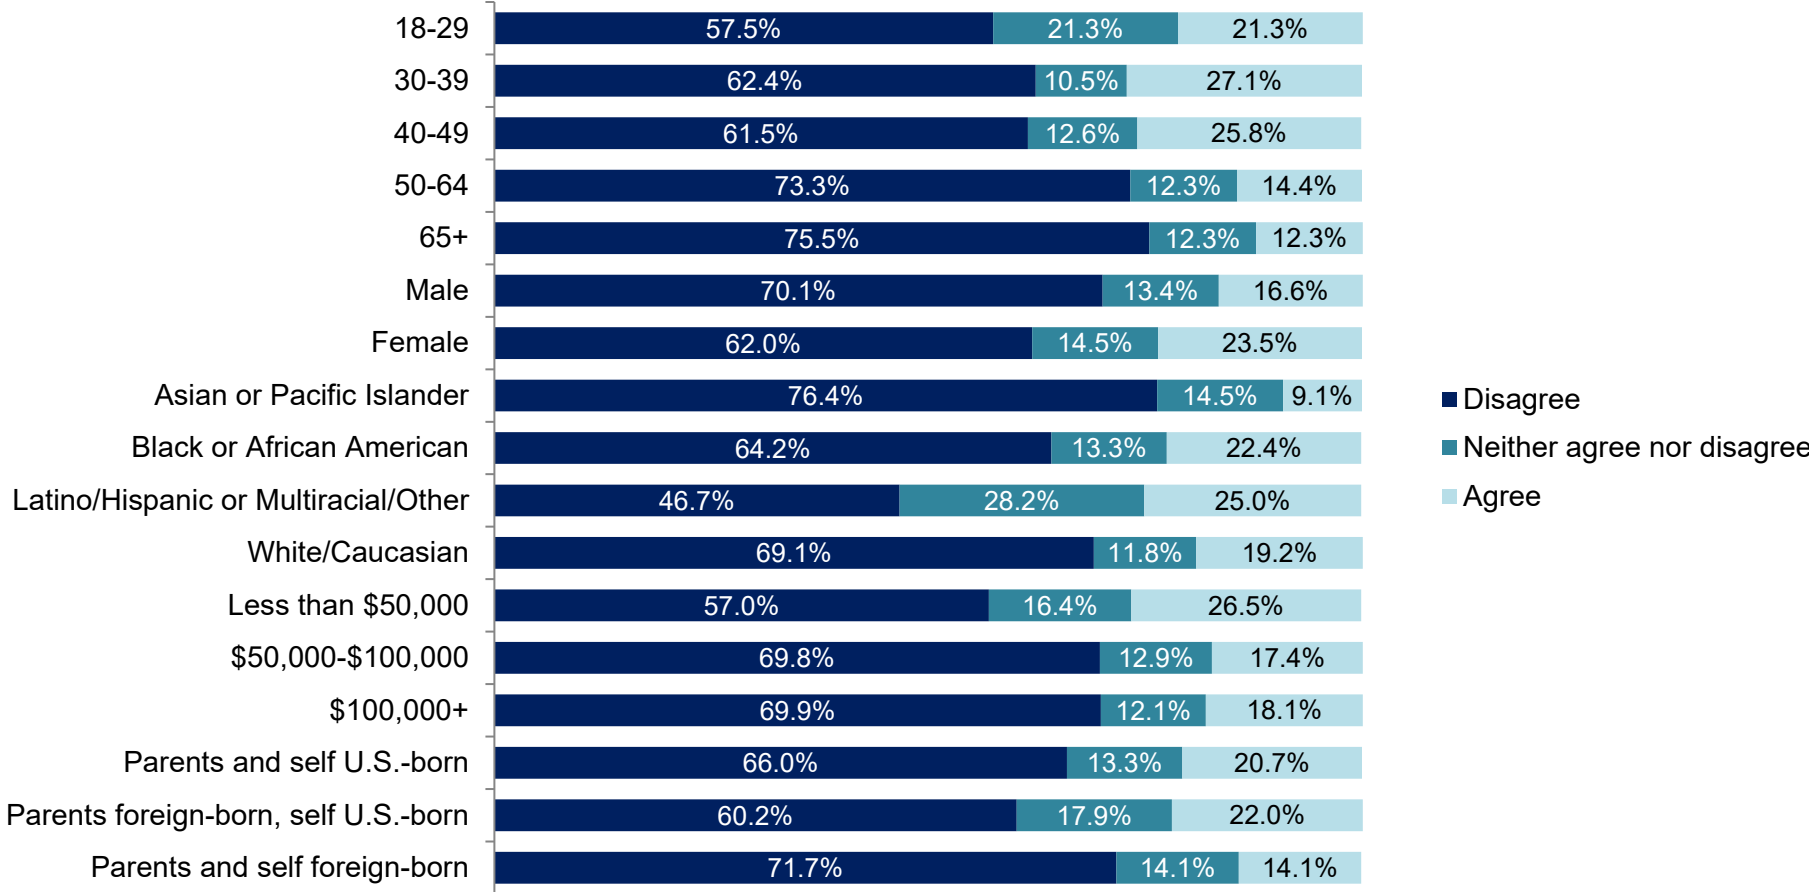

Q26: The tap water in my home has an unpleasant odor, color, or residue.

Younger, Black, Latino/multiracial, or lower-income residents are more likely to think their tap water has an unpleasant odor, color, or residue

For the following statements, please indicate the extent to which you agree or disagree.

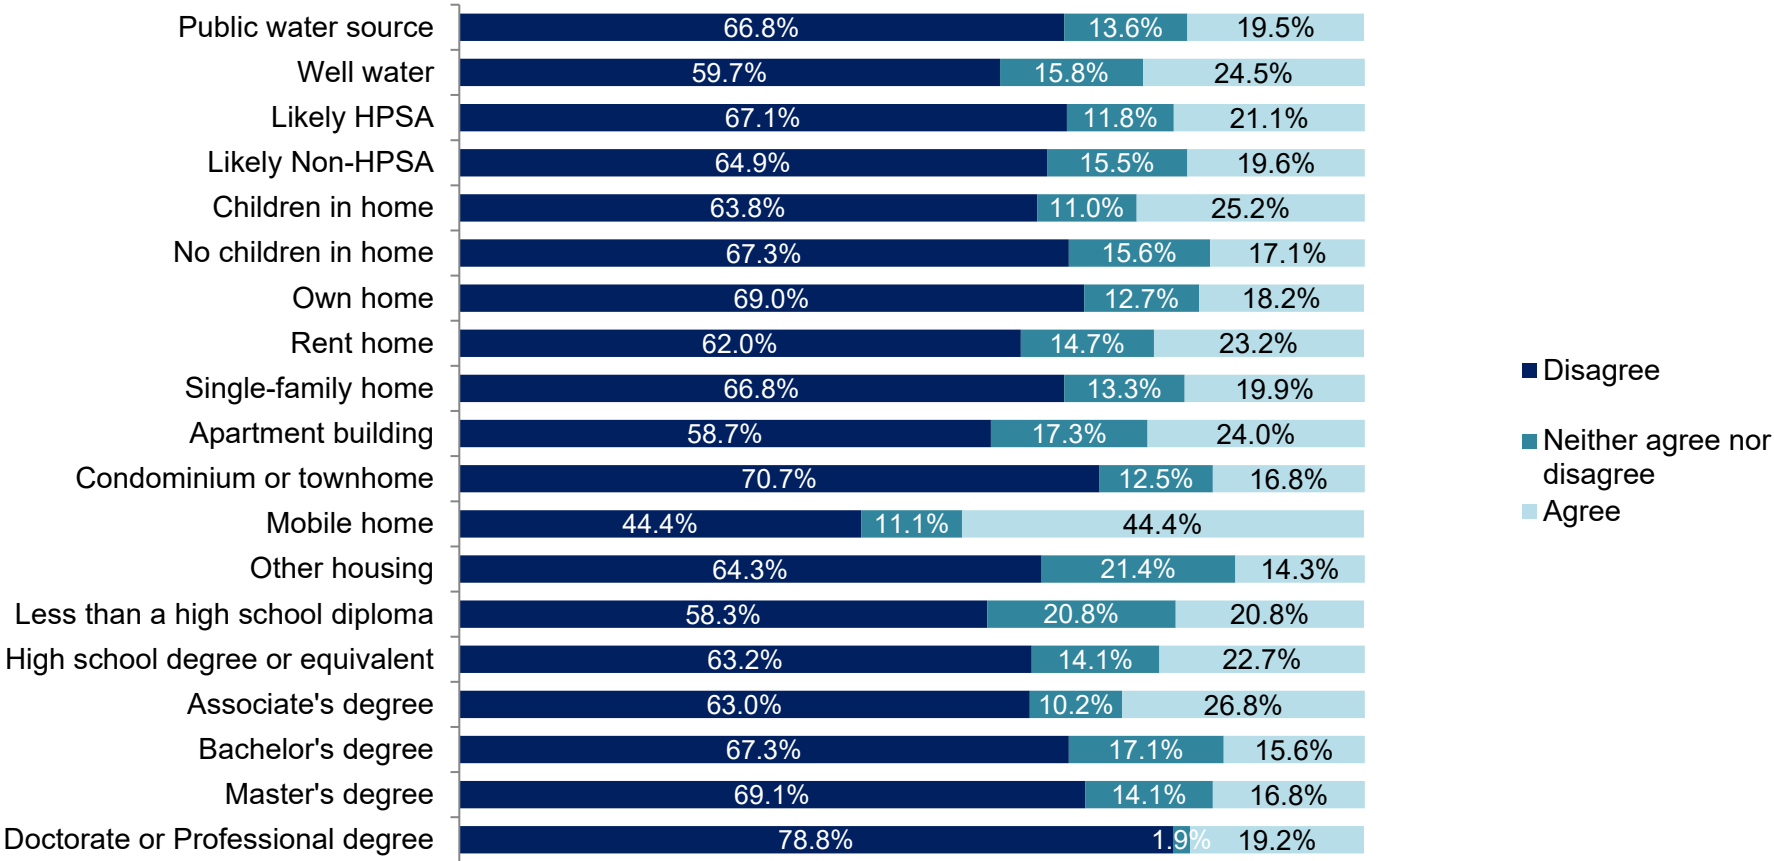

Q26: The tap water in my home has an unpleasant odor, color, or residue.

Residents of lower-education are more likely to think that their tap water has an unpleasant odor, color, or residue

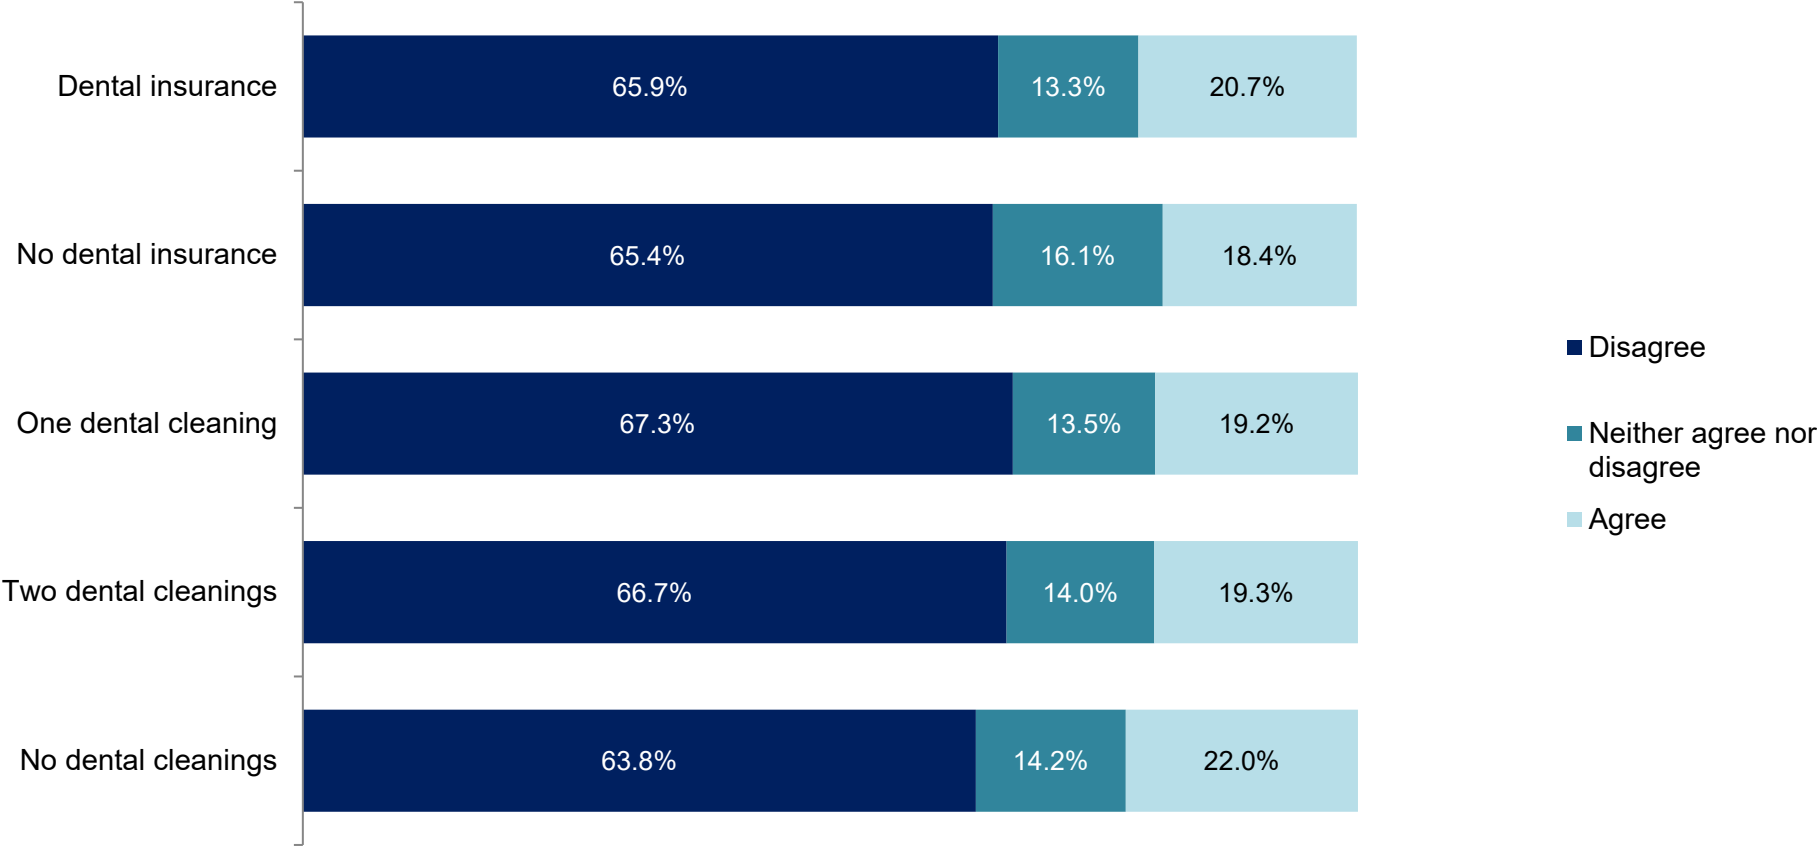

For the following statements, please indicate the extent to which you agree or disagree.

Q26: The tap water in my home has an unpleasant odor, color, or residue.

Perceptions of odor, color, and residue are relatively equal by dental insurance coverage and cleaning frequency

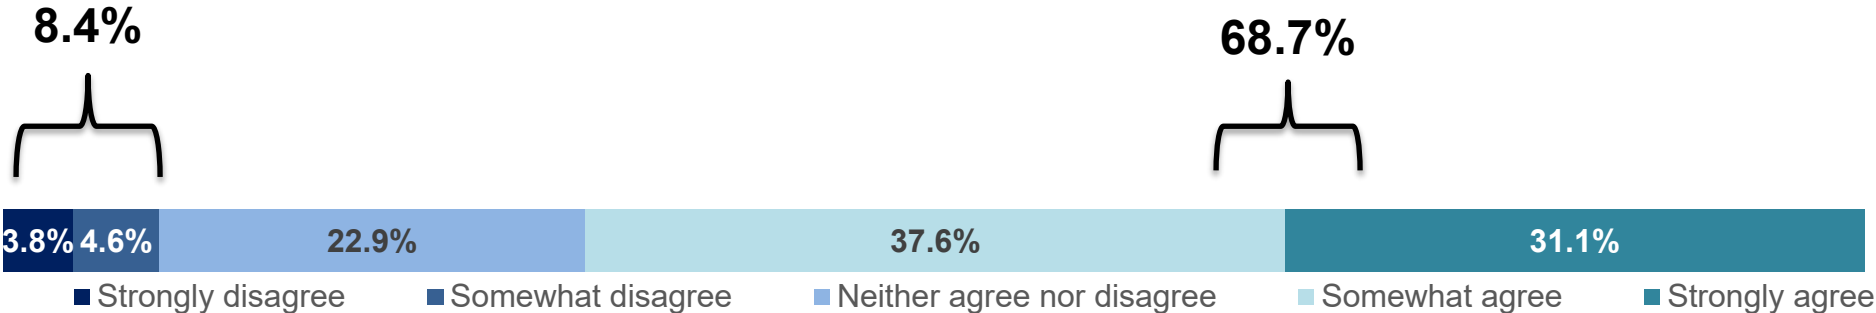

For the following statements, please indicate the extent to which you agree or disagree.
Q26: The tap water in my home has an unpleasant odor, color, or residue.

69% think that using a filter on their tap water makes it safer

For the following statements, please indicate the extent to which you agree or disagree.

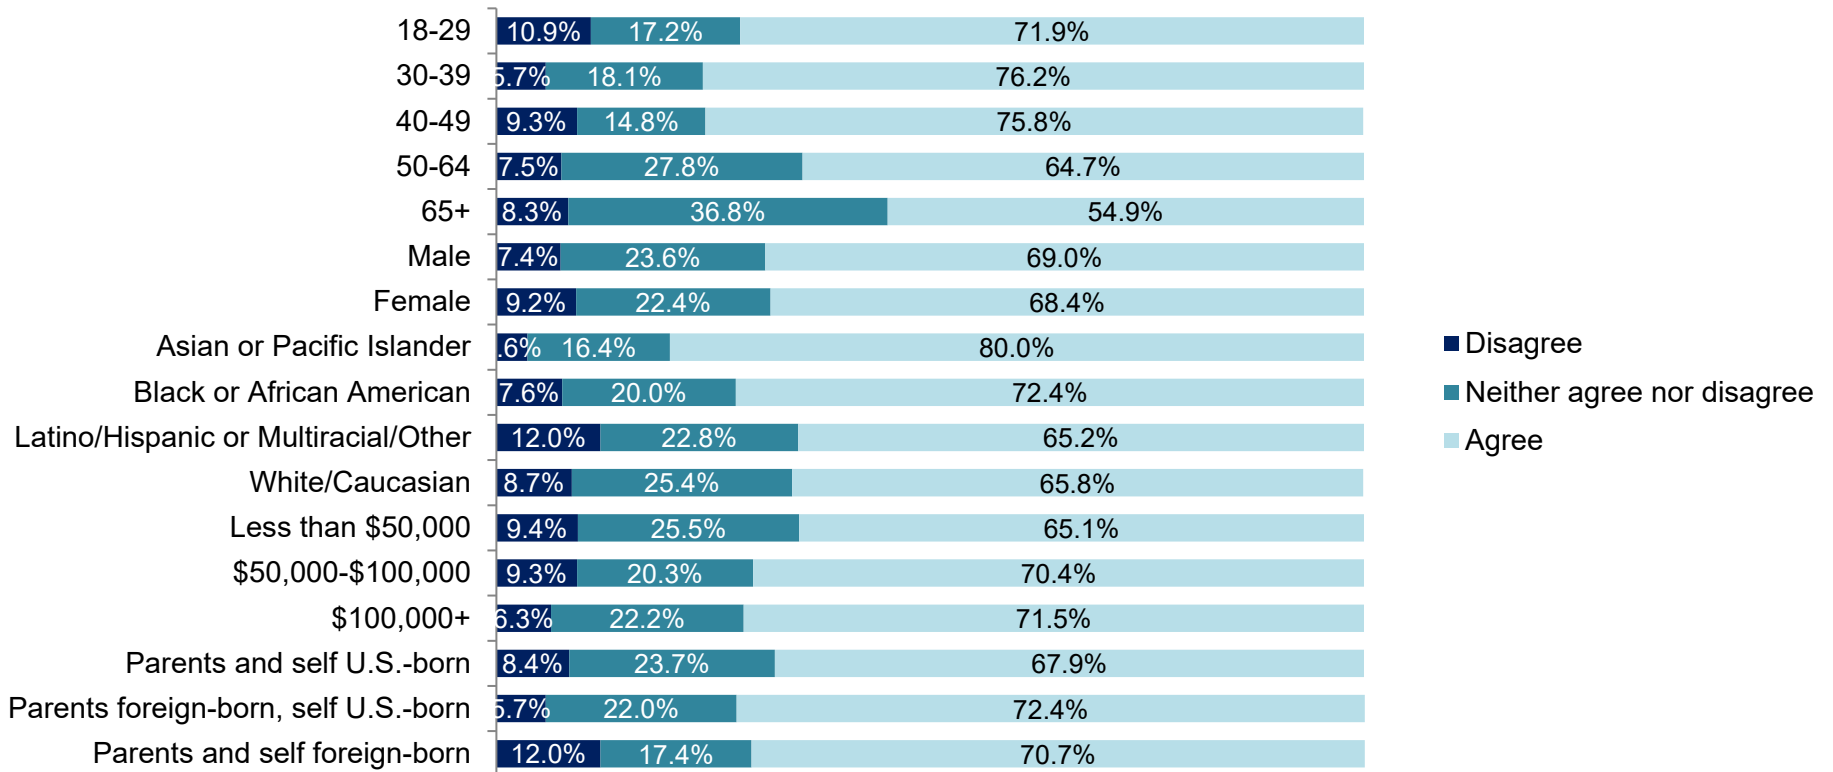

Q27: I think that using a filter for my tap water makes it safer.

Residents who are younger or Asian are more likely to believe that using a filter makes tap water safer

For the following statements, please indicate the extent to which you agree or disagree.

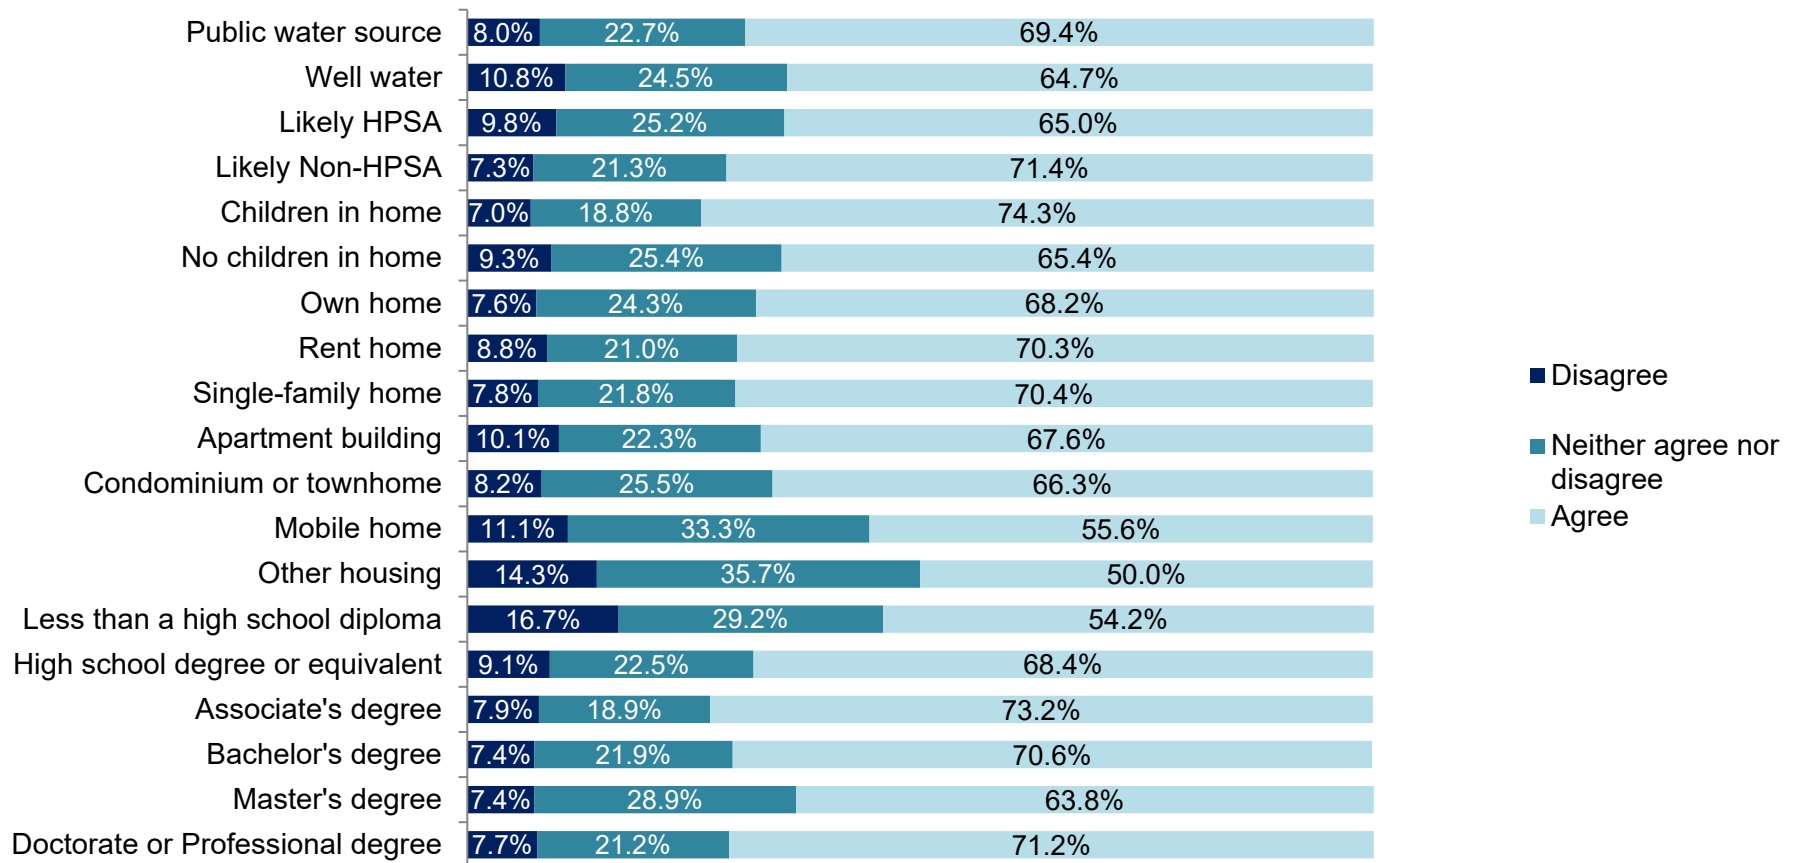

Q27: I think that using a filter for my tap water makes it safer.

Residents in single-family homes or who are college-educated are more likely to think a filter makes tap water safer

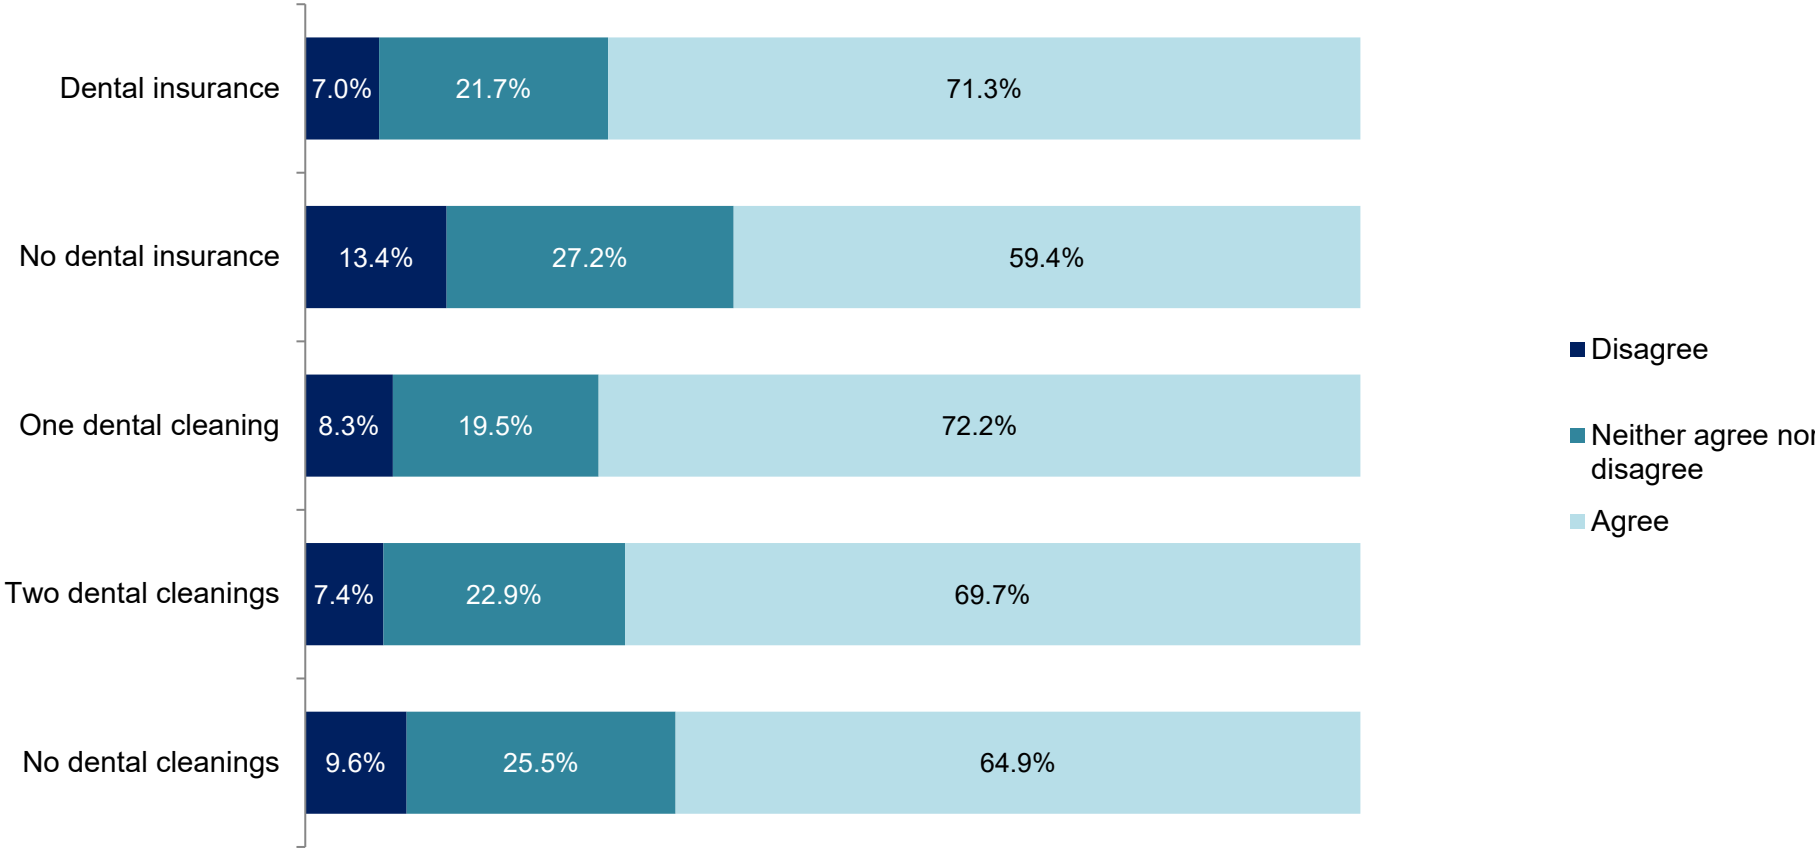

For the following statements, please indicate the extent to which you agree or disagree.

Q27: I think that using a filter for my tap water makes it safer.

Residents with dental insurance are more likely to think tap water is safer with a filter than those without coverage

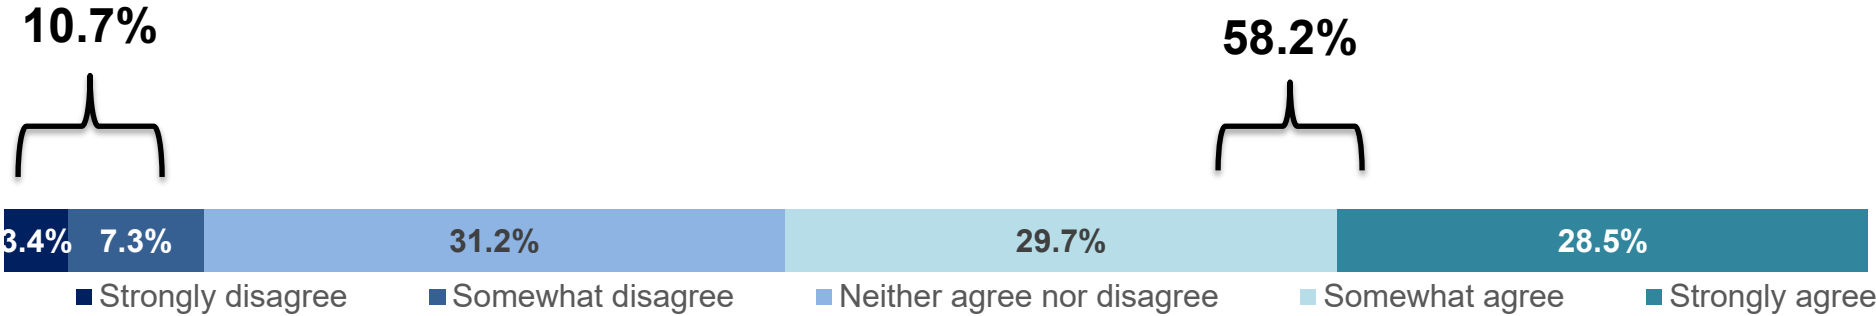

For the following statements, please indicate the extent to which you agree or disagree.
Q27: I think that using a filter for my tap water makes it safer.

58% think that using a filter on their tap water makes it taste better

For the following statements, please indicate the extent to which you agree or disagree.

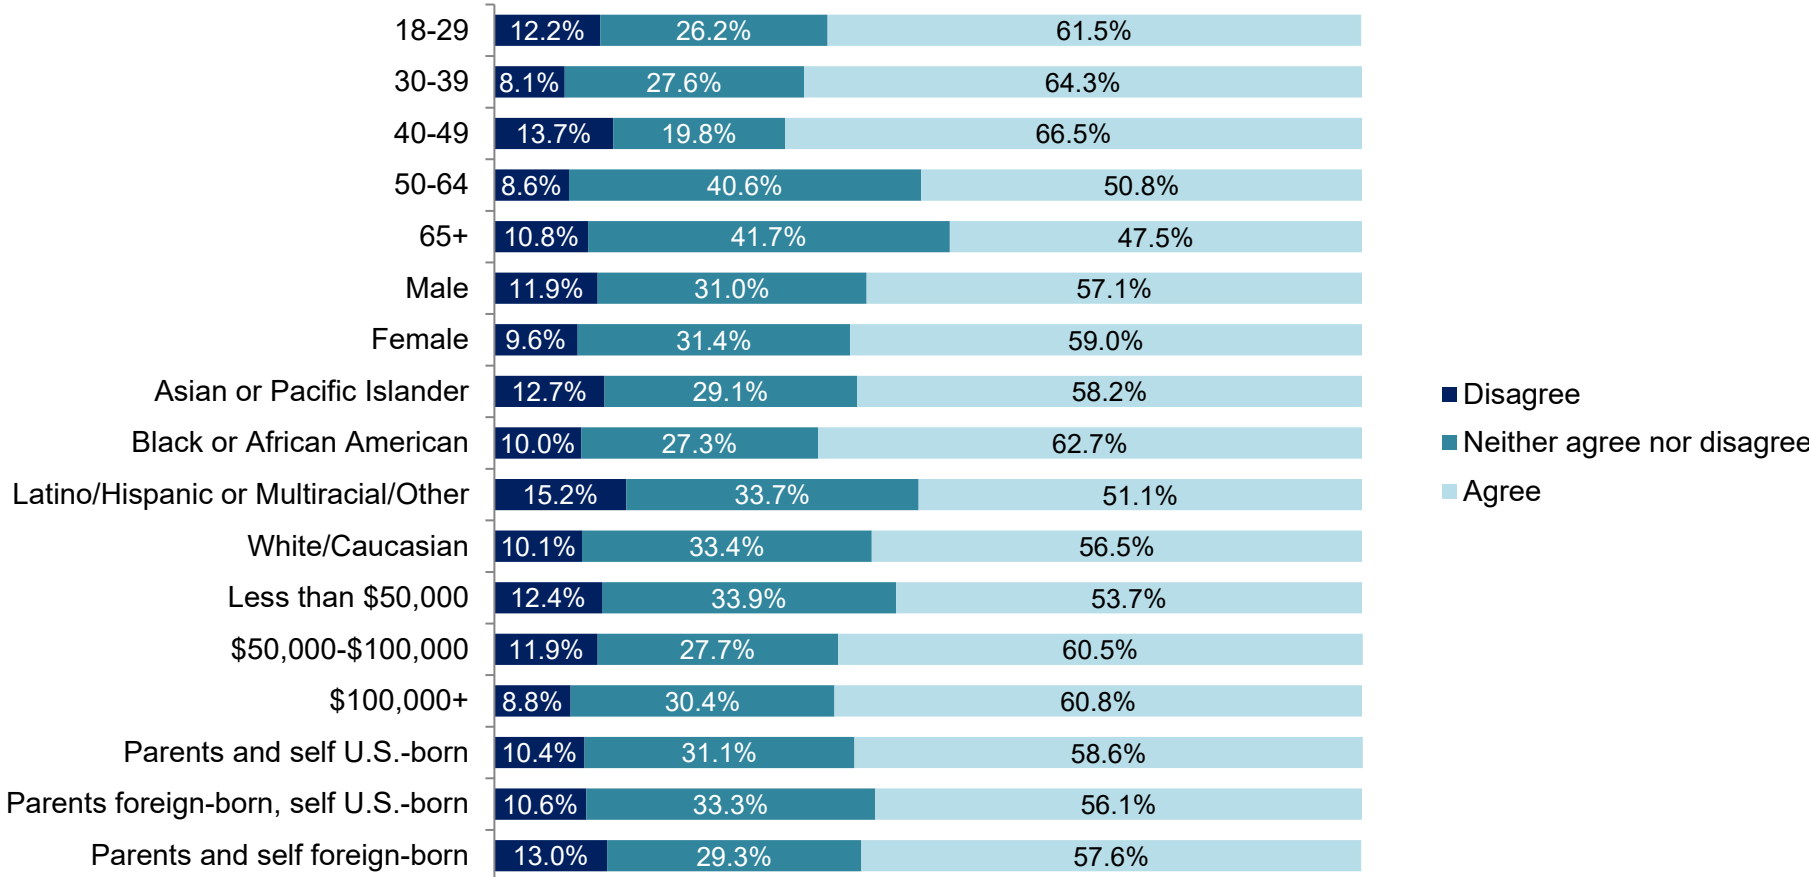

Q28: I think that using a filter for my tap water makes it taste better.

Younger, Black, or higher-income residents are more likely to think that filters will make their tap water taste better

For the following statements, please indicate the extent to which you agree or disagree.

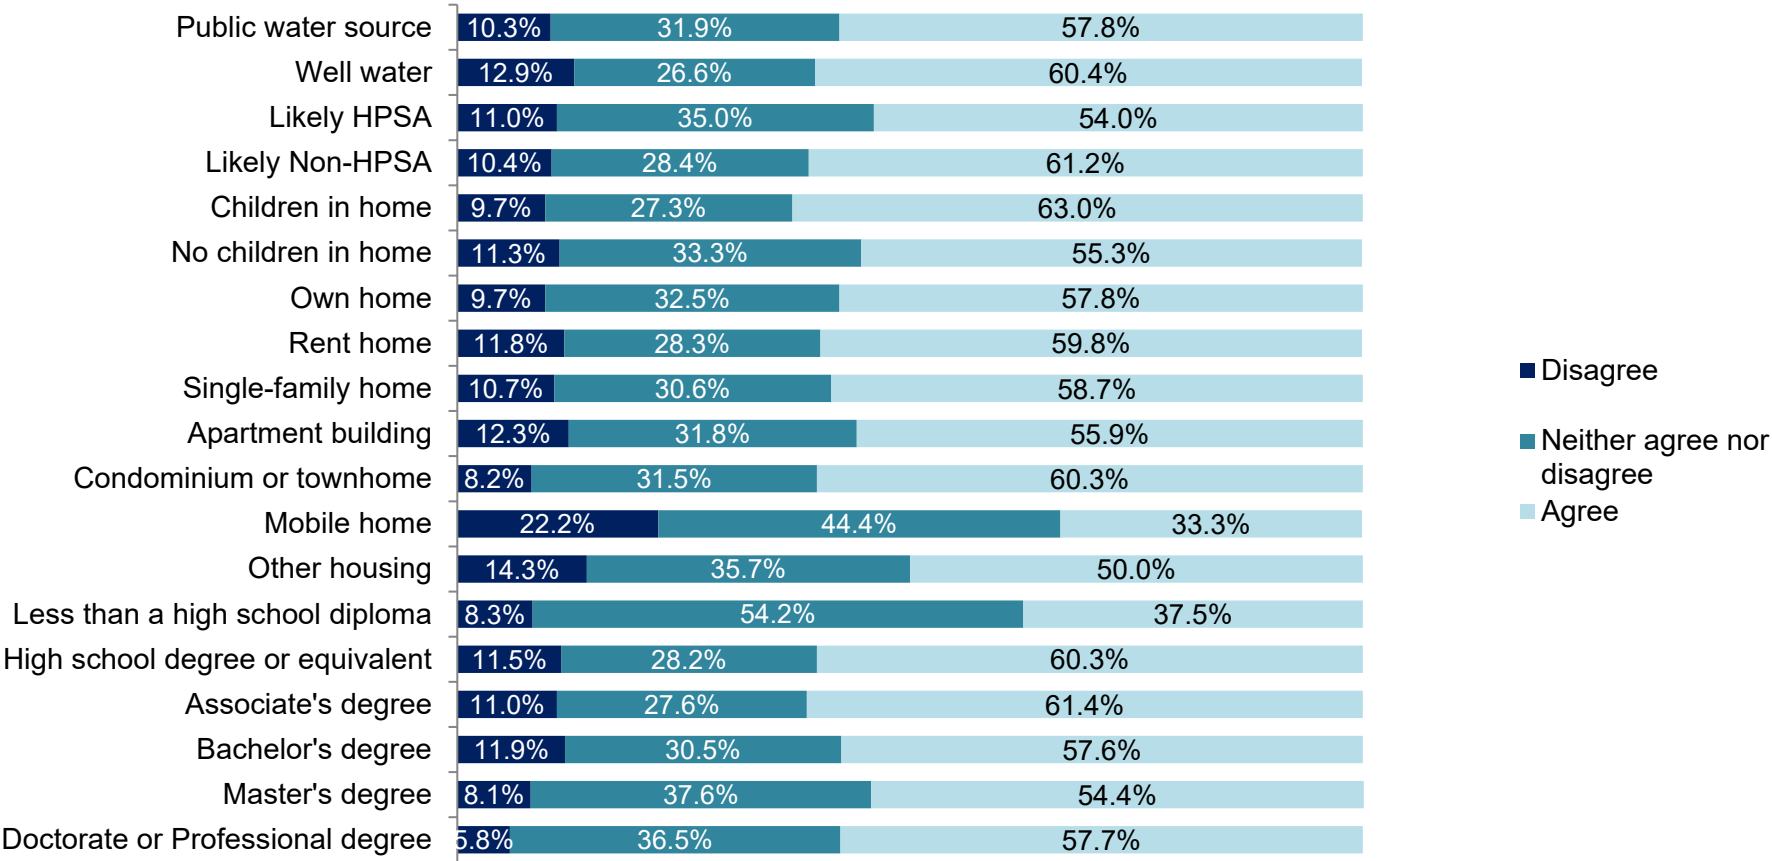

Q28: I think that using a filter for my tap water makes it taste better.

Less-educated residents are less likely to think that filters will make their tap water taste better

For the following statements, please indicate the extent to which you agree or disagree.

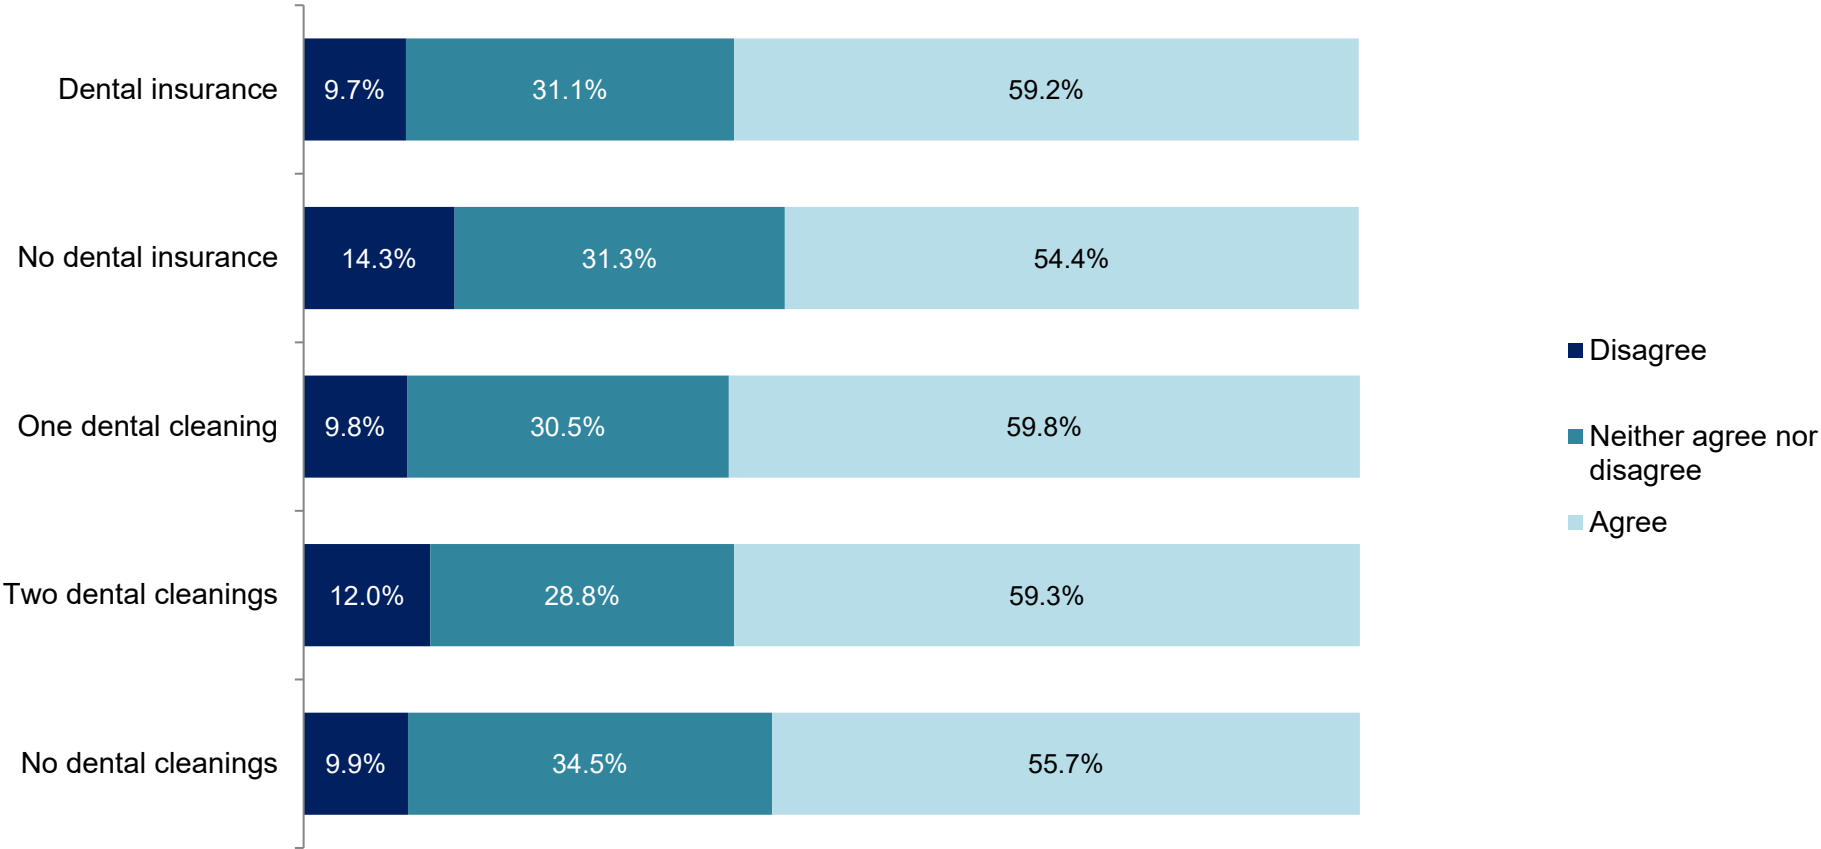

Q28: I think that using a filter for my tap water makes it taste better.

Perceptions of filters making tap water taste better is relatively equal by dental insurance coverage

For the following statements, please indicate the extent to which you agree or disagree.

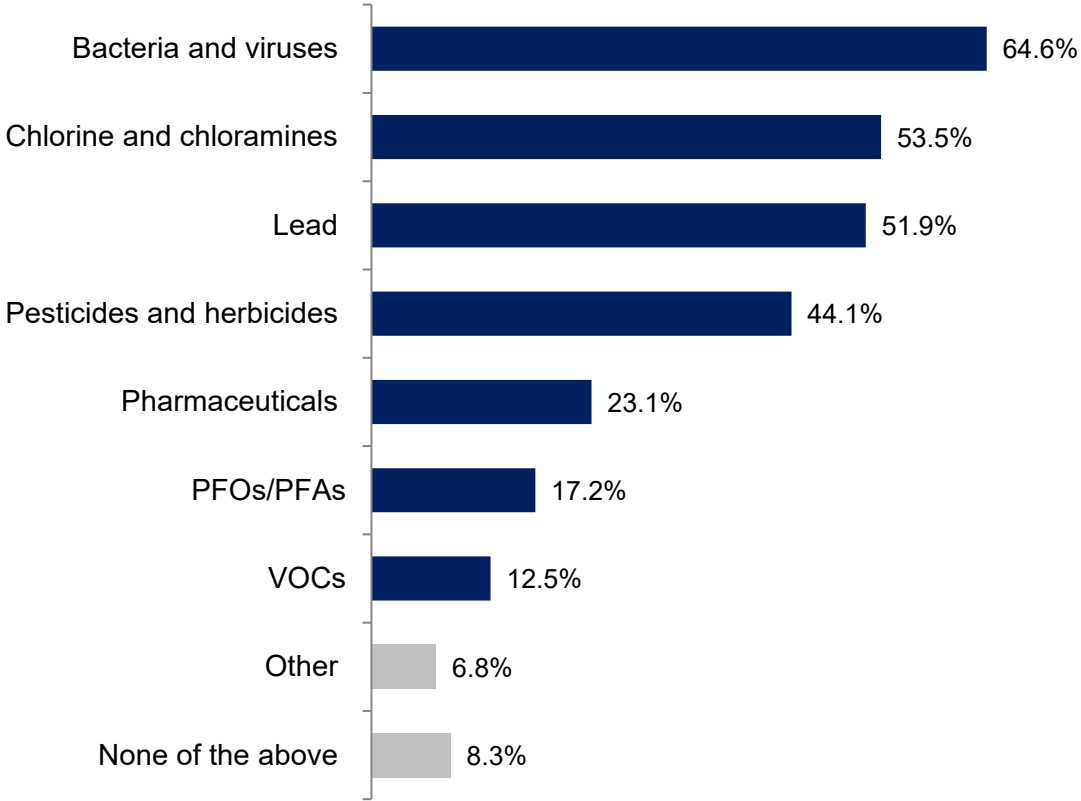

Q28: I think that using a filter for my tap water makes it taste better.

Residents are most concerned about bacteria/viruses, chlorine/chloramines, and lead in their tap water

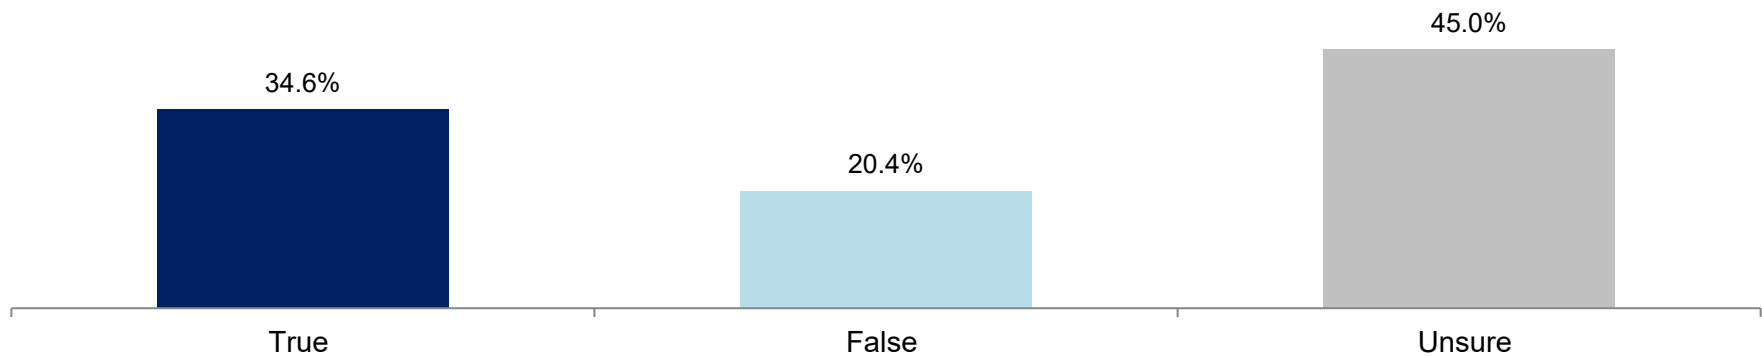

Q29: Which of the following, if any, are you concerned may be in your home's tap water? Select all that apply.

[ASK IF "AGREE" TO Q22 OR Q23]

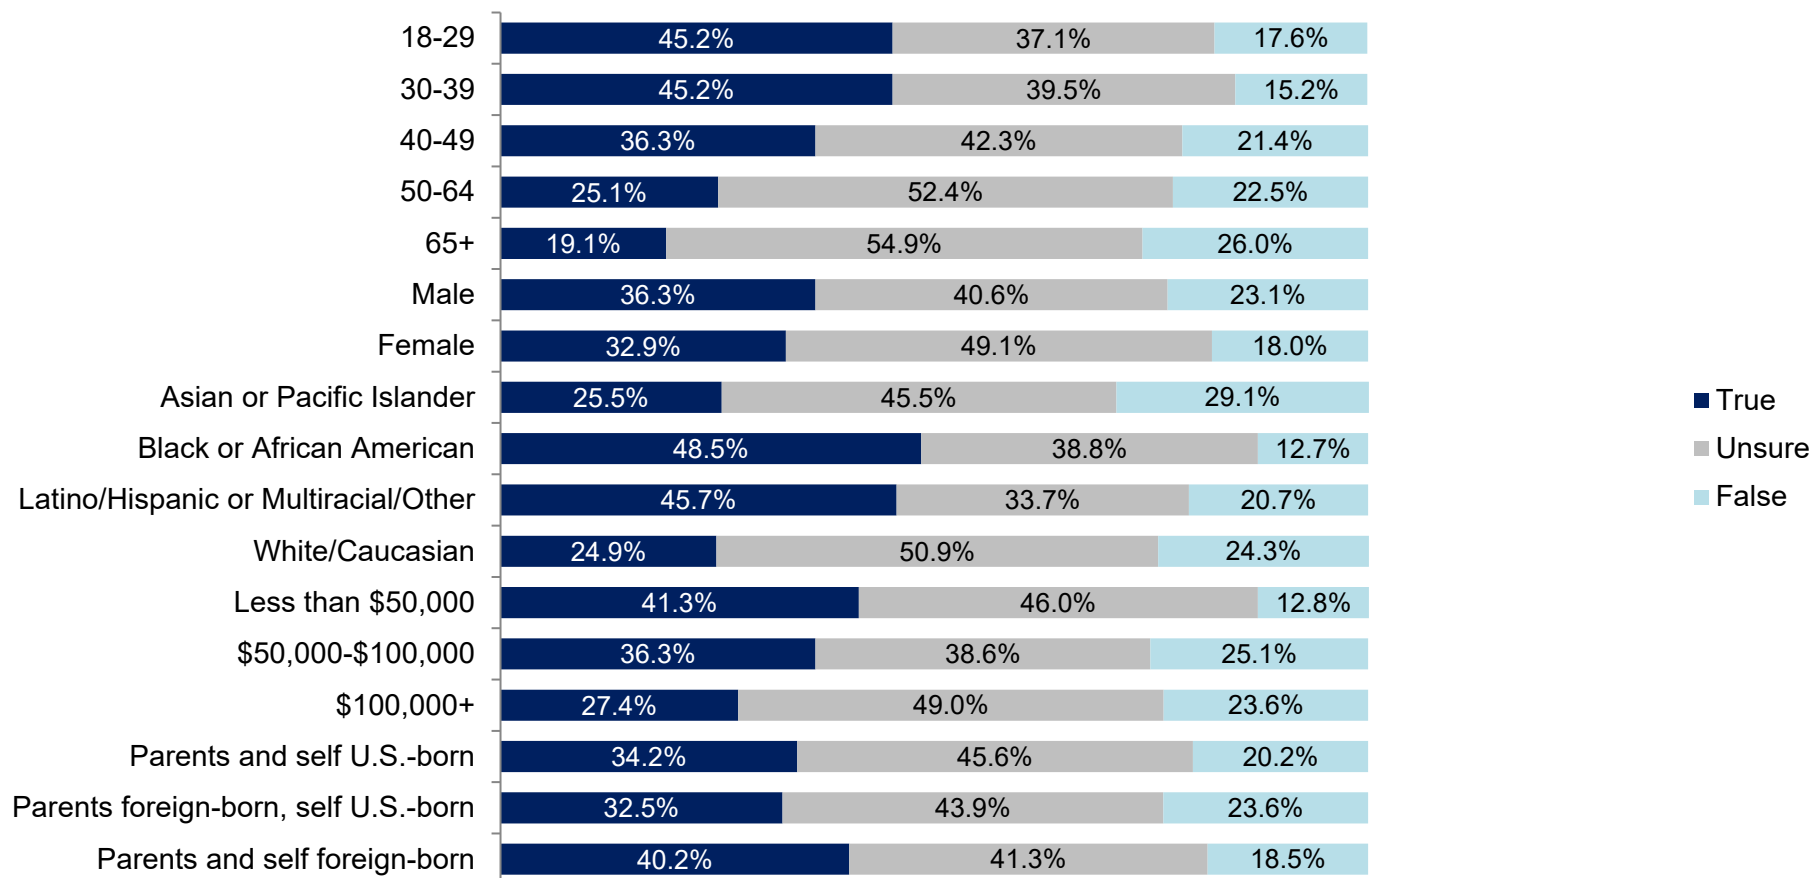

Only 20% knew that tap water has more safety regulations than bottled water

Q30: True or false: Bottled water has more safety regulations than tap water.

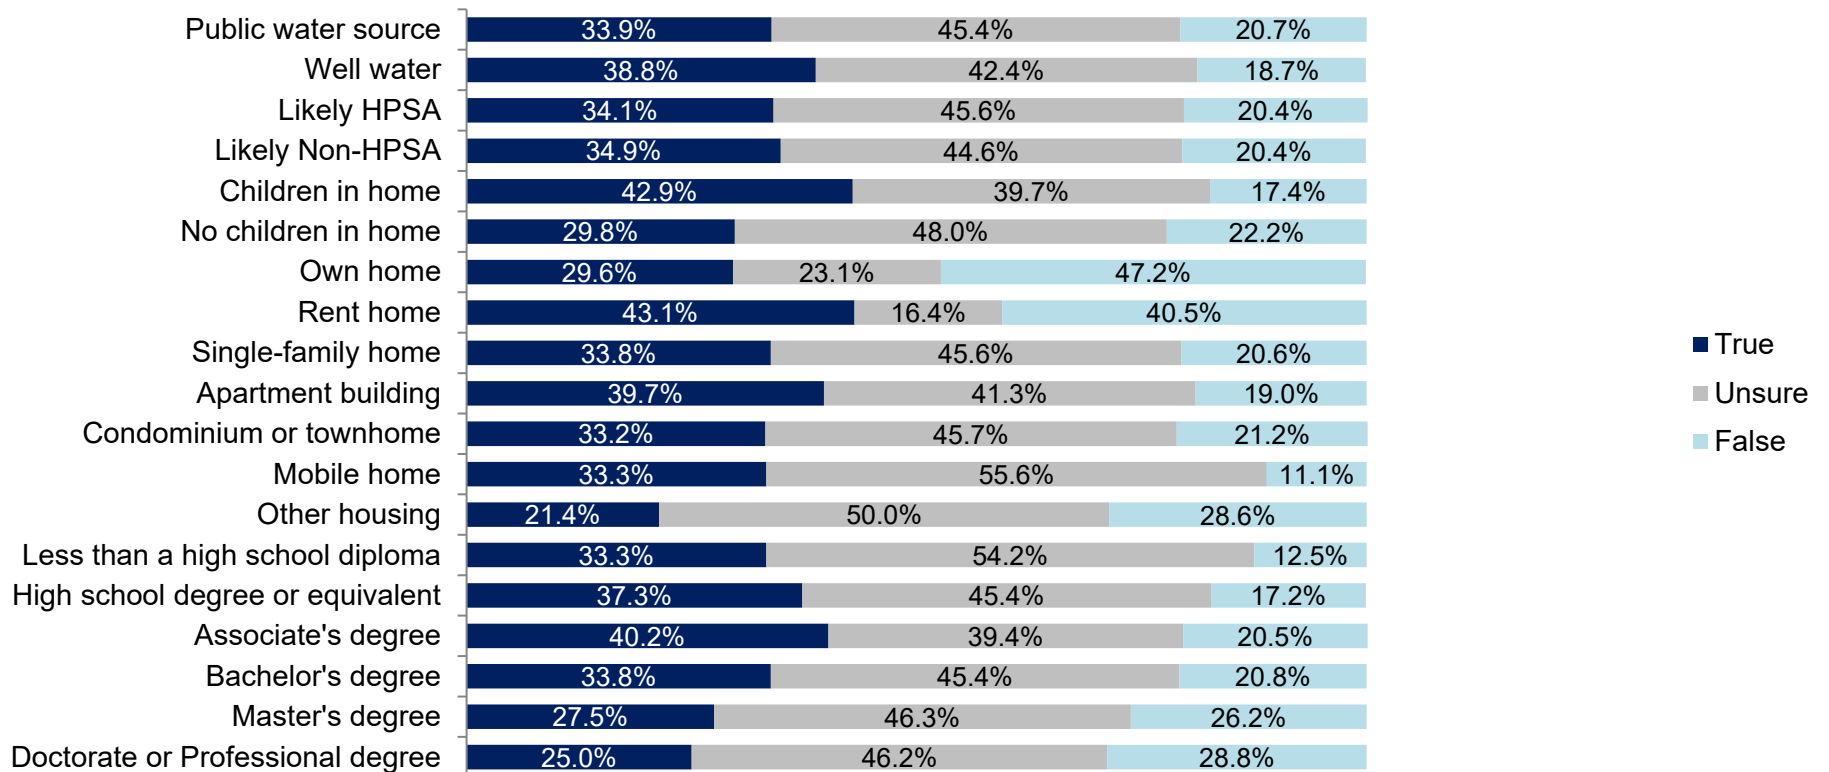

The belief that bottled water has more safety regulations is more prevalent among younger residents

Q30: True or false: Bottled water has more safety regulations than tap water.

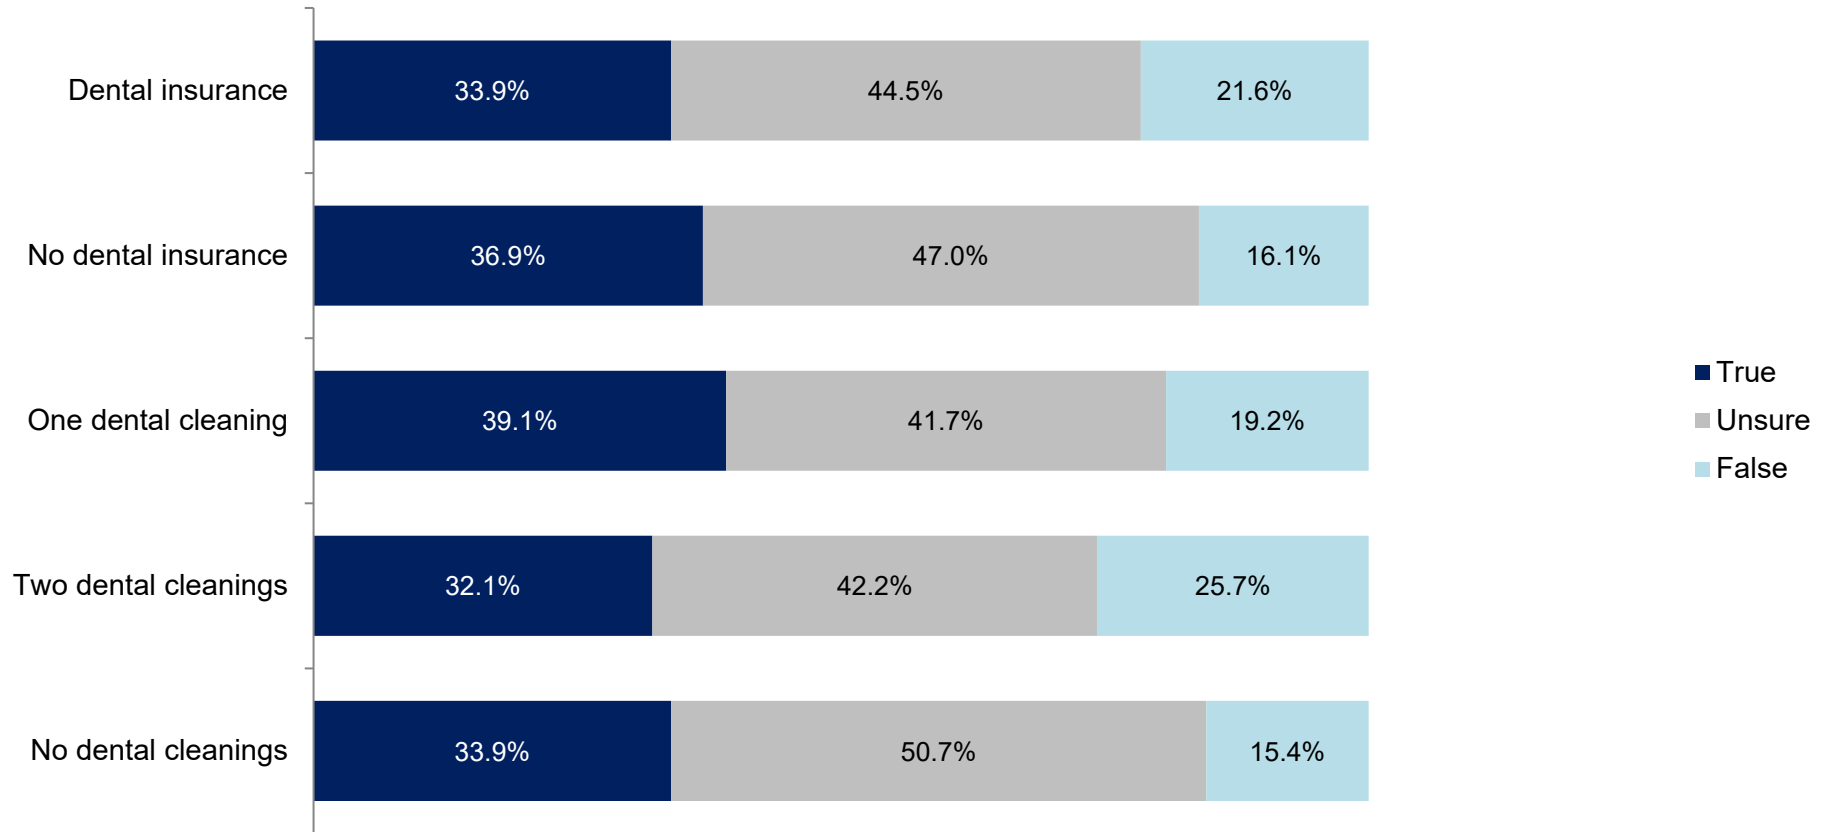

The belief that bottled water has more safety regulations is more prevalent among residents that are less-educated or renters

Q30: True or false: Bottled water has more safety regulations than tap water.

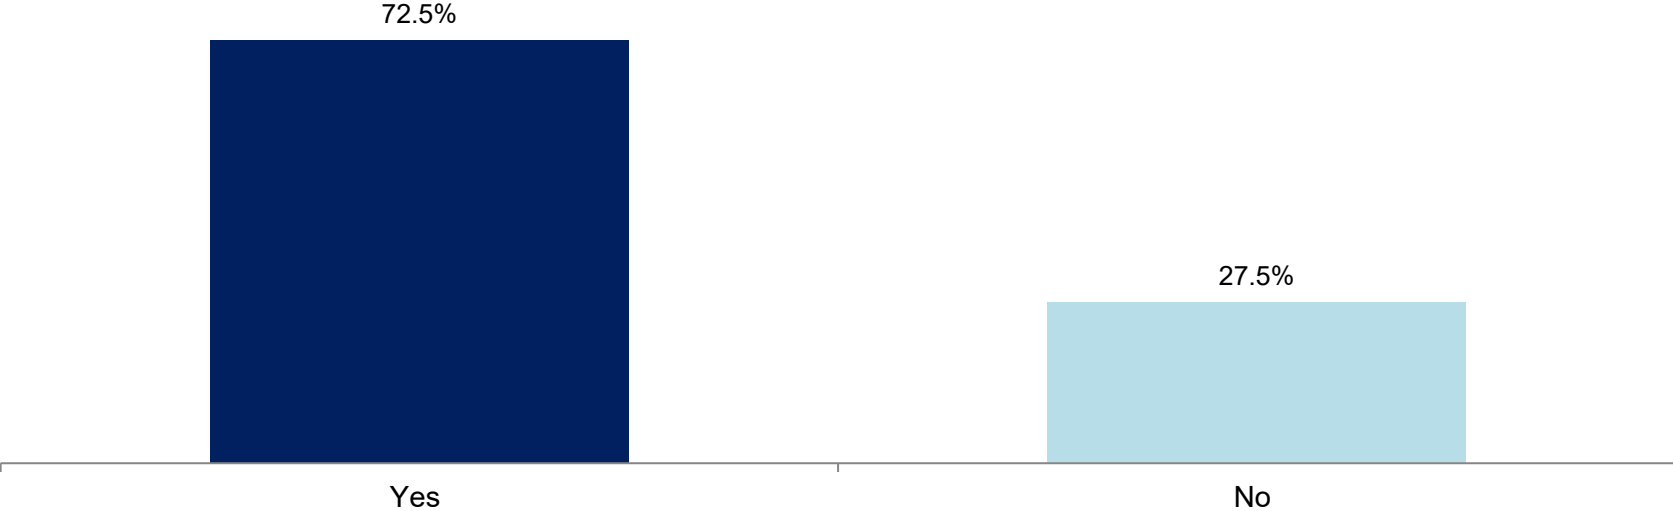

The belief that bottled water has more safety regulations does not vary significantly by dental insurance coverage or cleaning frequency.

Q30: True or false: Bottled water has more safety regulations than tap water.

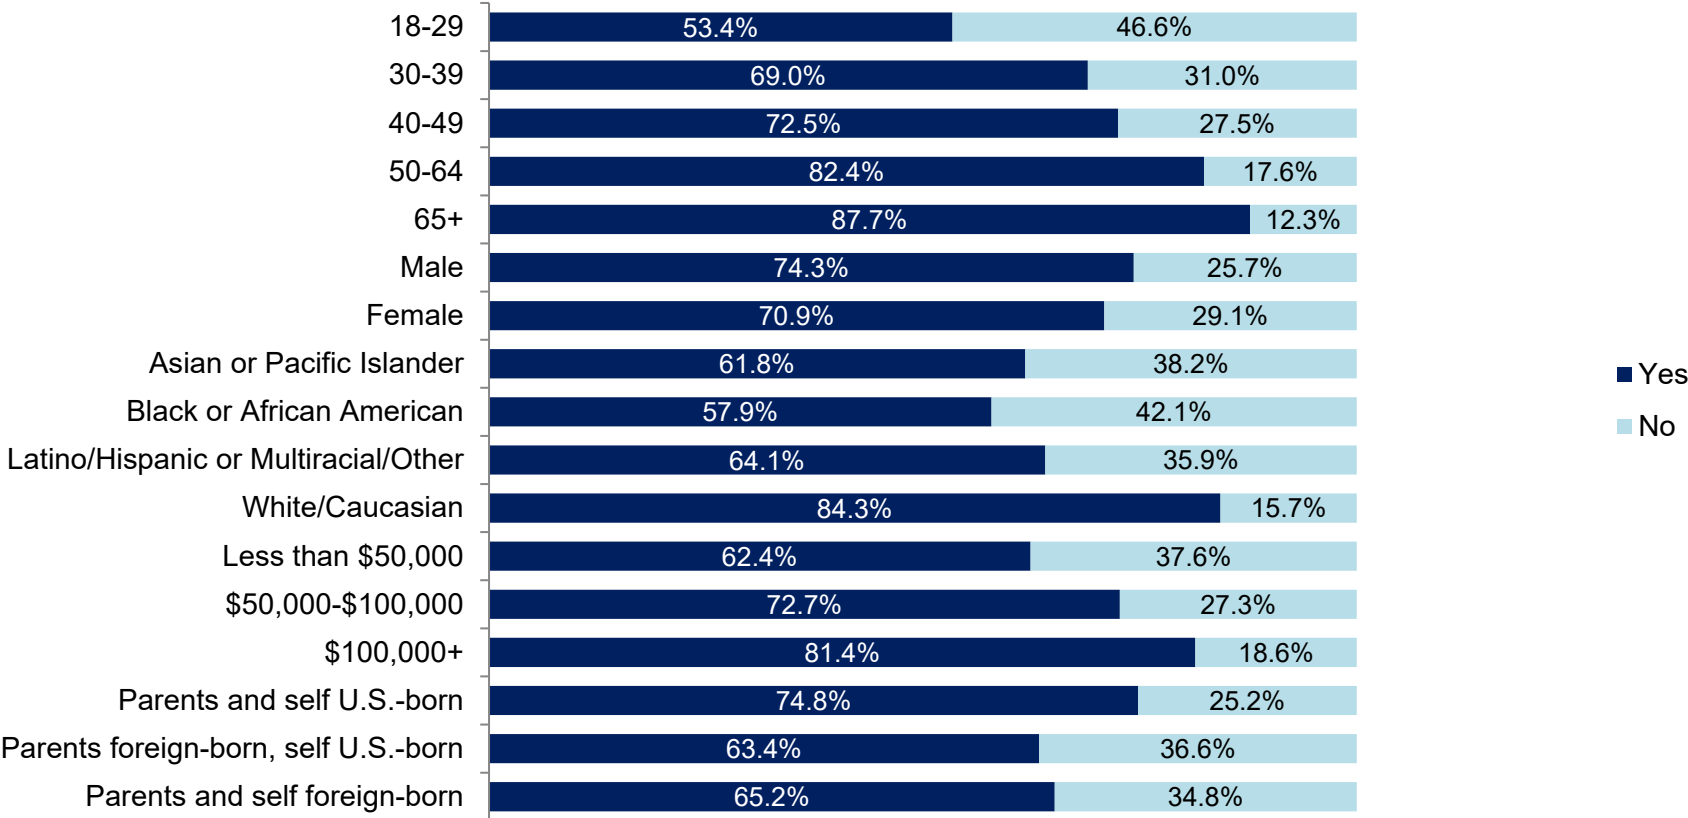

73% were aware of community water fluoridation

Q31: Before taking this survey, were you aware that local water providers add fluoride to public tap water systems, also known as community water fluoridation?

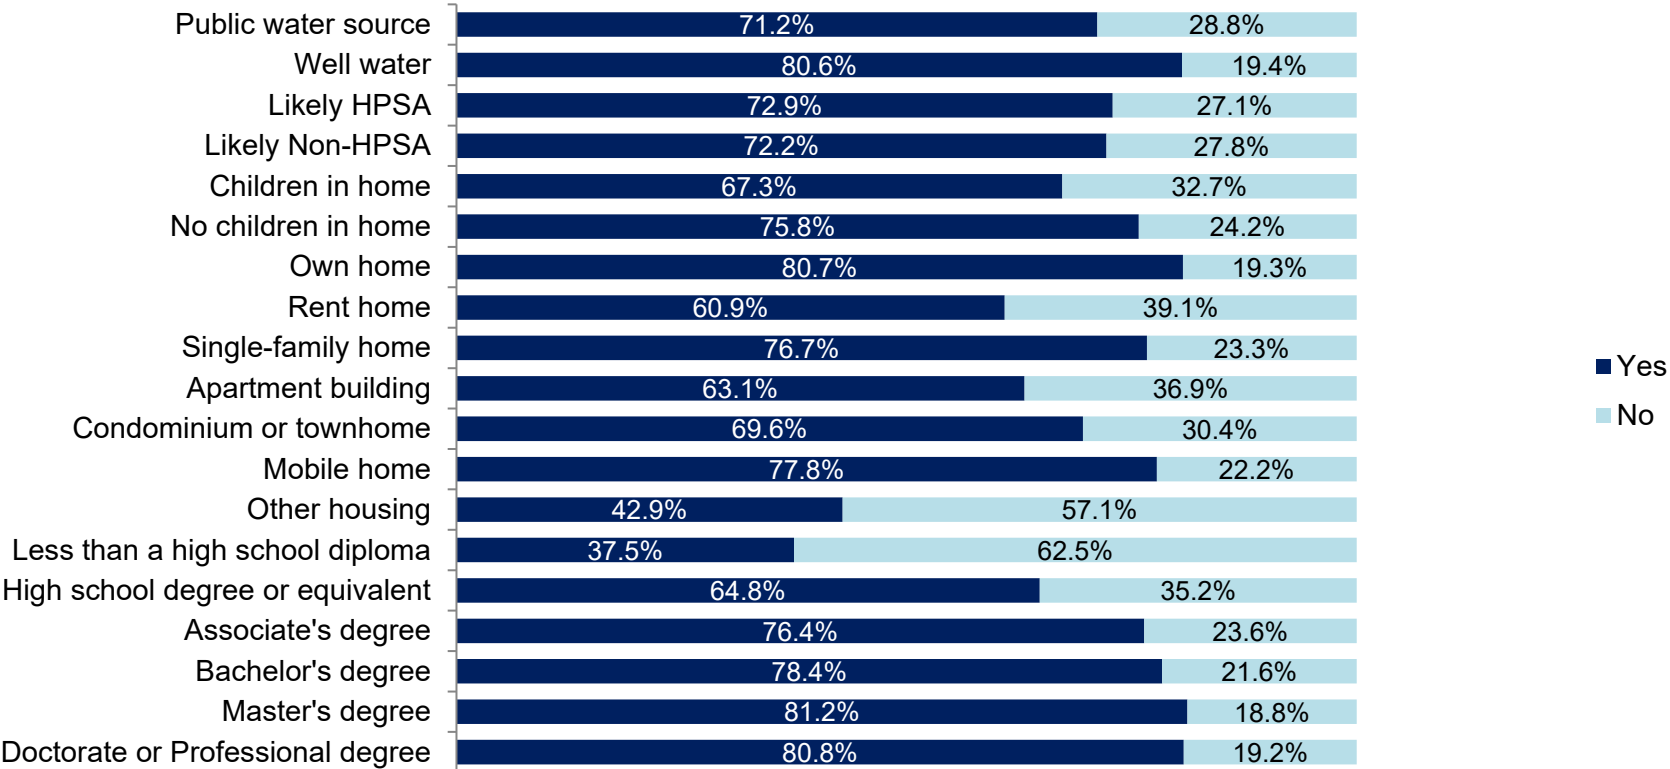

Community water fluoridation awareness is lower among residents who are younger, Black, Latino/Hispanic, or lower-income

Q31: Before taking this survey, were you aware that local water providers add fluoride to public tap water systems, also known as community water fluoridation?

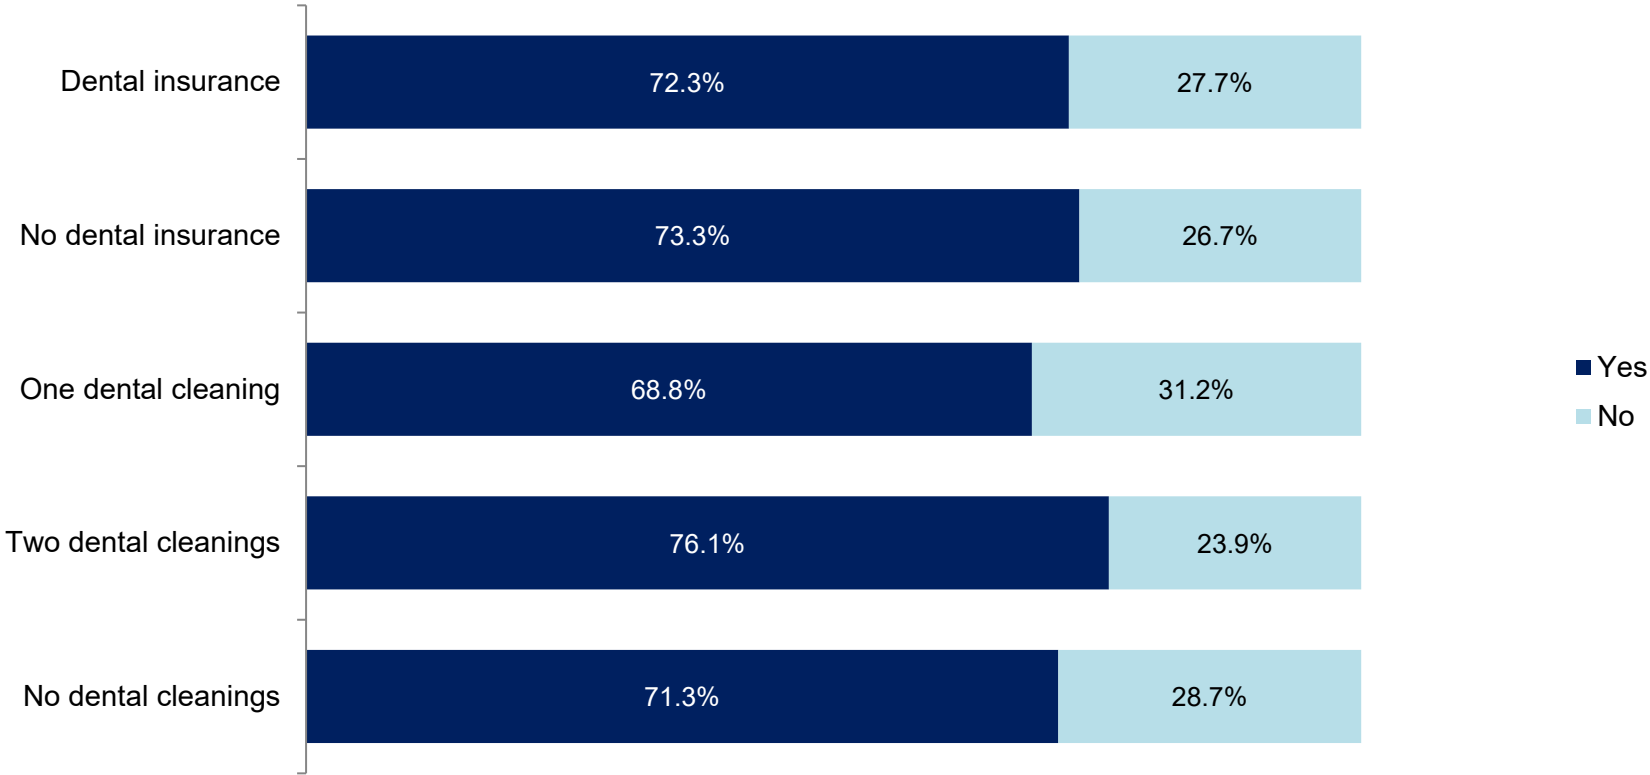

Community water fluoridation awareness is lower among less-educated residents or renters

Q31: Before taking this survey, were you aware that local water providers add fluoride to public tap water systems, also known as community water fluoridation?

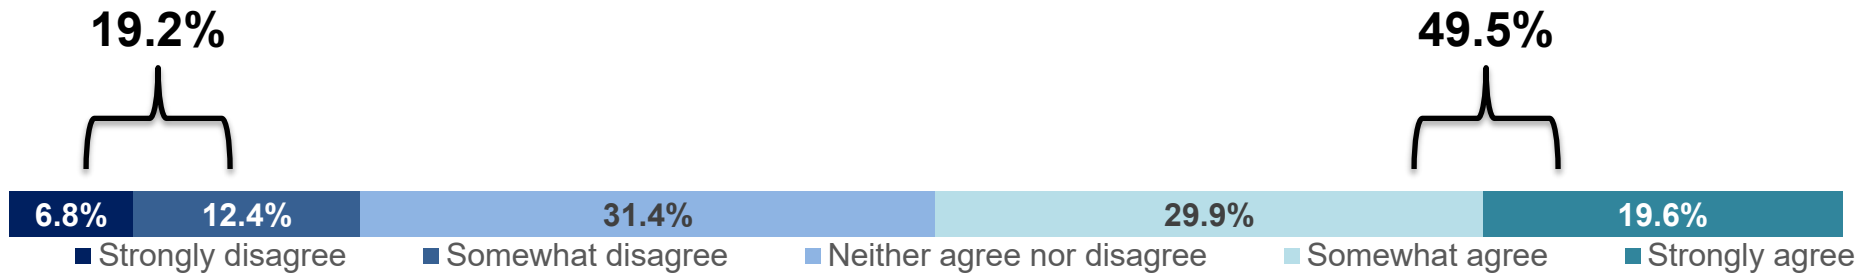

Community water fluoridation awareness is relatively balanced by insurance coverage

Q31: Before taking this survey, were you aware that local water providers add fluoride to public tap water systems, also known as community water fluoridation?

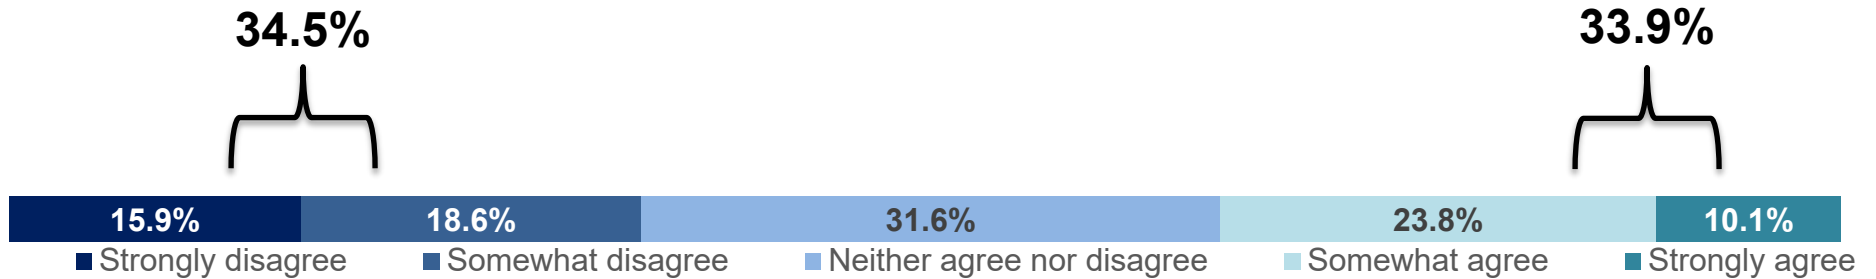

50% think that fluoridated tap water is safe to drink, but 35% are concerned that fluoride in the water supply might be unhealthy; nearly 1/3 may be unsure of fluoride's safety

Q32: I think that fluoridated tap water is safe to drink.

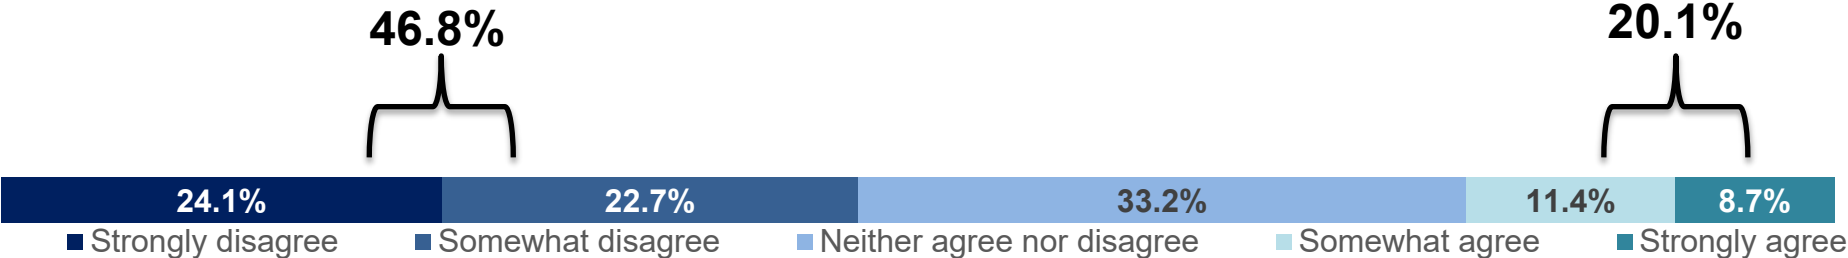

Q34: I'm afraid that putting fluoride in the water supply might be unhealthy.

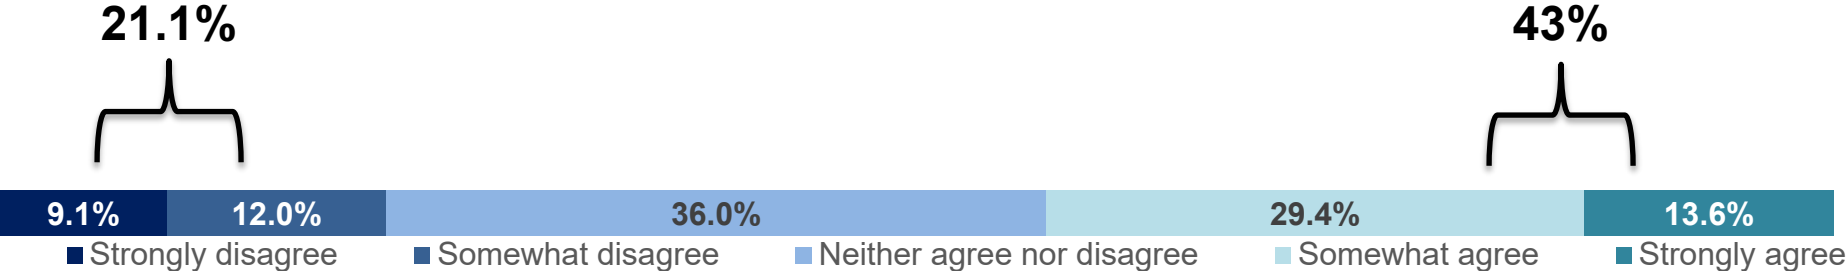

Majority of residents may be willing to drink fluoridated tap water; 43% were aware of oral health benefits of fluoride

Q35: I would not drink tap water that has been fluoridated.

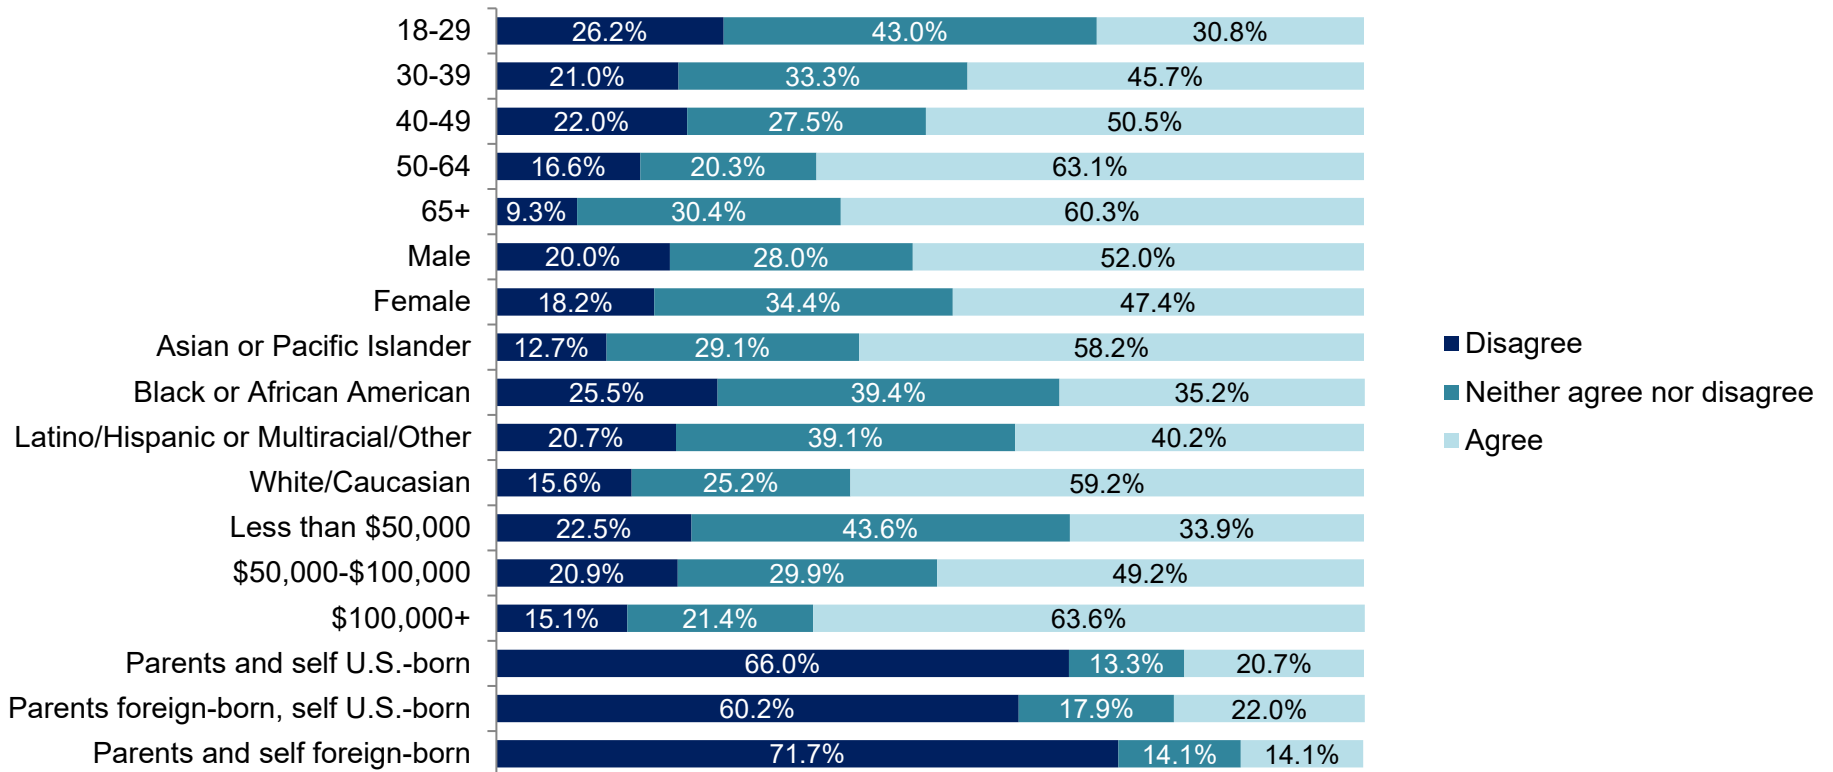

Q33: I think that drinking fluoridated tap water prevents cavities.

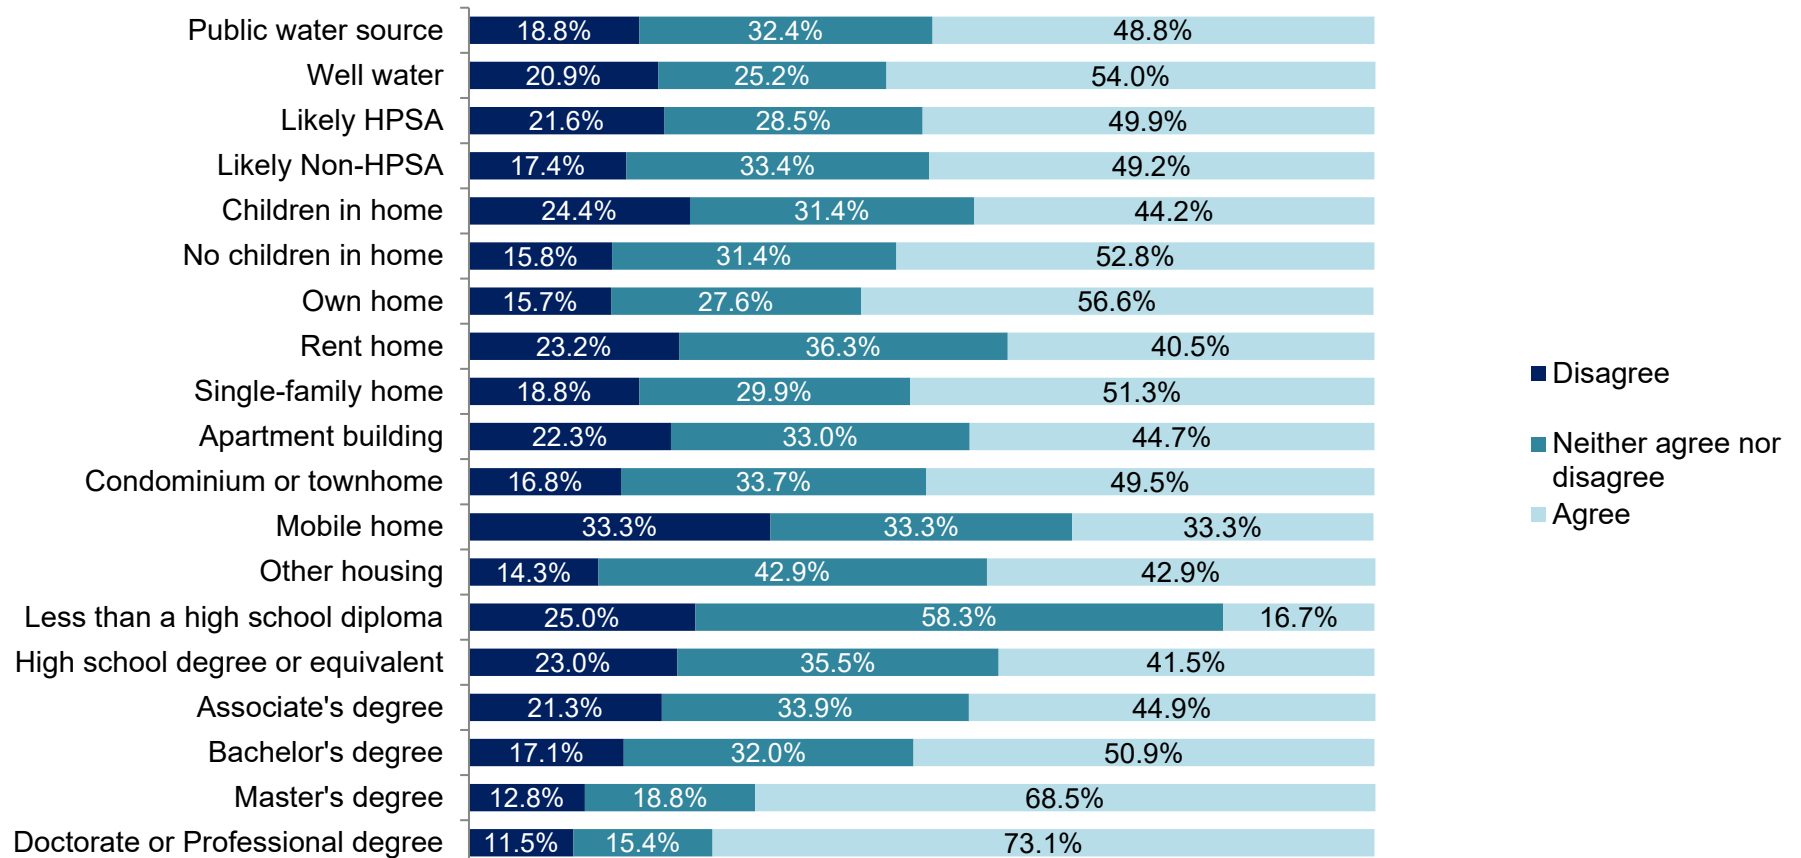

Residents who are older, Asian, White, or high-income are more likely to think that fluoridated tap water is safe to drink

Q32: I think that fluoridated tap water is safe to drink.

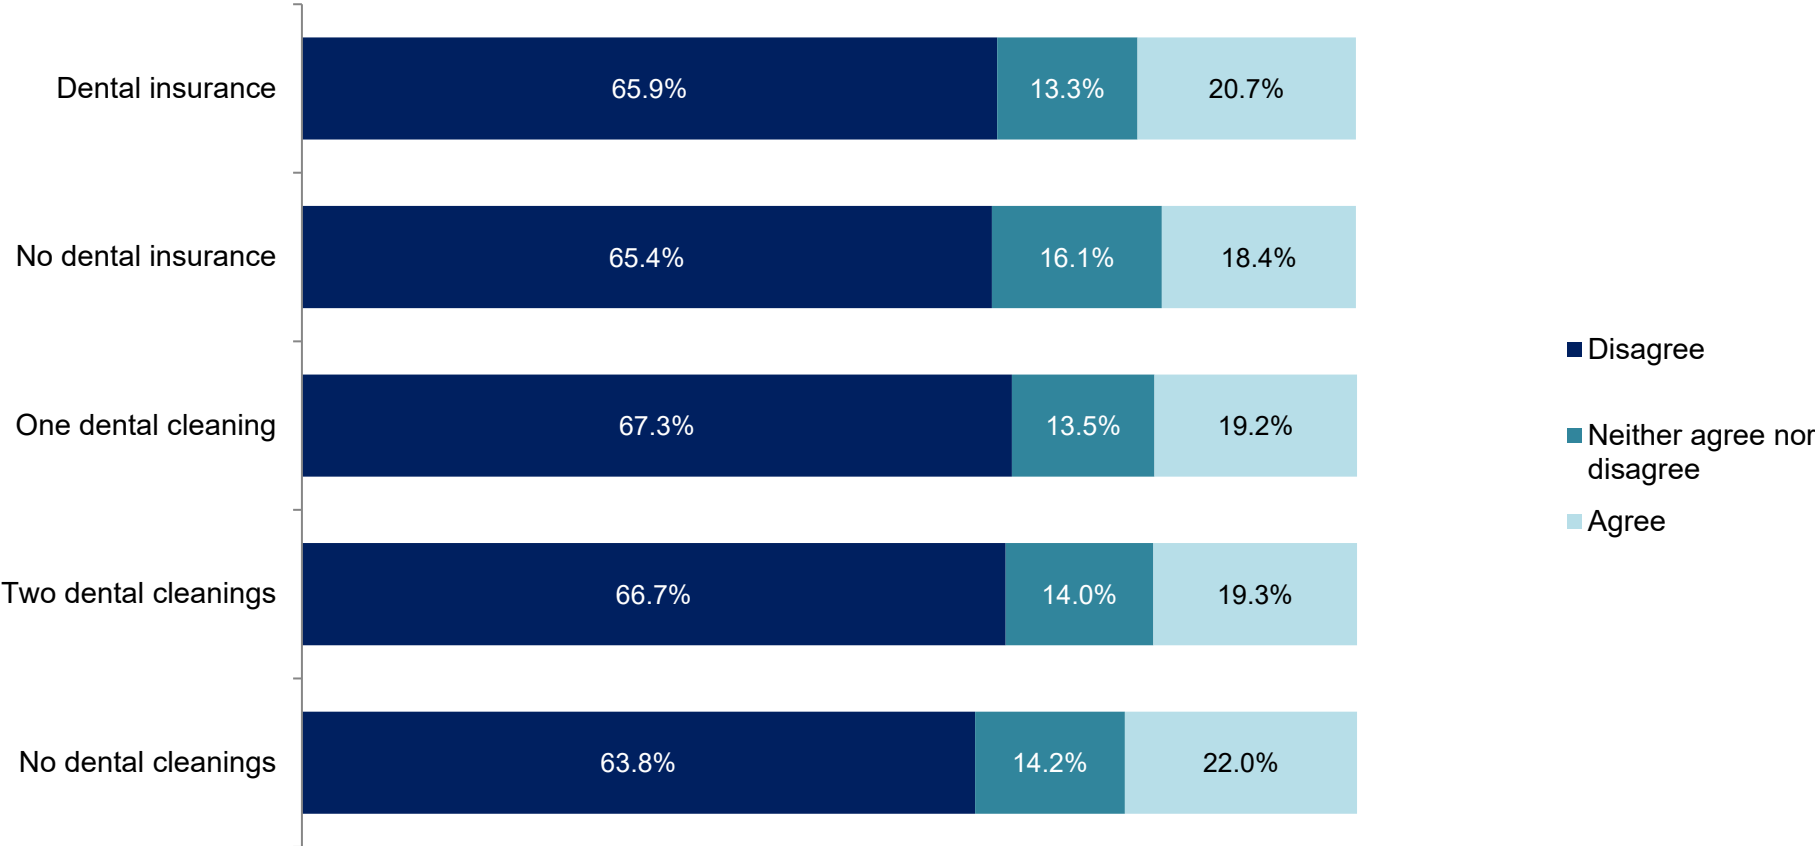

Residents who are college-educated or homeowners are more likely to think that fluoridated tap water is safe to drink

Q32: I think that fluoridated tap water is safe to drink.

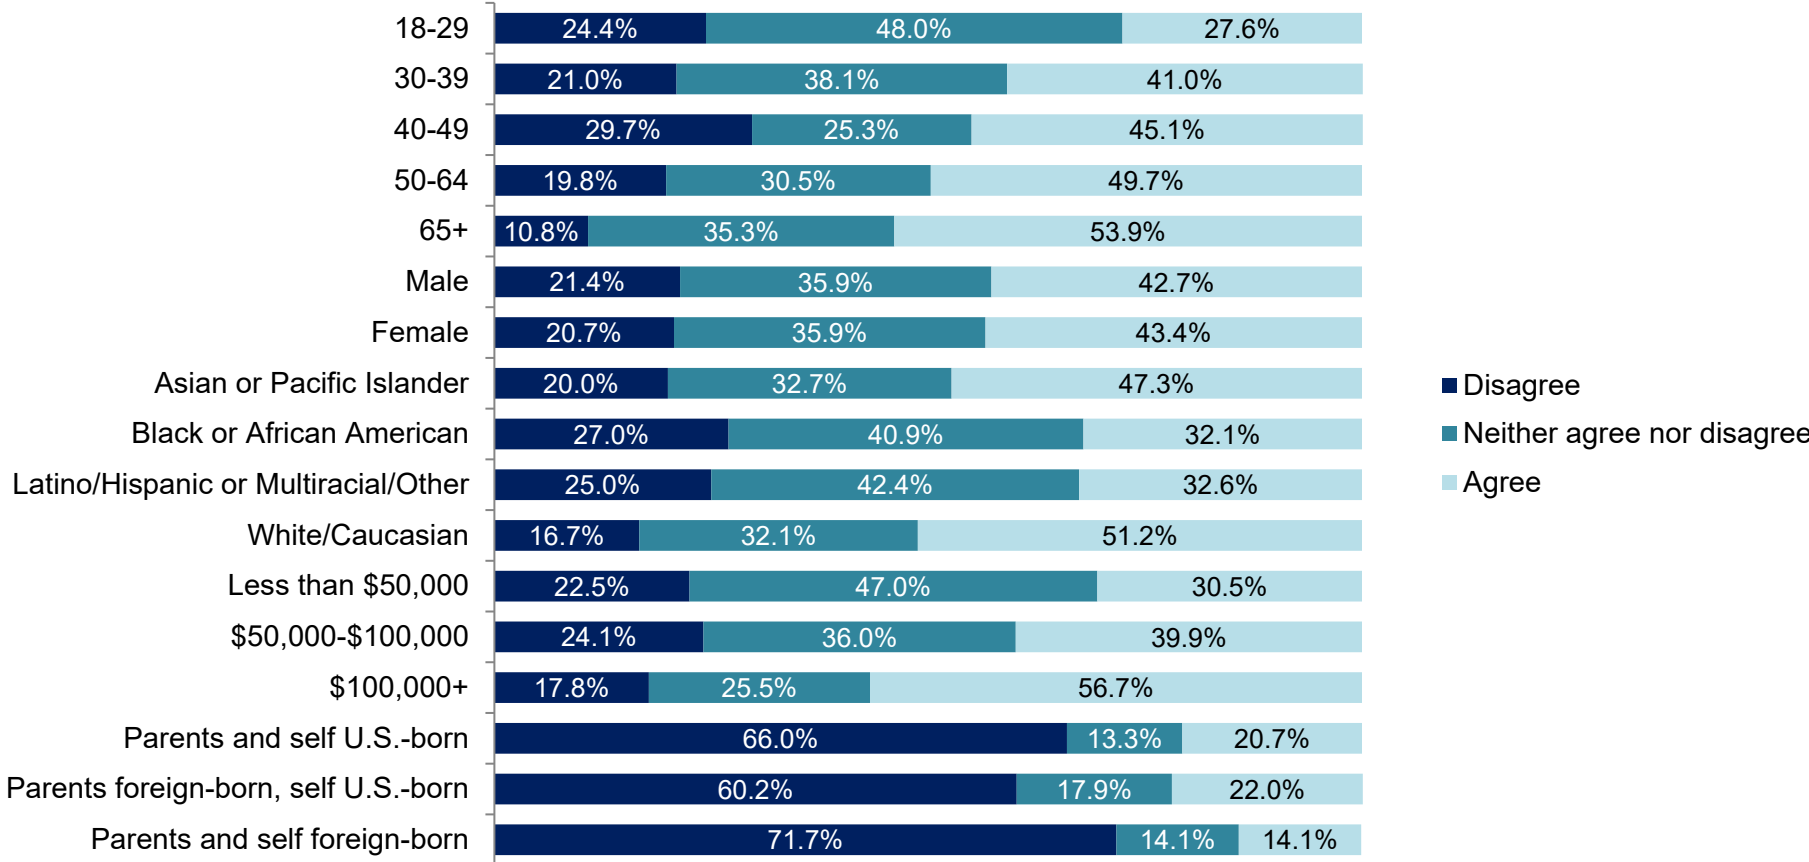

There are no major differences by dental insurance coverage in thinking that fluoridated tap water is safe to drink

Q32: I think that fluoridated tap water is safe to drink.

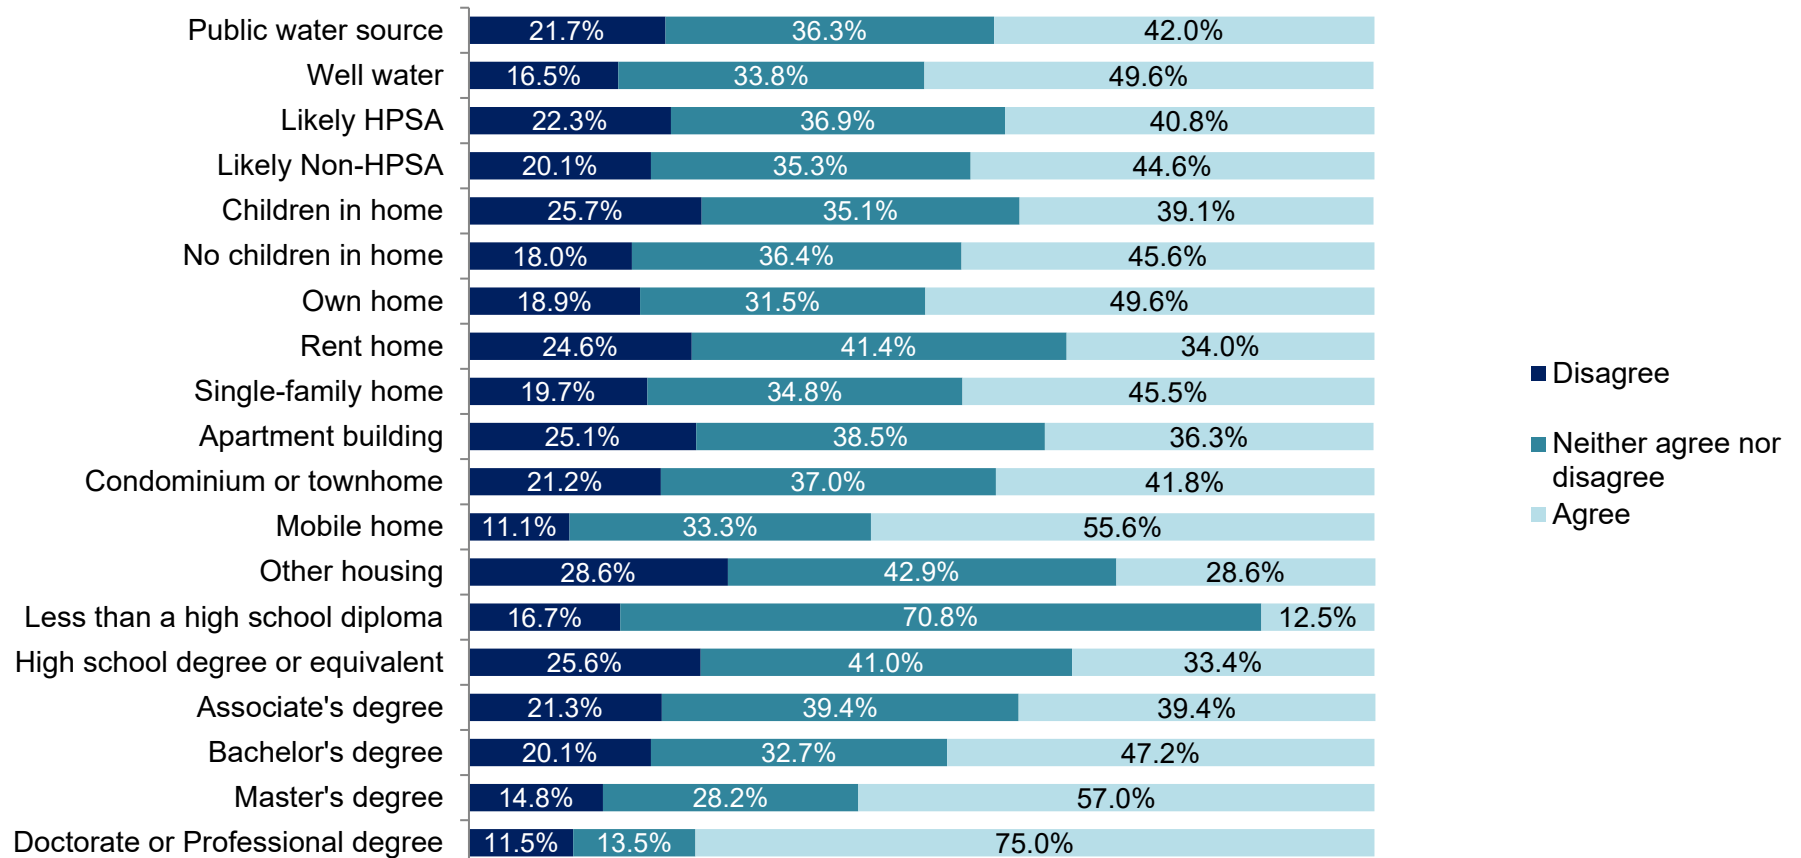

Older, Asian, White, or high-income residents are more likely to think that drinking fluoridated tap water prevents cavities

Q33: I think that drinking fluoridated tap water prevents cavities.

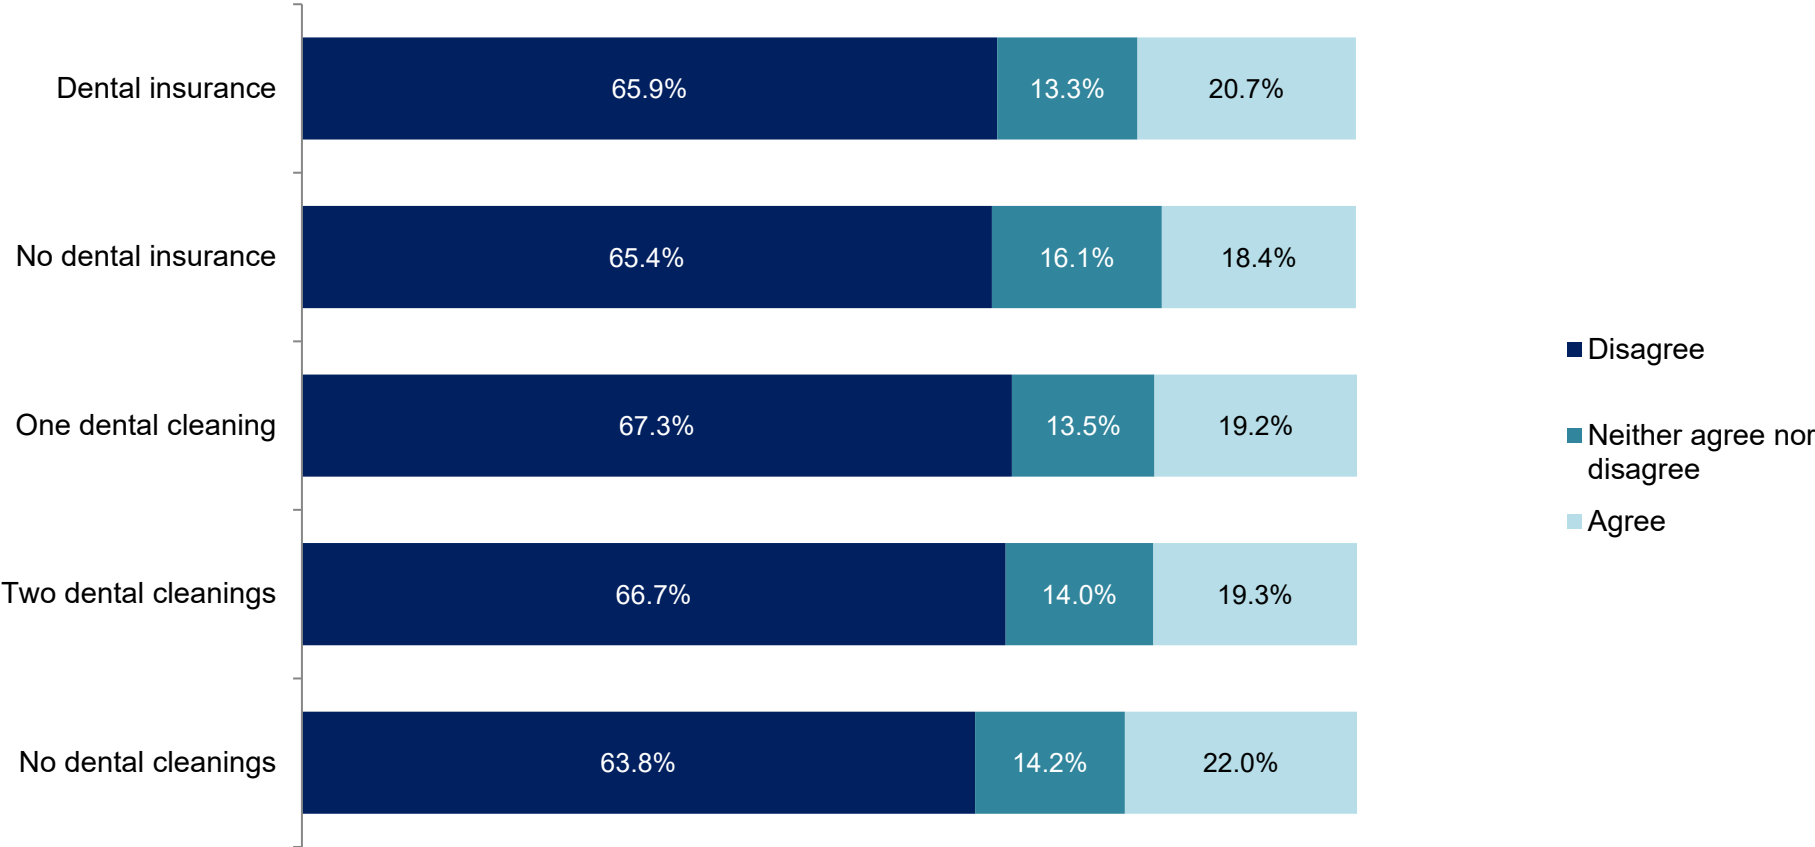

College-educated residents or homeowners are more likely to think that drinking fluoridated tap water prevents cavities

Q33: I think that drinking fluoridated tap water prevents cavities.

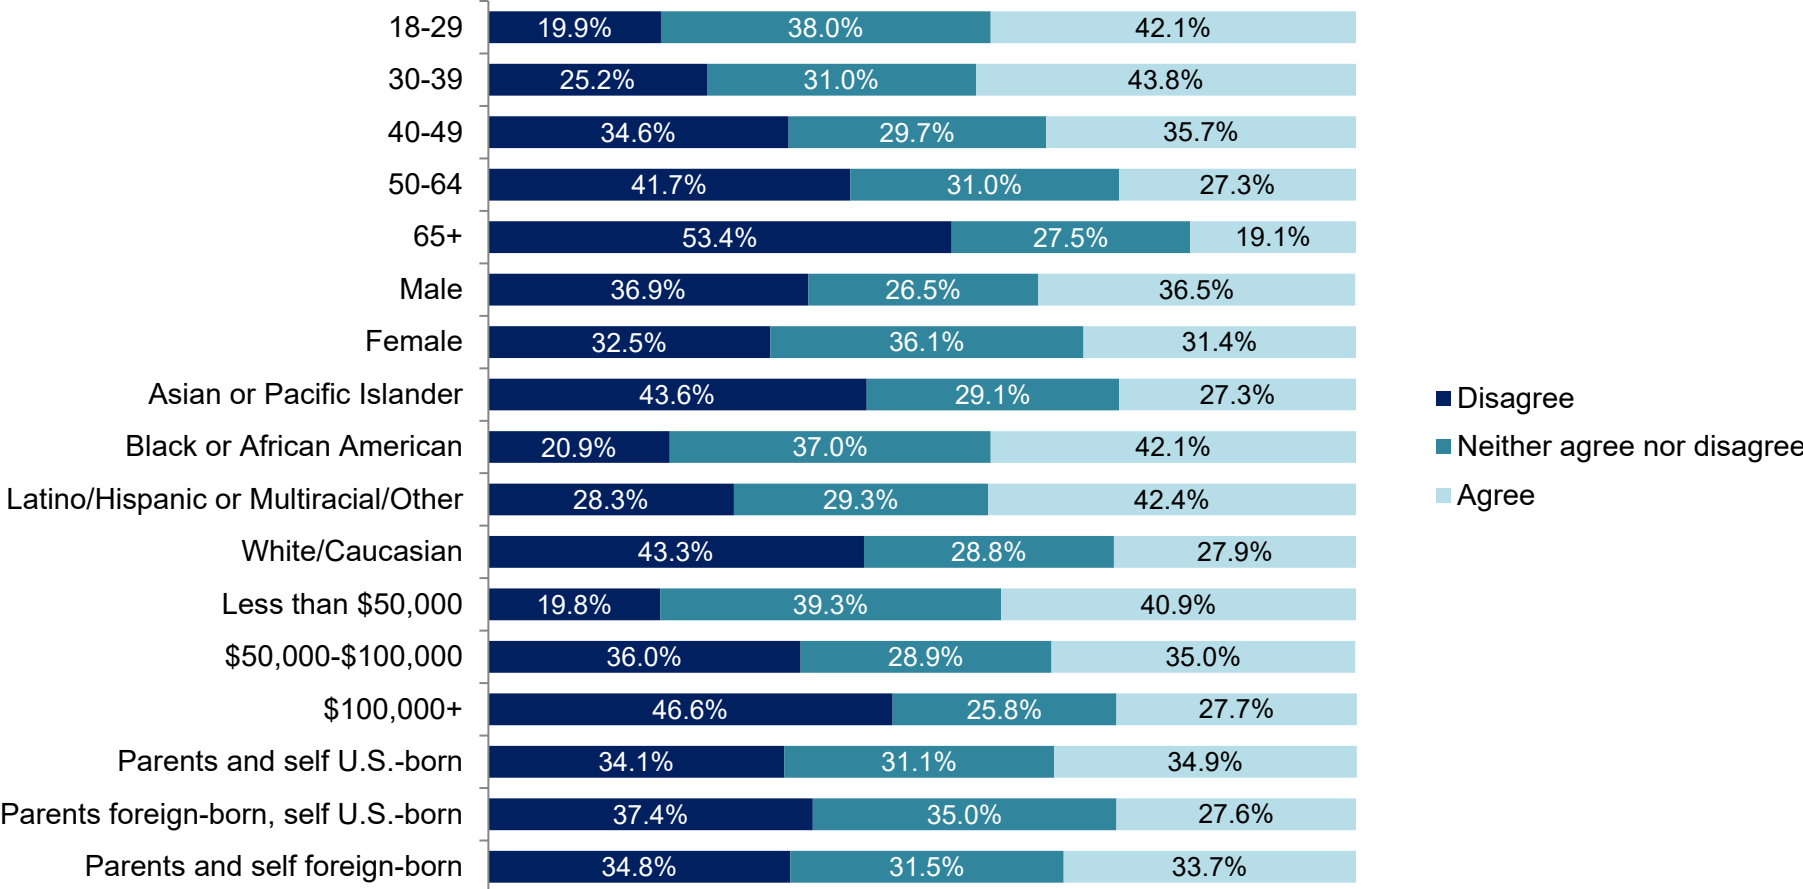

There are no large differences by dental insurance coverage in thinking that drinking fluoridated tap water prevents cavities

Q33: I think that drinking fluoridated tap water prevents cavities.

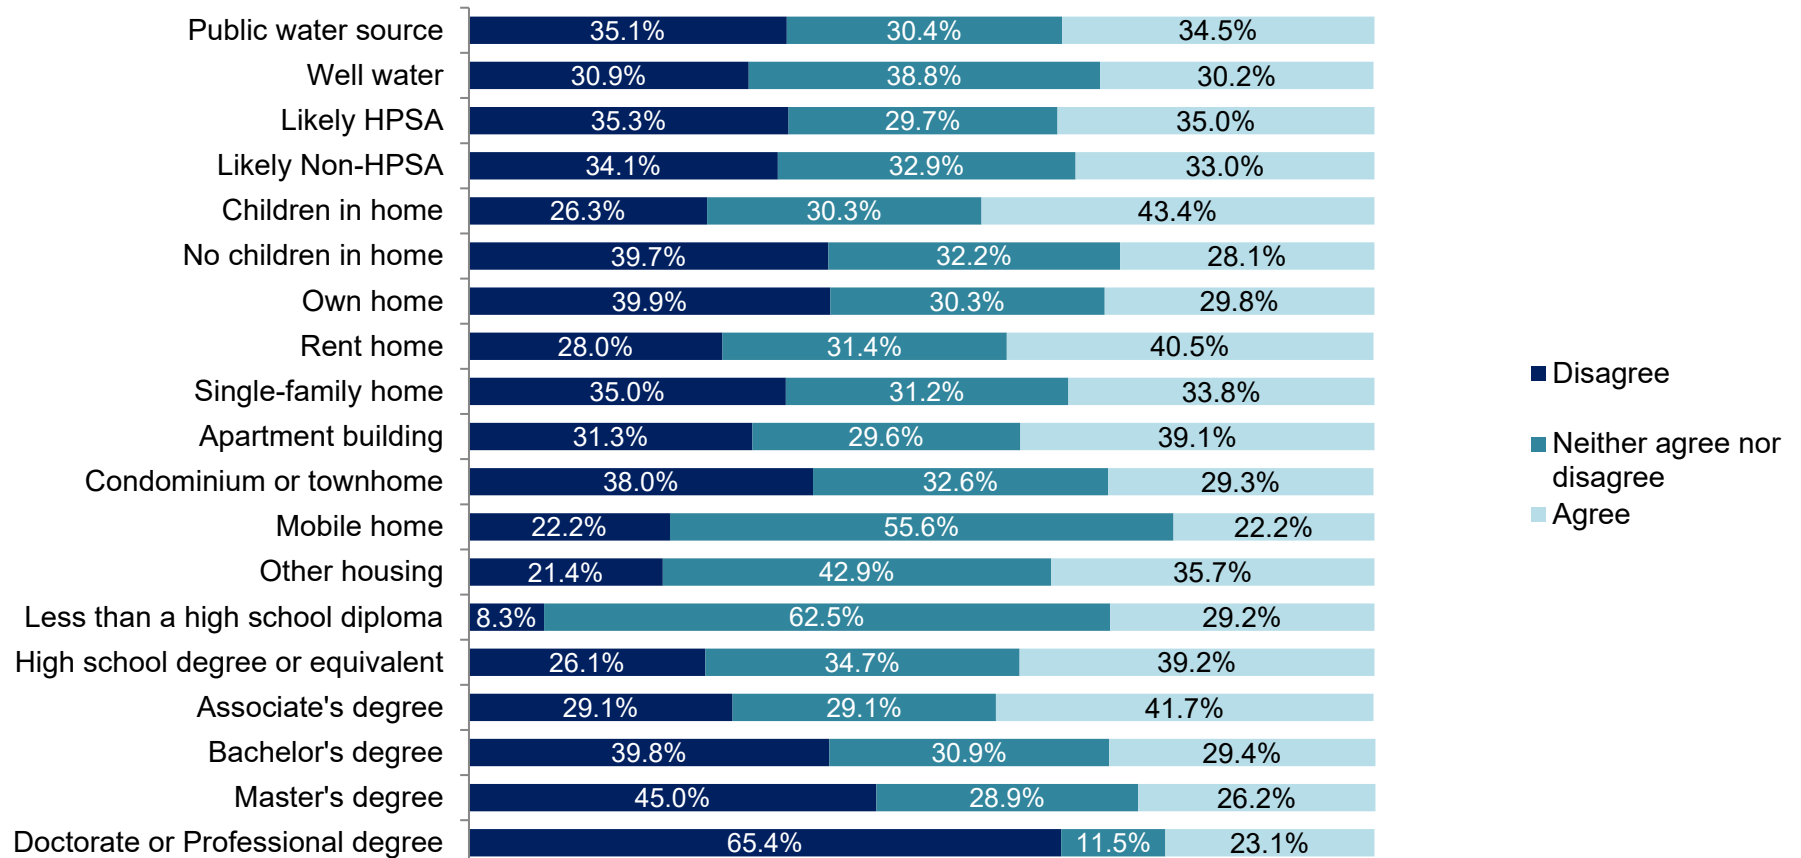

Thinking fluoridated tap water might be unhealthy is more prevalent among residents who are younger, Black, Latino/Hispanic or lower-income

Q34: I'm afraid that putting fluoride in the water supply might be unhealthy.

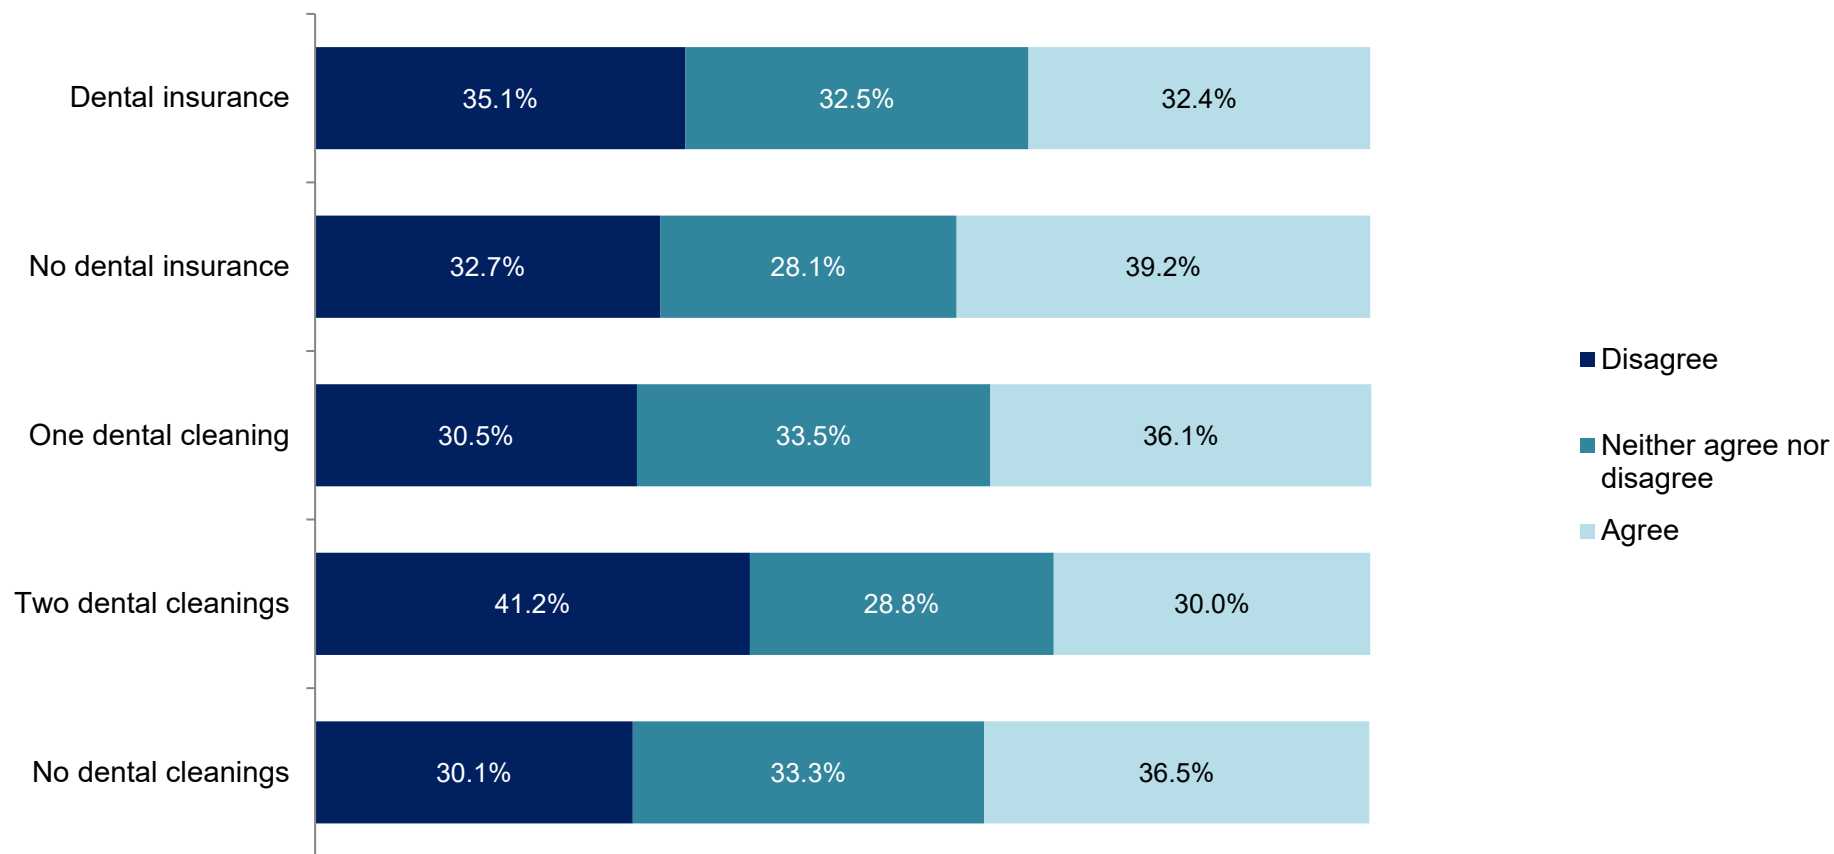

Thinking fluoridated tap water might be unhealthy is more prevalent among residents who are less-educated

Q34: I'm afraid that putting fluoride in the water supply might be unhealthy.

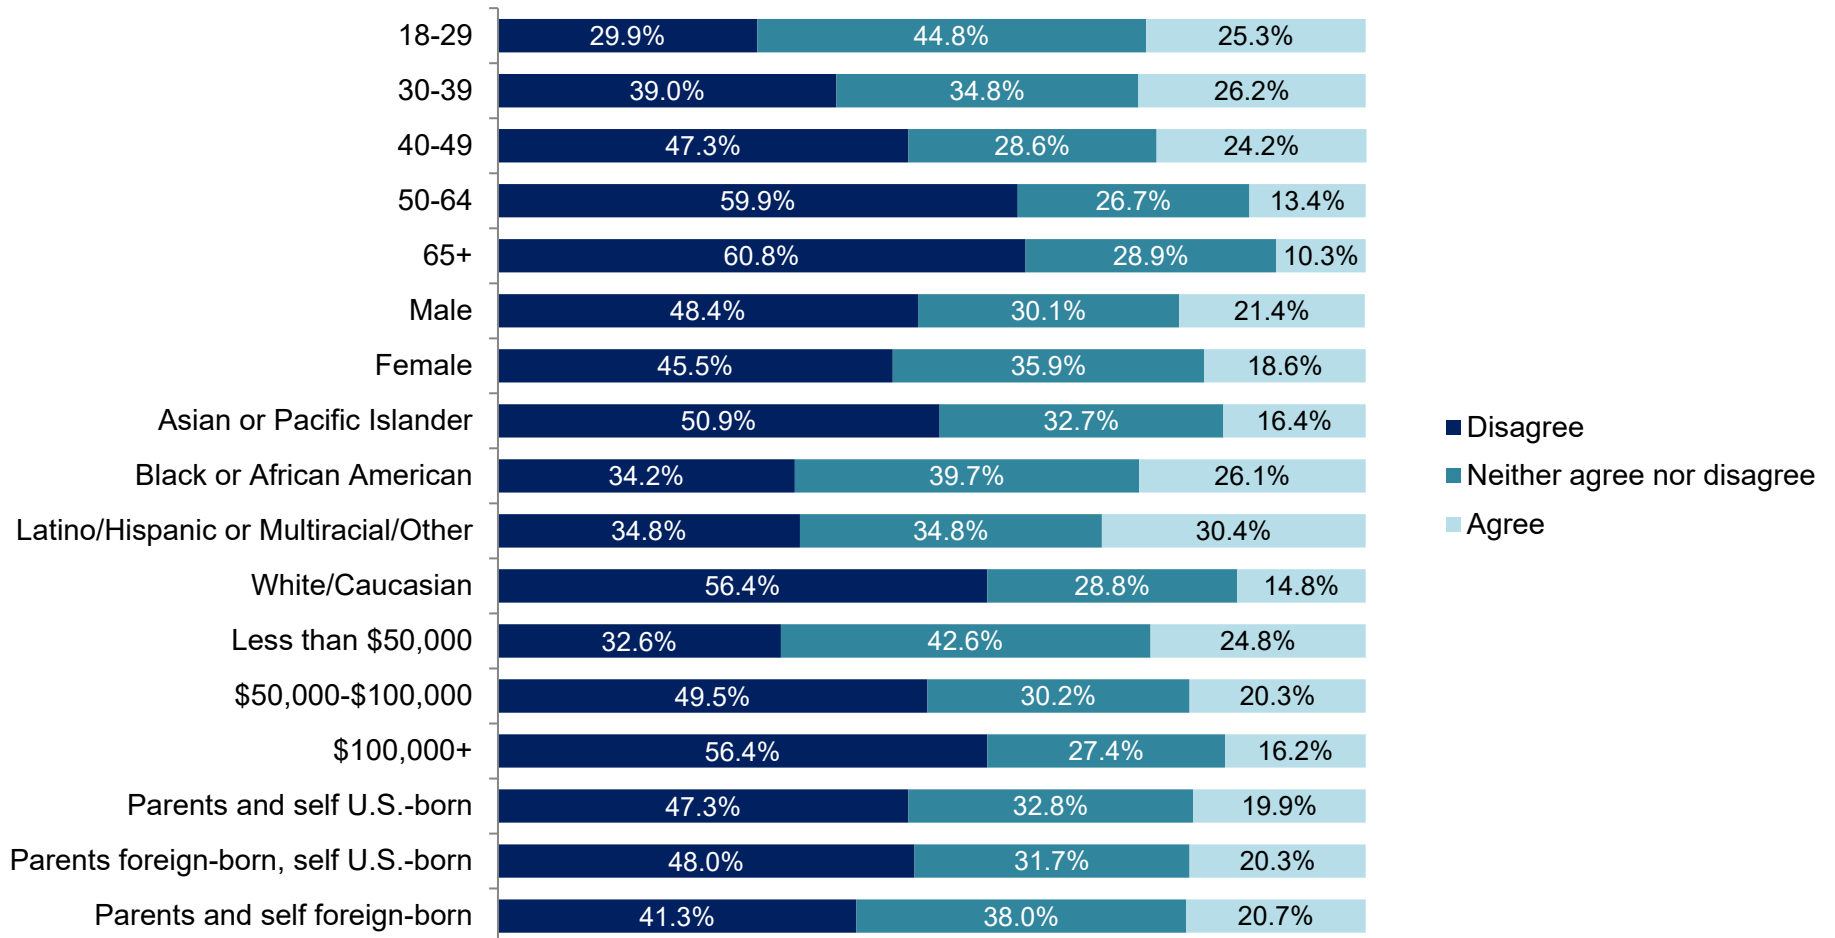

Thinking fluoridated tap water might be unhealthy is relatively equal by dental insurance coverage

Q34: I'm afraid that putting fluoride in the water supply might be unhealthy.

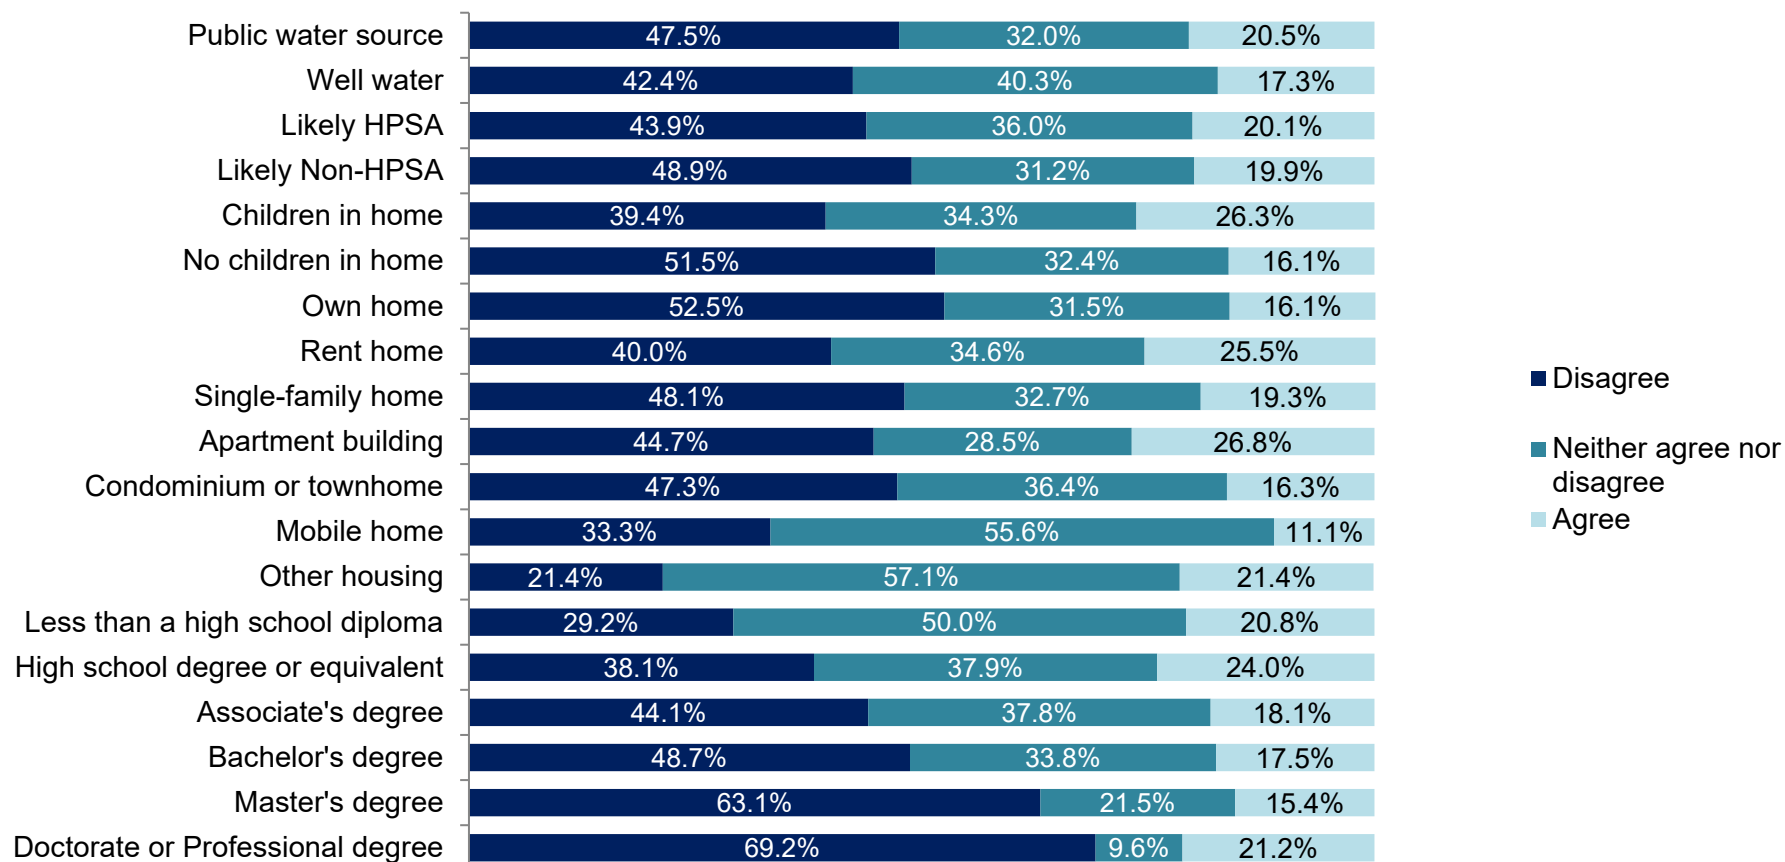

Younger, Black, Latino/Hispanic, or lower-income residents are less willing to drink tap water that has been fluoridated

Q35: I would not drink tap water that has been fluoridated.

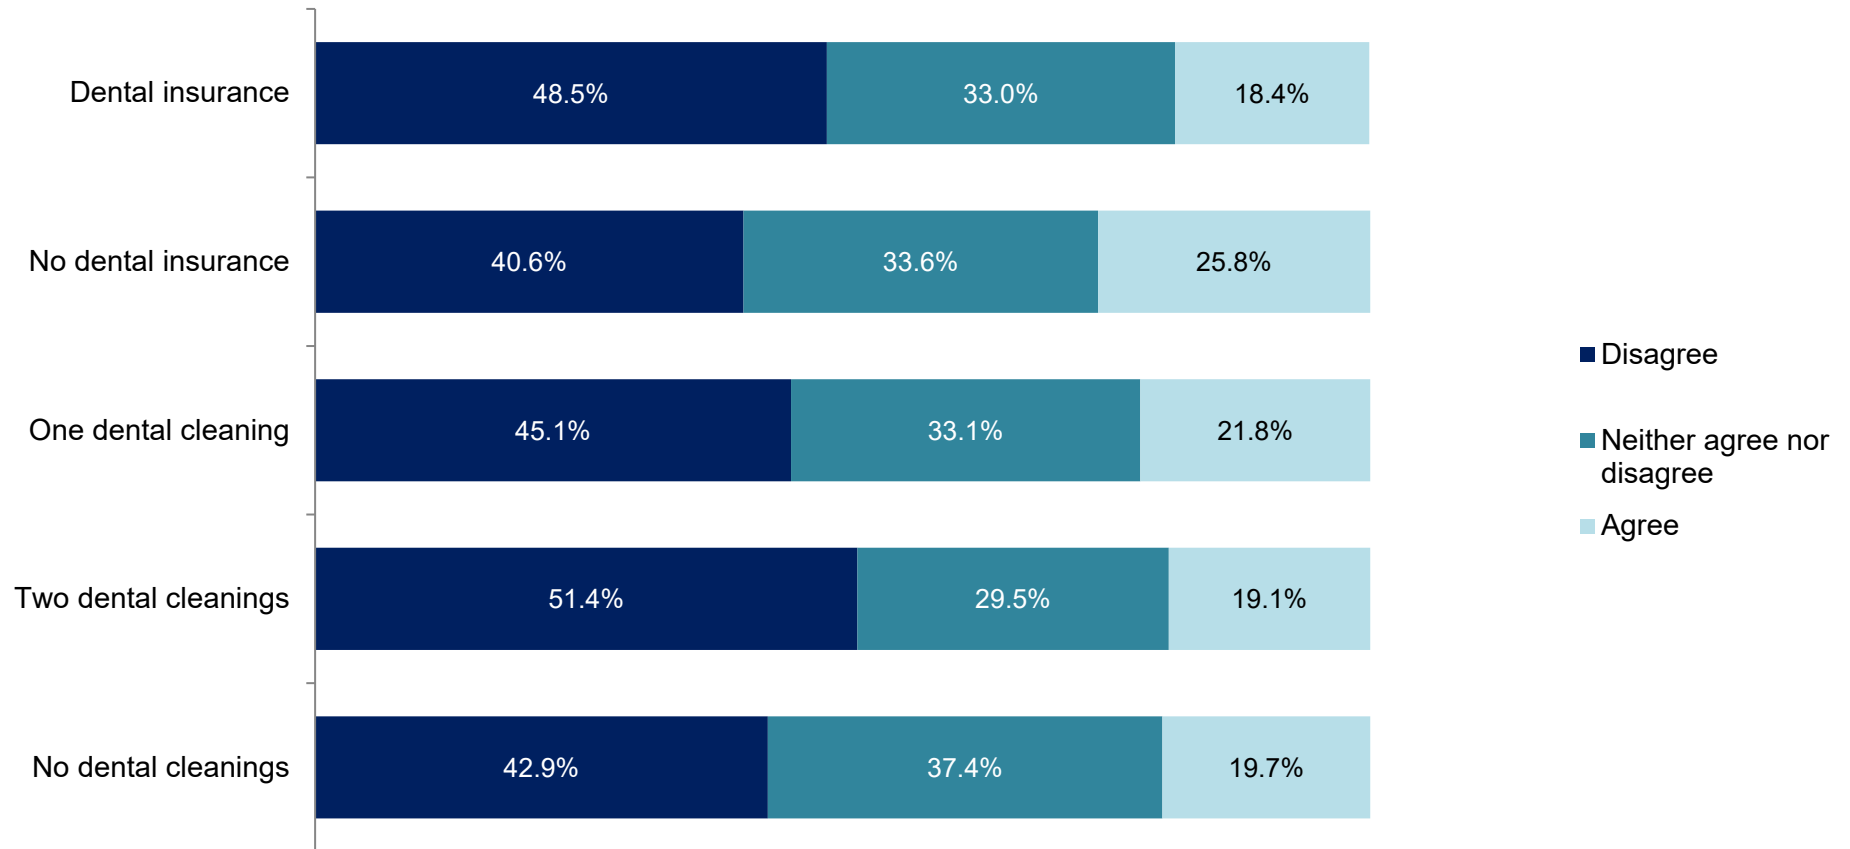

Households with children and less-educated residents are less willing to drink tap water that has been fluoridated

Q35: I would not drink tap water that has been fluoridated.

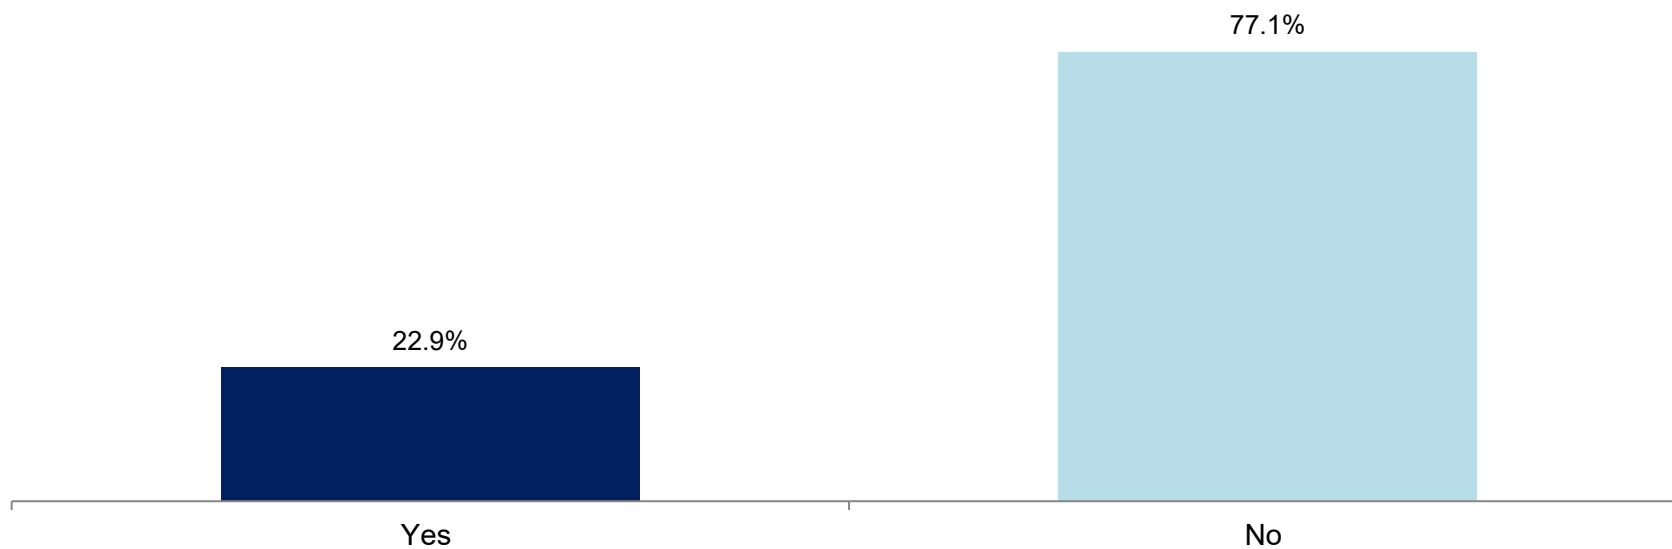

Residents without dental insurance are slightly less willing to drink tap water that has been fluoridated

Q35: I would not drink tap water that has been fluoridated.

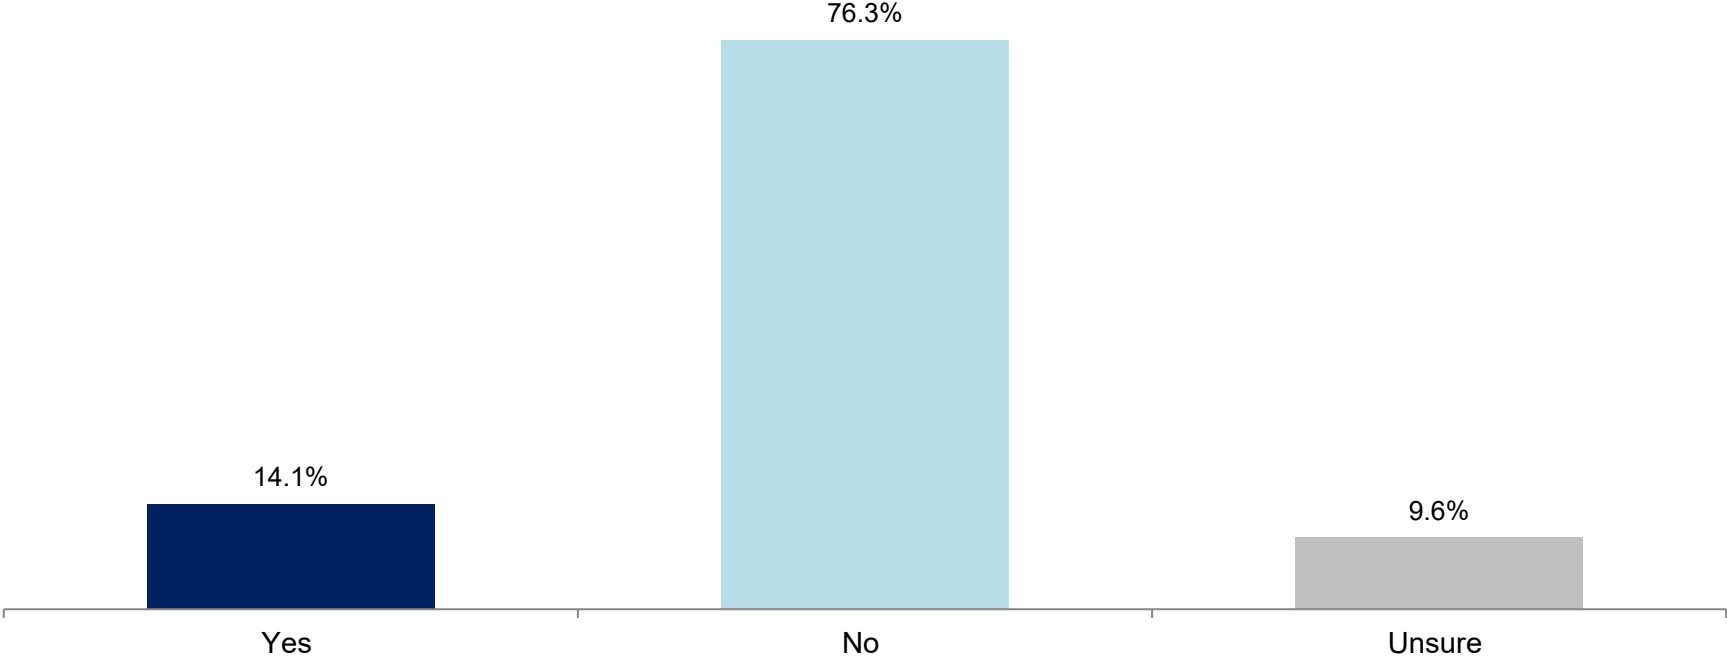

77% have not received any communication about tap water quality, safety, or testing in the past year

Q36: Have you received any communication about water quality, safety, or testing measures from your water provider in the last year?
[ASK AMONG PUBLIC/PRIVATE WATER SOURCE]

Majority have not read their Annual Water Quality Report

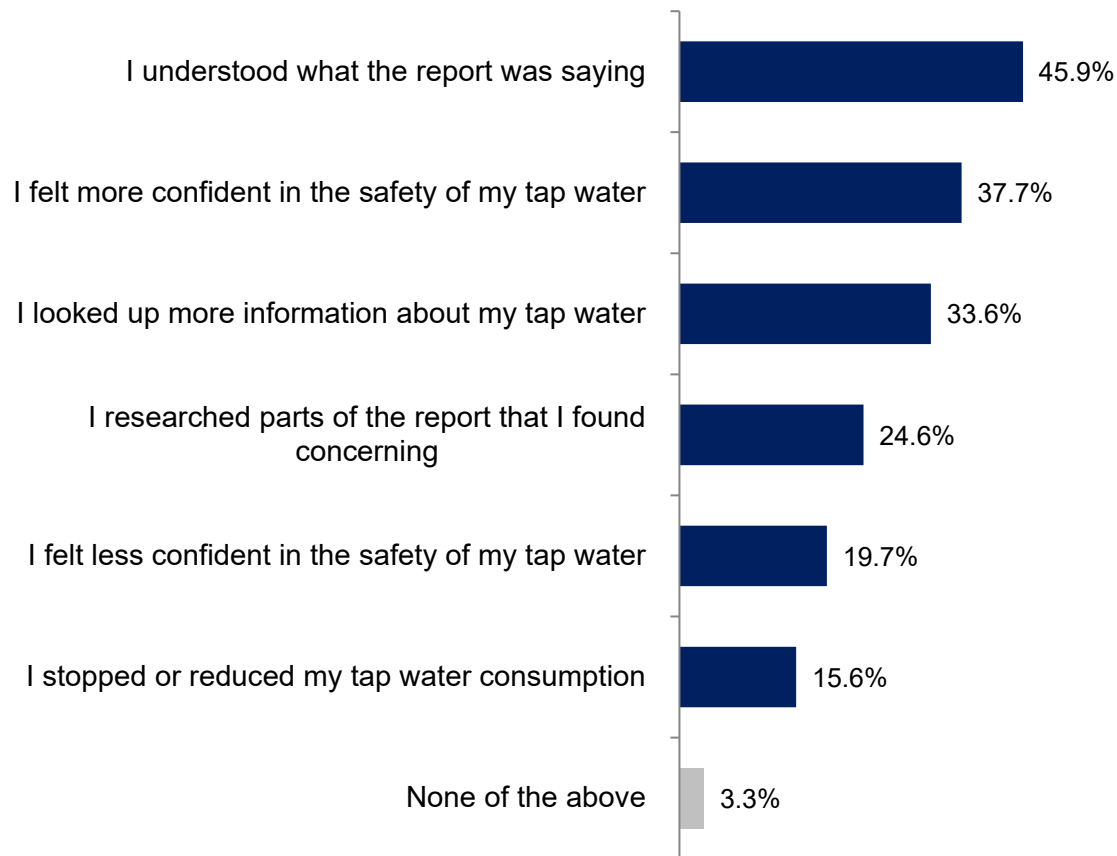

Q37: Have you read the Annual Water Quality Report from your water system?
[ASK AMONG PUBLIC/PRIVATE WATER SOURCE]

Among those who have read AWQ report, 46% understood the information; 38% felt more confident in safety of tap water; however, 20% felt less confident

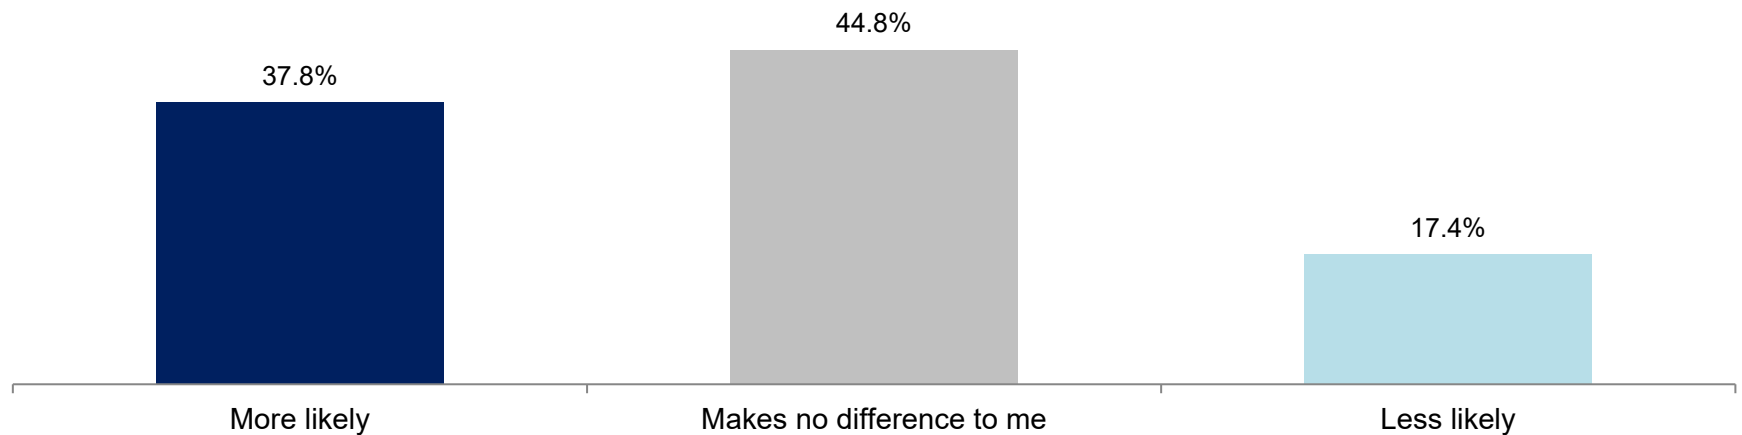

Q38: Have you read the Annual Water Quality Report from your water system?

[ASK AMONG PUBLIC/PRIVATE WATER SOURCE & READ ANNUAL WATER QUALITY REPORT]

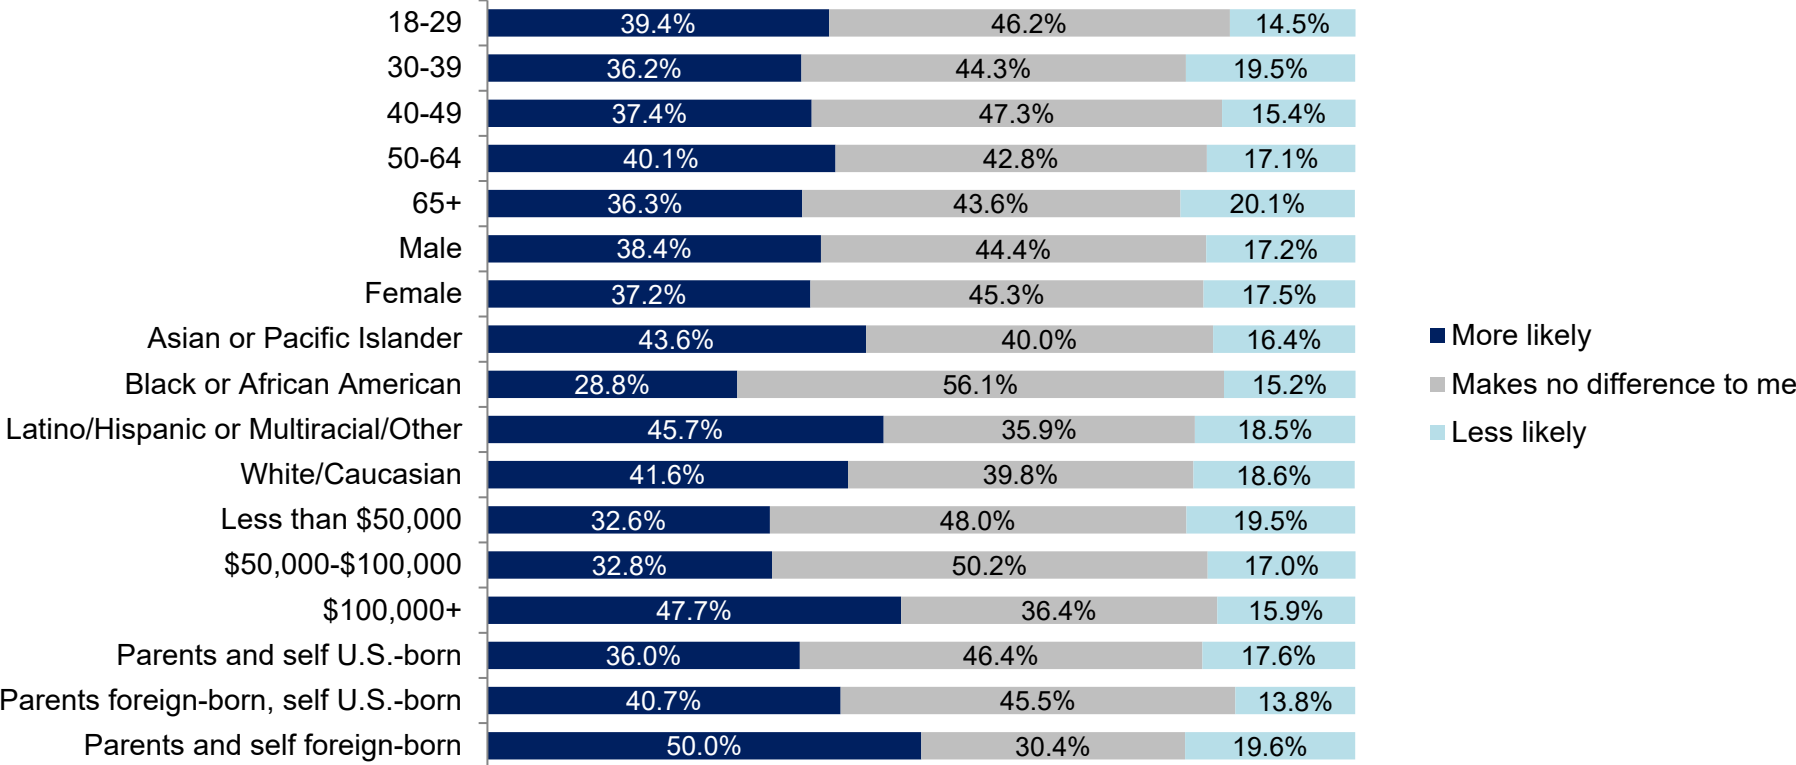

38% are more likely to drink tap water over bottled water because of environmental reasons

Q39: Bottled water requires approximately 2,000 times more energy to produce than tap water. In other words, the process of bottling and transporting the water requires the use of more energy to produce plastic bottles, supply oil/gas for trucks, recruit and employ human labor, etc. Does knowing this information make you more likely or less likely to drink tap water instead of bottled water in the future?

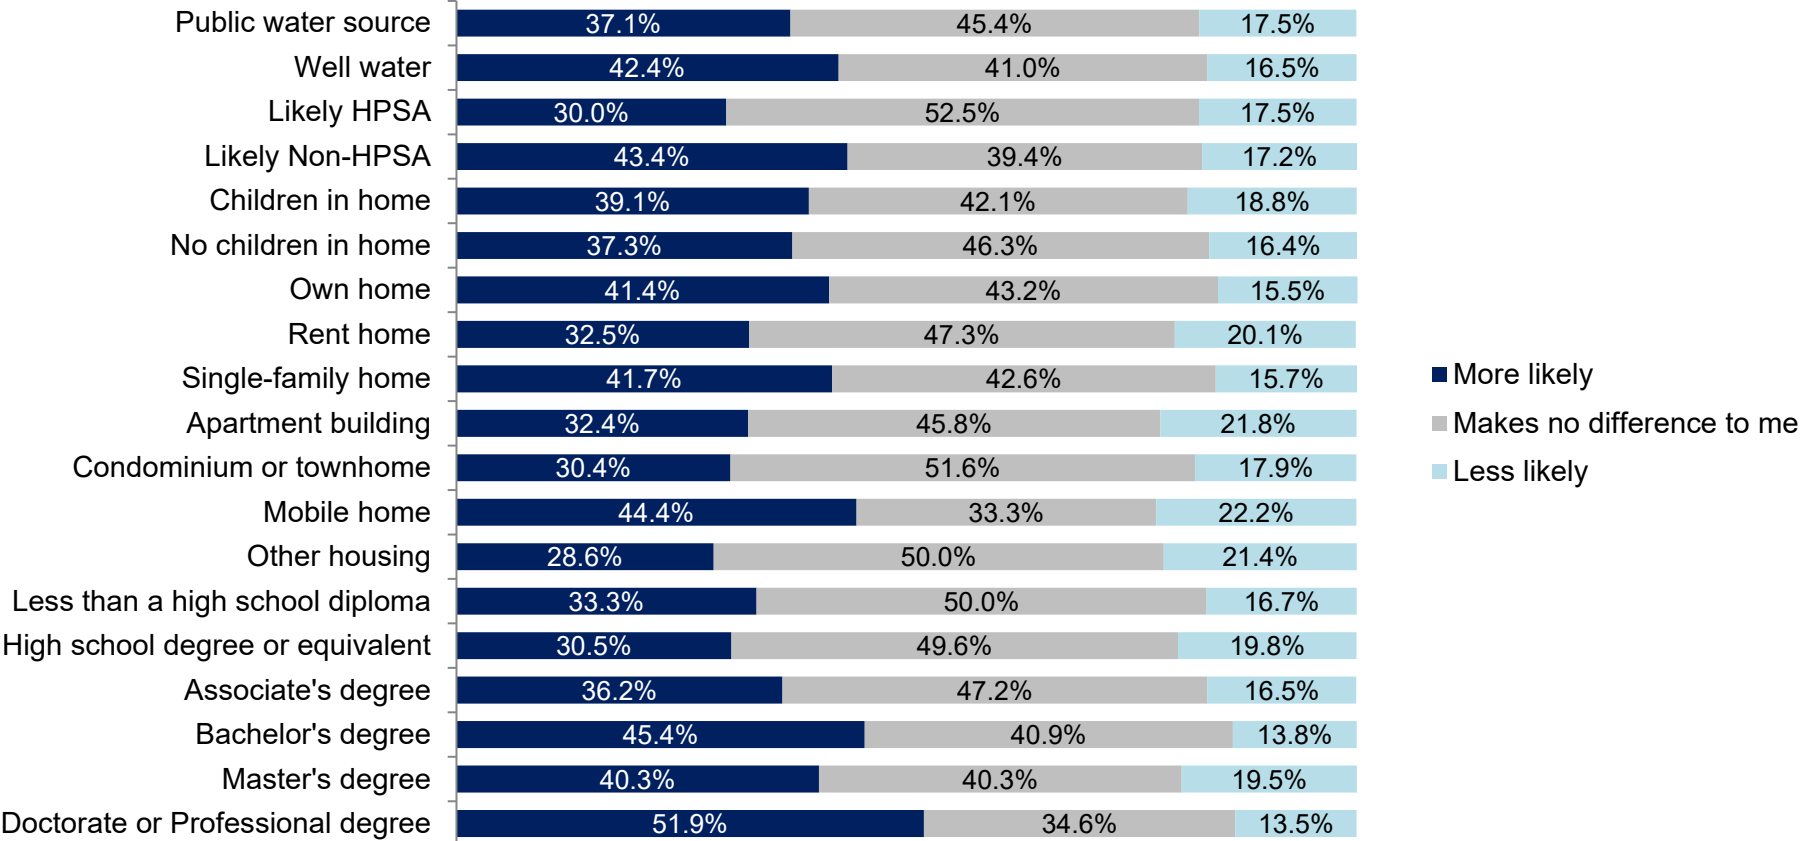

Higher-income residents are more likely to drink tap water over bottled water because of energy consumption than lower-income residents

Q39: Bottled water requires approximately 2,000 times more energy to produce than tap water. In other words, the process of bottling and transporting the water requires the use of more energy to produce plastic bottles, supply oil/gas for trucks, recruit and employ human labor, etc. Does knowing this information make you more likely or less likely to drink tap water instead of bottled water in the future?

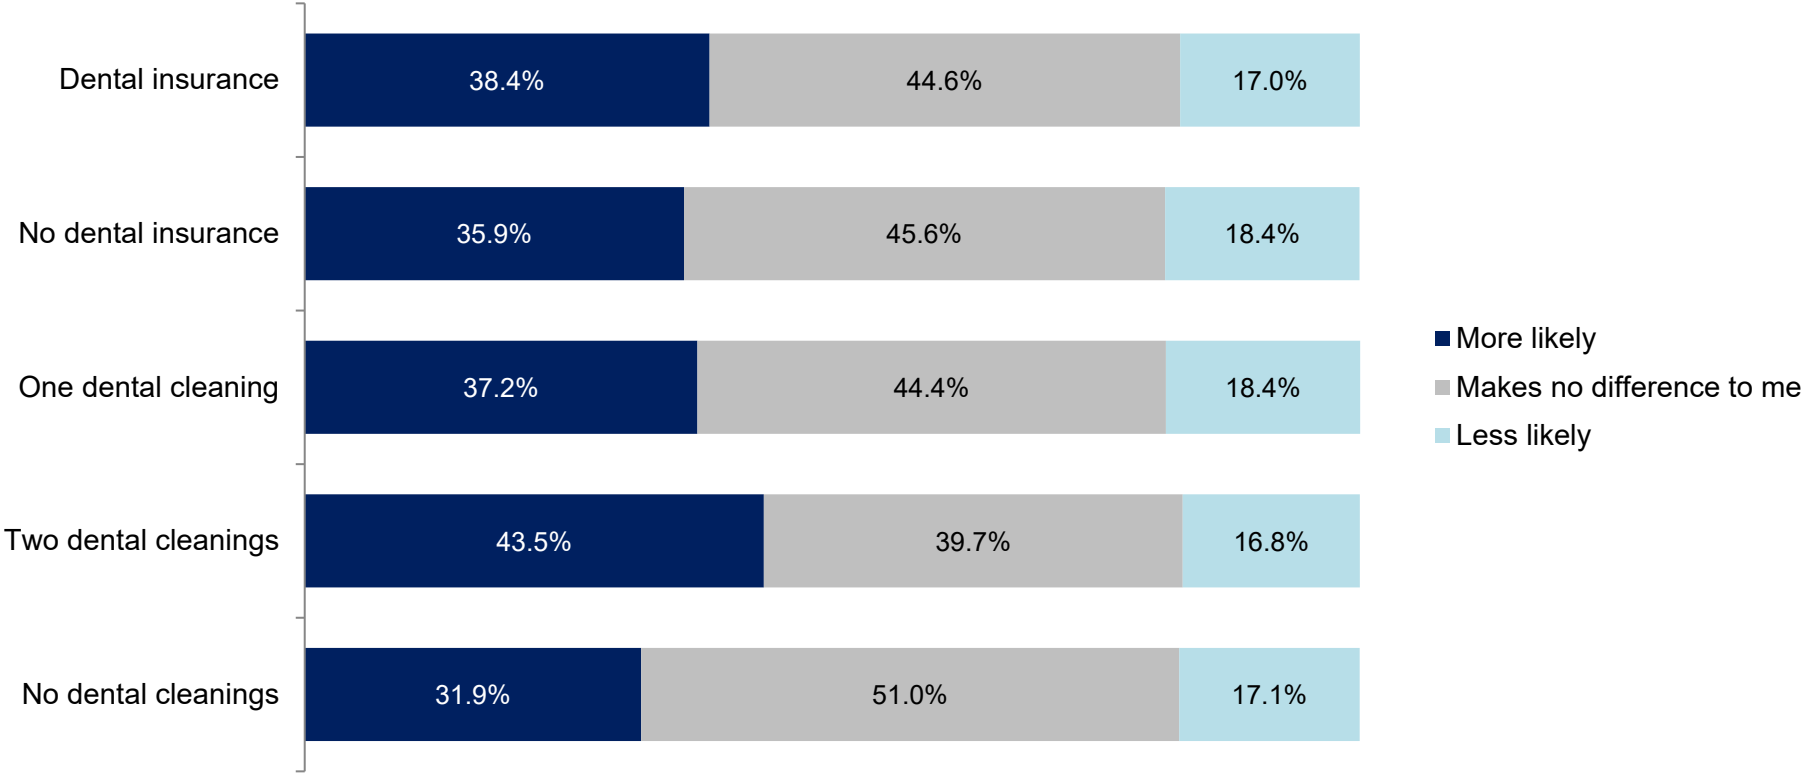

Homeowners or college-educated are more likely to drink tap water over bottled water for energy consumption reasons

Q39: Bottled water requires approximately 2,000 times more energy to produce than tap water. In other words, the process of bottling and transporting the water requires the use of more energy to produce plastic bottles, supply oil/gas for trucks, recruit and employ human labor, etc. Does knowing this information make you more likely or less likely to drink tap water instead of bottled water in the future?

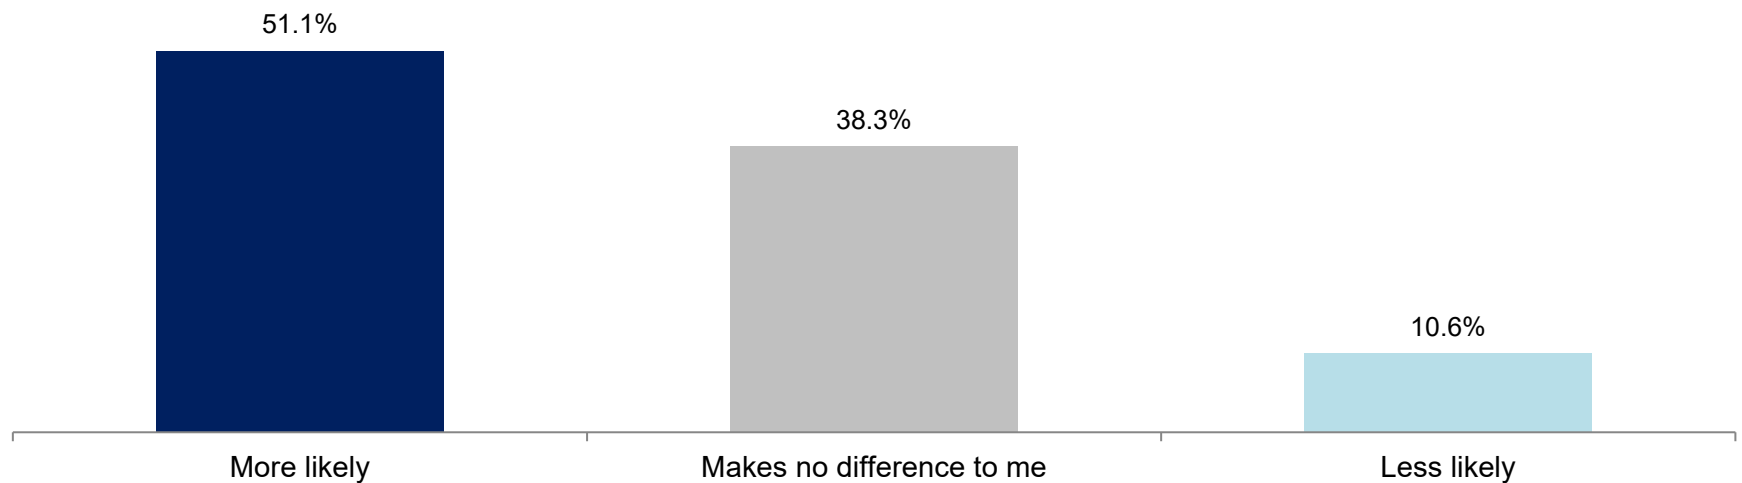

Residents who have regular cleanings are more likely to drink tap water over bottled water for energy consumption reasons

Q39: Bottled water requires approximately 2,000 times more energy to produce than tap water. In other words, the process of bottling and transporting the water requires the use of more energy to produce plastic bottles, supply oil/gas for trucks, recruit and employ human labor, etc. Does knowing this information make you more likely or less likely to drink tap water instead of bottled water in the future?

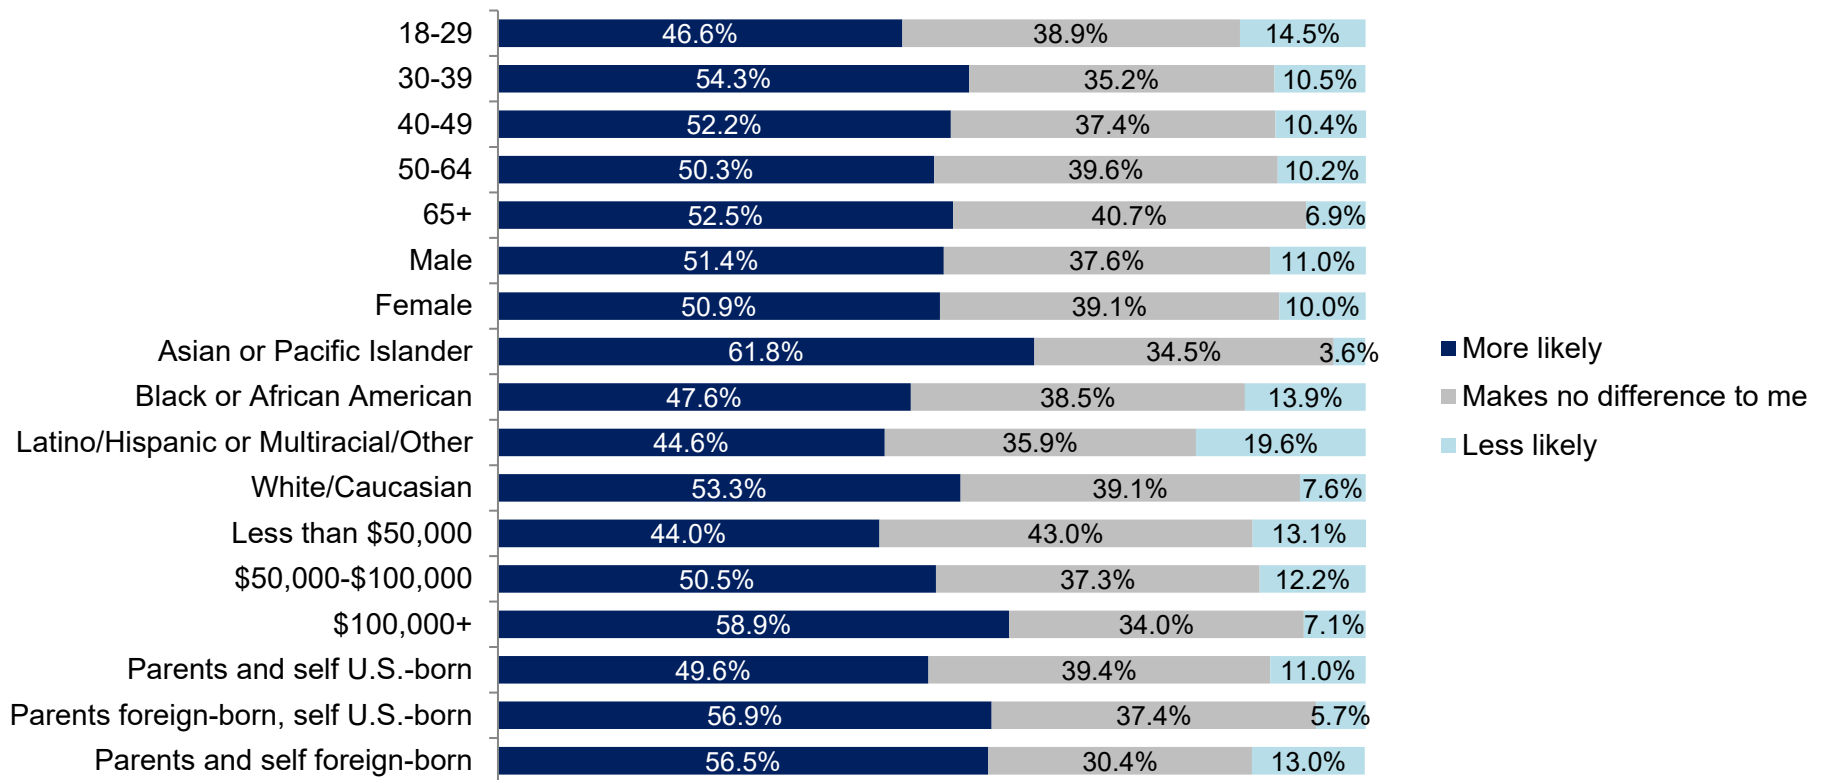

51% are more likely to drink tap water over bottled water knowing that it is recommended by health organizations and provides oral health benefits

Q40: Drinking fluoridated tap water is recommended by nearly all public health, medical, and dental health organizations because it keeps teeth strong and reduces cavities by about 25% in both children and adults with no adverse health effects. Does knowing this information make you more likely or less likely to drink tap water instead of bottled water in the future?

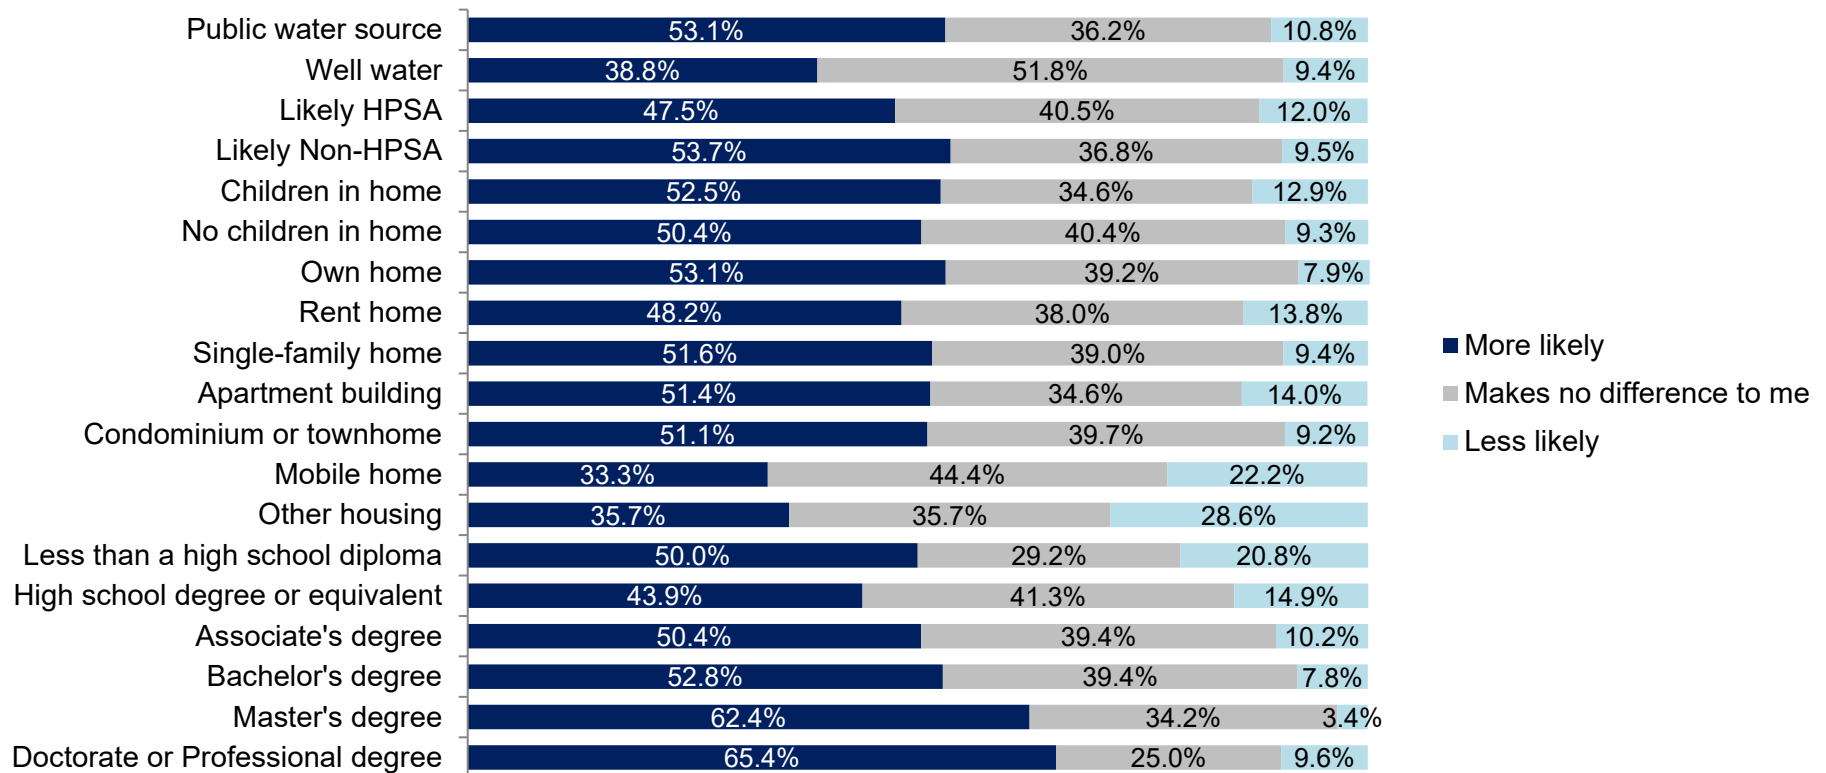

Asian, White, or high-income residents are more likely to drink tap water over bottled water knowing that it is recommended by health organizations and provides oral health benefits

Q40: Drinking fluoridated tap water is recommended by nearly all public health, medical, and dental health organizations because it keeps teeth strong and reduces cavities by about 25% in both children and adults with no adverse health effects. Does knowing this information make you more likely or less likely to drink tap water instead of bottled water in the future?

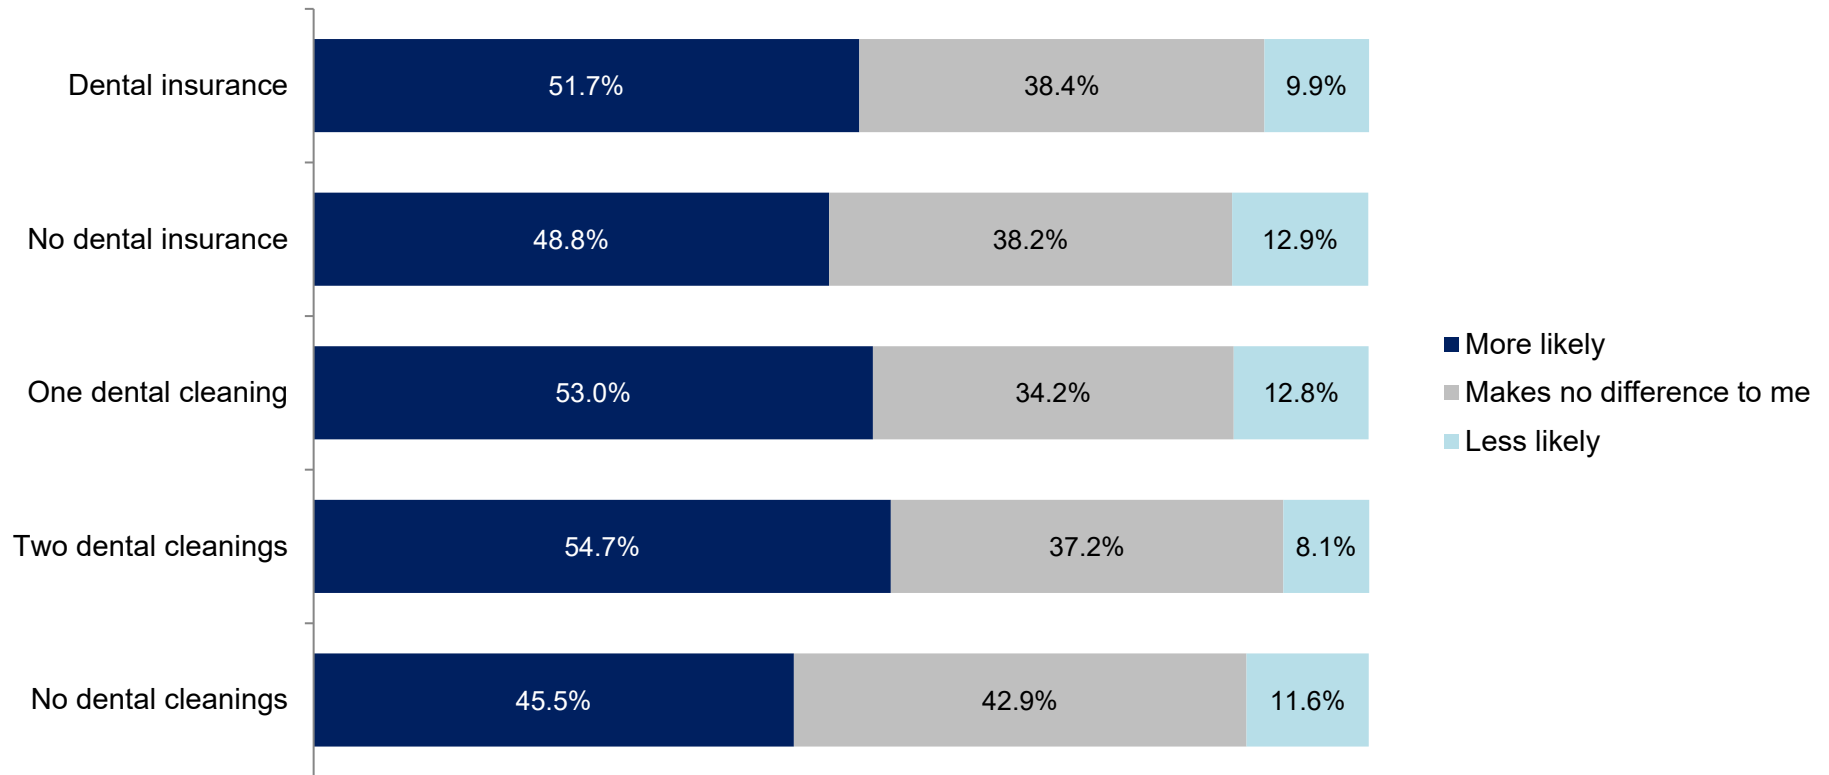

Public water users or college-educated residents are more likely to drink tap water over bottled because of medical organization recommendations and oral health benefits

Q40: Drinking fluoridated tap water is recommended by nearly all public health, medical, and dental health organizations because it keeps teeth strong and reduces cavities by about 25% in both children and adults with no adverse health effects. Does knowing this information make you more likely or less likely to drink tap water instead of bottled water in the future?

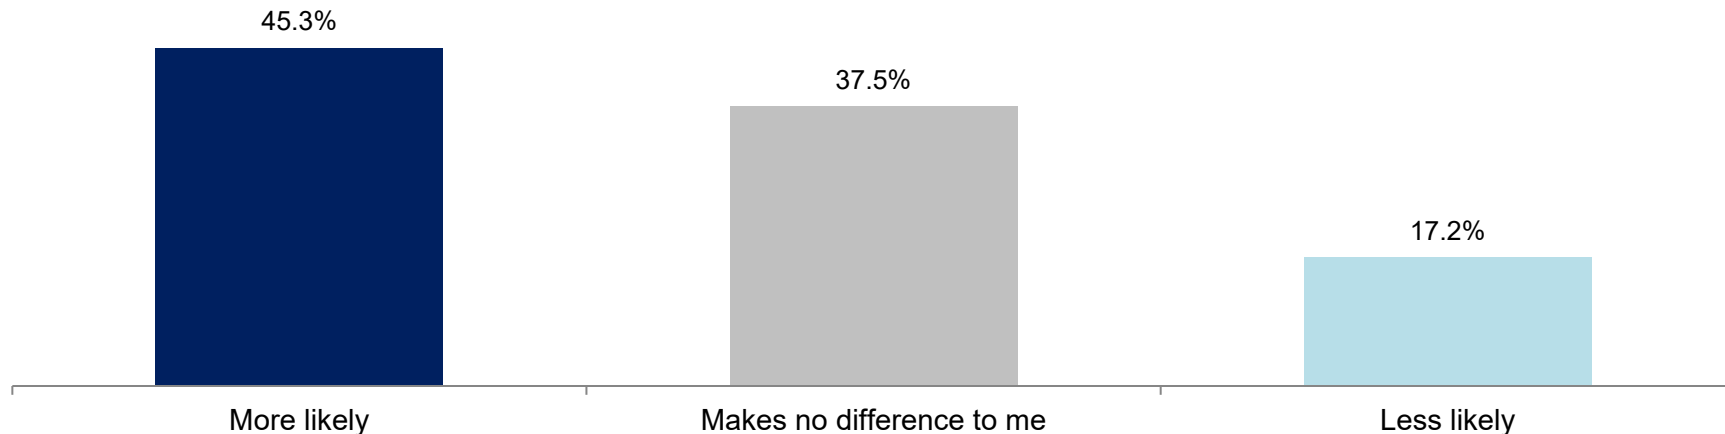

Likelihood of drinking tap water over bottled water because of medical organization recommendations and oral health benefits are relatively equal by dental insurance coverage

Q40: Drinking fluoridated tap water is recommended by nearly all public health, medical, and dental health organizations because it keeps teeth strong and reduces cavities by about 25% in both children and adults with no adverse health effects. Does knowing this information make you more likely or less likely to drink tap water instead of bottled water in the future?

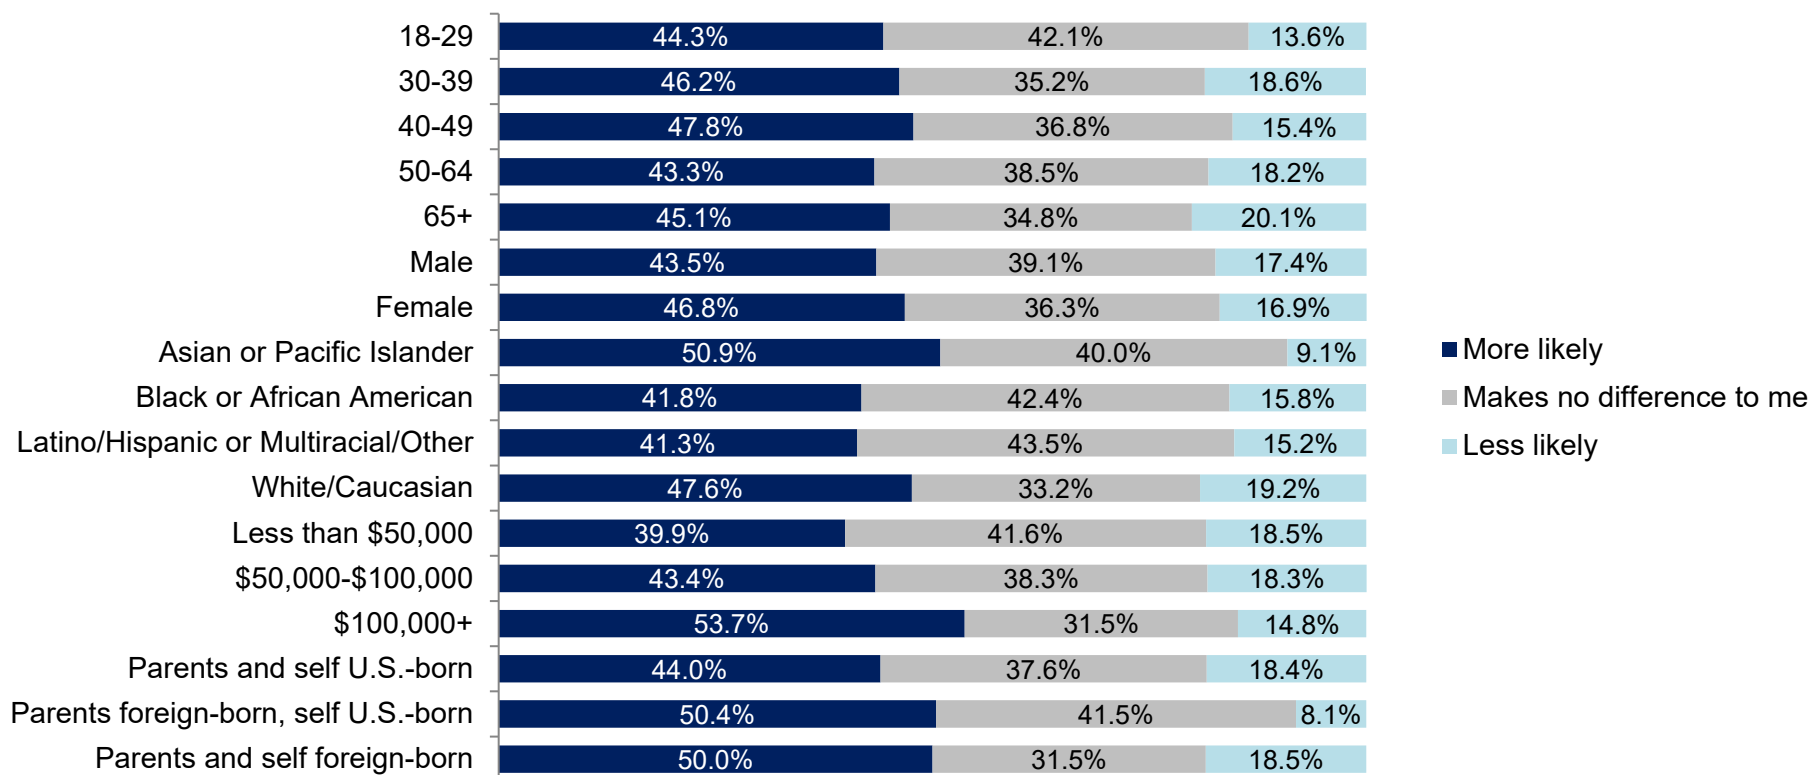

45% are more likely to drink tap water over bottled water knowing that bottled water is less regulated than tap water

Q41: Bottled water is less regulated than tap water. In many cases, it is bottled in states with less regulation on chemicals and fewer, less strict requirements for testing. Does knowing this information make you more likely or less likely to drink tap water instead of bottled water in the future?

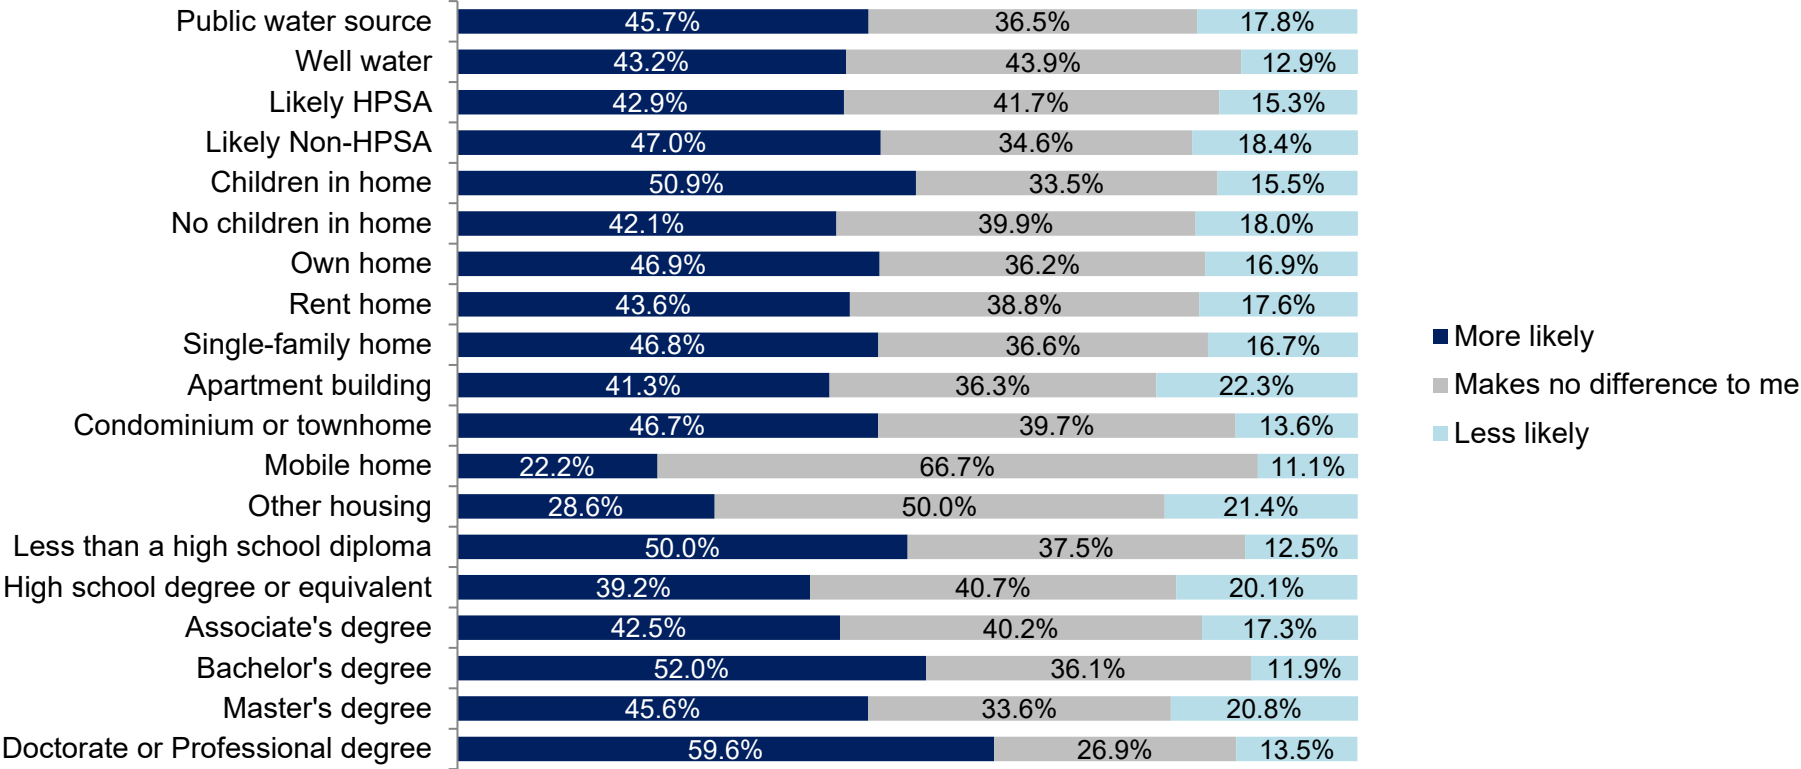

High-income residents are more likely to drink tap water over bottled water knowing that bottled water is less regulated than tap water

Q41: Bottled water is less regulated than tap water. In many cases, it is bottled in states with less regulation on chemicals and fewer, less strict requirements for testing. Does knowing this information make you more likely or less likely to drink tap water instead of bottled water in the future?

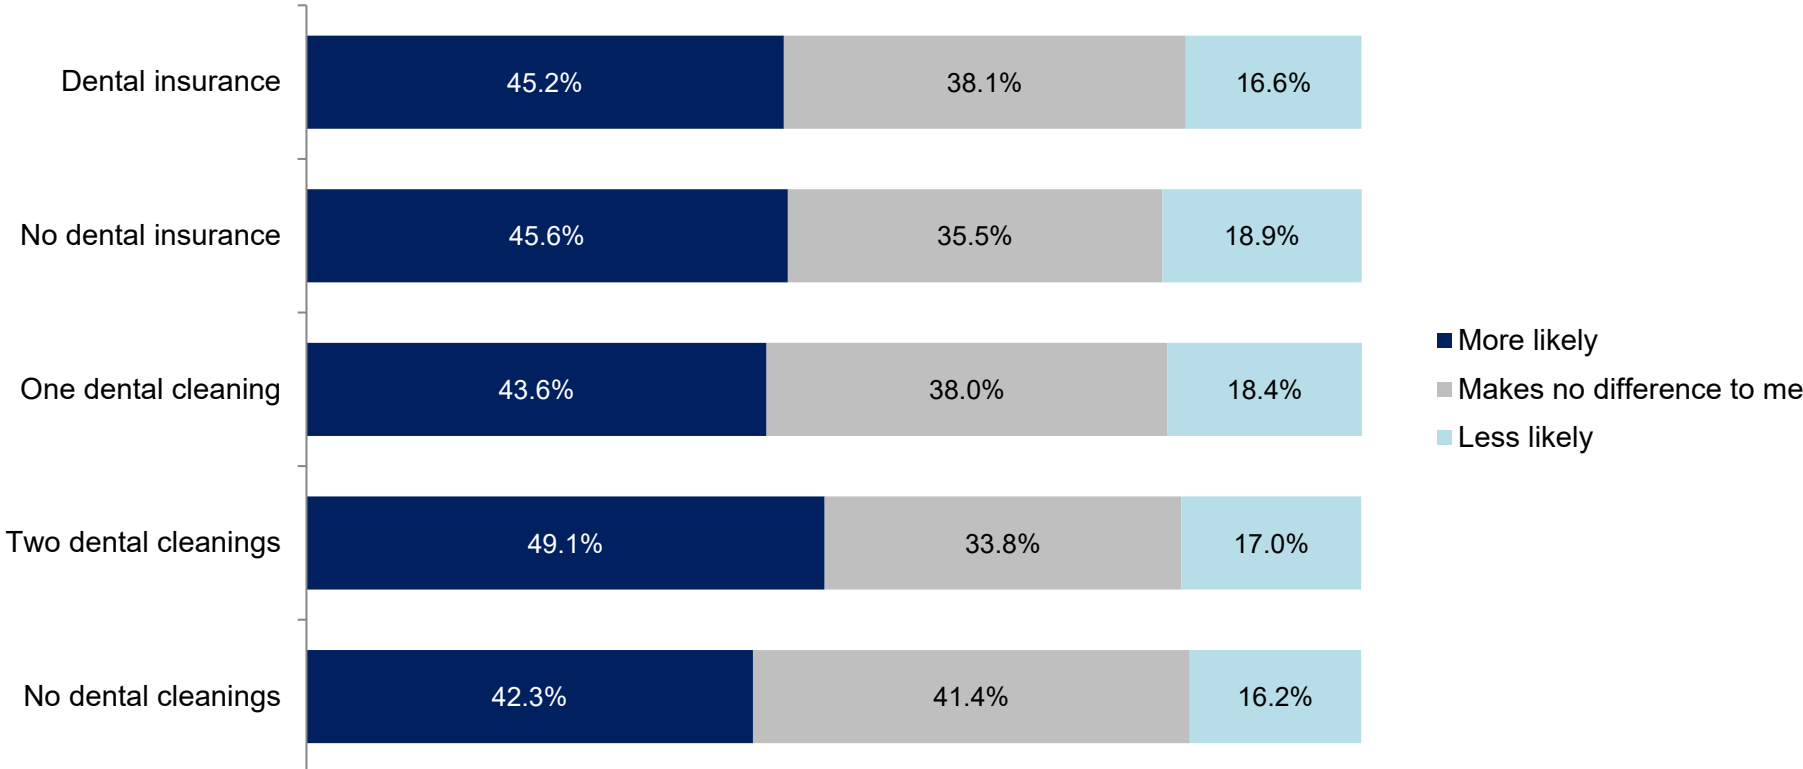

College-educated residents are more likely to drink tap water over bottled water knowing that bottled water is less regulated than tap water

Q41: Bottled water is less regulated than tap water. In many cases, it is bottled in states with less regulation on chemicals and fewer, less strict requirements for testing. Does knowing this information make you more likely or less likely to drink tap water instead of bottled water in the future?

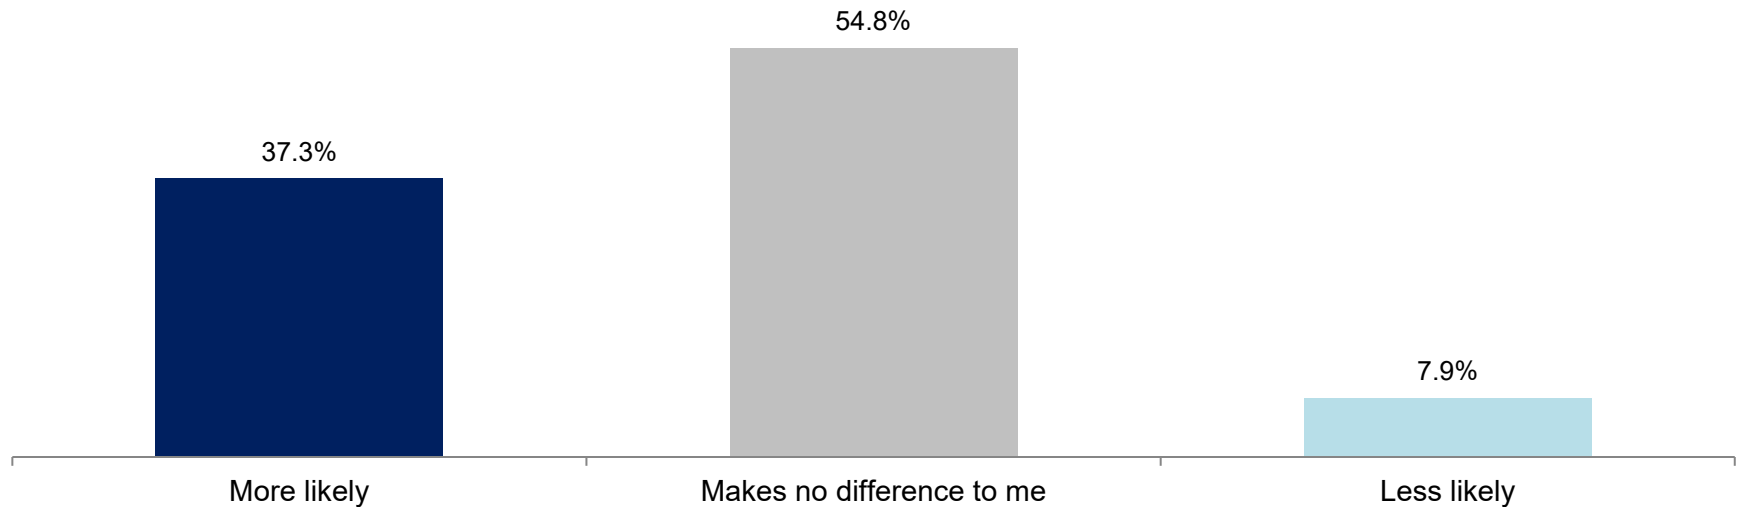

There are no significant differences by dental insurance coverage in likelihood to drink tap water over bottled water knowing that bottled water is less regulated than tap water

Q41: Bottled water is less regulated than tap water. In many cases, it is bottled in states with less regulation on chemicals and fewer, less strict requirements for testing. Does knowing this information make you more likely or less likely to drink tap water instead of bottled water in the future?

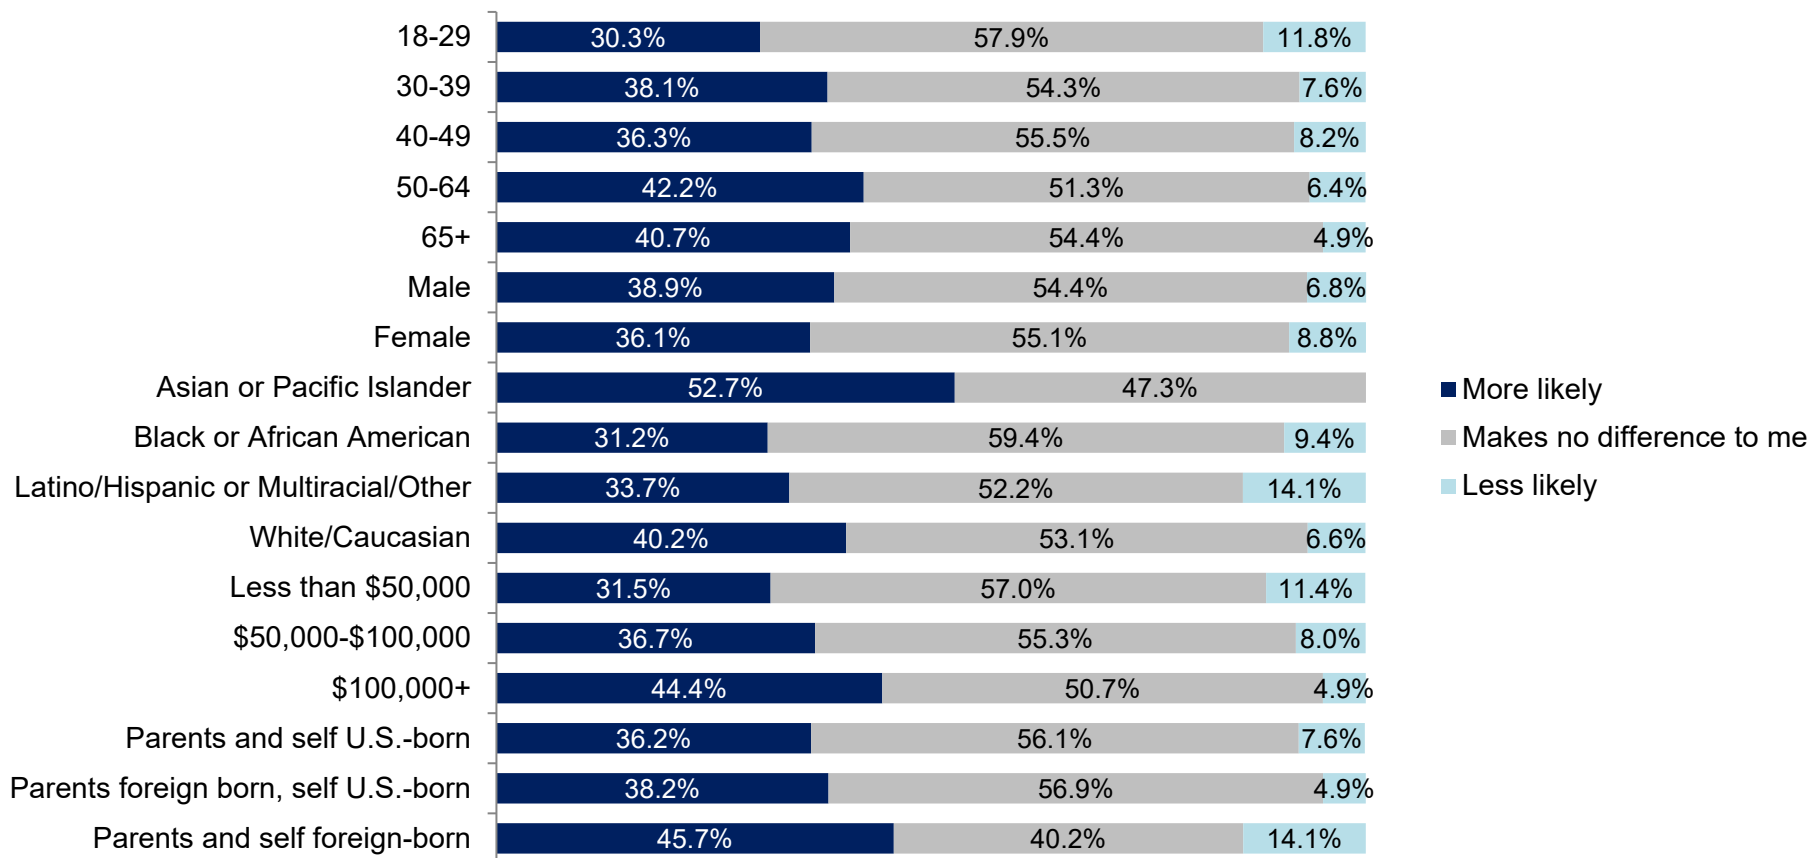

More than half of people were not influenced to drink tap water over bottled water knowing that many cannot taste the difference between each

Q42: In a blind taste test, research found that most people could not tell the difference between the taste of bottled water and tap water. Does knowing this information make you more likely or less likely to drink tap water over bottled water in the future?

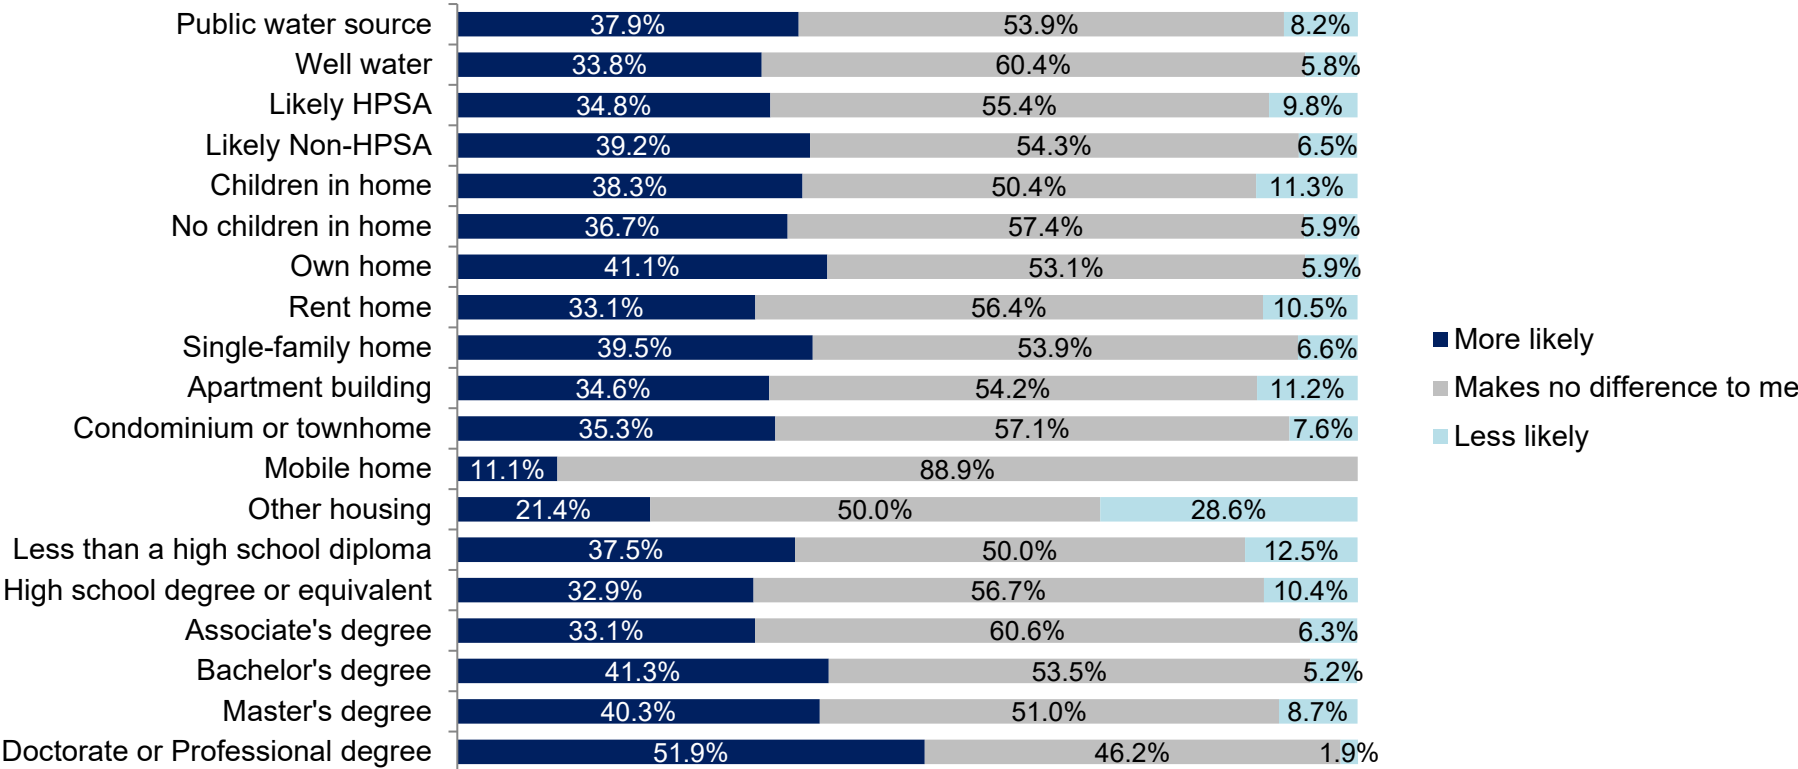

Asian residents were slightly more likely to drink tap water over bottled water knowing that many cannot taste the difference between each

Q42: In a blind taste test, research found that most people could not tell the difference between the taste of bottled water and tap water. Does knowing this information make you more likely or less likely to drink tap water over bottled water in the future?

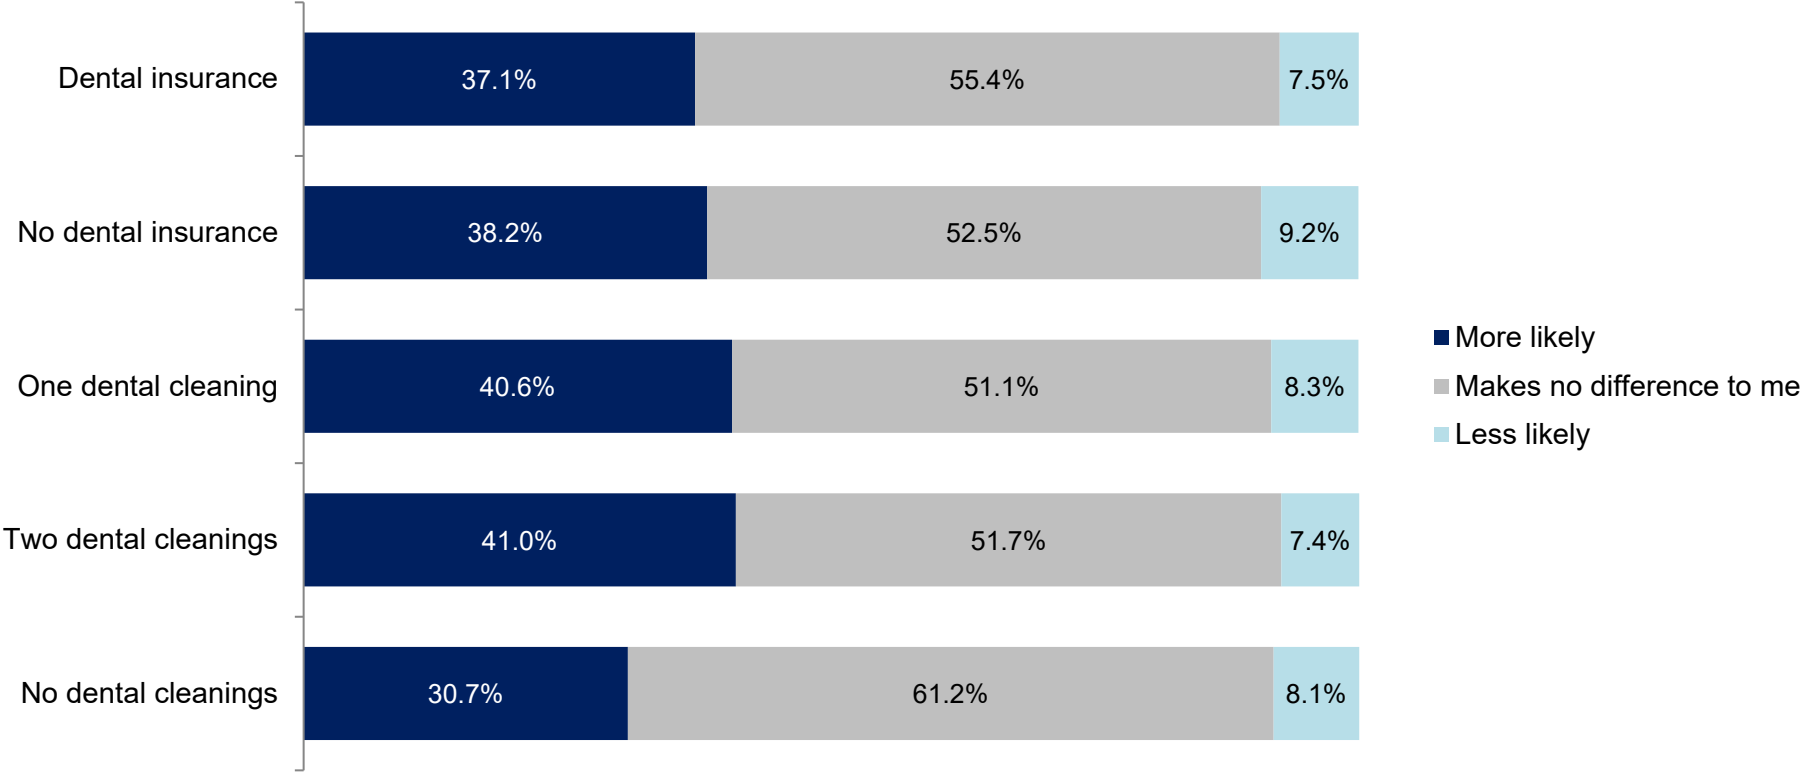

Higher-educated residents were slightly more likely to drink tap water over bottled water knowing that many cannot taste the difference between each

Q42: In a blind taste test, research found that most people could not tell the difference between the taste of bottled water and tap water. Does knowing this information make you more likely or less likely to drink tap water over bottled water in the future?

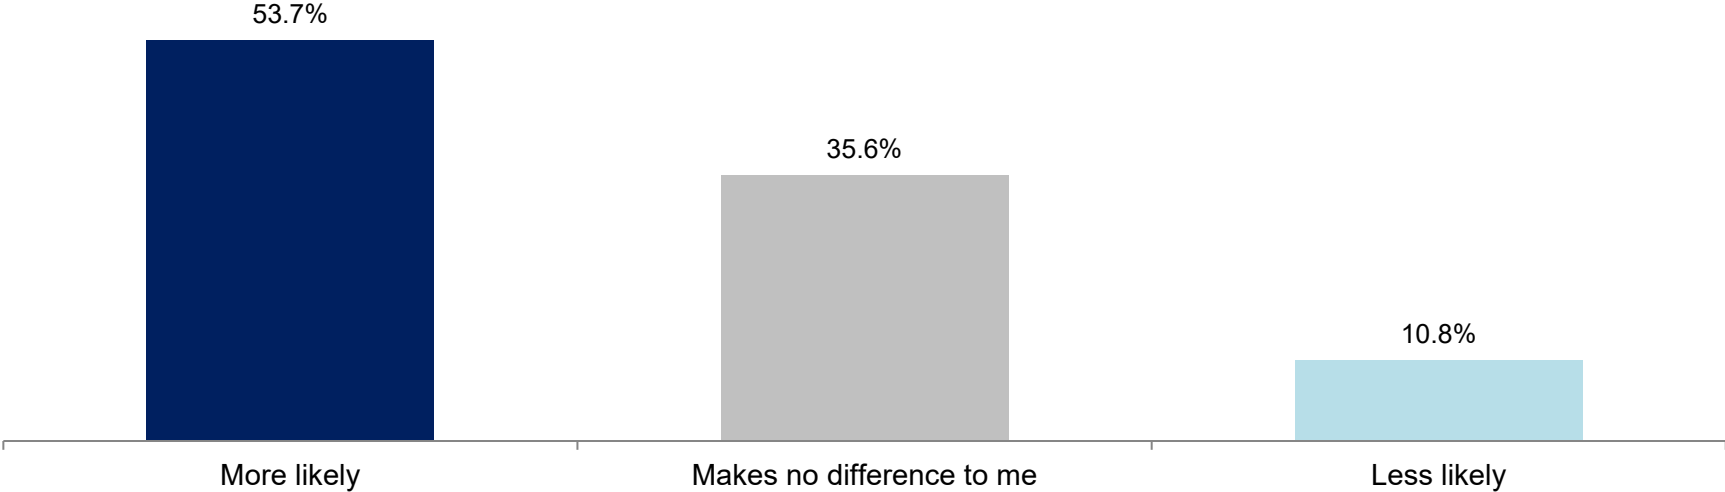

There was no differences by dental insurance coverage in likelihood to drink tap water over bottled water knowing that many cannot taste the difference between each

Q42: In a blind taste test, research found that most people could not tell the difference between the taste of bottled water and tap water. Does knowing this information make you more likely or less likely to drink tap water over bottled water in the future?

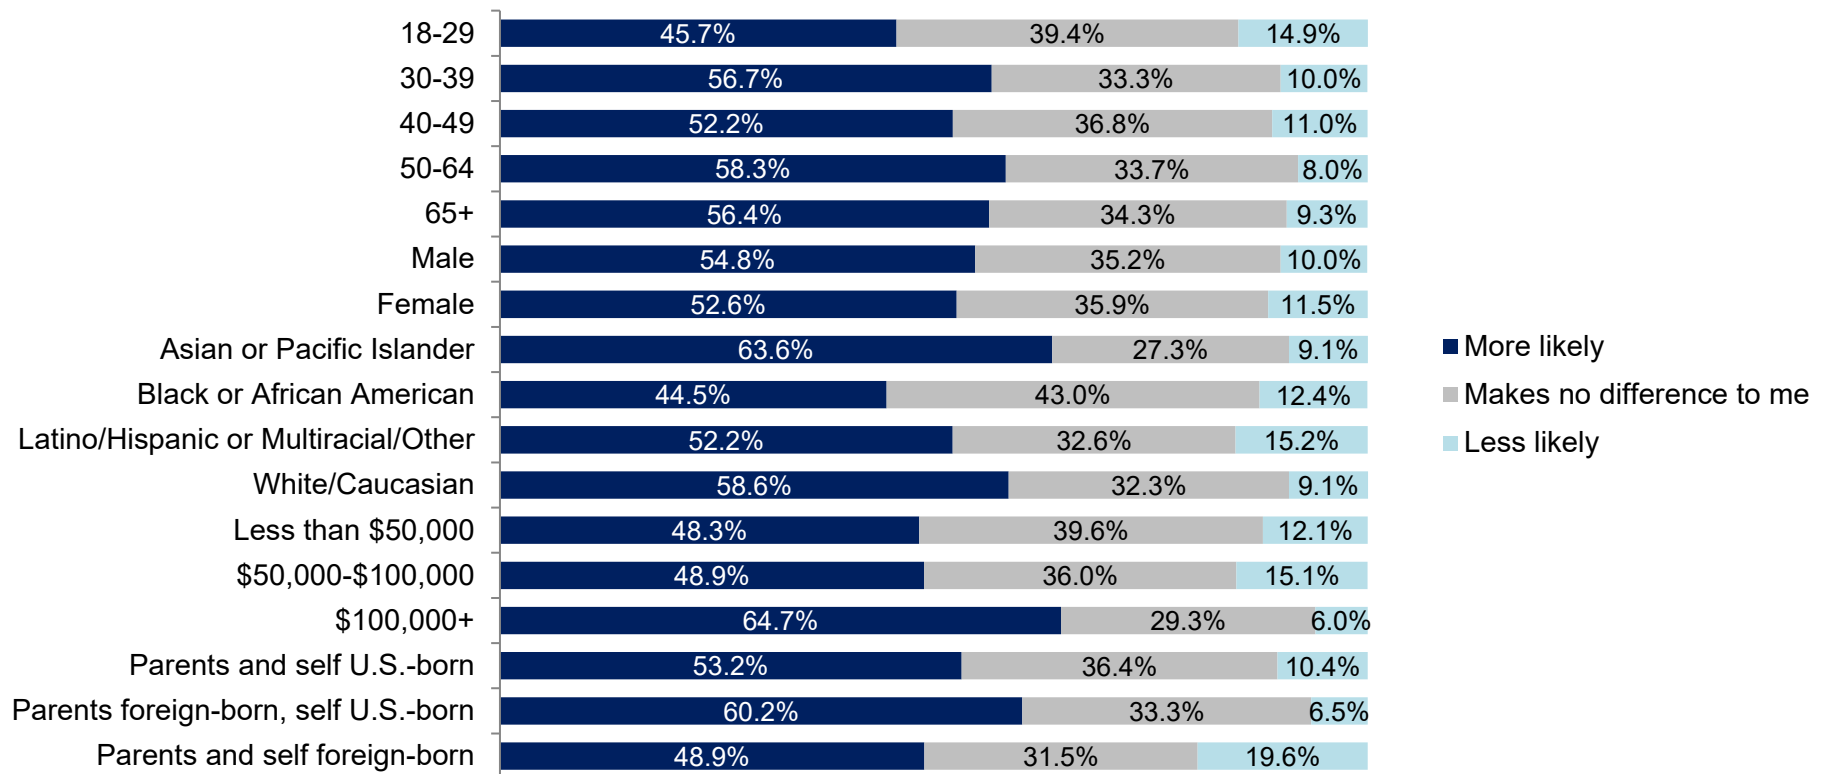

54% of respondents were more likely to drink tap water over bottled water knowing the increased cost of bottled water

Q43: Some studies have found that bottled water can cost an average household about 2,000 times more than tap water. Does knowing this information make you more likely or less likely to drink tap water instead of bottled water in the future?

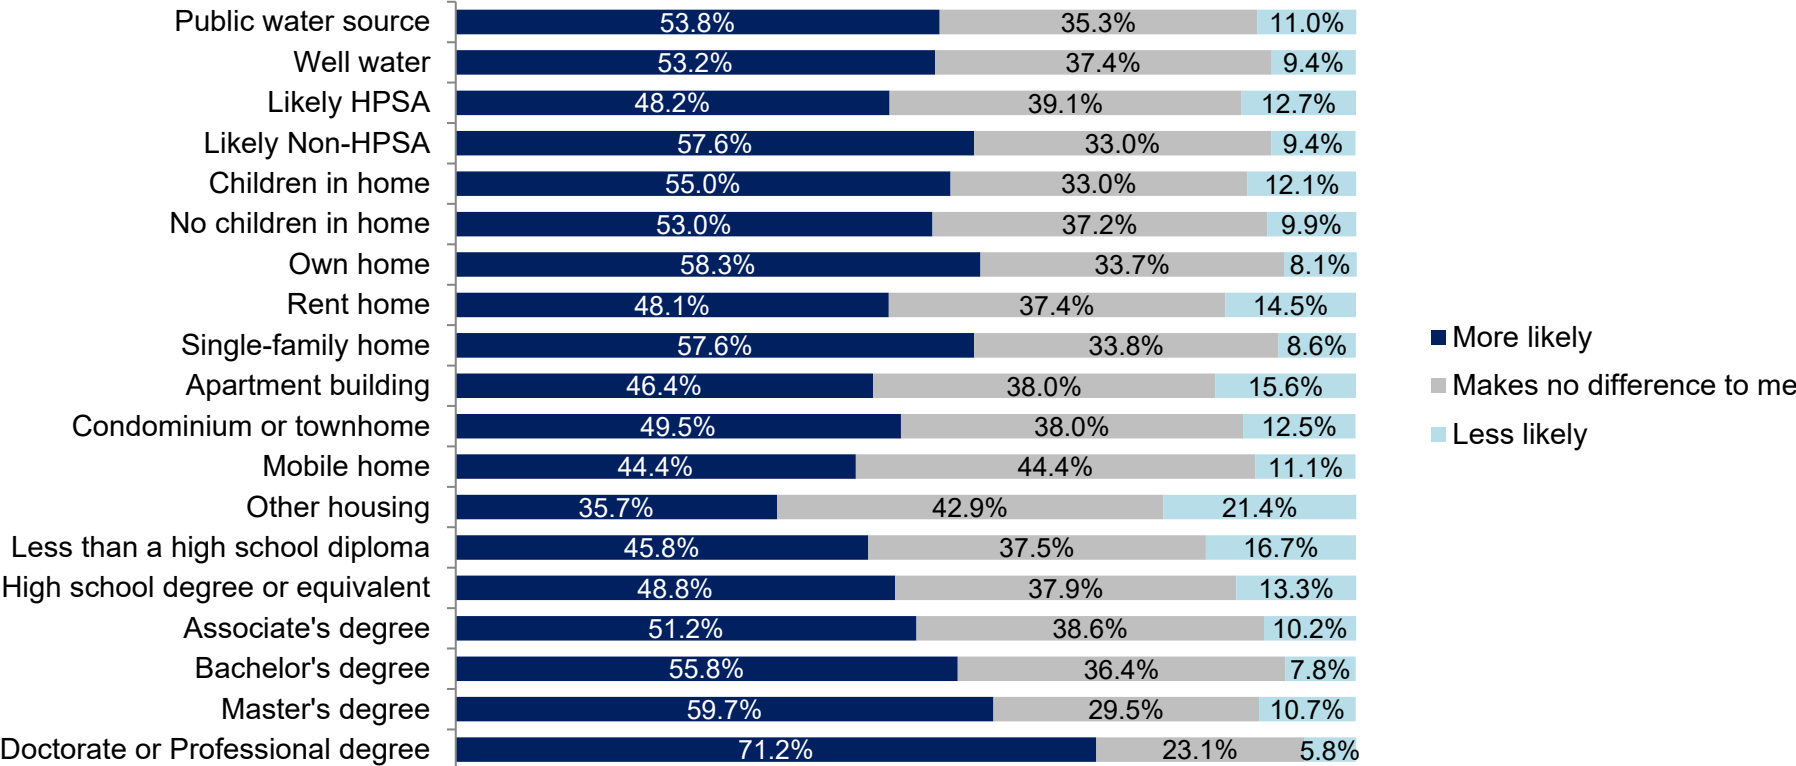

Asian, White, or high-income residents were more likely to drink tap water over bottled water knowing the increased cost of bottled water

Q43: Some studies have found that bottled water can cost an average household about 2,000 times more than tap water. Does knowing this information make you more likely or less likely to drink tap water instead of bottled water in the future?

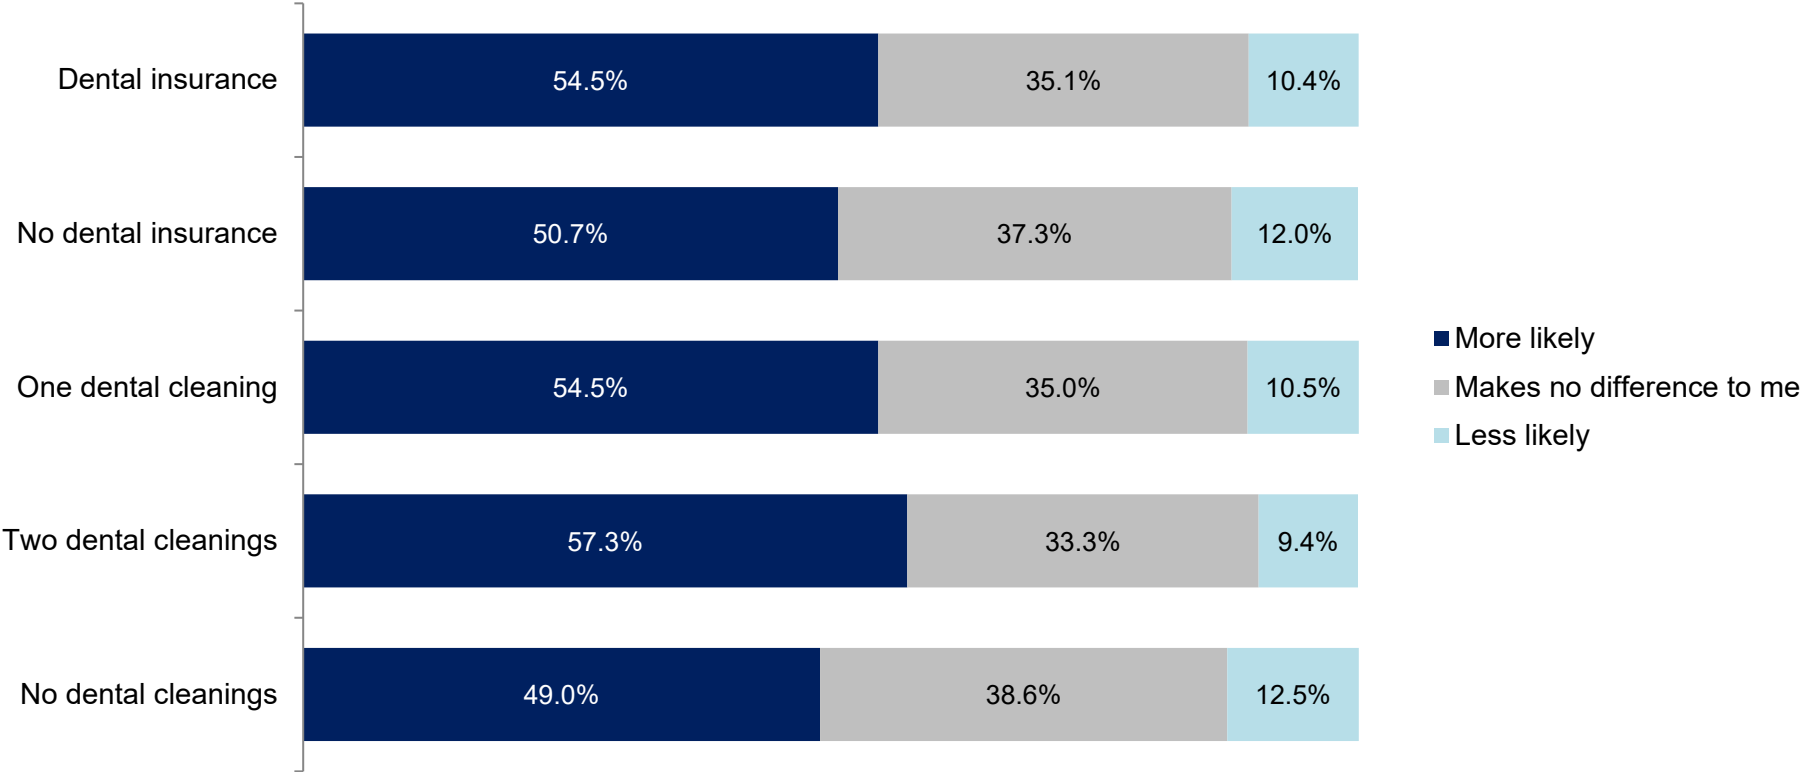

College-educated residents were more likely to drink tap water over bottled water knowing the increased cost

Q43: Some studies have found that bottled water can cost an average household about 2,000 times more than tap water. Does knowing this information make you more likely or less likely to drink tap water instead of bottled water in the future?

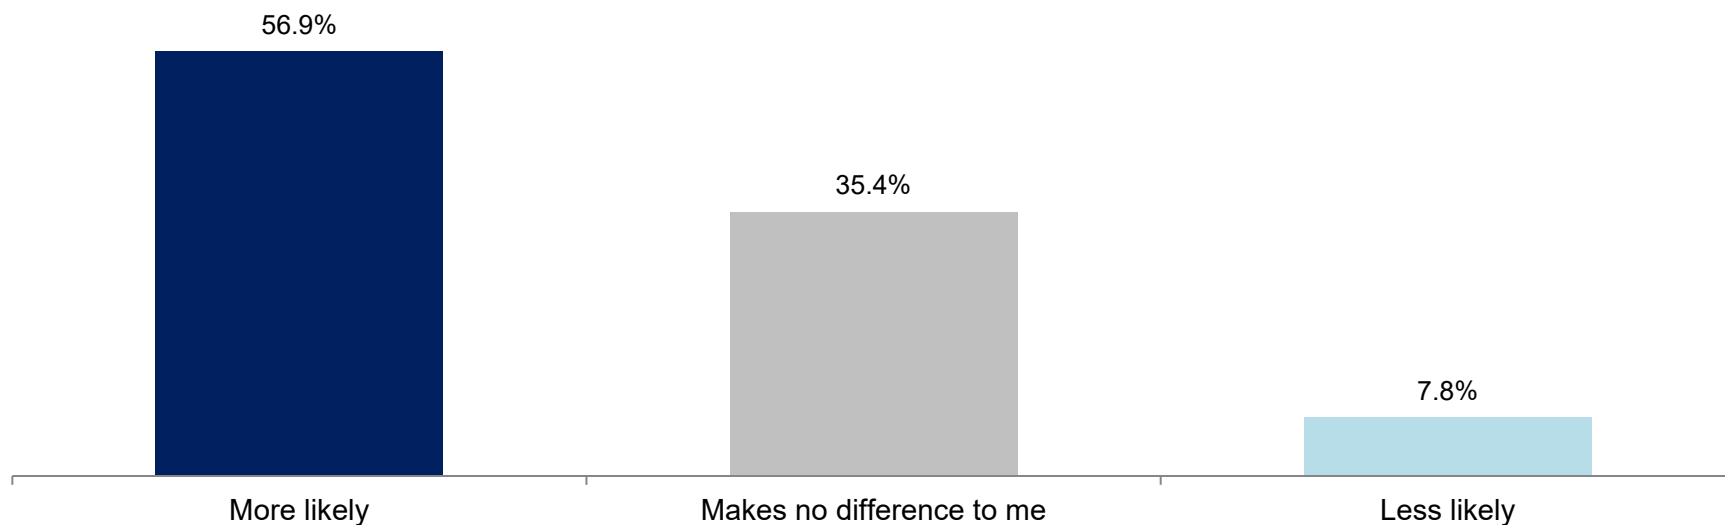

Residents with regular dental cleanings were slightly more likely to drink tap water over bottled water knowing the costs

Q43: Some studies have found that bottled water can cost an average household about 2,000 times more than tap water. Does knowing this information make you more likely or less likely to drink tap water instead of bottled water in the future?

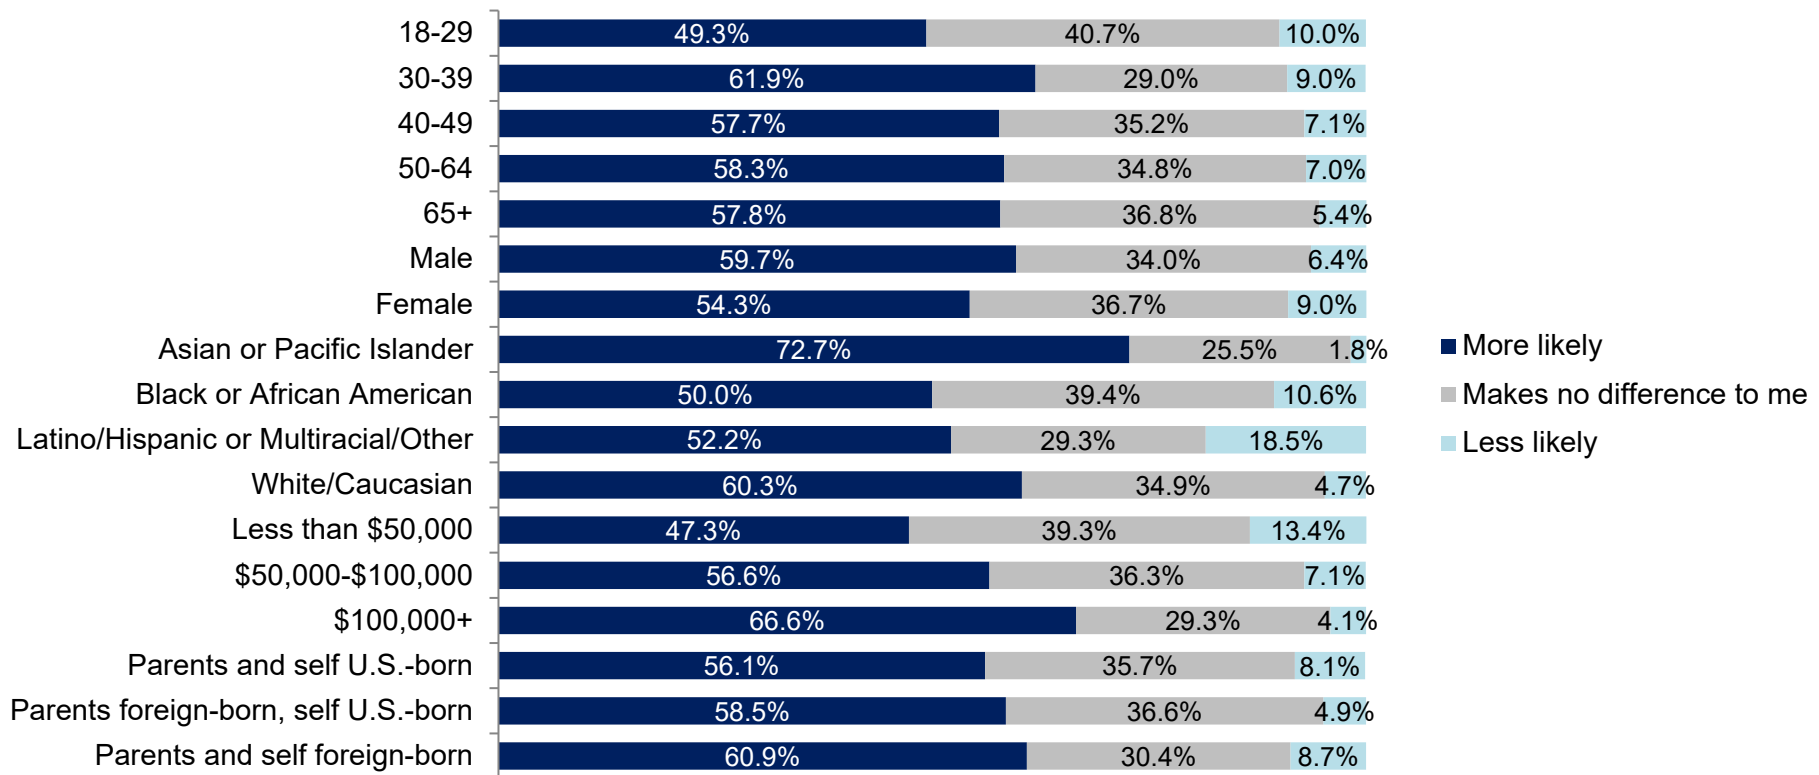

57% of respondents were more likely to drink tap water over bottled water knowing Maryland's requirements for water quality

Q44: Maryland water systems meet all federal and state standards for water quality. This includes the testing for harmful contaminants including lead, copper, fecal coliform bacteria, e. coli bacteria, and many others. Does knowing this information make you more likely or less likely to drink tap water over bottled water in the future?

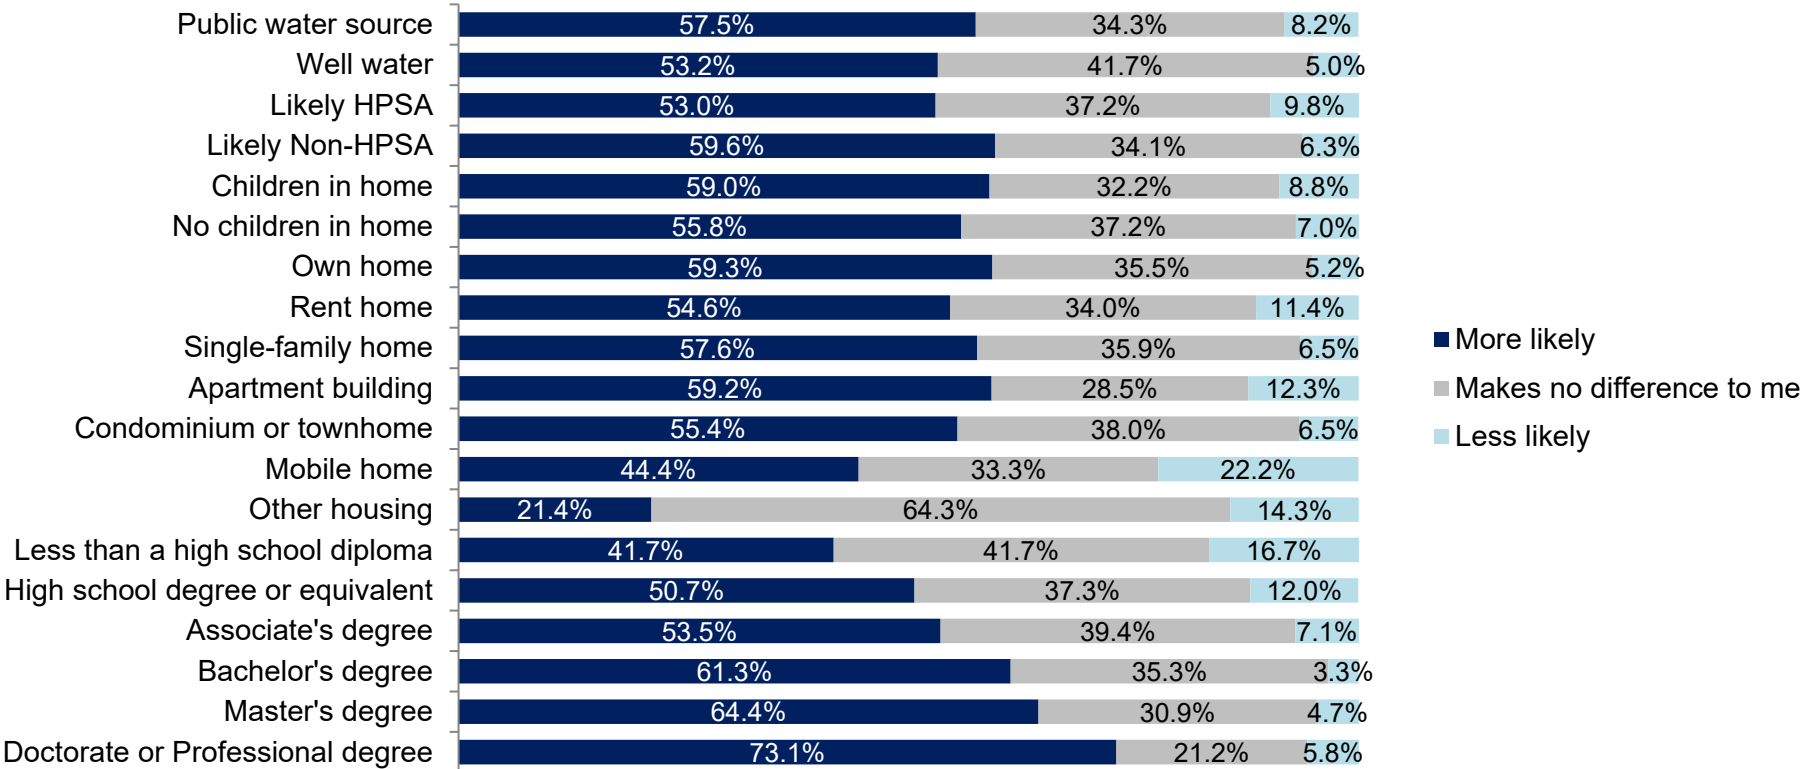

Asian, White, or high-income residents were more likely to drink tap water over bottled water knowing Maryland's requirements for quality

Q44: Maryland water systems meet all federal and state standards for water quality. This includes the testing for harmful contaminants including lead, copper, fecal coliform bacteria, e. coli bacteria, and many others. Does knowing this information make you more likely or less likely to drink tap water over bottled water in the future?

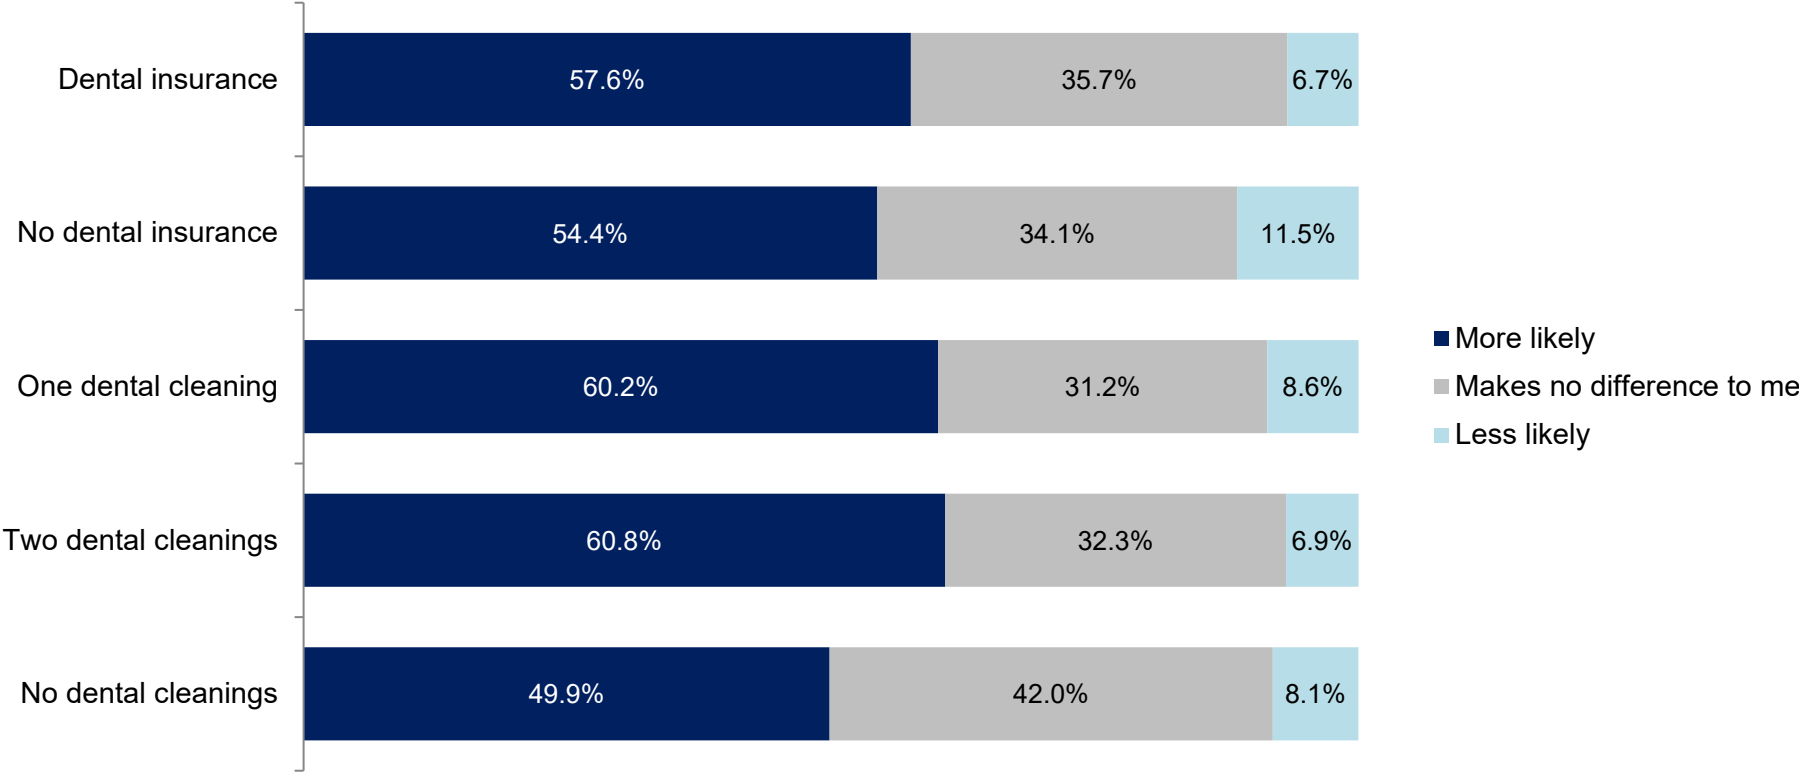

Highly-educated residents were more likely to drink tap water over bottled water knowing Maryland's requirements for quality

Q44: Maryland water systems meet all federal and state standards for water quality. This includes the testing for harmful contaminants including lead, copper, fecal coliform bacteria, e. coli bacteria, and many others. Does knowing this information make you more likely or less likely to drink tap water over bottled water in the future?

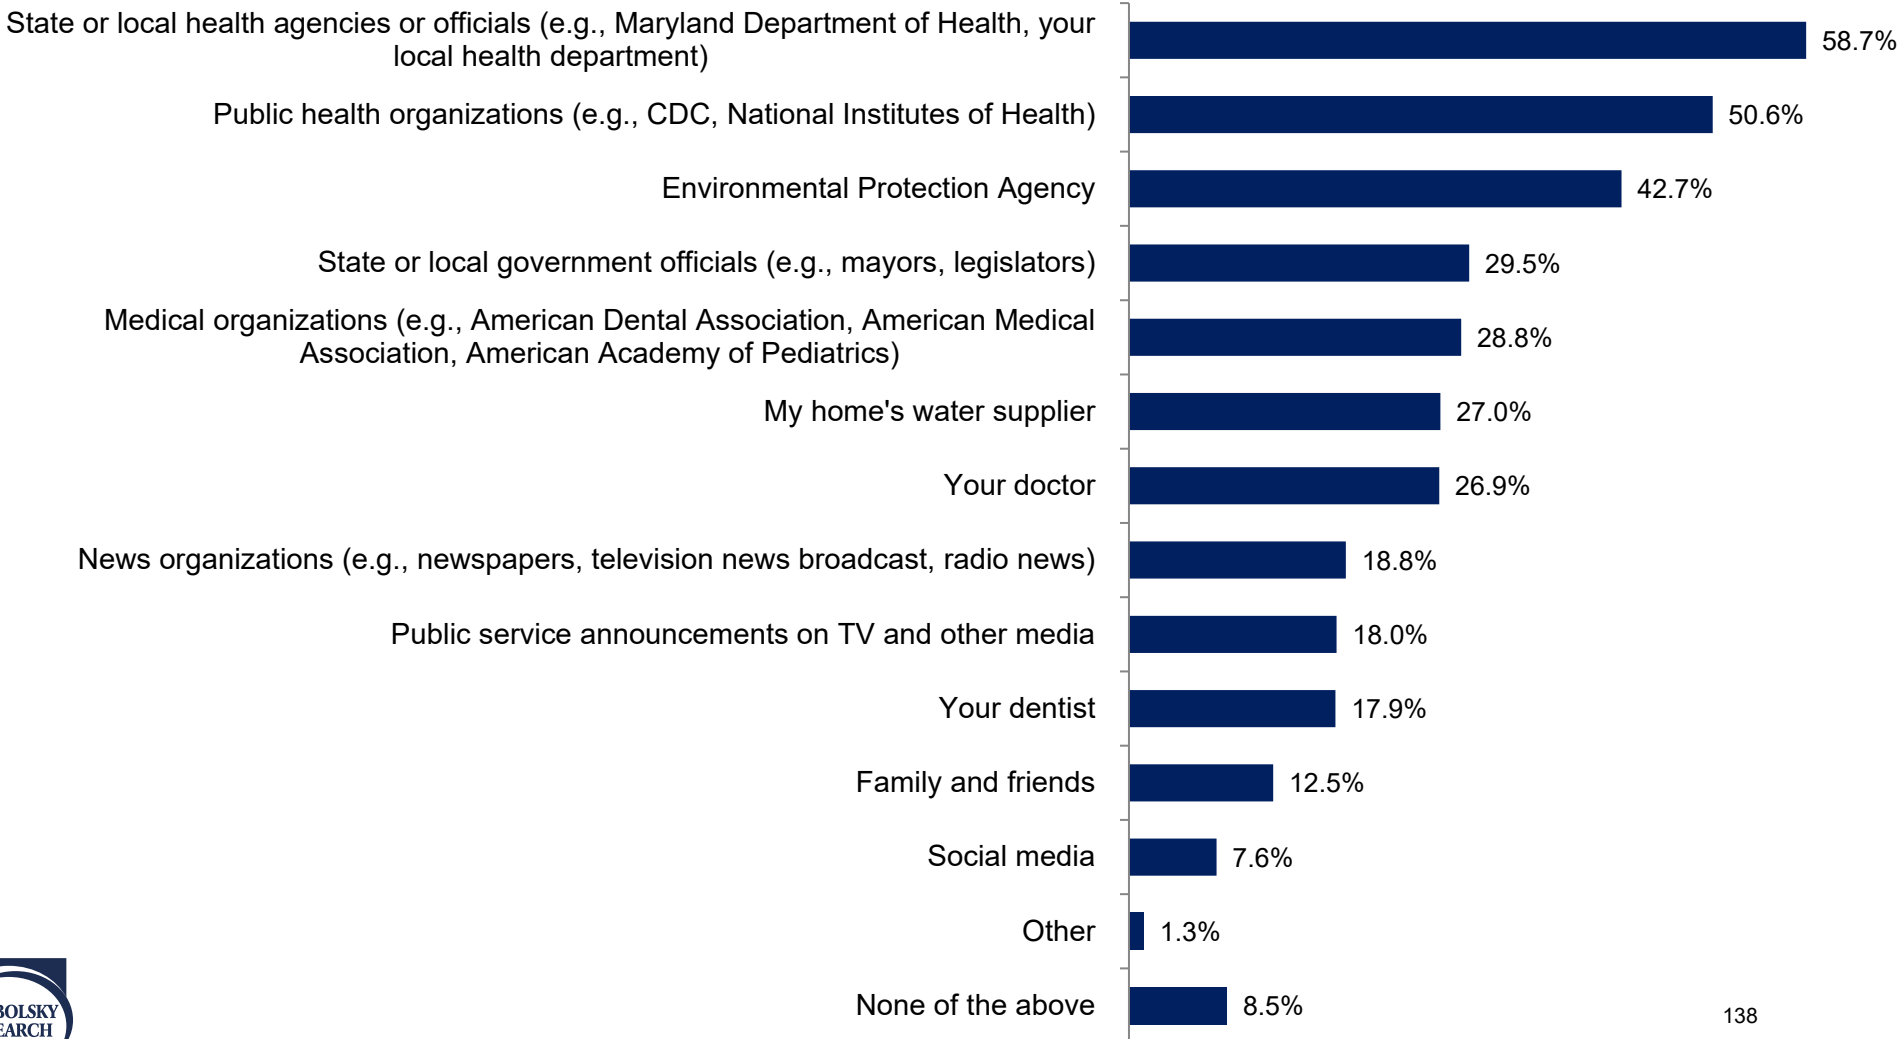

Residents with regular dental cleanings were more likely to drink tap water over bottled water knowing Maryland's requirements for quality

Q44: Maryland water systems meet all federal and state standards for water quality. This includes the testing for harmful contaminants including lead, copper, fecal coliform bacteria, e. coli bacteria, and many others. Does knowing this information make you more likely or less likely to drink tap water over bottled water in the future?

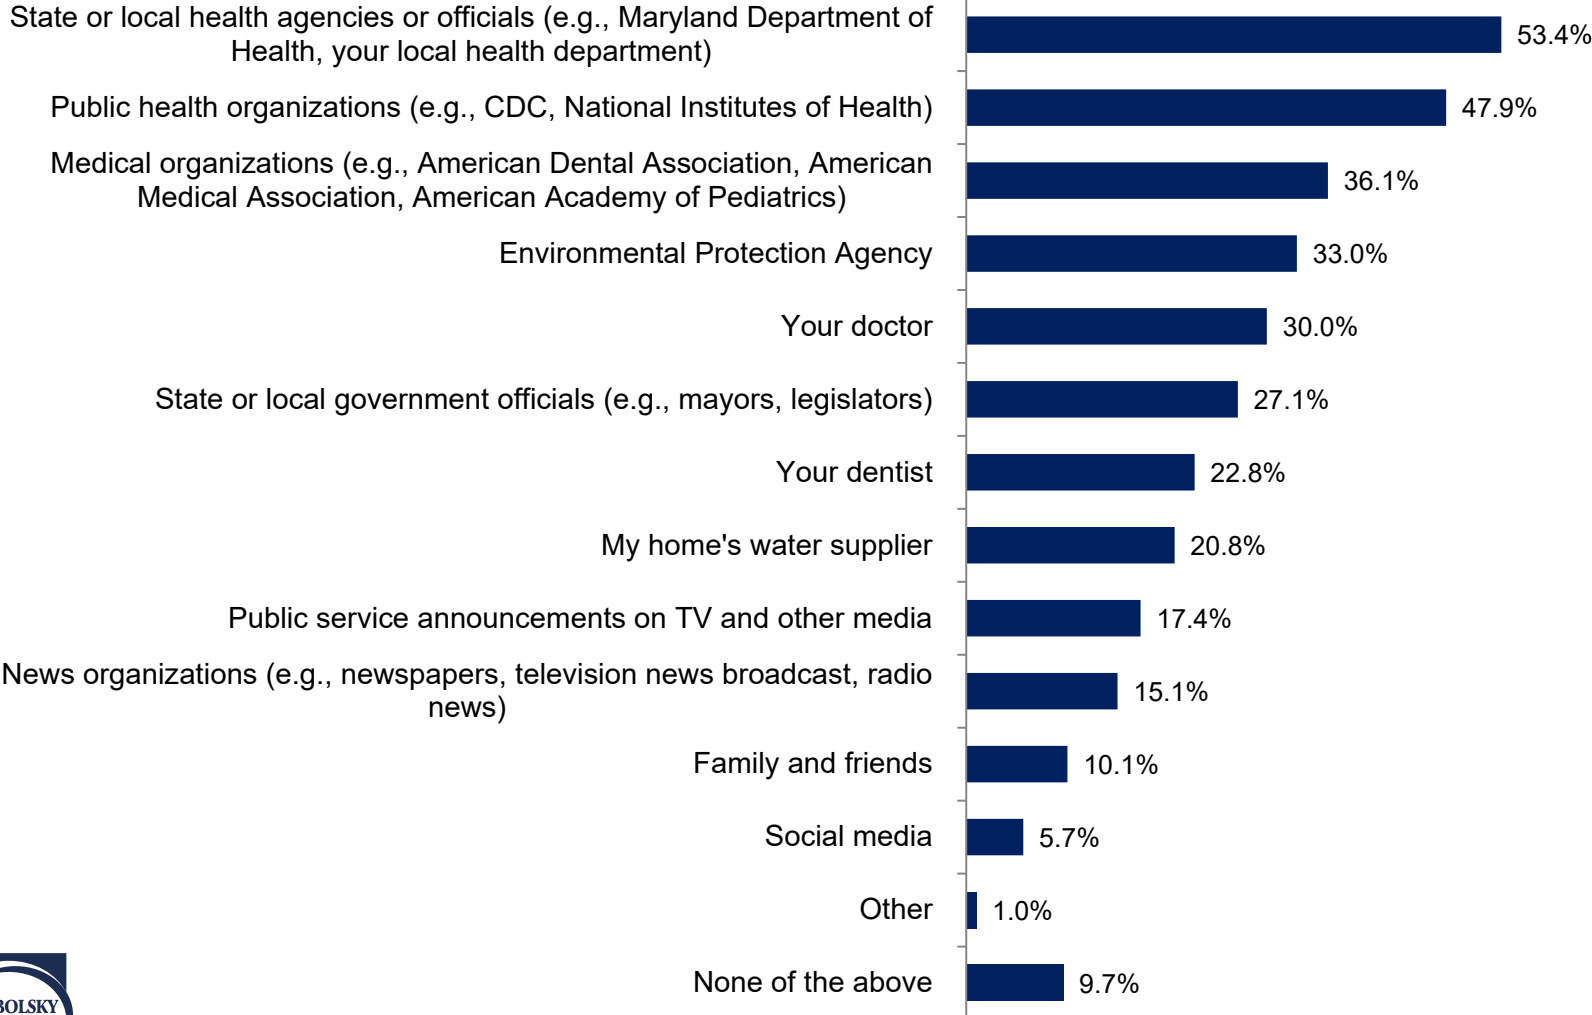

State, local, or public health agencies are the most trusted sources for tap water safety information

Q45: Who do you trust to provide you with information about the safety of drinking your household's tap water? Select all that apply.

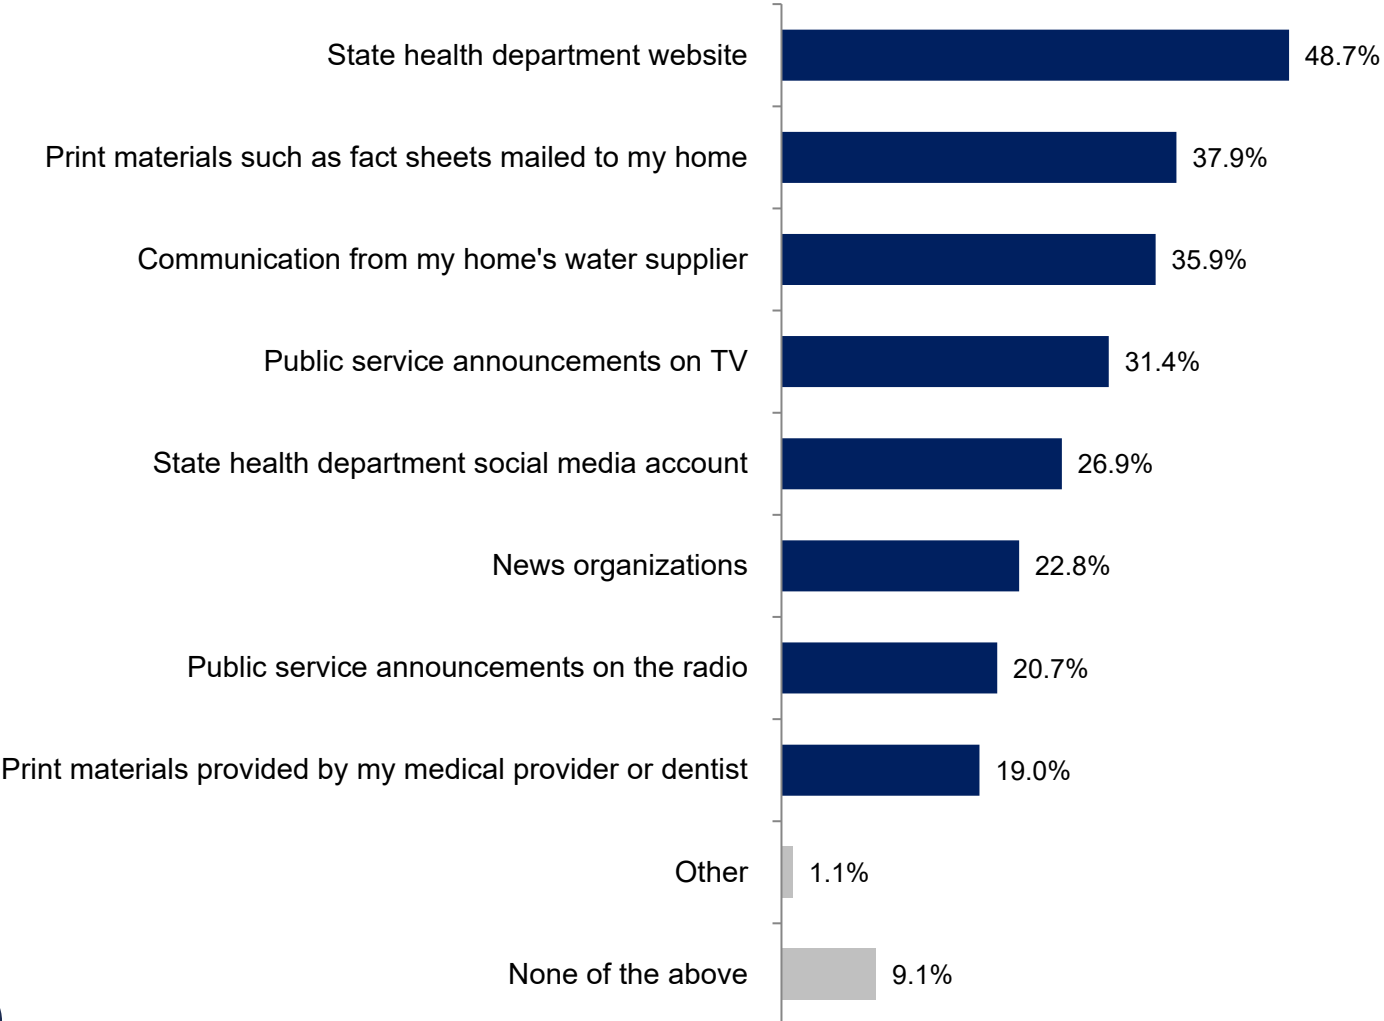

State, local, or public health agencies are the most trusted sources for household tap water benefits information

Q46: Who do you trust to provide you with information about the benefits of drinking your household's tap water? Select all that apply.

State health department website and mailed fact sheets are the top information source preferences

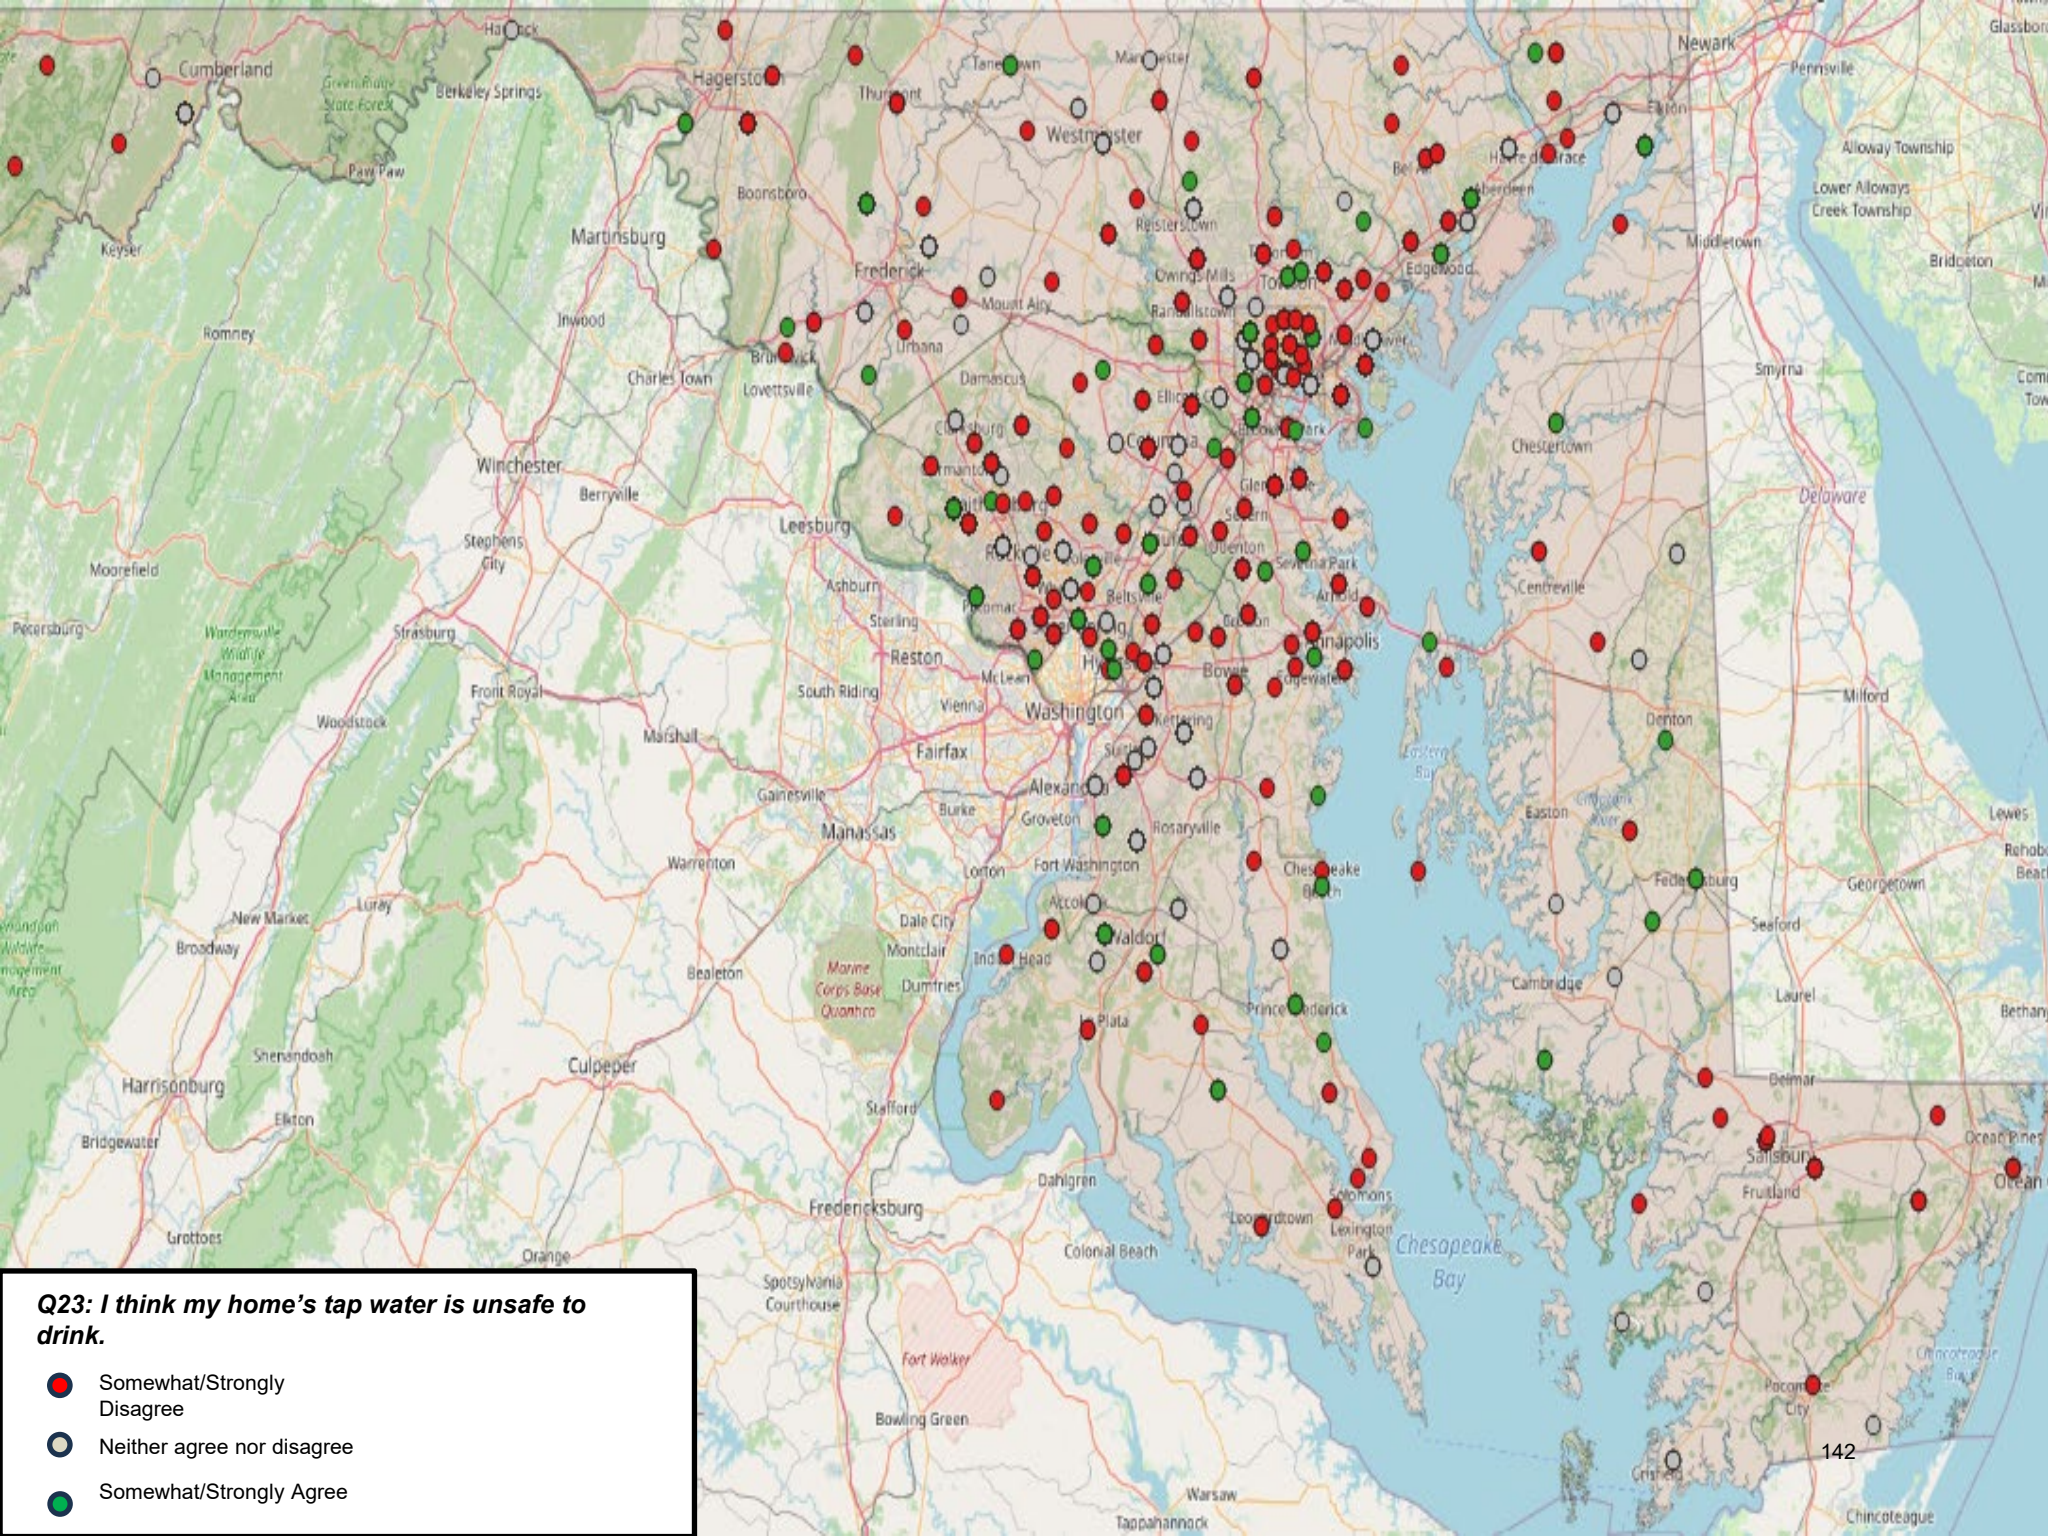

Q47: How would you like to receive information about the safety and benefits of drinking your household's tap water? Select all that apply.

Quality and safety reports about tap water is the top motivator for increasing confidence in drinking tap water

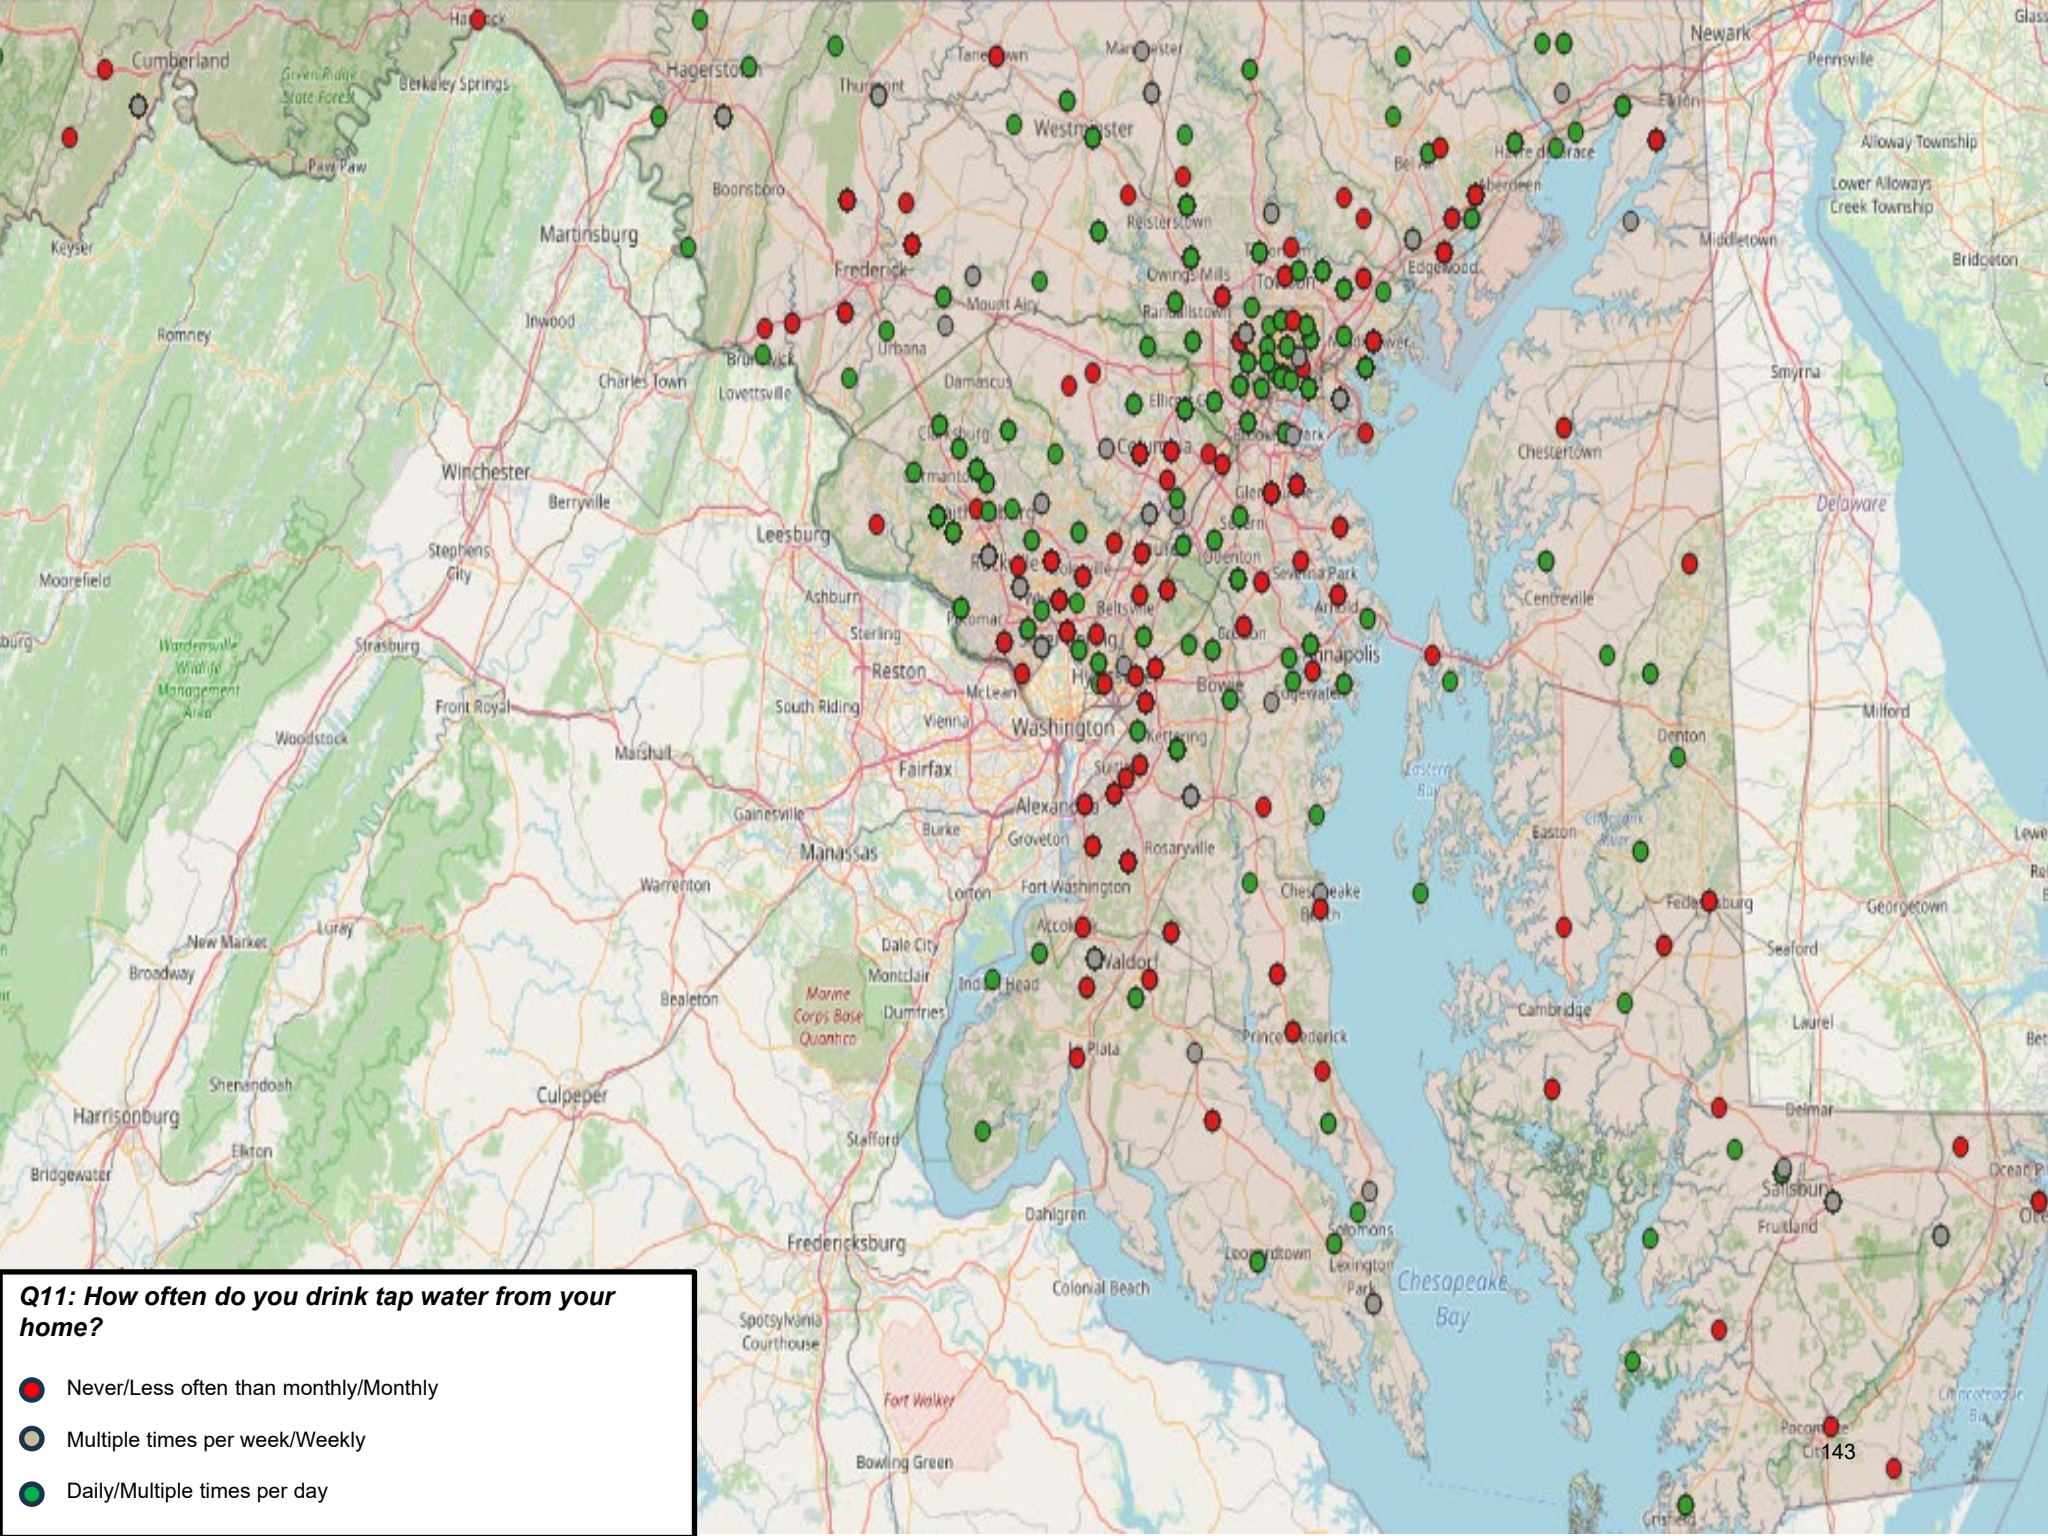

Q48: What would make you more confident in and likely to drink tap water?
 [OPEN-END RESPONSE]

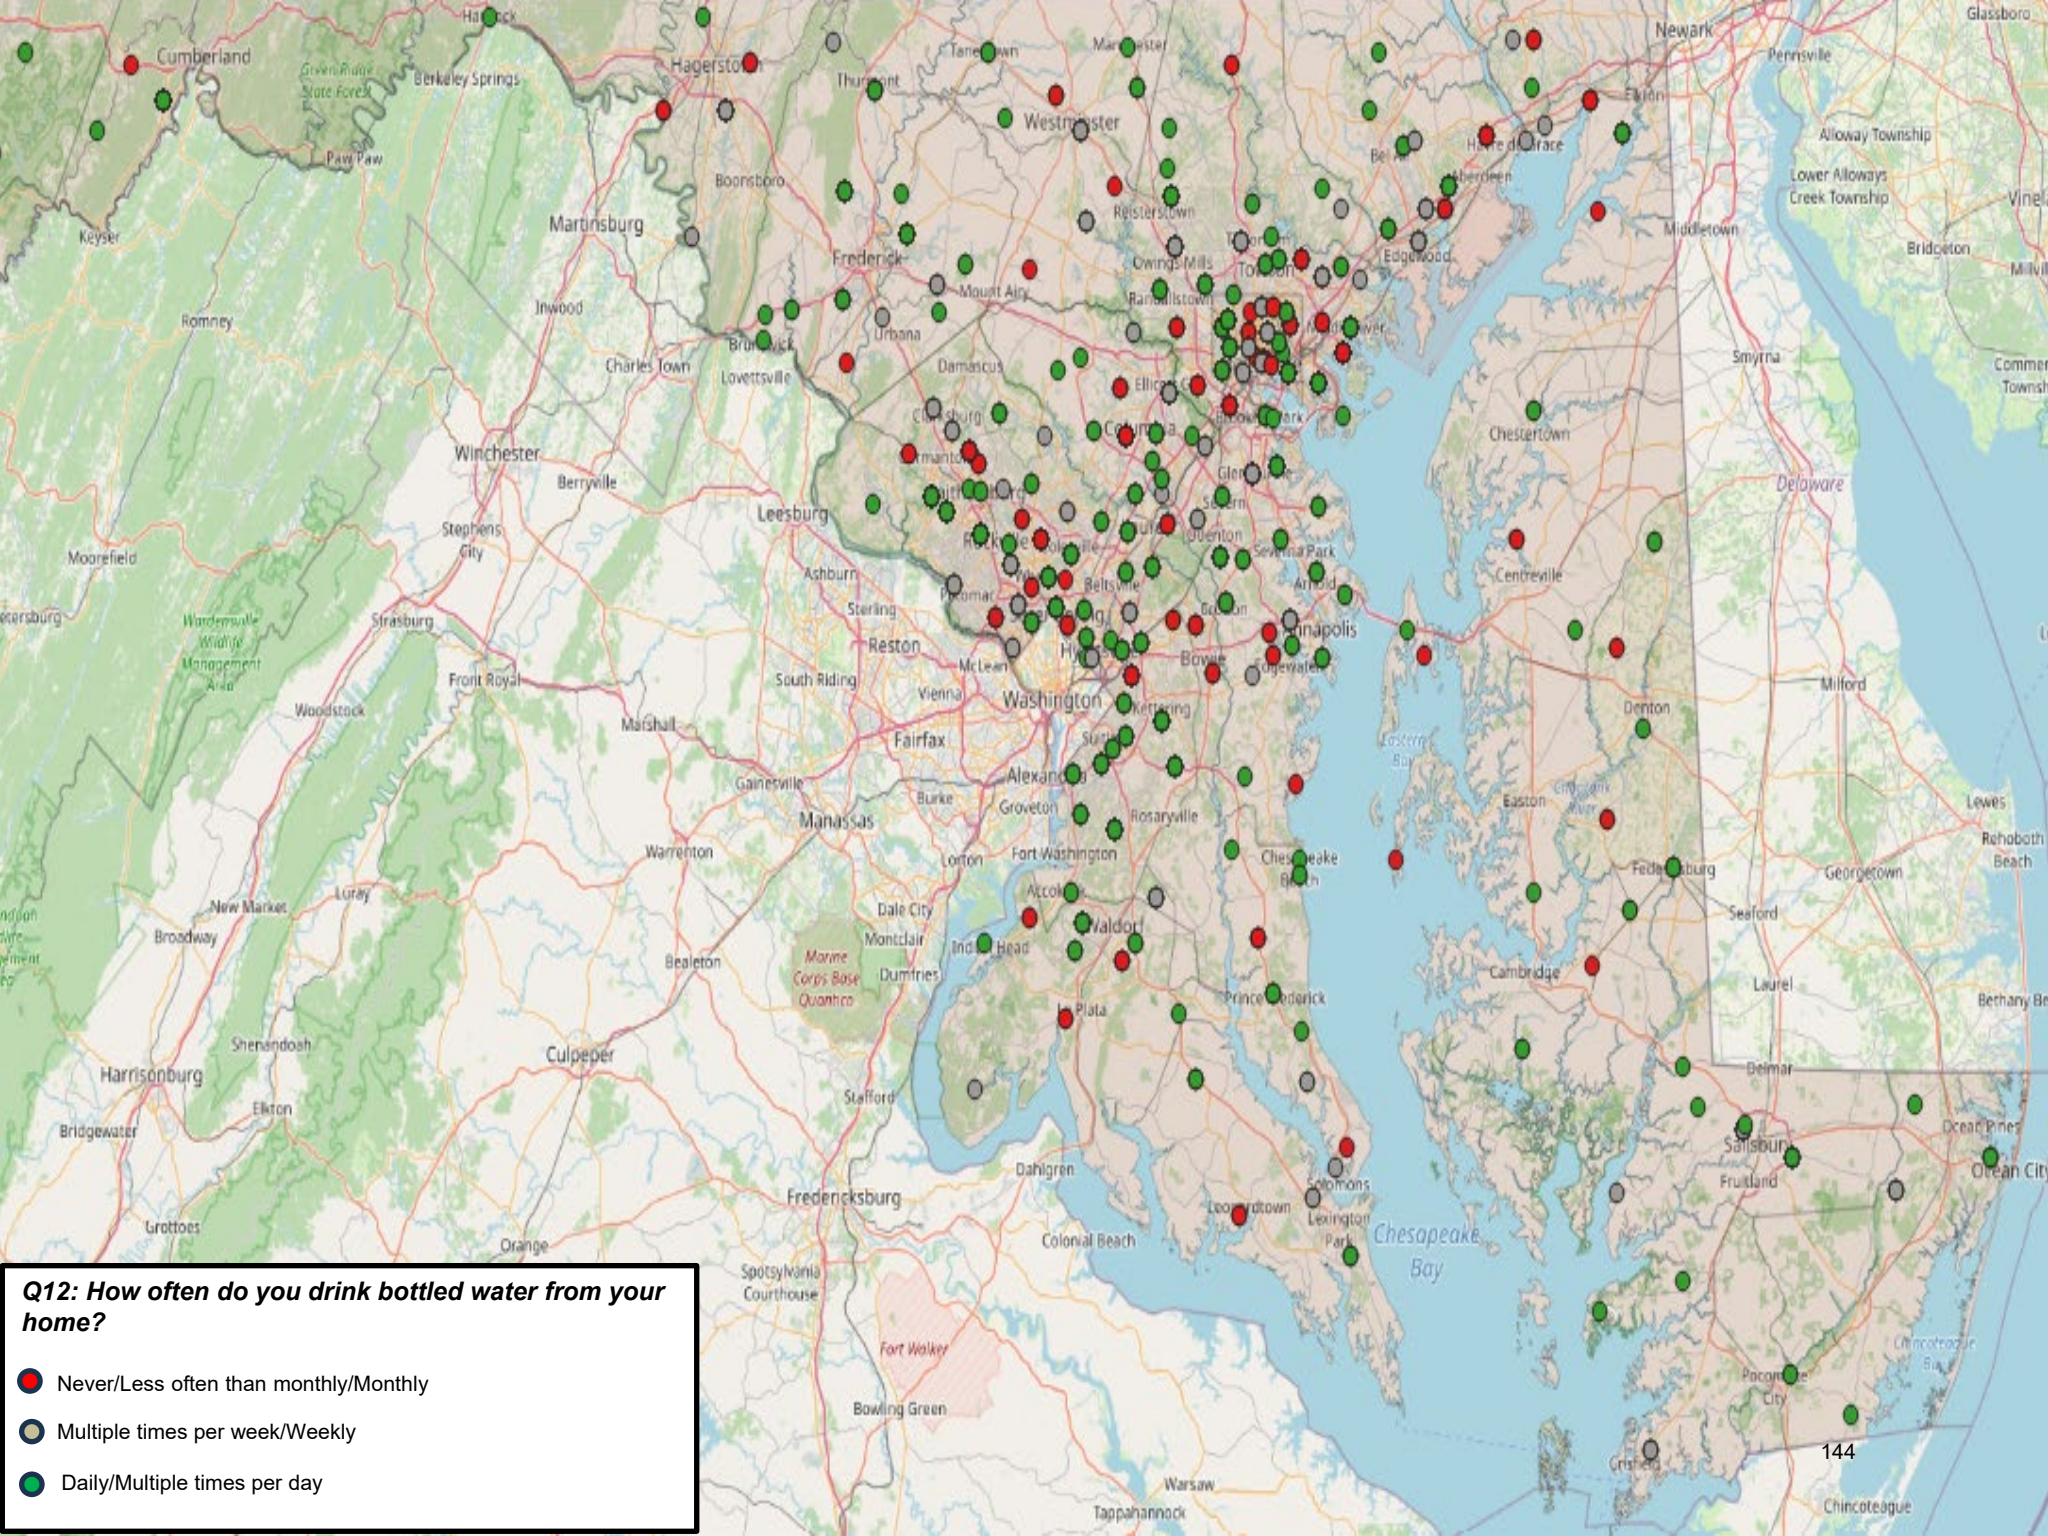

Q23: I think my home's tap water is unsafe to drink.

- Somewhat/Strongly Disagree
- Neither agree nor disagree
- Somewhat/Strongly Agree

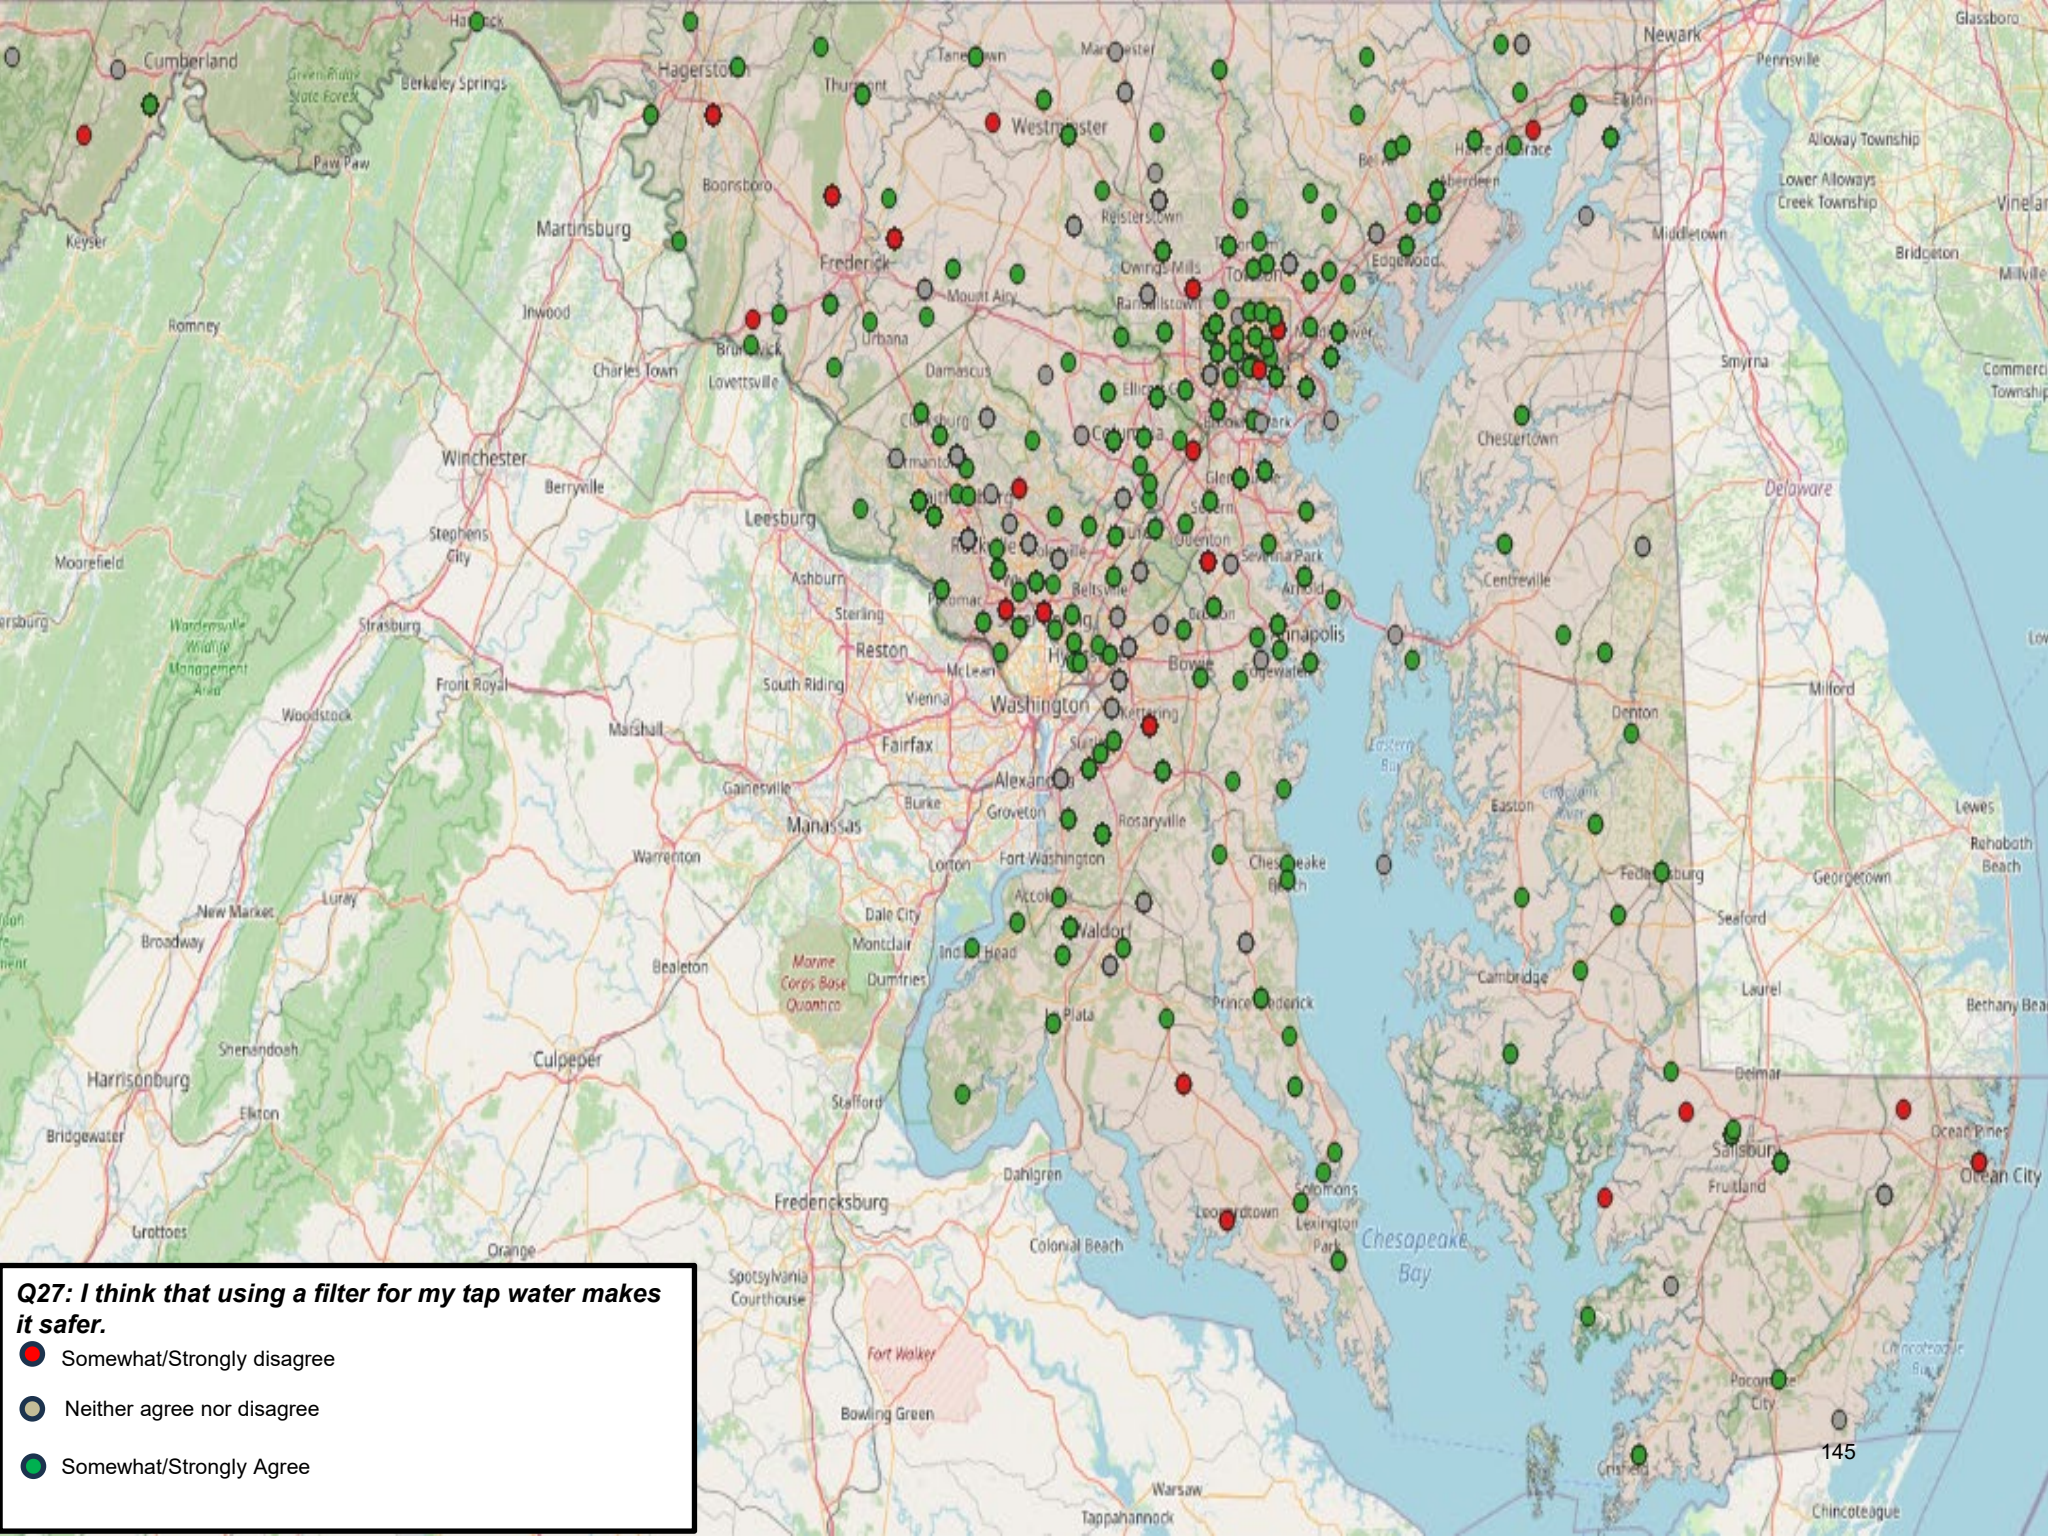

Q11: How often do you drink tap water from your home?

- Never/Less often than monthly/Monthly
- Multiple times per week/Weekly
- Daily/Multiple times per day

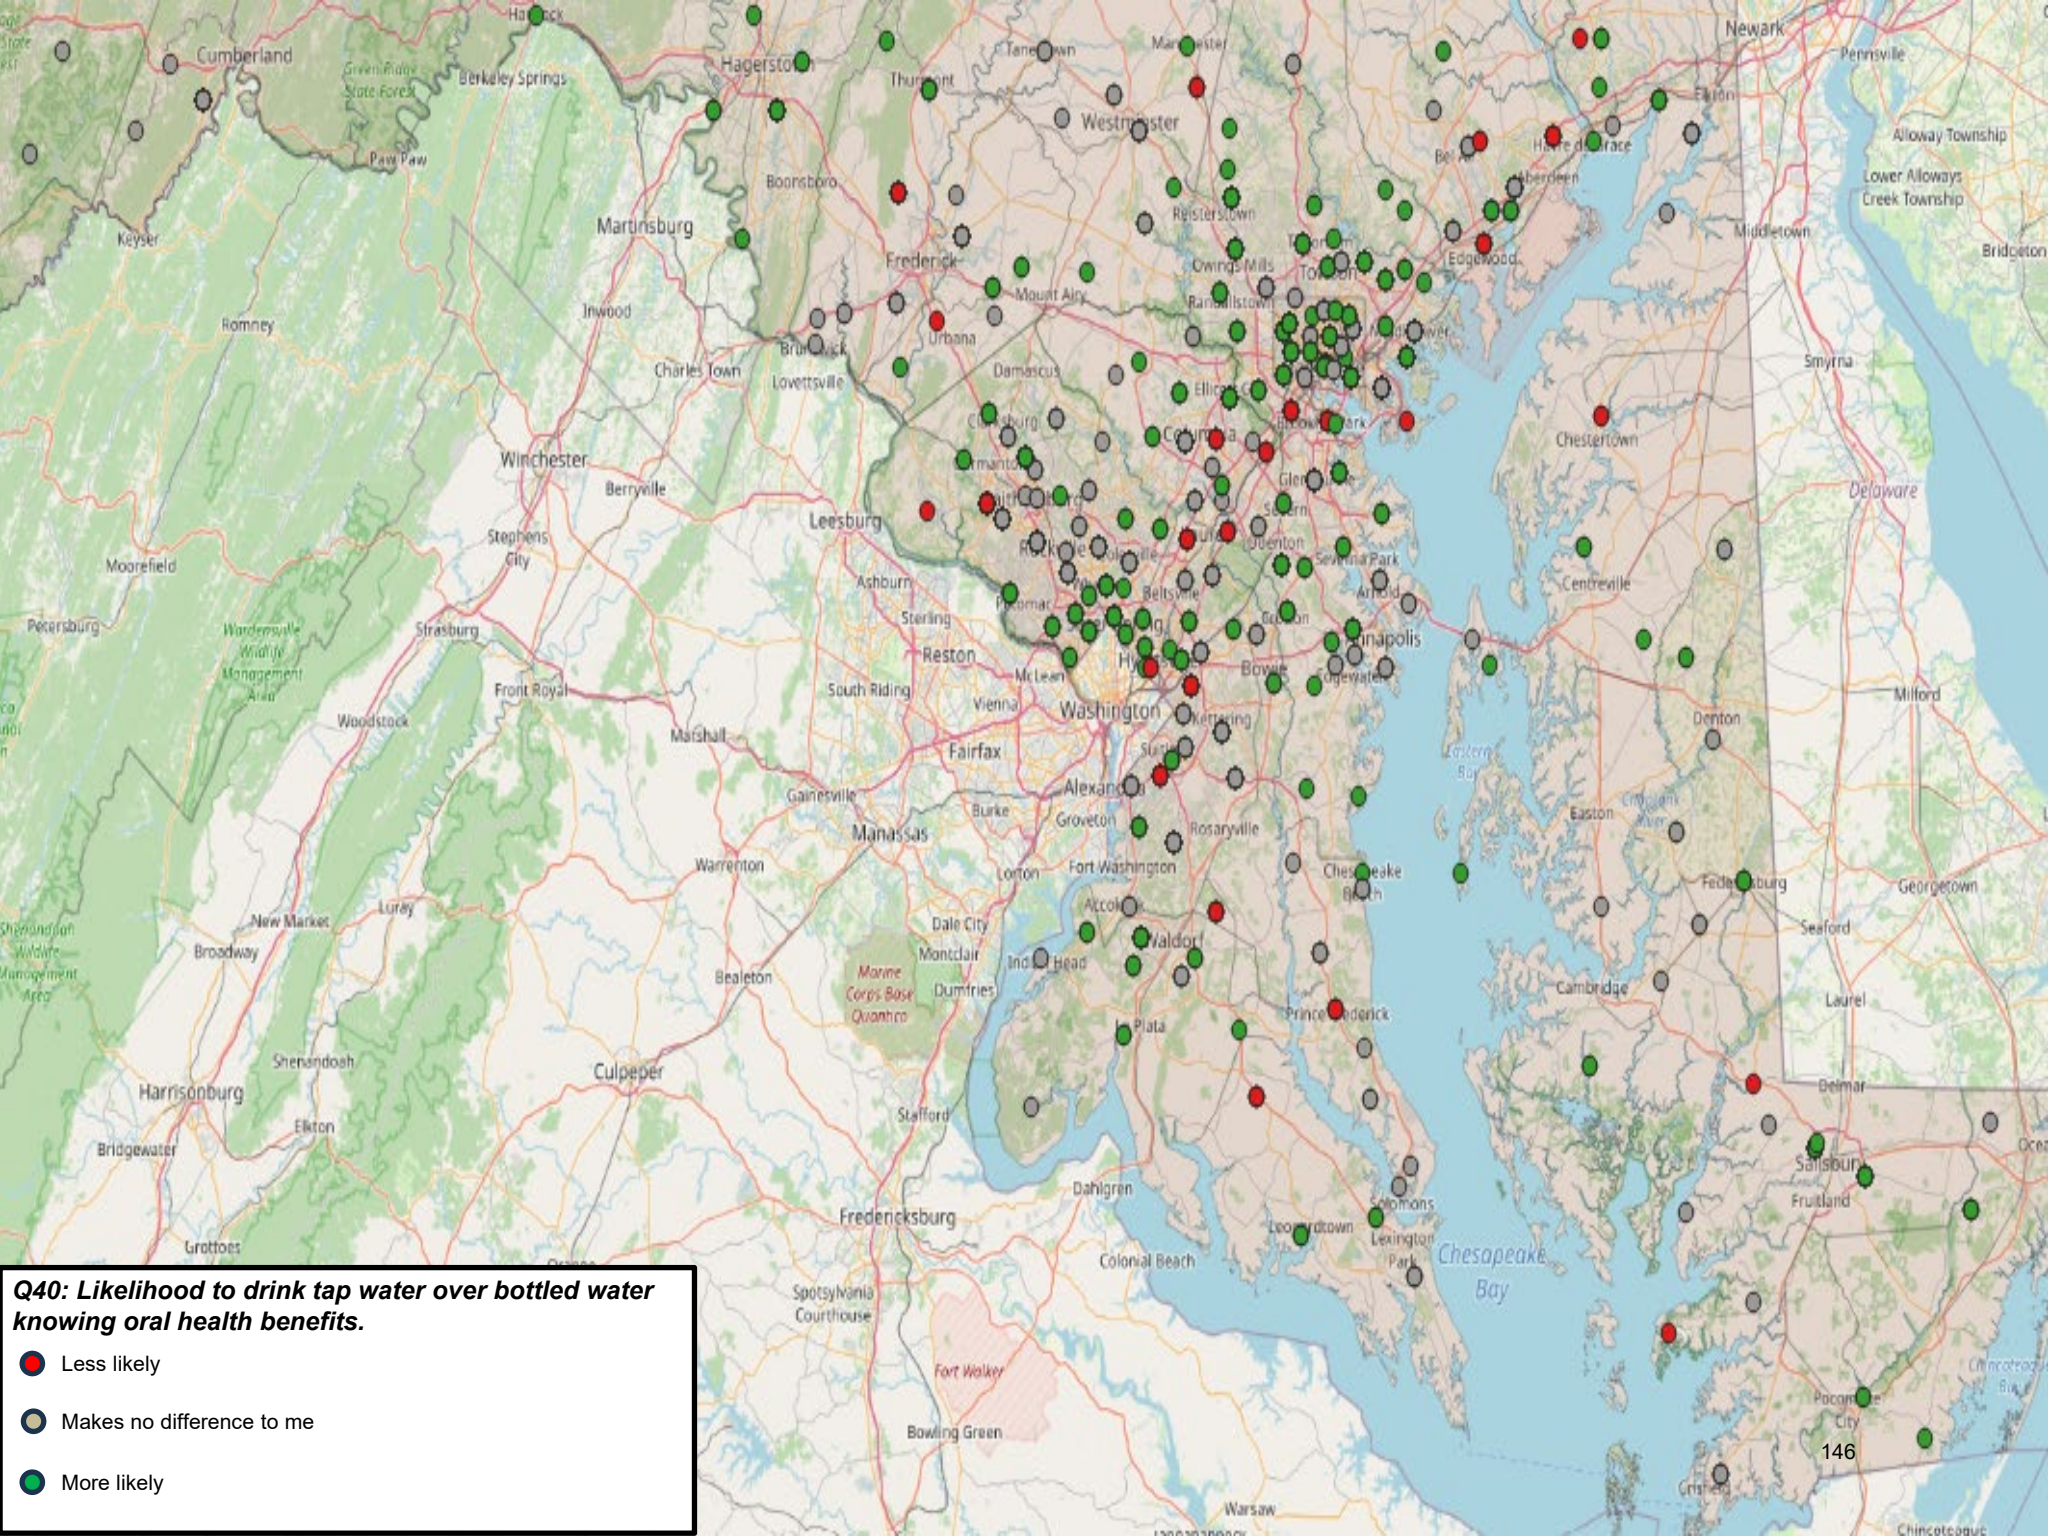

Q12: How often do you drink bottled water from your home?

- Never/Less often than monthly/Monthly
- Multiple times per week/Weekly
- Daily/Multiple times per day

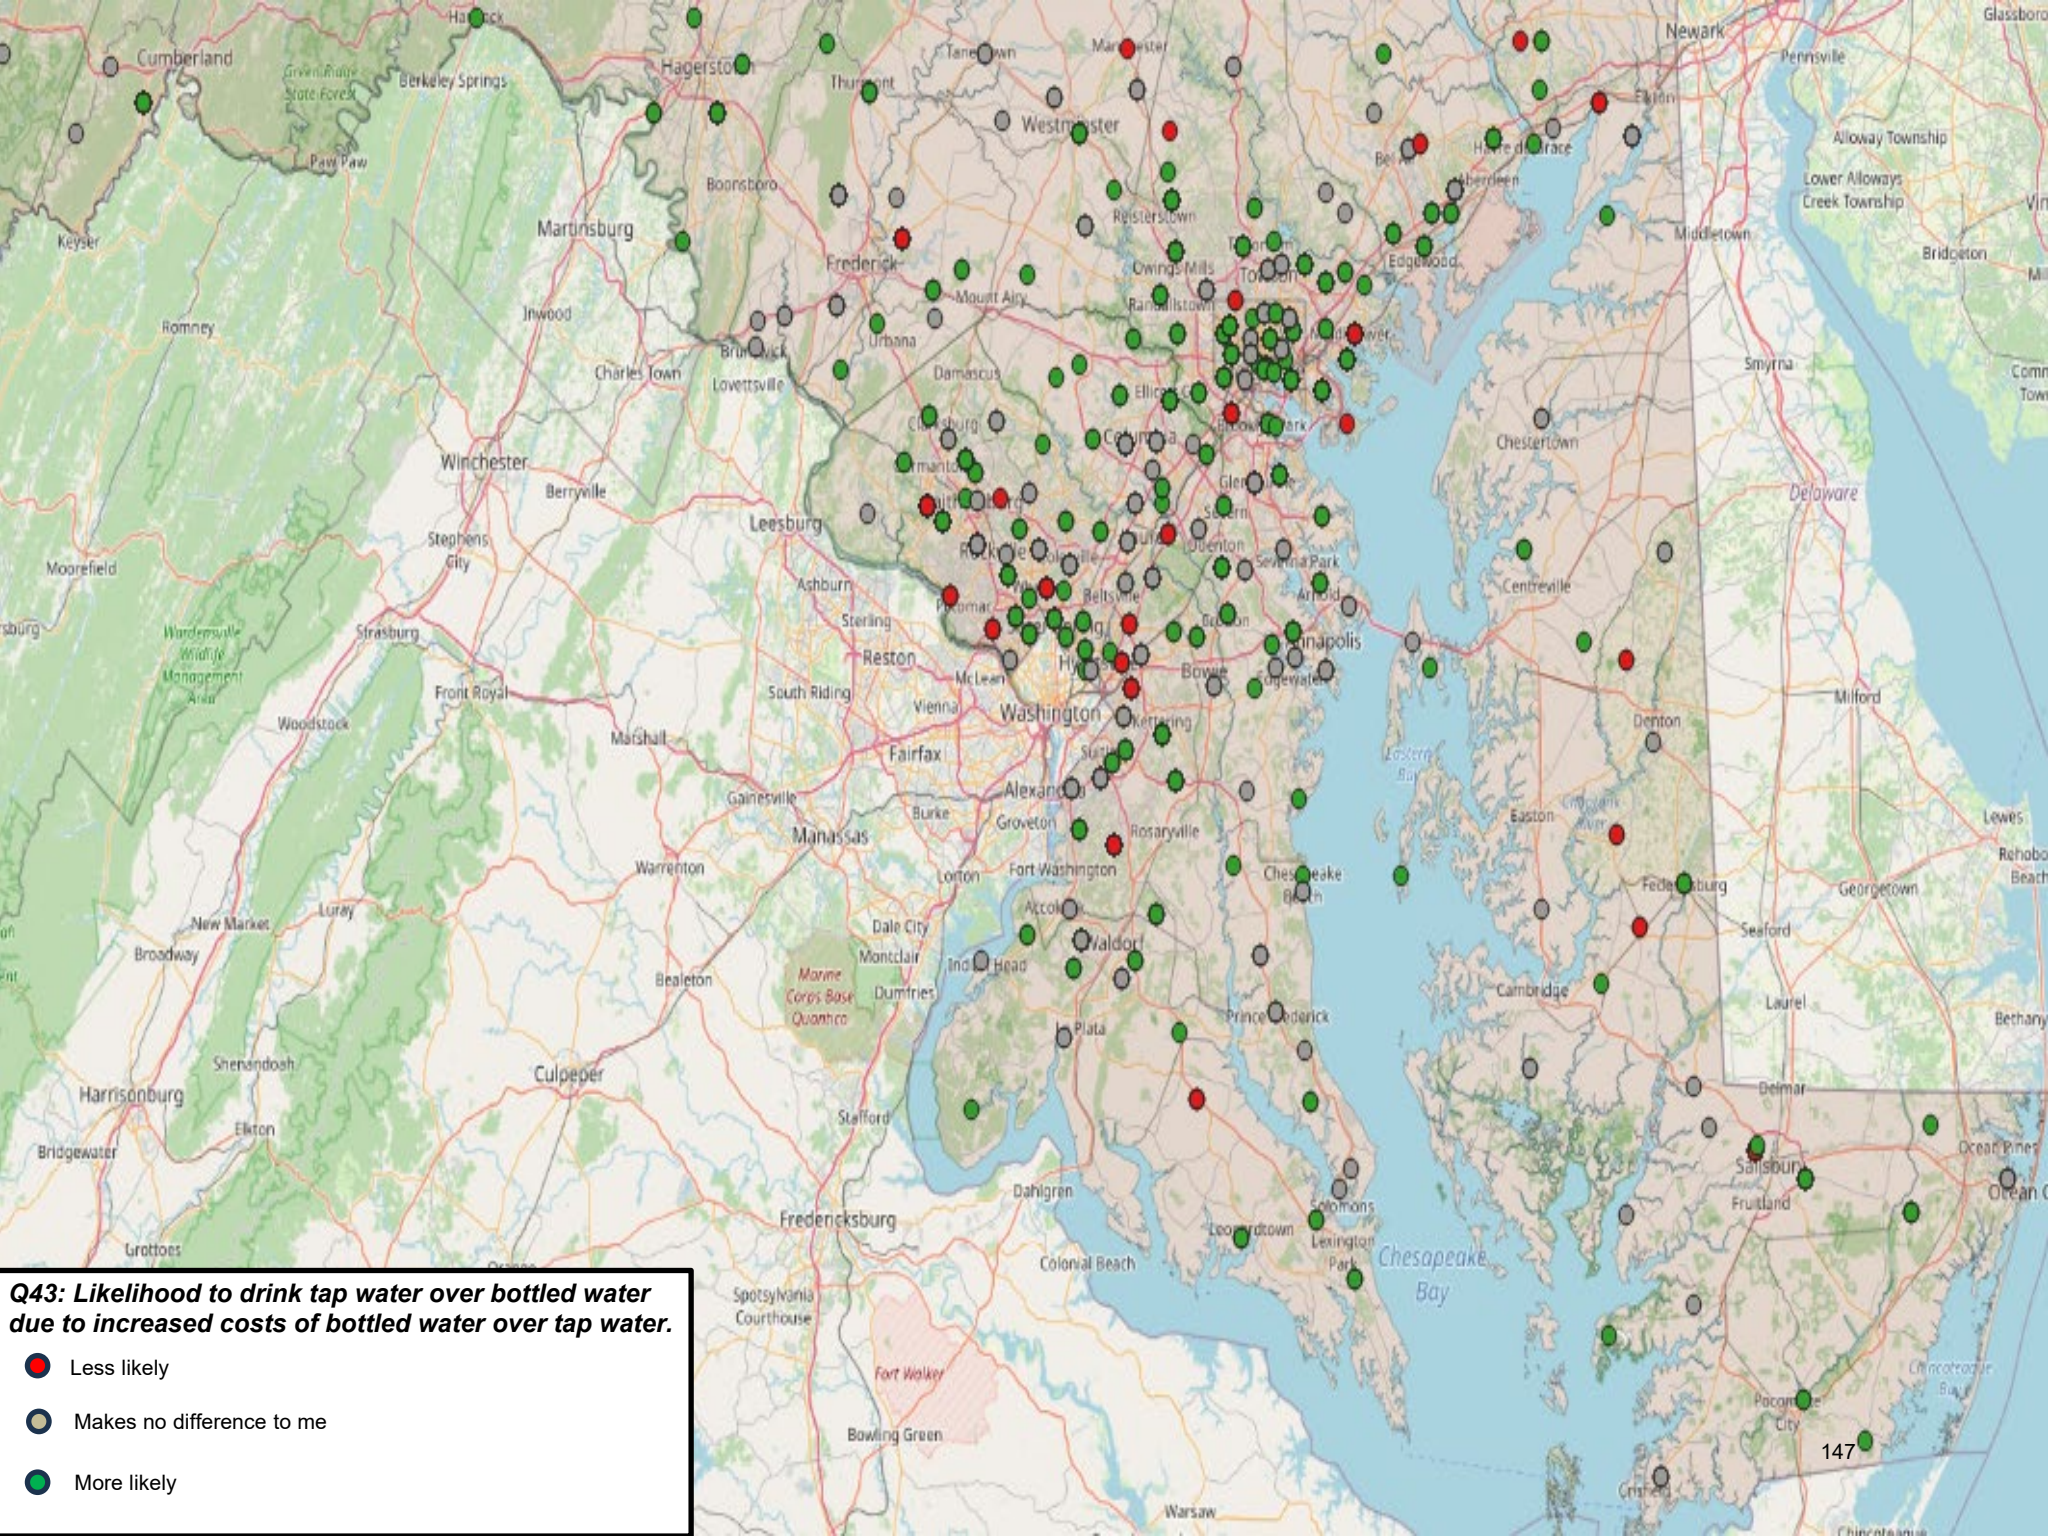

Q27: I think that using a filter for my tap water makes it safer.

- Somewhat/Strongly disagree
- Neither agree nor disagree
- Somewhat/Strongly Agree

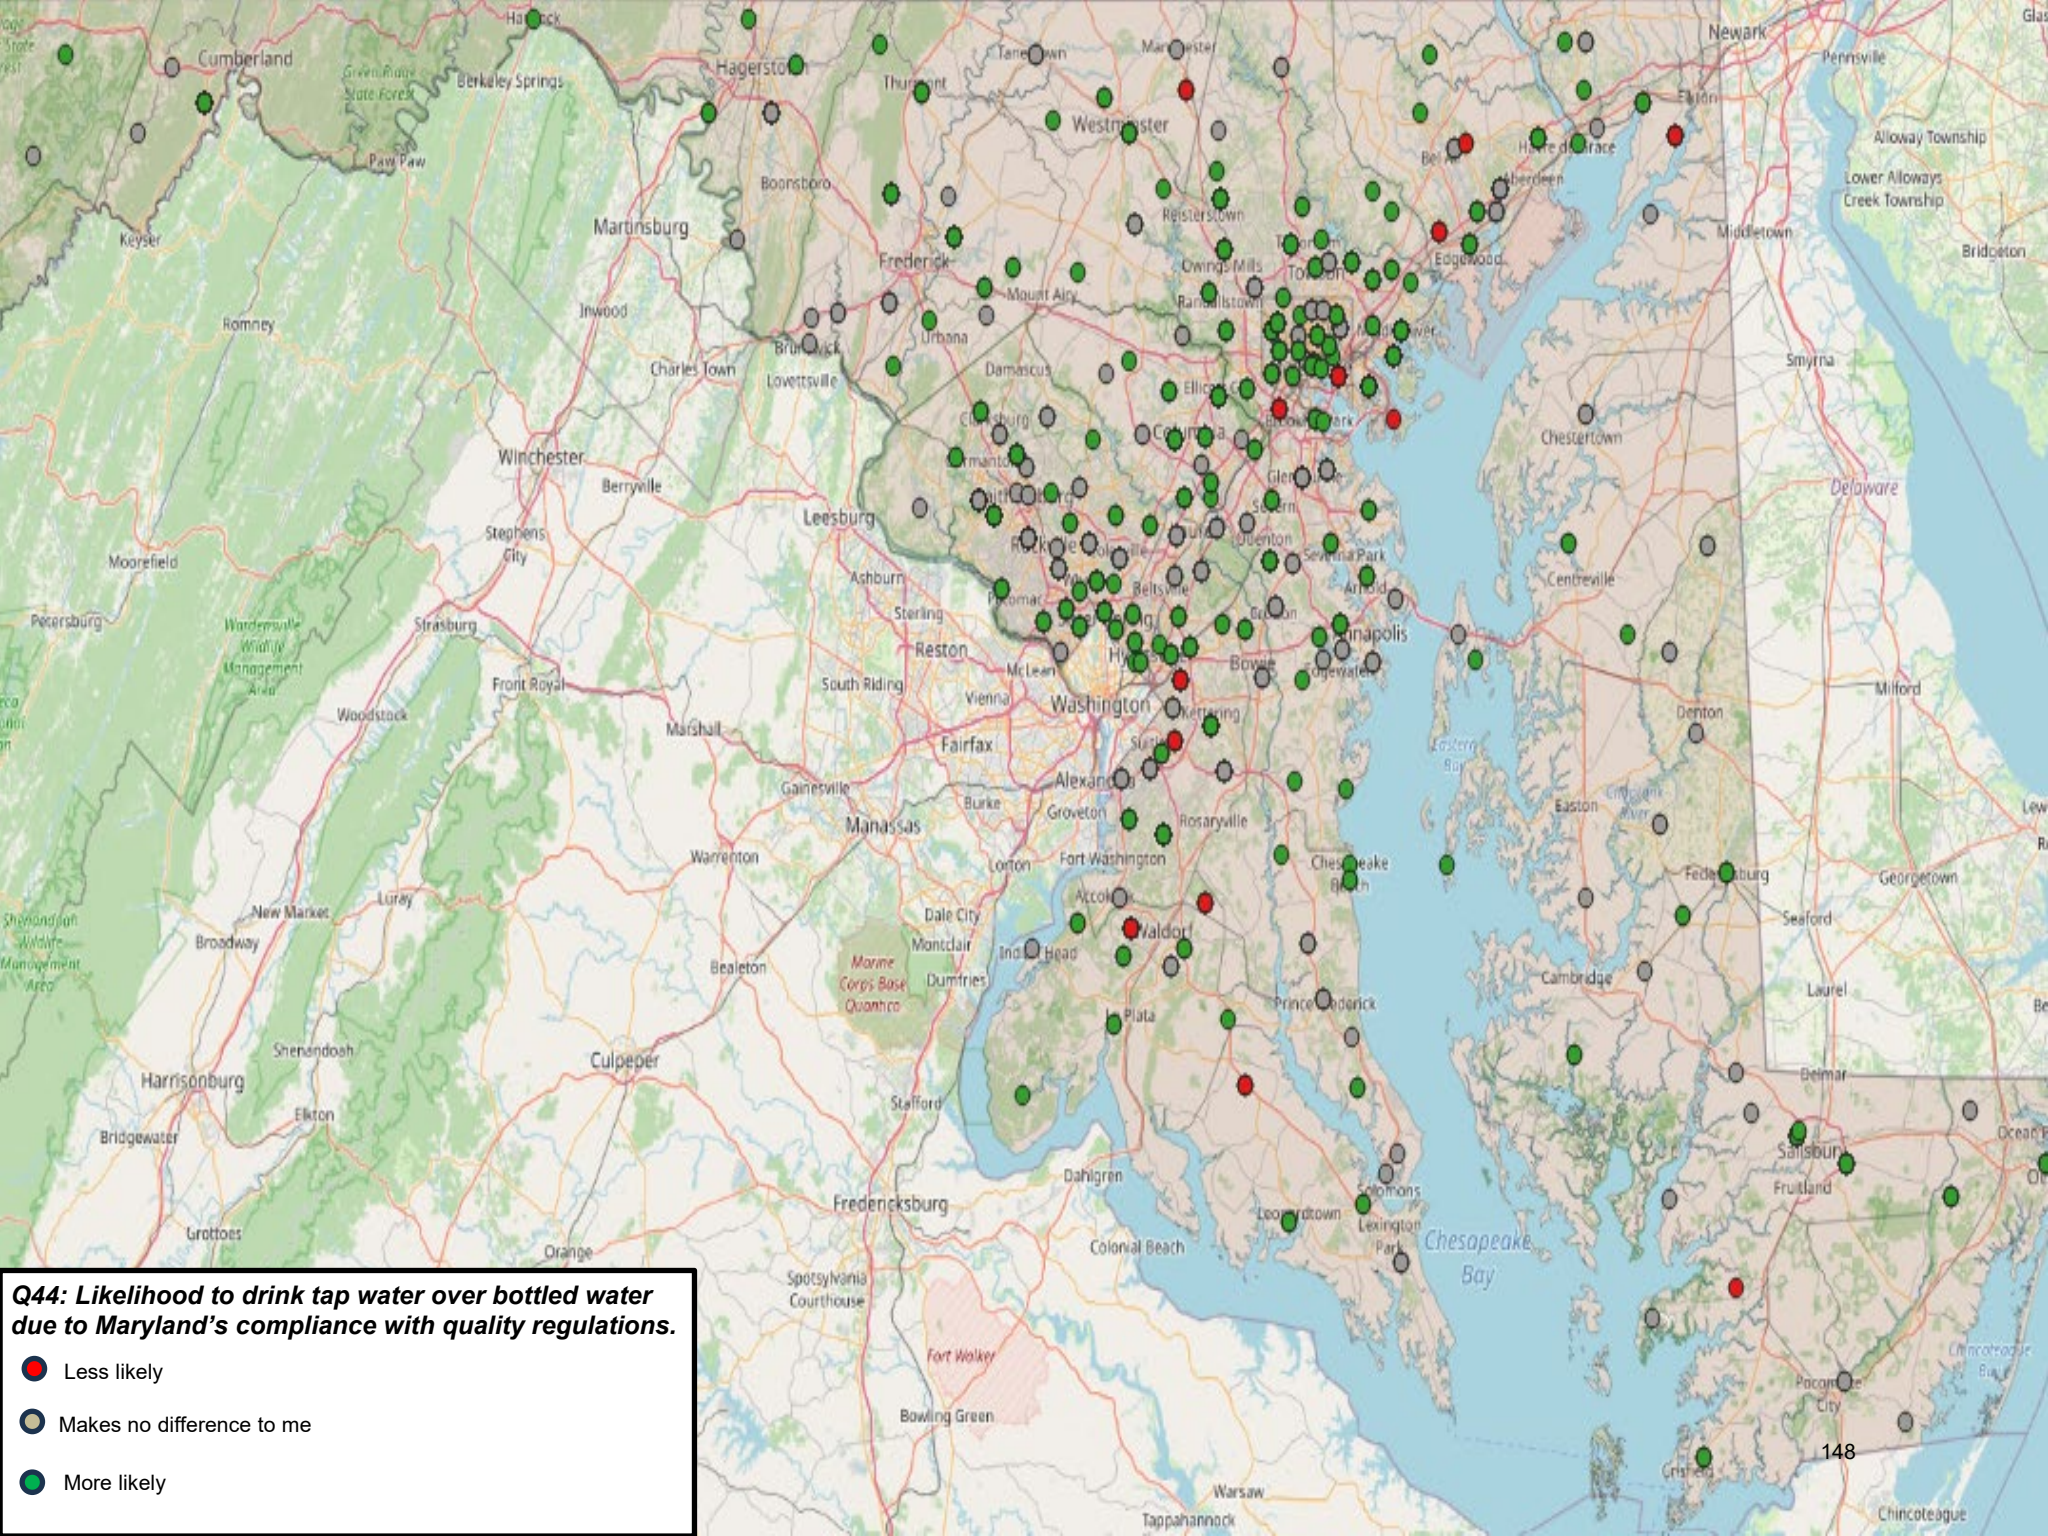

Q40: Likelihood to drink tap water over bottled water knowing oral health benefits.

- Less likely
- Makes no difference to me
- More likely

Q43: Likelihood to drink tap water over bottled water due to increased costs of bottled water over tap water.

- Less likely
- Makes no difference to me
- More likely

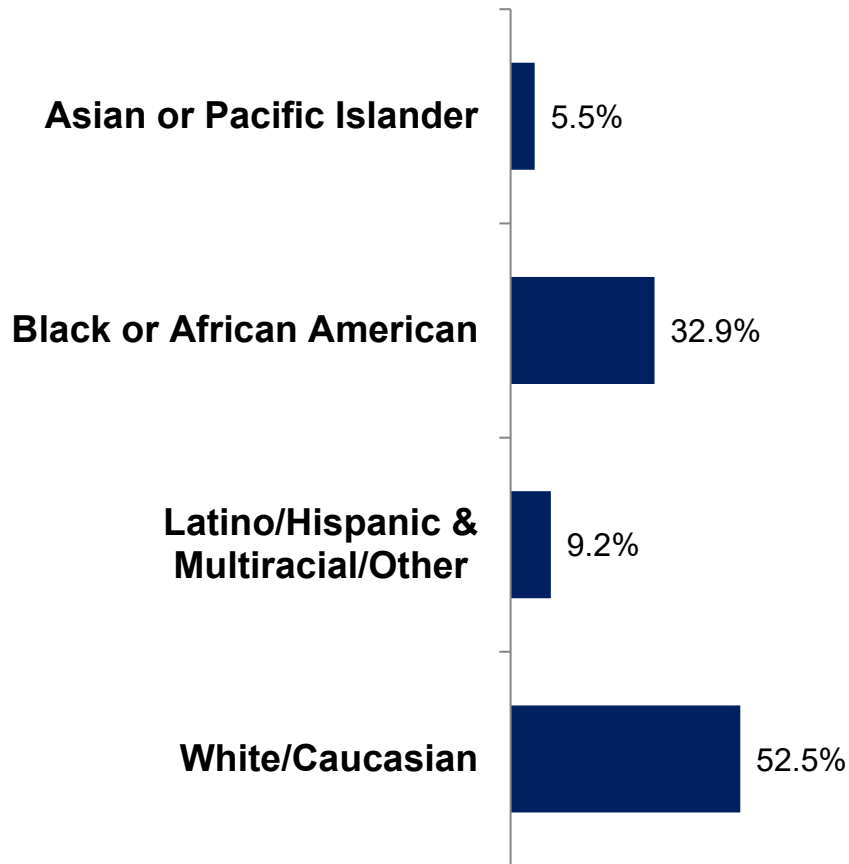

Q44: Likelihood to drink tap water over bottled water due to Maryland's compliance with quality regulations.

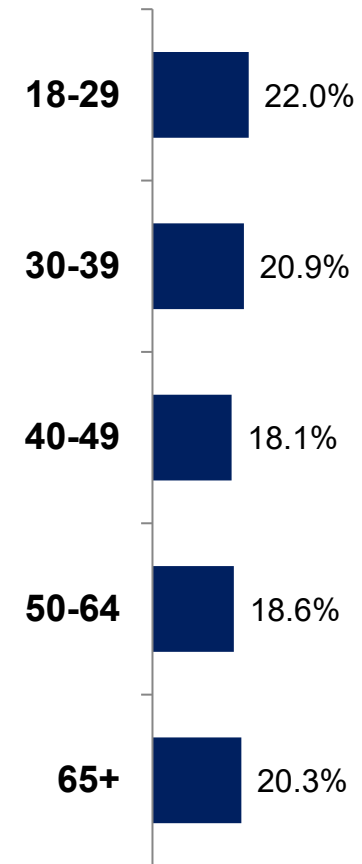

- Less likely
- Makes no difference to me
- More likely

Q40. Bottled water requires approximately 2,000 times more energy to produce than tap water. In other words, the process of bottling and transporting water requires the use of more energy to produce plastic bottles, supply oil/gas for trucks, recruit and employ human labor, etc. Does knowing this information make you more likely or less likely to drink tap water instead of bottled water in the future?

Q40. Bottled water requires approximately 2,000 times more energy to produce than tap water. In other words, the process of bottling and transporting water requires the use of more energy to produce plastic bottles, supply oil/gas for trucks, recruit and employ human labor, etc. Does knowing this information make you more likely or less likely to drink tap water instead of bottled water in the future?

Q45. Maryland water systems meet all federal and state standards for water quality. This includes the testing for harmful contaminants including lead, copper, fecal coliform bacteria, e. coli bacteria, and many others. Does knowing this information make you more likely or less likely to drink tap water over bottled water in the future?

Question: Why do you not drink tap water in your home more frequently? Select all that apply.

Answer: *use it for my cpap machine and drink also*

65+, Male, White/Caucasian, \$50,000-\$100,000, Own, Single-family home, High school degree or equivalent (e.g., GED), Uninsured, Public water, HPSA

Question: Why do you not drink tap water in your home more frequently? Select all that apply.

Answer: *It is cloudy sometimes*

65+, Female, White/Caucasian, \$100,000-\$200,000, Own, Single-family home, Master's degree, Insured, Public water, Non-HPSA

Question: Why do you not drink tap water in your home more frequently? Select all that apply.

Answer: *My tap water goes through af colligam stste*

30-39, Male, Black or African American, \$50,000-\$100,000, Other, Single-family home, High school degree or equivalent (e.g., GED), Insured, Public water, Non-HPSA

Question: Why do you not drink tap water in your home more frequently? Select all that apply.

Answer: *I like filtered water*

18-29, Female, Black or African American, Less than \$50,000, Rent, Single-family home, Associate's degree, Insured, Public water, HPSA

Question: Why do you not drink tap water in your home more frequently? Select all that apply.

Answer: *Tap is only suppose to be used for your teeth and showers because of what's in it*

30-39, Female, Black or African American, \$100,000-\$200,000, Own, Condominium or townhome, Bachelor's degree, Uninsured, Public water, Non-HPSA

Question: Why do you not drink tap water in your home more frequently? Select all that apply.

Answer: *I filter it in the fridge*

40-49, Female, Asian or Pacific Islander, \$100,000-\$200,000, Own, Single-family home, Associate's degree, Insured, Public water, Non-HPSA

Question: Why do you not drink tap water in your home more frequently? Select all that apply.

Answer: *Filtered tap water*

40-49, Male, Multiracial, \$50,000-\$100,000, Own, Single-family home, Bachelor's degree, Uninsured, Public water, Non-HPSA

Question: Why do you not drink tap water in your home more frequently? Select all that apply.

Answer: *bad for health*

40-49, Female, White/Caucasian, \$50,000-\$100,000, Own, Mobile home, High school degree or equivalent (e.g., GED), Uninsured, Well Water, HPSA

Question: Why do you not drink tap water in your home more frequently? Select all that apply.

Answer: *We have very hard water and I choose not to drink it*

18-29, Female, Black or African American, Less than \$50,000, Rent, Condominium or townhome, High school degree or equivalent (e.g., GED), Insured, Public water, HPSA

Question: Why do you not drink tap water in your home more frequently? Select all that apply.

Answer: *Don't have any water bottles*

40-49, Male, Black or African American, \$50,000-\$100,000, Own, Single-family home, Master's degree, Insured, Public water, HPSA

Question: Why do you not drink tap water in your home more frequently? Select all that apply.

Answer: *Infested water in the taps*

30-39, Female, Latino/Hispanic, \$100,000-\$200,000, Rent, Apartment building, Bachelor's degree, Insured, Public water, HPSA

Question: Why do you not drink tap water in your home more frequently? Select all that apply.

Answer: *I use a filter to drink tap water*

30-39, Male, White/Caucasian, Less than \$50,000, Other, Single-family home, High school degree or equivalent (e.g., GED), Insured, Public water, Non-HPSA

Question: Why do you not drink tap water in your home more frequently? Select all that apply.

Answer: *I would get it from the refrigerator*

40-49, Male, Latino/Hispanic, \$100,000-\$200,000, Own, Single-family home, Master's degree, Insured, Public water, HPSA

Question: Why do you not drink tap water in your home more frequently? Select all that apply.

Answer: *contaminated as all public water is...*

18-29, Female, Black or African American, \$50,000-\$100,000, Rent, Single-family home, Associate's degree, Insured, Public water, Non-HPSA

Question: Why do you not drink tap water in your home more frequently? Select all that apply.

Answer: *I've heard it wasn't good for you*

18-29, Female, White/Caucasian, Less than \$50,000, Rent, Mobile home, High school degree or equivalent (e.g., GED), Insured, Well Water, HPSA

Question: Why do you not drink tap water in your home more frequently? Select all that apply.

Answer: *The water is unsafe to drink due to sulfur unless we get a water treatment*

30-39, Male, Black or African American, Less than \$50,000, Other, Condominium or townhome, Doctorate or Professional degree (e.g., MD, PhD, JD), Insured, Public water, Non-HPSA

Question: Why do you not drink tap water in your home more frequently? Select all that apply.

Answer: *I just often don't get the opportunity to do so*

65+, Female, Black or African American, Prefer not to answer, Own, Single-family home, Master's degree, Insured, Public water, Non-HPSA

Question: Why do you not drink tap water in your home more frequently? Select all that apply.

Answer: *Convenience*

65+, Male, White/Caucasian, \$100,000-\$200,000, Own, Single-family home, Master's degree, Insured, Public water, Non-HPSA

Question: Why do you not drink tap water in your home more frequently? Select all that apply.

Answer: *I have a filter in my refrigerator*

65+, Female, White/Caucasian, \$50,000-\$100,000, Own, Single-family home, Associate's degree, Insured, Public water, HPSA

Question: Why do you not drink tap water in your home more frequently? Select all that apply.

Answer: *At times it smells awful*

18-29, Female, Black or African American, \$50,000-\$100,000, Rent, Single-family home, High school degree or equivalent (e.g., GED), Insured, Public water, HPSA

Question: Why do you not drink tap water in your home more frequently? Select all that apply.

Answer: *Need a filter*

40-49, Male, White/Caucasian, Less than \$50,000, Rent, Apartment building, High school degree or equivalent (e.g., GED), Insured, Public water, HPSA

Question: Why do you not drink tap water in your home more frequently? Select all that apply.

Answer: *It makes me feel sick*

40-49, Female, Latino/Hispanic, \$100,000-\$200,000, Own, Single-family home, Master's degree, Insured, Public water, Non-HPSA

Question: Why do you not drink tap water in your home more frequently? Select all that apply.

Answer: *i use filtered water*

50-64, Female, White/Caucasian, Over \$200,000, Own, Single-family home, Associate's degree, Insured, Public water, Non-HPSA

30-39, Male, White/Caucasian, Less than \$50,000, Rent, Single-family home, High school degree or equivalent (e.g., GED), Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Im unsure*

30-39, Male, White/Caucasian, \$100,000-\$200,000, Own, Single-family home, Master's degree, Insured, Well Water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *I would need a whole house filtration system*

30-39, Female, Black or African American, \$50,000-\$100,000, Rent, Apartment building, High school degree or equivalent (e.g., GED), Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *If I know it does not have any long term affects*

30-39, Male, Black or African American, Less than \$50,000, Rent, Single-family home, High school degree or equivalent (e.g., GED), Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Scientific reports.*

50-64, Male, White/Caucasian, \$100,000-\$200,000, Own, Single-family home, High school degree or equivalent (e.g., GED), Insured, Well Water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Nothing*

50-64, Female, Asian or Pacific Islander, \$100,000-\$200,000, Own, Single-family home, Bachelor's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *That the water remains clear and odorless*

18-29, Female, Latino/Hispanic, \$100,000-\$200,000, Rent, Apartment building, Bachelor's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *More reports published*

30-39, Female, Black or African American, Less than \$50,000, Other, Single-family home, High school degree or equivalent (e.g., GED), Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Nothing. I prefer alkaline waters*

40-49, Female, Black or African American, \$50,000-\$100,000, Own, Single-family home, Bachelor's degree, Insured, Well Water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *more safety regulations*

50-64, Male, Asian or Pacific Islander, \$50,000-\$100,000, Own, Single-family home, Less than a high school diploma, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Communication from the supplier to customers*

65+, Male, White/Caucasian, \$50,000-\$100,000, Rent, Apartment building, Bachelor's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *already drink*

18-29, Female, White/Caucasian, \$50,000-\$100,000, Other, Single-family home, High school degree or equivalent (e.g., GED), Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Having more information on it*

65+, Male, White/Caucasian, \$50,000-\$100,000, Own, Apartment building, Master's degree, Uninsured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *I would be more likely to drink tap water if it tasted as good as bottled water.*

65+, Male, White/Caucasian, \$50,000-\$100,000, Own, Condominium or townhome, Master's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Being able to test my home water*

50-64, Male, White/Caucasian, Less than \$50,000, Rent, Apartment building, High school degree or equivalent (e.g., GED), Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *I already drink tap water so nothing more*

30-39, Female, Black or African American, \$50,000-\$100,000, Rent, Condominium or townhome, Bachelor's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Seeing clearer water.*

65+, Female, Other, \$100,000-\$200,000, Own, Single-family home, Associate's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Hearing about it from my doctor and health organization*

65+, Male, Black or African American, \$50,000-\$100,000, Own, Condominium or townhome, High school degree or equivalent (e.g., GED), Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *I'm not sure they could do more than what they're already doing to make the water safer to drink*

40-49, Male, Asian or Pacific Islander, \$100,000-\$200,000, Own, Single-family home, Bachelor's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *It is regulated and might be safer than bottled water.*

30-39, Male, White/Caucasian, \$50,000-\$100,000, Own, Single-family home, Master's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *If you read that it was being tested on a more regular basis overall*

18-29, Male, Black or African American, Less than \$50,000, Rent, Single-family home, High school degree or equivalent (e.g., GED), Uninsured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Nonetheless*

30-39, Male, Black or African American, \$50,000-\$100,000, Rent, Apartment building, High school degree or equivalent (e.g., GED), Uninsured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *No chemicals*

50-64, Male, Asian or Pacific Islander, \$50,000-\$100,000, Own, Condominium or townhome, Doctorate or Professional degree (e.g., MD, PhD, JD), Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *I drink boiled tap water.*

18-29, Male, Latino/Hispanic, \$50,000-\$100,000, Own, Single-family home, Bachelor's degree, Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *I need to be educated and feel comfortable by receiving information from reputable organizations regarding the health benefits of tap water over bottled water.*

30-39, Male, White/Caucasian, \$50,000-\$100,000, Other, Condominium or townhome, High school degree or equivalent (e.g., GED), Uninsured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *If I could trust the government*

18-29, Female, Black or African American, \$50,000-\$100,000, Rent, Apartment building, Associate's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *If it has more positive reviews from professional.*

18-29, Male, White/Caucasian, \$50,000-\$100,000, Rent, Single-family home, Bachelor's degree, Uninsured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *The information provided earlier in this survey has already made me more confident and likely to continue drinking tap water*

30-39, Male, Black or African American, \$50,000-\$100,000, Own, Single-family home, High school degree or equivalent (e.g., GED), Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *I will not drink tap water I do not like the state of it and it makes me become beyond sick*

40-49, Male, White/Caucasian, Less than \$50,000, Other, Single-family home, Bachelor's degree, Insured, Well Water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *if its not with lead or anything harmful*

40-49, Female, White/Caucasian, Less than \$50,000, Rent, Apartment building, High school degree or equivalent (e.g., GED), Uninsured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Reduced bleach smell*

18-29, Female, Latino/Hispanic, Less than \$50,000, Own, Single-family home, High school degree or equivalent (e.g., GED), Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *If I had access to a good filter or more information*

30-39, Male, Black or African American, \$50,000-\$100,000, Rent, Condominium or townhome, High school degree or equivalent (e.g., GED), Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Knowing it is safe*

50-64, Male, White/Caucasian, Less than \$50,000, Own, Single-family home, High school degree or equivalent (e.g., GED), Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Nothing*

30-39, Male, Black or African American, Less than \$50,000, Own, Single-family home, High school degree or equivalent (e.g., GED), Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Honestly nothing, I don't trust tap water and it taste nasty*

40-49, Female, Black or African American, Less than \$50,000, Rent, Apartment building, High school degree or equivalent (e.g., GED), Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Knowing that it is safe to drink*

30-39, Female, White/Caucasian, \$100,000-\$200,000, Rent, Single-family home, Bachelor's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *I already am confident drinking the tap water*

50-64, Female, White/Caucasian, \$100,000-\$200,000, Own, Single-family home, High school degree or equivalent (e.g., GED), Insured, Well Water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *I already know tap is better than bottled and see no difference in taste and bottled is expensive*

50-64, Female, White/Caucasian, \$100,000-\$200,000, Own, Condominium or townhome, Bachelor's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Not sure*

40-49, Male, White/Caucasian, \$100,000-\$200,000, Own, Single-family home, Bachelor's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *If I know that the water is free of chemicals*

50-64, Male, White/Caucasian, Less than \$50,000, Rent, Apartment building, Associate's degree, Uninsured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *What are you talking about? I pretty much made it clear that all I drink IS tap water*

30-39, Female, Black or African American, \$50,000-\$100,000, Rent, Apartment building, Associate's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *If it was clean I wouldn't have a problem drinking it*

30-39, Female, White/Caucasian, Less than \$50,000, Own, Condominium or townhome, High school degree or equivalent (e.g., GED), Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Doctors approval, testing reports, public service announcements*

40-49, Male, Multiracial, \$50,000-\$100,000, Rent, Apartment building, High school degree or equivalent (e.g., GED), Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *All the information u just gave already made me comfortable*

18-29, Female, White/Caucasian, \$100,000-\$200,000, Rent, Single-family home, High school degree or equivalent (e.g., GED), Insured, Well Water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *I would drink tap water if I knew my tap water was safe enough*

50-64, Male, White/Caucasian, \$50,000-\$100,000, Rent, Single-family home, High school degree or equivalent (e.g., GED), Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Better taste*

30-39, Male, Asian or Pacific Islander, \$100,000-\$200,000, Own, Condominium or townhome, Master's degree, Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *More filter and communication information*

50-64, Male, Black or African American, Less than \$50,000, Own, Condominium or townhome, Bachelor's degree, Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *I get more information on testing and strong controls from State, Federal and local government*

50-64, Male, White/Caucasian, \$100,000-\$200,000, Rent, Single-family home, Bachelor's degree, Insured, Well Water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *More education and support for community and personal wells.*

30-39, Female, White/Caucasian, \$100,000-\$200,000, Own, Single-family home, High school degree or equivalent (e.g., GED), Insured, Well Water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Knowing that my well water was completely safe to drink.*

40-49, Female, White/Caucasian, \$50,000-\$100,000, Own, Single-family home, Bachelor's degree, Insured, Well Water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *I would be more confident if I could afford to have my tap water tested and have a proper water treatment system installed in my home. I still drink my tap water daily, as does the rest of my family. I love the taste of my well water*

50-64, Female, White/Caucasian, \$100,000-\$200,000, Own, Single-family home, Associate's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Reading test results etc*

40-49, Female, Black or African American, Over \$200,000, Own, Single-family home, Bachelor's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *nothing*

18-29, Female, Black or African American, Less than \$50,000, Own, Single-family home, High school degree or equivalent (e.g., GED), Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *nothing*

40-49, Female, White/Caucasian, Less than \$50,000, Own, Single-family home, High school degree or equivalent (e.g., GED), Uninsured, Well Water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Nothing we drink our own well water. We don't buy bottled water. I don't believe them when they say it spring water*

40-49, Female, Multiracial, \$100,000-\$200,000, Rent, Apartment building, Master's degree, Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *new and updated processing facility reports and findings*

18-29, Male, Black or African American, \$50,000-\$100,000, Own, Single-family home, Less than a high school diploma, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *if it wasn't dirty.*

30-39, Female, White/Caucasian, \$50,000-\$100,000, Rent, Condominium or townhome, High school degree or equivalent (e.g., GED), Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *I'm not sure. Not sure the government agencies could be trusted anyways.*

65+, Female, Other, Prefer not to answer, Own, Single-family home, High school degree or equivalent (e.g., GED), Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Nothing*

65+, Female, White/Caucasian, \$50,000-\$100,000, Own, Single-family home, Master's degree, Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Nothing. I like bottled water*

30-39, Female, White/Caucasian, \$100,000-\$200,000, Own, Single-family home, Master's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Knowing how they are testing the water.*

40-49, Female, White/Caucasian, Less than \$50,000, Rent, Single-family home, High school degree or equivalent (e.g., GED), Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *I would be more likely to drink it if I had a water softener and filters connected to the incoming water supply.*

30-39, Female, Black or African American, \$50,000-\$100,000, Own, Single-family home, Master's degree, Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *If was better tasting, perhaps filtering the water more?*

18-29, Female, Latino/Hispanic, Less than \$50,000, Own, Single-family home, High school degree or equivalent (e.g., GED), Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *If I knew all the pros and cons*

30-39, Female, Black or African American, Less than \$50,000, Rent, Single-family home, Associate's degree, Uninsured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Because it helps the teeth and it takes less to make*

30-39, Female, Black or African American, \$50,000-\$100,000, Rent, Apartment building, High school degree or equivalent (e.g., GED), Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *It was safer*

18-29, Female, Black or African American, \$50,000-\$100,000, Own, Single-family home, Associate's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Water testing*

18-29, Female, White/Caucasian, \$50,000-\$100,000, Rent, Apartment building, Bachelor's degree, Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Knowing what makes tap water good or bad and knowing where to find information regarding these parameters about my own water.*

30-39, Female, Black or African American, Less than \$50,000, Rent, Condominium or townhome, High school degree or equivalent (e.g., GED), Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Better pipes underground*

50-64, Male, White/Caucasian, Over \$200,000, Own, Single-family home, Master's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *No need, I prefer tap water*

30-39, Male, Black or African American, Prefer not to answer, Rent, Condominium or townhome, Associate's degree, Uninsured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *I drink tap water daily so nothing will make me do something I'm already doing.*

50-64, Male, White/Caucasian, Less than \$50,000, Rent, Condominium or townhome, Bachelor's degree, Uninsured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Official government announcements and reliable scientific studies would make me more likely to drink tap water.*

18-29, Female, Asian or Pacific Islander, Less than \$50,000, Own, Single-family home, High school degree or equivalent (e.g., GED), Insured, Well Water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Nothing*

50-64, Male, White/Caucasian, Less than \$50,000, Rent, Apartment building, High school degree or equivalent (e.g., GED), Uninsured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Already trust it*

18-29, Male, White/Caucasian, \$50,000-\$100,000, Other, Single-family home, High school degree or equivalent (e.g., GED), Insured, Well Water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Nothing I'm fine with drinking tap*

18-29, Female, White/Caucasian, \$50,000-\$100,000, Own, Single-family home, High school degree or equivalent (e.g., GED), Uninsured, Well Water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *its not processed, its actually natural*

40-49, Male, Black or African American, Less than \$50,000, Rent, Apartment building, Bachelor's degree, Uninsured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *The information i gathered from this survey*

18-29, Male, White/Caucasian, \$100,000-\$200,000, Own, Single-family home, Associate's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *None*

40-49, Female, Asian or Pacific Islander, \$50,000-\$100,000, Own, Condominium or townhome, Bachelor's degree, Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Scientific research and records announce to public*

30-39, Female, White/Caucasian, \$100,000-\$200,000, Own, Single-family home, High school degree or equivalent (e.g., GED), Uninsured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *A yearly report of what is in our public water*

18-29, Female, Black or African American, Less than \$50,000, Own, Single-family home, High school degree or equivalent (e.g., GED), Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *By making it was checked by a health care provider or water provider*

40-49, Female, White/Caucasian, Over \$200,000, Own, Single-family home, Master's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Nothing, I'm already confident*

50-64, Male, White/Caucasian, \$100,000-\$200,000, Own, Single-family home, Bachelor's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *If they took Fluoride out of the water supply.*

40-49, Female, White/Caucasian, \$100,000-\$200,000, Own, Single-family home, High school degree or equivalent (e.g., GED), Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *if i got a repprt showing no checmicals are in it*

30-39, Male, Black or African American, \$50,000-\$100,000, Rent, Single-family home, Associate's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *That state local officials give us the knowledge about tap water*

50-64, Male, White/Caucasian, \$50,000-\$100,000, Own, Single-family home, Associate's degree, Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Better safety of the supply from domestic actors.*

18-29, Female, White/Caucasian, \$50,000-\$100,000, Other, Single-family home, High school degree or equivalent (e.g., GED), Uninsured, Well Water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Not sure*

18-29, Female, Black or African American, Less than \$50,000, Rent, Apartment building, Bachelor's degree, Uninsured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *An in home filtration system.*

50-64, Male, White/Caucasian, Less than \$50,000, Own, Apartment building, Less than a high school diploma, Uninsured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *I'm not a H2-O expert I have no idea other than adding flavor to it from flavor packs goodbye at the store.*

50-64, Male, White/Caucasian, Less than \$50,000, Rent, Apartment building, Less than a high school diploma, Uninsured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *no*

65+, Female, White/Caucasian, \$50,000-\$100,000, Own, Single-family home, Master's degree, Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Yearly communication from my water supplies*

65+, Female, White/Caucasian, \$100,000-\$200,000, Own, Single-family home, Master's degree, Insured, Well Water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Getting a filter system to soften the water*

30-39, Male, White/Caucasian, Over \$200,000, Own, Single-family home, Doctorate or Professional degree (e.g., MD, PhD, JD), Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *My main complaint with the tap water is heavy use of chlorine/chloramines in the summer, which affect the taste.*

40-49, Male, Black or African American, \$100,000-\$200,000, Rent, Single-family home, High school degree or equivalent (e.g., GED), Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *If I had a water filter*

18-29, Male, White/Caucasian, \$50,000-\$100,000, Rent, Single-family home, Bachelor's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *I am confident drinking tap water now.*

40-49, Male, Black or African American, Less than \$50,000, Own, Single-family home, Bachelor's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Doubl filtration*

50-64, Male, White/Caucasian, Prefer not to answer, Own, Condominium or townhome, High school degree or equivalent (e.g., GED), Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *None*

65+, Male, White/Caucasian, \$50,000-\$100,000, Own, Single-family home, Bachelor's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *not necessary: don't drink bottled water.*

50-64, Female, Black or African American, \$100,000-\$200,000, Own, Single-family home, High school degree or equivalent (e.g., GED), Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *The removal of lead pipes*

50-64, Male, White/Caucasian, Over \$200,000, Own, Single-family home, Master's degree, Uninsured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Cover and test the sources*

18-29, Female, Latino/Hispanic, Less than \$50,000, Rent, Single-family home, High school degree or equivalent (e.g., GED), Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *By knowing what is inside the tap water*

30-39, Female, White/Caucasian, \$100,000-\$200,000, Own, Single-family home, Bachelor's degree, Insured, Well Water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *I regularly drink tap water*

50-64, Female, White/Caucasian, \$100,000-\$200,000, Own, Single-family home, Bachelor's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Others' opinions and reviews*

18-29, Female, White/Caucasian, \$50,000-\$100,000, Own, Single-family home, High school degree or equivalent (e.g., GED), Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *I would feel more confident in drinking tap water if I were provided with an at least quarterly report from a third party tester.*

65+, Female, White/Caucasian, Less than \$50,000, Own, Condominium or townhome, Bachelor's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *I would feel confident to drink tap water if I filtered it.*

50-64, Female, Black or African American, \$100,000-\$200,000, Rent, Apartment building, Doctorate or Professional degree (e.g., MD, PhD, JD), Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Nothing. I don't care for the taste and would prefer to have bottled water at all cost.*

50-64, Female, White/Caucasian, Less than \$50,000, Own, Single-family home, Bachelor's degree, Uninsured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Reassurance that it is safe, good for me and necessary for good health. I do drink tap water but I have my filter. I always drank it as a child and was ok.*

65+, Female, White/Caucasian, Less than \$50,000, Own, Single-family home, High school degree or equivalent (e.g., GED), Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Already comfortable drinking tap water*

50-64, Male, White/Caucasian, Less than \$50,000, Own, Condominium or townhome, Bachelor's degree, Uninsured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Nothing*

50-64, Male, Black or African American, \$50,000-\$100,000, Rent, Single-family home, Associate's degree, Uninsured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *If people in the inner cities like Detroit had clean water to drink than maybe I would change my mind*

40-49, Female, White/Caucasian, \$50,000-\$100,000, Own, Single-family home, Bachelor's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *don't know*

65+, Female, Black or African American, \$100,000-\$200,000, Own, Condominium or townhome, Bachelor's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Nothing, but I like bottled water*

18-29, Female, Black or African American, \$100,000-\$200,000, Rent, Apartment building, High school degree or equivalent (e.g., GED), Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *I would need to read multiple articles stating that it is a healthier option to consume than bottled water.*

30-39, Male, Black or African American, \$50,000-\$100,000, Rent, Single-family home, Associate's degree, Uninsured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *I will never be confident in drinking tap water*

18-29, Male, Black or African American, \$50,000-\$100,000, Own, Single-family home, High school degree or equivalent (e.g., GED), Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *I don't have the ability to drink or consume anything, so confidence in tap water isn't applicable to me. However, for humans, confidence in tap water often comes from knowing that it meets or exceeds safety standards, is regularly tested for contaminants*

40-49, Female, White/Caucasian, Less than \$50,000, Own, Single-family home, Associate's degree, Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *More information available to the quality of the water*

18-29, Male, Black or African American, \$50,000-\$100,000, Rent, Apartment building, High school degree or equivalent (e.g., GED), Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *If I was able to control the temperature of my tap water like I do with my bottle by putting it in the freezer*

50-64, Female, White/Caucasian, Less than \$50,000, Own, Single-family home, High school degree or equivalent (e.g., GED), Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Testing of water.*

18-29, Male, Black or African American, Prefer not to answer, Own, Single-family home, High school degree or equivalent (e.g., GED), Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Know that the bacteria in the water is no longer present.*

18-29, Female, Latino/Hispanic, \$50,000-\$100,000, Rent, Apartment building, Bachelor's degree, Uninsured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *None*

50-64, Female, Asian or Pacific Islander, \$100,000-\$200,000, Own, Condominium or townhome, Bachelor's degree, Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Nothing it's almost all I drink*

40-49, Female, White/Caucasian, Less than \$50,000, Rent, Apartment building, Associate's degree, Uninsured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *I already drink about 95% tap*

30-39, Male, Black or African American, \$50,000-\$100,000, Rent, Apartment building, High school degree or equivalent (e.g., GED), Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Printed Water Quality Test Results*

65+, Female, Black or African American, Less than \$50,000, Rent, Condominium or townhome, High school degree or equivalent (e.g., GED), Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Water shouldn't have a taste and my water taste terrible and the bathroom water has a smell. If these things would change, then I would drink it.*

40-49, Female, White/Caucasian, \$50,000-\$100,000, Own, Mobile home, High school degree or equivalent (e.g., GED), Uninsured, Well Water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *I need to buy a water softener then I will have no problem drinking the water*

40-49, Male, Latino/Hispanic, \$50,000-\$100,000, Rent, Apartment building, Bachelor's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Reports from medical, federal or state agencies indicating it is safe to drink*

50-64, Female, White/Caucasian, \$100,000-\$200,000, Own, Single-family home, Bachelor's degree, Uninsured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *If I knew that all the residue and harmful elements were removed from the tap water, I'd feel better about drinking it.*

40-49, Female, Black or African American, Less than \$50,000, Rent, Apartment building, High school degree or equivalent (e.g., GED), Uninsured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Nothing*

40-49, Female, White/Caucasian, \$100,000-\$200,000, Rent, Apartment building, Master's degree, Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *I drink tap water all of the time. I maybe drink one bottle of bottled water a month, and that is only when I forget my own bottle.*

18-29, Female, Black or African American, Less than \$50,000, Other, Other, High school degree or equivalent (e.g., GED), Uninsured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *If I am assured that it is good to drink by medical professionals*

50-64, Female, White/Caucasian, Less than \$50,000, Rent, Apartment building, High school degree or equivalent (e.g., GED), Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *I drink lots of tap water*

18-29, Female, White/Caucasian, \$50,000-\$100,000, Rent, Apartment building, Associate's degree, Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Recent data sheets of the water quality in an easily acceptable website.*

65+, Male, White/Caucasian, \$100,000-\$200,000, Own, Single-family home, Master's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Na*

65+, Female, White/Caucasian, \$50,000-\$100,000, Own, Condominium or townhome, High school degree or equivalent (e.g., GED), Uninsured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Nothing*

65+, Female, White/Caucasian, \$50,000-\$100,000, Own, Single-family home, High school degree or equivalent (e.g., GED), Insured, Well Water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *We have well water and I think it is fine to drink but it is not the best tasting. We do use it to cook with and make coffee and tea with. It is mineral rich and not pleasant to drink.*

65+, Female, White/Caucasian, \$100,000-\$200,000, Own, Single-family home, Bachelor's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *I need to read more about this and then make up my mind.*

30-39, Male, Black or African American, Less than \$50,000, Rent, Condominium or townhome, High school degree or equivalent (e.g., GED), Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Nothing really not a water drinker like that*

50-64, Male, White/Caucasian, \$100,000-\$200,000, Own, Mobile home, Bachelor's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Better test*

18-29, Male, Black or African American, \$50,000-\$100,000, Rent, Single-family home, High school degree or equivalent (e.g., GED), Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *The filtration and the PH Balance in the water*

65+, Female, White/Caucasian, \$50,000-\$100,000, Own, Single-family home, Associate's degree, Uninsured, Well Water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *I have well water. I'm concerned with medications people take and spit in sinks or flush down the toilet.*

30-39, Male, Asian or Pacific Islander, \$100,000-\$200,000, Rent, Apartment building, Doctorate or Professional degree (e.g., MD, PhD, JD), Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *I am confident in it*

40-49, Female, White/Caucasian, Less than \$50,000, Own, Single-family home, High school degree or equivalent (e.g., GED), Uninsured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *For it to smell and taste better.*

30-39, Male, White/Caucasian, \$50,000-\$100,000, Own, Condominium or townhome, Bachelor's degree, Uninsured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *none*

30-39, Female, Black or African American, Less than \$50,000, Rent, Apartment building, Associate's degree, Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *its the only taste of water i really had and i like it better than bottle water. It has a better taste to me and i like drinking my tap water even though it may not be as healthy or good for you.*

30-39, Male, White/Caucasian, \$50,000-\$100,000, Rent, Single-family home, High school degree or equivalent (e.g., GED), Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *I would be more confident and drinking tapwater at the city and state legislation could guarantee that there would be no problems with it.*

50-64, Female, White/Caucasian, Over \$200,000, Own, Single-family home, Associate's degree, Uninsured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *I'd like more communication from SOMEONE when something is happening with our water to cause it to discolor or get air bubbles in it, etc.*

18-29, Female, White/Caucasian, Less than \$50,000, Rent, Apartment building, High school degree or equivalent (e.g., GED), Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Knowing what's in it and where it comes from*

30-39, Male, Black or African American, Less than \$50,000, Own, Apartment building, Less than a high school diploma, Uninsured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *If I know everything is clean n disease free*

65+, Female, White/Caucasian, Less than \$50,000, Own, Single-family home, Bachelor's degree, Insured, Well Water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *if there was a simple way to test the tap water.*

18-29, Female, Black or African American, Less than \$50,000, Rent, Condominium or townhome, High school degree or equivalent (e.g., GED), Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *When it becomes clean*

40-49, Female, White/Caucasian, \$100,000-\$200,000, Own, Single-family home, Bachelor's degree, Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *I'm honestly not sure. I love our tap water.*

50-64, Female, White/Caucasian, \$100,000-\$200,000, Own, Single-family home, Bachelor's degree, Insured, Well Water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *A letter from a trusted source.*

50-64, Female, White/Caucasian, \$100,000-\$200,000, Own, Single-family home, Master's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Data showing that the water is 100% safe*

65+, Male, White/Caucasian, \$50,000-\$100,000, Own, Single-family home, Bachelor's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Above all it must taste good, be unchlorinated, and smell good.*

50-64, Female, White/Caucasian, Less than \$50,000, Own, Single-family home, Associate's degree, Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *N/A*

30-39, Female, White/Caucasian, Less than \$50,000, Rent, Single-family home, High school degree or equivalent (e.g., GED), Uninsured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Built in water filters*

65+, Female, Black or African American, \$50,000-\$100,000, Rent, Single-family home, Bachelor's degree, Uninsured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *I drink apple water.*

18-29, Female, White/Caucasian, Prefer not to answer, Rent, Apartment building, Master's degree, Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Knowing it is entirely safe to drink without contaminants or chemicals. Cheaper price.*

50-64, Male, Black or African American, Less than \$50,000, Own, Condominium or townhome, High school degree or equivalent (e.g., GED), Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *I drink tap water the majority of the time so there is nothing that would make me more confident to drink more tap water*

40-49, Male, White/Caucasian, \$50,000-\$100,000, Own, Condominium or townhome, Bachelor's degree, Insured, Well Water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Lack of chemicals*

18-29, Male, Black or African American, \$50,000-\$100,000, Other, Single-family home, High school degree or equivalent (e.g., GED), Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Knowing more benefits*

18-29, Female, Black or African American, \$50,000-\$100,000, Own, Single-family home, High school degree or equivalent (e.g., GED), Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *I'm not sure*

30-39, Male, Black or African American, Less than \$50,000, Rent, Single-family home, High school degree or equivalent (e.g., GED), Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *More research done towards the cleaning of it*

30-39, Female, White/Caucasian, Prefer not to answer, Own, Single-family home, Doctorate or Professional degree (e.g., MD, PhD, JD), Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *I would drink tap water if it comes with a system in in the faucet. I would also drink it if the water table is checked out.*

30-39, Male, Asian or Pacific Islander, \$100,000-\$200,000, Own, Single-family home, Bachelor's degree, Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Filtration system*

18-29, Female, Black or African American, \$50,000-\$100,000, Own, Single-family home, Associate's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Nothing would make me confident in drinking it*

50-64, Female, White/Caucasian, Less than \$50,000, Own, Single-family home, High school degree or equivalent (e.g., GED), Uninsured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *less bleach taste*

30-39, Female, Asian or Pacific Islander, \$100,000-\$200,000, Own, Single-family home, Master's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *That it is not contaminated with anything harmful*

40-49, Female, White/Caucasian, \$100,000-\$200,000, Own, Single-family home, Bachelor's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *smell of bleacch in my tap water doesnt make it safe to drink*

50-64, Male, Latino/Hispanic, Prefer not to answer, Own, Single-family home, Bachelor's degree, Insured, Well Water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *If I was not receiving water from my well*

30-39, Female, White/Caucasian, Less than \$50,000, Rent, Apartment building, High school degree or equivalent (e.g., GED), Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Believing 100% that it was safer for me to drink*

65+, Female, White/Caucasian, Less than \$50,000, Rent, Apartment building, High school degree or equivalent (e.g., GED), Uninsured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Not a confidence issue--I just don't like the taste of ANY water in any city/country--too bland==like drinking cardboard!*

30-39, Female, Black or African American, \$50,000-\$100,000, Rent, Apartment building, Associate's degree, Insured, Well Water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *New plumbing in my house*

65+, Male, White/Caucasian, \$50,000-\$100,000, Own, Condominium or townhome, Bachelor's degree, Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *If I liked the taste*

30-39, Male, White/Caucasian, \$50,000-\$100,000, Own, Mobile home, Associate's degree, Insured, Well Water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *I'd drink it if I had it*

40-49, Female, White/Caucasian, \$50,000-\$100,000, Own, Single-family home, Master's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Nothing. I love and trust my tap water.*

18-29, Female, White/Caucasian, \$50,000-\$100,000, Rent, Apartment building, Master's degree, Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Majority of the water I currently drink is tapwater. The only reason I would drink out of a bottle is if I was out of the house and did not have access to a reusable water bottle.*

50-64, Male, Black or African American, \$100,000-\$200,000, Own, Single-family home, Bachelor's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Getting more information about the water in my community.*

40-49, Female, White/Caucasian, Less than \$50,000, Own, Condominium or townhome, High school degree or equivalent (e.g., GED), Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *If they have more research and let us know about it*

65+, Male, White/Caucasian, Less than \$50,000, Own, Single-family home, Bachelor's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Information it safe to drink*

50-64, Female, White/Caucasian, Less than \$50,000, Own, Condominium or townhome, High school degree or equivalent (e.g., GED), Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *a monthly water report card giving levels in the water*

30-39, Male, Black or African American, \$50,000-\$100,000, Own, Condominium or townhome, Bachelor's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *I already do. Trust the government more than private companies*

40-49, Female, Black or African American, Less than \$50,000, Rent, Condominium or townhome, High school degree or equivalent (e.g., GED), Uninsured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *At this moment, nothing*

40-49, Male, Asian or Pacific Islander, \$50,000-\$100,000, Own, Single-family home, High school degree or equivalent (e.g., GED), Uninsured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Just filtered water*

65+, Male, White/Caucasian, Less than \$50,000, Rent, Single-family home, Master's degree, Uninsured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Pretty confident already.*

18-29, Female, Black or African American, Less than \$50,000, Rent, Condominium or townhome, High school degree or equivalent (e.g., GED), Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *I'm drinking any water I can get my hands on when I'm feeling thirsty unless it tastes weird or have a color / Oder then I'm not drinking it*

30-39, Female, White/Caucasian, \$100,000-\$200,000, Own, Single-family home, Master's degree, Insured, Well Water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Knowing the added benefits for me and the society by drinking tap instead of bottled*

18-29, Female, Black or African American, \$100,000-\$200,000, Rent, Apartment building, Bachelor's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *I will only drink it if it is filtered*

50-64, Female, White/Caucasian, Less than \$50,000, Own, Single-family home, Associate's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Nothing*

Answer: *Knowing that it is regulated even more than it is now*

65+, Male, White/Caucasian, \$50,000-\$100,000, Own, Single-family home, Associate's degree, Insured, Well Water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Already drink filtered tap water from a well*

65+, Female, White/Caucasian, Less than \$50,000, Own, Single-family home, Associate's degree, Uninsured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *not sure*

65+, Male, White/Caucasian, \$100,000-\$200,000, Own, Condominium or townhome, Master's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Not sure*

65+, Male, Asian or Pacific Islander, \$100,000-\$200,000, Rent, Apartment building, Doctorate or Professional degree (e.g., MD, PhD, JD), Uninsured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Periodic testing results showing mineral content and coliform counts*

65+, Female, White/Caucasian, \$50,000-\$100,000, Own, Single-family home, Associate's degree, Uninsured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Seeing in print from a reliable and trustworthy organization with their research included.*

65+, Female, Asian or Pacific Islander, \$50,000-\$100,000, Own, Single-family home, Bachelor's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *facts supporting that it is safe to drink tap water*

18-29, Male, Black or African American, \$50,000-\$100,000, Rent, Apartment building, High school degree or equivalent (e.g., GED), Uninsured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *a lower water bill*

50-64, Male, White/Caucasian, \$100,000-\$200,000, Own, Single-family home, Master's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *I drink tap water now.*

18-29, Male, White/Caucasian, Over \$200,000, Rent, Single-family home, Less than a high school diploma, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *95% of the water I consume daily is tap water and the other 5% is if I can't reach the tap*

18-29, Female, Black or African American, Less than \$50,000, Rent, Single-family home, High school degree or equivalent (e.g., GED), Uninsured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Nothing at all*

40-49, Female, Black or African American, \$50,000-\$100,000, Rent, Apartment building, High school degree or equivalent (e.g., GED), Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Not sure*

18-29, Female, Other, \$50,000-\$100,000, Rent, Apartment building, High school degree or equivalent (e.g., GED), Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *If I knew new information*

40-49, Male, Asian or Pacific Islander, \$100,000-\$200,000, Own, Single-family home, Bachelor's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Reports and tests showing the data.*

30-39, Female, Black or African American, \$100,000-\$200,000, Own, Single-family home, Associate's degree, Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *the only way i could ever be able is to get my own car to work for a month or so before the pandemic hit so that my parents can have*

40-49, Female, White/Caucasian, Less than \$50,000, Rent, Condominium or townhome, High school degree or equivalent (e.g., GED), Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Nothing, irreversible damage, forever chemicals, contamination*

18-29, Female, Other, Less than \$50,000, Other, Other, Bachelor's degree, Uninsured, Well Water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Noo I'll drink bottled water*

50-64, Male, White/Caucasian, \$100,000-\$200,000, Own, Single-family home, Master's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Pretty confident.*

65+, Female, White/Caucasian, \$50,000-\$100,000, Own, Single-family home, Bachelor's degree, Insured, Well Water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *I use tap water for certain reasons - cooking and baking, coffee and tea, lemonade, iced tea, fruit punches. My conditioner is salt-based; I have high blood pressure. I was medically advised to drink bottled spring water to flush salts out of my system.*

30-39, Female, Black or African American, Less than \$50,000, Other, Apartment building, High school degree or equivalent (e.g., GED), Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *The fact that it makes your teeth stronger*

18-29, Female, White/Caucasian, Less than \$50,000, Rent, Single-family home, Less than a high school diploma, Insured, Well Water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Nothing*

50-64, Male, White/Caucasian, \$50,000-\$100,000, Own, Single-family home, High school degree or equivalent (e.g., GED), Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *nothing*

30-39, Male, Black or African American, Less than \$50,000, Rent, Single-family home, Bachelor's degree, Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *The health benefits.*

18-29, Female, Black or African American, \$50,000-\$100,000, Rent, Apartment building, High school degree or equivalent (e.g., GED), Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *I am actually going to start doing it more now. I'm going to refill the water bottles from the store with tapwater and drink it . Thanks for letting me know.*

30-39, Male, White/Caucasian, Less than \$50,000, Other, Single-family home, Associate's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *As long as it is clean and tasty I'm good*

18-29, Female, White/Caucasian, \$100,000-\$200,000, Rent, Condominium or townhome, Bachelor's degree, Uninsured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Replacing any remaining lead/other dangerous metal pipes and minimizing use of ex road salt that corrodes pipes (ions of the pipes get into the water supply)*

18-29, Female, Black or African American, Less than \$50,000, Rent, Apartment building, High school degree or equivalent (e.g., GED), Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *If it tasted better*

30-39, Male, White/Caucasian, Less than \$50,000, Other, Single-family home, High school degree or equivalent (e.g., GED), Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Testing kits provided to me for free to test my water and if it's not good then having good leaders in the governmental construct to take care of the issue ASAP. Look at flint Michigan, the people in power are the direct blame and they still haven't taken*

40-49, Male, Black or African American, \$50,000-\$100,000, Own, Single-family home, Bachelor's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *I use tap water for almost everything in the kitchen.*

18-29, Female, Black or African American, Less than \$50,000, Rent, Condominium or townhome, High school degree or equivalent (e.g., GED), Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *getting more information about it from my home water supplier*

30-39, Male, Black or African American, \$50,000-\$100,000, Rent, Condominium or townhome, High school degree or equivalent (e.g., GED), Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Fluoride in it*

18-29, Female, White/Caucasian, \$50,000-\$100,000, Own, Single-family home, High school degree or equivalent (e.g., GED), Insured, Well Water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Nothing, i think the whole system is not clean.*

30-39, Male, White/Caucasian, \$50,000-\$100,000, Own, Condominium or townhome, Bachelor's degree, Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *If I felt flouride was healthy in the amount I drink it.*

18-29, Male, White/Caucasian, Less than \$50,000, Rent, Condominium or townhome, High school degree or equivalent (e.g., GED), Uninsured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *I think constant updates on regulations*

40-49, Female, White/Caucasian, \$50,000-\$100,000, Rent, Single-family home, Bachelor's degree, Insured, Well Water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Regular surveys and public comments on results*

40-49, Male, White/Caucasian, \$100,000-\$200,000, Own, Single-family home, High school degree or equivalent (e.g., GED), Uninsured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Having my own deionizer filter filtering the water before I drink it*

18-29, Female, Black or African American, Less than \$50,000, Rent, Single-family home, Less than a high school diploma, Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *If the tap water was more filtered and cleaned*

65+, Female, Black or African American, \$50,000-\$100,000, Own, Single-family home, High school degree or equivalent (e.g., GED), Uninsured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *I drink tap water*

40-49, Female, Black or African American, Less than \$50,000, Rent, Single-family home, Bachelor's degree, Uninsured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *When more facts are made available to me*

65+, Male, White/Caucasian, \$100,000-\$200,000, Own, Single-family home, Bachelor's degree, Insured, Well Water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *I already answered a previous question saying that I never drink bottled water.*

18-29, Female, White/Caucasian, \$50,000-\$100,000, Rent, Single-family home, High school degree or equivalent (e.g., GED), Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Nothing. Nothing is safe anymore. The government is horrible. May God save us*

18-29, Male, White/Caucasian, \$50,000-\$100,000, Rent, Apartment building, Associate's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Less chemical taste that's why i choose bottled water i have hyperosmia*

30-39, Female, White/Caucasian, Less than \$50,000, Other, Other, Less than a high school diploma, Uninsured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Nothing*

50-64, Male, White/Caucasian, Less than \$50,000, Rent, Single-family home, High school degree or equivalent (e.g., GED), Insured, Well Water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *nothing*

18-29, Female, White/Caucasian, Less than \$50,000, Rent, Apartment building, Associate's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Better filtration*

30-39, Male, White/Caucasian, \$50,000-\$100,000, Own, Single-family home, Master's degree, Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Not sure*

40-49, Male, White/Caucasian, Less than \$50,000, Own, Single-family home, High school degree or equivalent (e.g., GED), Uninsured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *nothing really, already drink it all the time*

40-49, Male, White/Caucasian, \$100,000-\$200,000, Own, Single-family home, Master's degree, Uninsured, Well Water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Morning would change my opinion*

50-64, Female, White/Caucasian, \$100,000-\$200,000, Own, Single-family home, Master's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Being kept informed.*

30-39, Female, Black or African American, Less than \$50,000, Rent, Single-family home, High school degree or equivalent (e.g., GED), Insured, Well Water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *If no bottles*

65+, Male, White/Caucasian, Less than \$50,000, Rent, Apartment building, Bachelor's degree, Uninsured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *taste improvement*

65+, Female, Other, Less than \$50,000, Own, Single-family home, High school degree or equivalent (e.g., GED), Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Nothing*

50-64, Male, Asian or Pacific Islander, Less than \$50,000, Own, Single-family home, Bachelor's degree, Insured, Well Water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *I believe having access to additional information on the benefits of tap water would be helpful. Already the survey has opened my eyes a bit.*

50-64, Male, Asian or Pacific Islander, \$50,000-\$100,000, Own, Condominium or townhome, Doctorate or Professional degree (e.g., MD, PhD, JD), Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Safety of the chemicals used to during the cold weather is my concern. Antifreeze?*

65+, Female, White/Caucasian, \$100,000-\$200,000, Own, Single-family home, High school degree or equivalent (e.g., GED), Insured, Well Water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *I am most confident drinking the tap water from my well after it is treated through our reverse osmosis system.*

40-49, Female, Black or African American, Less than \$50,000, Rent, Condominium or townhome, Associate's degree, Uninsured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *taste*

65+, Female, Black or African American, Less than \$50,000, Own, Single-family home, High school degree or equivalent (e.g., GED), Insured, Well Water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Nothing really*

30-39, Female, Black or African American, Less than \$50,000, Rent, Condominium or townhome, High school degree or equivalent (e.g., GED), Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Nothing would make me more likely to drink tap water*

40-49, Female, Latino/Hispanic, Less than \$50,000, Rent, Single-family home, Less than a high school diploma, Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *The house is old water has is yellowish*

65+, Male, White/Caucasian, Less than \$50,000, Own, Single-family home, Bachelor's degree, Uninsured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Facts from organizations like the cdc*

30-39, Female, Black or African American, Less than \$50,000, Rent, Condominium or townhome, High school degree or equivalent (e.g., GED), Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *I drink tap water regularly, but I'd drink more if it tasted better.*

65+, Female, Black or African American, \$50,000-\$100,000, Own, Condominium or townhome, Associate's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *NO opinion, I trust myself with Brita Filters.*

18-29, Female, White/Caucasian, Less than \$50,000, Rent, Apartment building, High school degree or equivalent (e.g., GED), Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *If it tasted better*

65+, Male, White/Caucasian, \$100,000-\$200,000, Own, Single-family home, Master's degree, Uninsured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *nothing i am quite willing to drink tap water*

65+, Male, White/Caucasian, \$100,000-\$200,000, Rent, Apartment building, Doctorate or Professional degree (e.g., MD, PhD, JD), Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Knowing the condition and age of pipes*

50-64, Male, Black or African American, \$50,000-\$100,000, Own, Single-family home, High school degree or equivalent (e.g., GED), Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *It's ok to drink*

65+, Female, White/Caucasian, Less than \$50,000, Other, Single-family home, Master's degree, Insured, Well Water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Water testing for wells*

18-29, Male, Black or African American, Less than \$50,000, Rent, Single-family home, Less than a high school diploma, Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *That all the water is clean the same some water doesn't get the same cleaning*

50-64, Male, White/Caucasian, \$100,000-\$200,000, Own, Condominium or townhome, Bachelor's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Better taste and more information*

40-49, Female, White/Caucasian, Less than \$50,000, Own, Condominium or townhome, High school degree or equivalent (e.g., GED), Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *i filter the water cause it tastes funny (not in a good way funny)*

40-49, Female, White/Caucasian, \$50,000-\$100,000, Own, Single-family home, Associate's degree, Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *I don't really like the taste so I put in flavor packets if I'm gonna drink water at all on lemon n Splenda. I do make tea with it. N use it to cook. Like I said I do t like water weither it's from faucet or bottled but I always thought bottled was better*

50-64, Male, White/Caucasian, Less than \$50,000, Own, Condominium or townhome, High school degree or equivalent (e.g., GED), Uninsured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *I drink much*

65+, Female, White/Caucasian, \$50,000-\$100,000, Own, Condominium or townhome, High school degree or equivalent (e.g., GED), Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *nothing I can think of*

50-64, Female, Multiracial, Prefer not to answer, Rent, Apartment building, High school degree or equivalent (e.g., GED), Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Nothing*

65+, Male, White/Caucasian, Prefer not to answer, Own, Condominium or townhome, Bachelor's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *private company runs the tap water*

40-49, Male, Black or African American, \$100,000-\$200,000, Rent, Single-family home, Associate's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Conduct my own water testing to see which one would be best for me.*

50-64, Male, White/Caucasian, Less than \$50,000, Own, Single-family home, Less than a high school diploma, Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *More information*

50-64, Male, White/Caucasian, Over \$200,000, Own, Single-family home, Bachelor's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Already a firm believer*

65+, Male, Black or African American, \$50,000-\$100,000, Own, Single-family home, Bachelor's degree, Uninsured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *information provided to me from the public health org.*

65+, Female, White/Caucasian, \$50,000-\$100,000, Rent, Apartment building, High school degree or equivalent (e.g., GED), Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *nothing, and we don't have flouride in my local water*

30-39, Male, Black or African American, Less than \$50,000, Other, Mobile home, High school degree or equivalent (e.g., GED), Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *I'm not interested in drinking tap water*

50-64, Female, Black or African American, \$100,000-\$200,000, Own, Single-family home, Bachelor's degree, Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *I would be more confident in my tap water if the source of my water came from a covered filtration location versus the current uncovered location where a parasite was found in the water negatively impacting my health.*

18-29, Female, White/Caucasian, \$50,000-\$100,000, Rent, Single-family home, Bachelor's degree, Uninsured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Ninguna, posiblemente el agua de grifo es segura para el consumo. Regularmente la uso solo para cocinar*

18-29, Male, Black or African American, Less than \$50,000, Rent, Apartment building, Associate's degree, Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *nothing because i think it's disgusting*

65+, Female, White/Caucasian, Prefer not to answer, Own, Single-family home, Master's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Sharing more information with the public*

40-49, Male, Black or African American, \$100,000-\$200,000, Own, Single-family home, Bachelor's degree, Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *I don't know. I just don't trust it.*

65+, Female, Black or African American, \$50,000-\$100,000, Own, Single-family home, High school degree or equivalent (e.g., GED), Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *hearing from the health officials that the water is safe to drink*

30-39, Female, Black or African American, Over \$200,000, Rent, Single-family home, Doctorate or Professional degree (e.g., MD, PhD, JD), Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Fewer reported issues with the tap water, and explanations of drastic color and taste changes*

50-64, Female, White/Caucasian, Less than \$50,000, Rent, Apartment building, High school degree or equivalent (e.g., GED), Uninsured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Nothing could, since I only drink tap water already.*

30-39, Female, Black or African American, Less than \$50,000, Rent, Apartment building, High school degree or equivalent (e.g., GED), Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *The taste*

18-29, Male, Black or African American, Less than \$50,000, Rent, Apartment building, Bachelor's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *regular test that were distributed perhaps on a monthly basis*

30-39, Female, Black or African American, Less than \$50,000, Rent, Apartment building, High school degree or equivalent (e.g., GED), Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *The information from the professionals*

50-64, Female, White/Caucasian, \$100,000-\$200,000, Own, Single-family home, Master's degree, Insured, Well Water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Regular testing and publishing results. I mostly drink my tap water.*

30-39, Female, White/Caucasian, \$100,000-\$200,000, Rent, Apartment building, Associate's degree, Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Knowing it was clean and safe; that it tastes good*

30-39, Male, Asian or Pacific Islander, \$100,000-\$200,000, Own, Single-family home, Master's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Give me a independent study result.*

30-39, Female, Black or African American, Less than \$50,000, Rent, Single-family home, High school degree or equivalent (e.g., GED), Uninsured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Me being thirsty I would drink the water*

18-29, Female, Black or African American, \$50,000-\$100,000, Own, Single-family home, High school degree or equivalent (e.g., GED), Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *If it didn't taste different and I don't trust that the pipes are fully clean so maybe clear pipes*

30-39, Male, Other, \$50,000-\$100,000, Rent, Single-family home, High school degree or equivalent (e.g., GED), Insured, Well Water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Nothing could really change my mind.*

50-64, Female, White/Caucasian, Less than \$50,000, Rent, Apartment building, High school degree or equivalent (e.g., GED), Uninsured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *I am confident now*

18-29, Female, Black or African American, \$50,000-\$100,000, Rent, Apartment building, Bachelor's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Possibly knowing my water has the proper ph balance to be consumed*

50-64, Male, White/Caucasian, \$50,000-\$100,000, Own, Condominium or townhome, Associate's degree, Uninsured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *I am very confident in the local water.*

18-29, Female, White/Caucasian, \$50,000-\$100,000, Rent, Apartment building, High school degree or equivalent (e.g., GED), Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Having a good filter for my sink. I won't drink it without a filter.*

50-64, Male, White/Caucasian, Less than \$50,000, Rent, Single-family home, High school degree or equivalent (e.g., GED), Insured, Well Water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *paying less for water*

50-64, Male, White/Caucasian, Less than \$50,000, Own, Single-family home, High school degree or equivalent (e.g., GED), Insured, Well Water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *have well water tested annually.*

30-39, Female, Black or African American, Over \$200,000, Own, Single-family home, Master's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *a stat sheet and transparency in the the water quality on a weekly basis*

50-64, Female, Latino/Hispanic, \$100,000-\$200,000, Rent, Other, Associate's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *have a monthly safety report*

18-29, Female, Black or African American, Less than \$50,000, Rent, Condominium or townhome, High school degree or equivalent (e.g., GED), Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Nothing would make me want to drink tap water because I don't like it at all. When I cook with it I boil it first.*

50-64, Female, Asian or Pacific Islander, \$100,000-\$200,000, Own, Condominium or townhome, Doctorate or Professional degree (e.g., MD, PhD, JD), Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Transparent communication about what contaminants and their amount found in my local water supply.*

18-29, Female, Black or African American, Less than \$50,000, Rent, Apartment building, Bachelor's degree, Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Knowing the schedule in which city water is cleaned and rotated via each neighborhood.*

40-49, Male, Latino/Hispanic, Over \$200,000, Own, Single-family home, Master's degree, Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Statistics and data from heath separtment*

50-64, Female, White/Caucasian, Less than \$50,000, Own, Single-family home, Associate's degree, Uninsured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *better taste and quality*

40-49, Male, Multiracial, \$50,000-\$100,000, Own, Condominium or townhome, High school degree or equivalent (e.g., GED), Uninsured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *if it wasn't so cloudy, I MIGHT give it a shot, but probably nothing*

65+, Female, White/Caucasian, \$100,000-\$200,000, Own, Single-family home, High school degree or equivalent (e.g., GED), Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *I drink a good bit now.*

50-64, Male, White/Caucasian, \$50,000-\$100,000, Own, Single-family home, Doctorate or Professional degree (e.g., MD, PhD, JD), Uninsured, Well Water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *I already do*

30-39, Male, White/Caucasian, Less than \$50,000, Own, Single-family home, High school degree or equivalent (e.g., GED), Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *An annual report from my water provider.*

40-49, Female, White/Caucasian, \$100,000-\$200,000, Own, Single-family home, Master's degree, Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *I am already drinking tap water and not bottled water. Nothing would make me more confident or more likely.*

65+, Female, Black or African American, Less than \$50,000, Rent, Apartment building, High school degree or equivalent (e.g., GED), Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *nothing*

40-49, Male, Latino/Hispanic, \$100,000-\$200,000, Own, Single-family home, Master's degree, Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *CONTINUOUS MONITORING AND TESTING WEEKLY OR AT LEAST BI-WEEKLY AND RESULTS PROVIDED TO COMMUNITY*

30-39, Female, Asian or Pacific Islander, Over \$200,000, Own, Single-family home, Doctorate or Professional degree (e.g., MD, PhD, JD), Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Nothing really since I already drink mostly all tap water.*

40-49, Male, Asian or Pacific Islander, \$50,000-\$100,000, Own, Condominium or townhome, Doctorate or Professional degree (e.g., MD, PhD, JD), Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *I trust my tap water implicitly. No other things necessary*

65+, Female, White/Caucasian, \$50,000-\$100,000, Own, Single-family home, Associate's degree, Insured, Well Water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *i drink tap water now*

30-39, Male, Black or African American, \$50,000-\$100,000, Rent, Single-family home, High school degree or equivalent (e.g., GED), Insured, Well Water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *I think all water is good*

40-49, Female, White/Caucasian, \$100,000-\$200,000, Rent, Single-family home, High school degree or equivalent (e.g., GED), Insured, Well Water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Less chlorine*

18-29, Female, Black or African American, \$50,000-\$100,000, Rent, Single-family home, Associate's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Showing us clips on the tap water make the actual bottles*

30-39, Female, White/Caucasian, Over \$200,000, Own, Single-family home, Master's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *I'm already sold on tap water I don't need convincing.*

40-49, Male, White/Caucasian, \$100,000-\$200,000, Own, Single-family home, Bachelor's degree, Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Better taste*

40-49, Female, Black or African American, \$100,000-\$200,000, Own, Single-family home, Doctorate or Professional degree (e.g., MD, PhD, JD), Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *See previous page*

65+, Female, White/Caucasian, \$100,000-\$200,000, Own, Single-family home, High school degree or equivalent (e.g., GED), Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *we have filters on our refridgerator*

30-39, Female, White/Caucasian, \$100,000-\$200,000, Own, Single-family home, Bachelor's degree, Insured, Well Water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *I already have a reverse osmosis system, so there's no reason for me to change my habits. Bottled water is simply a convenience.*

30-39, Female, White/Caucasian, \$100,000-\$200,000, Rent, Apartment building, Master's degree, Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Not sure, as I already confidently drink plenty of tap water.*

18-29, Male, Black or African American, \$50,000-\$100,000, Rent, Single-family home, High school degree or equivalent (e.g., GED), Insured, Well Water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *none*

18-29, Female, Black or African American, Less than \$50,000, Own, Single-family home, Master's degree, Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *If it was 100% clean. With nothing floating in it. The taste to be better.*

30-39, Female, White/Caucasian, \$100,000-\$200,000, Own, Single-family home, Associate's degree, Uninsured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Knowing that it is a safe option for my family and myself.*

18-29, Male, Black or African American, \$100,000-\$200,000, Own, Single-family home, Master's degree, Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *It depends on how it tastes and also if I had it tested*

18-29, Male, Black or African American, Less than \$50,000, Rent, Single-family home, Associate's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Nothing really unless it came from the damn Fiji mountains*

65+, Female, White/Caucasian, Less than \$50,000, Other, Single-family home, High school degree or equivalent (e.g., GED), Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *The information in this survey will make me more confident in drinking tap water*

18-29, Female, White/Caucasian, Less than \$50,000, Rent, Mobile home, High school degree or equivalent (e.g., GED), Insured, Well Water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *If my home had a water treatment system put in that made the water clean and safe, removed the sulfur smell and taste and cleared up the color of the water.*

40-49, Female, Black or African American, Less than \$50,000, Rent, Condominium or townhome, Associate's degree, Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Annual door to door water check inside the home itself an ran for each place water comes out the home for example shower, bathrooms laundry rooms and most importantly kitchen!*

18-29, Male, Black or African American, Less than \$50,000, Rent, Condominium or townhome, High school degree or equivalent (e.g., GED), Uninsured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Nothing at all. I don't think I'll ever be comfortable enough to drink tap water*

65+, Male, Asian or Pacific Islander, \$100,000-\$200,000, Own, Single-family home, Bachelor's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Already drinking only tap water*

30-39, Female, Latino/Hispanic, Less than \$50,000, Rent, Single-family home, Bachelor's degree, Uninsured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *that i knew it was safe*

18-29, Male, White/Caucasian, Less than \$50,000, Rent, Apartment building, High school degree or equivalent (e.g., GED), Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Facts that tap water isn't dangerous to your health*

30-39, Female, Black or African American, Less than \$50,000, Other, Single-family home, High school degree or equivalent (e.g., GED), Uninsured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Filter*

50-64, Female, White/Caucasian, Less than \$50,000, Other, Single-family home, High school degree or equivalent (e.g., GED), Uninsured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *don't know*

65+, Male, White/Caucasian, Over \$200,000, Own, Single-family home, High school degree or equivalent (e.g., GED), Uninsured, Well Water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *yes*

65+, Female, White/Caucasian, Less than \$50,000, Own, Condominium or townhome, High school degree or equivalent (e.g., GED), Uninsured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *nothing*

40-49, Female, Black or African American, \$50,000-\$100,000, Own, Condominium or townhome, Bachelor's degree, Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *The fact that tap water is safer and goes through more testing than tap water. I was not aware that bottled water is not regulated much. I can taste the difference between bottled and tap water but thought tap wasn't good for you. This study proves other*

65+, Male, White/Caucasian, \$100,000-\$200,000, Own, Single-family home, Master's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *I already drink tap water always.*

40-49, Female, Black or African American, Less than \$50,000, Rent, Apartment building, High school degree or equivalent (e.g., GED), Uninsured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Nothing I do not like the taste*

40-49, Male, Black or African American, Less than \$50,000, Own, Apartment building, High school degree or equivalent (e.g., GED), Uninsured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Making it more healthy*

18-29, Male, Latino/Hispanic, \$50,000-\$100,000, Rent, Apartment building, Bachelor's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Nothing at all.*

30-39, Male, White/Caucasian, \$50,000-\$100,000, Rent, Mobile home, High school degree or equivalent (e.g., GED), Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Safer regulations*

65+, Female, Asian or Pacific Islander, \$50,000-\$100,000, Own, Condominium or townhome, Doctorate or Professional degree (e.g., MD, PhD, JD), Uninsured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Nothing*

65+, Female, White/Caucasian, \$50,000-\$100,000, Own, Single-family home, Associate's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Nothing, I already drink it*

65+, Female, White/Caucasian, Less than \$50,000, Own, Single-family home, High school degree or equivalent (e.g., GED), Insured, Well Water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *I find no difference. It much cheaper to drink tap*

18-29, Female, White/Caucasian, \$50,000-\$100,000, Rent, Apartment building, Bachelor's degree, Uninsured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Knowing more about regulations regarding tap water, and the testing for chemicals that occurs.*

65+, Male, White/Caucasian, \$50,000-\$100,000, Own, Condominium or townhome, Master's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *i already drink it*

65+, Male, White/Caucasian, \$50,000-\$100,000, Own, Single-family home, High school degree or equivalent (e.g., GED), Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *complete openness on how it works*

50-64, Male, White/Caucasian, \$50,000-\$100,000, Own, Single-family home, Bachelor's degree, Insured, Well Water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Lab results.*

18-29, Female, Black or African American, Less than \$50,000, Rent, Single-family home, Associate's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *If it was already being filtered of PFAs*

18-29, Female, Black or African American, Less than \$50,000, Rent, Condominium or townhome, High school degree or equivalent (e.g., GED), Uninsured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *If I knew for sure that the water had no harsh or unsafe chemicals in them.*

30-39, Female, White/Caucasian, \$100,000-\$200,000, Rent, Apartment building, Associate's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Fluoride and minerals for a crisp taste*

18-29, Female, White/Caucasian, \$50,000-\$100,000, Own, Single-family home, High school degree or equivalent (e.g., GED), Insured, Well Water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *I would like to have the details of how exactly tap water is treated and made safe to drink. I trust that it is being treated properly, but I would love to know more about the whole process.*

18-29, Female, White/Caucasian, Less than \$50,000, Rent, Apartment building, High school degree or equivalent (e.g., GED), Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *If I see facts that prove tap water is more beneficial and safe than bottled water.*

30-39, Male, White/Caucasian, \$100,000-\$200,000, Own, Single-family home, Bachelor's degree, Insured, Well Water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *programmes to improve water quality ,reduce the need*

18-29, Male, Black or African American, \$100,000-\$200,000, Own, Single-family home, Bachelor's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *If it's filtered*

30-39, Female, Asian or Pacific Islander, \$50,000-\$100,000, Own, Condominium or townhome, Bachelor's degree, Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Public announcements*

40-49, Male, White/Caucasian, \$100,000-\$200,000, Own, Single-family home, Doctorate or Professional degree (e.g., MD, PhD, JD), Insured, Well Water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *some more tests and comparisons with other waters*

18-29, Female, White/Caucasian, \$100,000-\$200,000, Rent, Apartment building, High school degree or equivalent (e.g., GED), Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *If i knew more about how it was cleaned and why*

30-39, Male, White/Caucasian, \$50,000-\$100,000, Own, Single-family home, Bachelor's degree, Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Nothing, still going to drink it due to state if economy and prices of water bottles*

50-64, Female, White/Caucasian, \$100,000-\$200,000, Own, Condominium or townhome, Master's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Nothing.. really. I would prefer this information would be delivered to my inbox.*

50-64, Female, White/Caucasian, Less than \$50,000, Own, Single-family home, High school degree or equivalent (e.g., GED), Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Yearly test results sent to me*

65+, Male, White/Caucasian, \$50,000-\$100,000, Own, Condominium or townhome, Bachelor's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Getting weekly reports (email, public announcement) on the status of the water supply.*

30-39, Female, White/Caucasian, \$100,000-\$200,000, Own, Condominium or townhome, Associate's degree, Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *If it didn't smell and taste like garlic*

65+, Male, White/Caucasian, \$50,000-\$100,000, Own, Single-family home, Associate's degree, Uninsured, Well Water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *nothing because i am on a well i have to have it tested,*

18-29, Male, Multiracial, \$50,000-\$100,000, Rent, Apartment building, High school degree or equivalent (e.g., GED), Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Easier way to have it filtered.*

30-39, Male, White/Caucasian, \$100,000-\$200,000, Own, Condominium or townhome, Master's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: Yes

65+, Male, White/Caucasian, \$50,000-\$100,000, Own, Condominium or townhome, Bachelor's degree, Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Some unbiased reputable third party telling me the real dope*

18-29, Female, Latino/Hispanic, Less than \$50,000, Rent, Apartment building, High school degree or equivalent (e.g., GED), Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Have tests results accessible to the public*

50-64, Male, White/Caucasian, Less than \$50,000, Own, Condominium or townhome, High school degree or equivalent (e.g., GED), Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *nothing*

65+, Female, Black or African American, Less than \$50,000, Rent, Apartment building, Master's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *I formation on safety and the environmental impact of bottled water*

65+, Male, Black or African American, \$100,000-\$200,000, Own, Condominium or townhome, Associate's degree, Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Quality updates from State.*

65+, Male, Black or African American, \$50,000-\$100,000, Own, Single-family home, Doctorate or Professional degree (e.g., MD, PhD, JD), Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Nothing would I do not believe drinking tap water is safe*

65+, Male, White/Caucasian, \$50,000-\$100,000, Own, Single-family home, High school degree or equivalent (e.g., GED), Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Trusting what was reported.*

30-39, Male, White/Caucasian, \$100,000-\$200,000, Rent, Single-family home, Master's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Communication of regular testing results.*

30-39, Male, White/Caucasian, Over \$200,000, Own, Single-family home, Bachelor's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *My tap water sometimes has a flavor to it that is slightly unpleasant. A more consistently great/clean taste would make me mostly choose that over bottled water.*

30-39, Male, Black or African American, \$50,000-\$100,000, Rent, Apartment building, High school degree or equivalent (e.g., GED), Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Having a super filter on my faucet*

30-39, Male, Black or African American, Less than \$50,000, Rent, Apartment building, High school degree or equivalent (e.g., GED), Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *A filtration system*

50-64, Male, Black or African American, Less than \$50,000, Own, Single-family home, High school degree or equivalent (e.g., GED), Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Nothing..I like the taste and I drink it*

65+, Male, Black or African American, \$100,000-\$200,000, Own, Condominium or townhome, Bachelor's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *When my tap water starts to taste better.*

65+, Male, Black or African American, \$50,000-\$100,000, Own, Single-family home, High school degree or equivalent (e.g., GED), Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *nothing*

30-39, Male, Black or African American, \$50,000-\$100,000, Rent, Condominium or townhome, Associate's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *My only con with drinking tap water is just the taste otherwise I don't have any problem to drink it in the future*

65+, Male, White/Caucasian, \$100,000-\$200,000, Own, Single-family home, Master's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Knowing that it had a low mineral content to help prevent kidney stones*

30-39, Male, White/Caucasian, \$100,000-\$200,000, Own, Single-family home, Associate's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *If it was filtered the same way I'm filtering it there's no reason it isn't*

40-49, Male, White/Caucasian, Less than \$50,000, Rent, Apartment building, High school degree or equivalent (e.g., GED), Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Stop adding fluoride and other chemicals.*

50-64, Male, Black or African American, \$50,000-\$100,000, Rent, Single-family home, Associate's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *I already drink tap water multiple times per day.*

40-49, Male, Black or African American, \$50,000-\$100,000, Own, Single-family home, Bachelor's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Having facts available consistently about the safety of drinking tap water, news updates and reports about tap water every so often, public safety announcements that create awareness of the benefits for tap water in general*

65+, Male, Latino/Hispanic, \$100,000-\$200,000, Own, Single-family home, Doctorate or Professional degree (e.g., MD, PhD, JD), Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *more information from research institutions*

65+, Female, White/Caucasian, \$100,000-\$200,000, Own, Condominium or townhome, Master's degree, Uninsured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *I already feel confident with drinking tap water.*

50-64, Male, Black or African American, \$100,000-\$200,000, Rent, Apartment building, High school degree or equivalent (e.g., GED), Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Full transparency*

40-49, Male, Black or African American, \$100,000-\$200,000, Rent, Single-family home, High school degree or equivalent (e.g., GED), Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *When I have a filter*

65+, Female, White/Caucasian, \$100,000-\$200,000, Own, Single-family home, Bachelor's degree, Insured, Well Water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *I generally like tap water*

50-64, Female, White/Caucasian, Over \$200,000, Own, Single-family home, Bachelor's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Nothing I have already tested and know my tap water is good to drink.*

50-64, Male, White/Caucasian, \$100,000-\$200,000, Own, Single-family home, Bachelor's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *That I could test to make sure it did not include Fluoride.*

18-29, Male, Black or African American, \$100,000-\$200,000, Own, Single-family home, Bachelor's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *If my doctor approved*

18-29, Female, Black or African American, \$100,000-\$200,000, Own, Single-family home, High school degree or equivalent (e.g., GED), Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *If it's clean*

30-39, Female, Latino/Hispanic, \$100,000-\$200,000, Rent, Apartment building, Bachelor's degree, Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *a study that measures the quality of water*

50-64, Male, White/Caucasian, Over \$200,000, Own, Single-family home, Bachelor's degree, Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Reduce the taste of chlorine and less fluoride.*

65+, Male, White/Caucasian, \$100,000-\$200,000, Own, Single-family home, Master's degree, Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Health department*

50-64, Male, Latino/Hispanic, \$100,000-\$200,000, Own, Single-family home, Master's degree, Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Nothing*

18-29, Female, Latino/Hispanic, Less than \$50,000, Own, Single-family home, Bachelor's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *getting a filter maybe*

30-39, Female, White/Caucasian, \$100,000-\$200,000, Own, Single-family home, Bachelor's degree, Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *More frequent reports supporting it. Annual reports are spread out too far.*

18-29, Female, White/Caucasian, \$50,000-\$100,000, Rent, Apartment building, Associate's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *if it was filtered more*

18-29, Female, Multiracial, Less than \$50,000, Own, Condominium or townhome, High school degree or equivalent (e.g., GED), Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *n/a*

40-49, Male, Black or African American, Over \$200,000, Own, Single-family home, Master's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *The information I was just provided as part of this survey makes me more likely to drink tap water.*

40-49, Male, White/Caucasian, Over \$200,000, Rent, Single-family home, Associate's degree, Uninsured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *I already drink it.*

50-64, Female, White/Caucasian, \$100,000-\$200,000, Own, Single-family home, Bachelor's degree, Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *I would drink tap water if it didn't smell of chlorine and change the taste of tea, coffee and other cooking. Our water has way too much chlorine in it.*

50-64, Female, White/Caucasian, Over \$200,000, Own, Single-family home, Associate's degree, Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Everything about it*

50-64, Female, White/Caucasian, \$100,000-\$200,000, Own, Condominium or townhome, Bachelor's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *None*

30-39, Female, White/Caucasian, \$100,000-\$200,000, Own, Single-family home, High school degree or equivalent (e.g., GED), Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *If we got our water tested*

65+, Male, White/Caucasian, \$100,000-\$200,000, Rent, Apartment building, Doctorate or Professional degree (e.g., MD, PhD, JD), Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Knowing it does not contain iron residue*

40-49, Female, White/Caucasian, \$100,000-\$200,000, Own, Single-family home, Doctorate or Professional degree (e.g., MD, PhD, JD), Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *I do drink some tap water daily*

50-64, Female, Other, \$100,000-\$200,000, Rent, Condominium or townhome, High school degree or equivalent (e.g., GED), Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *If my husband and I purchased a home filtration system in our new home we'd be buying not here in this rental.*

30-39, Male, Asian or Pacific Islander, \$100,000-\$200,000, Rent, Apartment building, Doctorate or Professional degree (e.g., MD, PhD, JD), Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Just making sure it is safe*

40-49, Female, White/Caucasian, \$100,000-\$200,000, Own, Single-family home, High school degree or equivalent (e.g., GED), Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Reading the results in the mail.*

18-29, Male, White/Caucasian, \$50,000-\$100,000, Rent, Apartment building, Master's degree, Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *if it tasted good*

30-39, Male, Black or African American, \$100,000-\$200,000, Own, Single-family home, High school degree or equivalent (e.g., GED), Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *If it's better for you*

30-39, Female, White/Caucasian, \$100,000-\$200,000, Rent, Condominium or townhome, Bachelor's degree, Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *I don't know*

65+, Male, White/Caucasian, \$100,000-\$200,000, Own, Single-family home, Bachelor's degree, Insured, Well Water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Regular testing*

18-29, Female, Black or African American, Over \$200,000, Other, Condominium or townhome, Bachelor's degree, Uninsured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Using testing strips*

18-29, Female, Latino/Hispanic, \$50,000-\$100,000, Other, Single-family home, Bachelor's degree, Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *If I found the taste more appealing*

30-39, Female, White/Caucasian, \$100,000-\$200,000, Own, Condominium or townhome, Associate's degree, Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Nothing. I am already confident the drinking water is safe.*

40-49, Male, Black or African American, \$100,000-\$200,000, Rent, Single-family home, Associate's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *With out the proper filter system I wouldn't drink it.*

50-64, Female, Black or African American, \$100,000-\$200,000, Rent, Apartment building, Doctorate or Professional degree (e.g., MD, PhD, JD), Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Nothing can make me change my mind about drinking bottled water.*

65+, Male, Black or African American, \$100,000-\$200,000, Own, Condominium or townhome, High school degree or equivalent (e.g., GED), Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *More assurance from the medical society and my doctor.*

65+, Male, White/Caucasian, \$100,000-\$200,000, Own, Single-family home, Bachelor's degree, Uninsured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *I do not need more convincing. I am confident that my tap water tastes good and is safe.*

18-29, Male, Multiracial, \$50,000-\$100,000, Rent, Apartment building, Associate's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Tap water being more publicly talked about and advocated for by local health and government officials.*

65+, Male, White/Caucasian, \$100,000-\$200,000, Own, Single-family home, High school degree or equivalent (e.g., GED), Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *I'm already more confident*

30-39, Female, Black or African American, \$100,000-\$200,000, Own, Condominium or townhome, Bachelor's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *There's no bottled water. Also, if my water in my home specifically is tested for everything regularly.*

18-29, Male, Black or African American, \$100,000-\$200,000, Own, Single-family home, High school degree or equivalent (e.g., GED), Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Regulations*

18-29, Female, Black or African American, Over \$200,000, Rent, Apartment building, Bachelor's degree, Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Knowing that I bathe with it if y skin slid ok then it's somewhat safe*

40-49, Male, White/Caucasian, \$100,000-\$200,000, Own, Single-family home, High school degree or equivalent (e.g., GED), Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Not having the hard water in Taneytown that has visible particles in the tap water.*

30-39, Female, Black or African American, \$100,000-\$200,000, Rent, Condominium or townhome, Bachelor's degree, Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Nothing honestly I just prefer bottled water because it's easier*

40-49, Female, White/Caucasian, \$100,000-\$200,000, Rent, Apartment building, Master's degree, Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *I already drink mostly tap water, and I only drink bottled water if I forget my personal water bottle.*

50-64, Female, White/Caucasian, Over \$200,000, Own, Single-family home, Bachelor's degree, Uninsured, Well Water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Knowing it is NOT city water.*

18-29, Female, White/Caucasian, \$100,000-\$200,000, Rent, Condominium or townhome, Bachelor's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *If I didn't have to pay for it in my town lol*

40-49, Female, White/Caucasian, \$100,000-\$200,000, Own, Single-family home, High school degree or equivalent (e.g., GED), Insured, Well Water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Having my water supply retested*

50-64, Male, White/Caucasian, \$100,000-\$200,000, Own, Condominium or townhome, Associate's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Nothing. My water is provided from Baltimore city and I don't trust the lying and corrupt leaders*

65+, Male, White/Caucasian, \$100,000-\$200,000, Own, Single-family home, Master's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Not sure*

18-29, Male, White/Caucasian, \$100,000-\$200,000, Rent, Apartment building, Associate's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *My county's tap water is one of the best in the world*

50-64, Female, White/Caucasian, \$100,000-\$200,000, Own, Single-family home, High school degree or equivalent (e.g., GED), Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Just knowing it's being regulated and tested for safety. I love water.*

30-39, Female, Multiracial, Less than \$50,000, Rent, Single-family home, Bachelor's degree, Uninsured, Well Water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *I currently drink it now.*

50-64, Female, White/Caucasian, Over \$200,000, Rent, Apartment building, Bachelor's degree, Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *I dont know*

30-39, Male, White/Caucasian, \$100,000-\$200,000, Own, Single-family home, Master's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *I'm currently confident drinking tap water*

40-49, Female, Black or African American, \$100,000-\$200,000, Own, Single-family home, Master's degree, Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *All natural water that is healthy for the body and the future*

40-49, Male, White/Caucasian, Over \$200,000, Own, Single-family home, Bachelor's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Nothing, drinking bottled water is simply a preference for ease of transport*

65+, Female, Black or African American, Over \$200,000, Own, Single-family home, High school degree or equivalent (e.g., GED), Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *No c6*

40-49, Male, White/Caucasian, \$100,000-\$200,000, Own, Single-family home, High school degree or equivalent (e.g., GED), Insured, Well Water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *I already drink tap water daily*

18-29, Female, Latino/Hispanic, \$50,000-\$100,000, Rent, Single-family home, Bachelor's degree, Uninsured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Si cumple con todas las normas sanitarias y se dejase el consumo de agua embotellada*

40-49, Female, White/Caucasian, Over \$200,000, Own, Single-family home, Master's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *I am confident in our tap water. I think the community at large could benefit from bottled vs. tap water comparison facts*

50-64, Female, White/Caucasian, Over \$200,000, Own, Single-family home, Master's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *If I had a home filter and there was no chloramine smell.*

40-49, Female, Other, Less than \$50,000, Rent, Apartment building, High school degree or equivalent (e.g., GED), Uninsured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Nothing would really make me comfortable with drinking tap water again because I feel like it has lead and other chemicals that aren't healthy for me and my family*

50-64, Male, White/Caucasian, Over \$200,000, Own, Single-family home, Master's degree, Uninsured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Cover reservoirs ... Test more often ... Reveal problems sooner*

50-64, Female, Black or African American, \$100,000-\$200,000, Own, Single-family home, Bachelor's degree, Insured, Well Water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *The taste and smell better*

18-29, Female, Black or African American, \$50,000-\$100,000, Rent, Apartment building, Bachelor's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Erasing past horrible filtration systems*

50-64, Male, White/Caucasian, Over \$200,000, Own, Single-family home, Bachelor's degree, Insured, Well Water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *knowing where it came from*

30-39, Female, White/Caucasian, \$100,000-\$200,000, Rent, Apartment building, Bachelor's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Being able to test it myself at home for contaminants.*

30-39, Female, Black or African American, \$100,000-\$200,000, Own, Condominium or townhome, Master's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Nothing really I don't have a problem with it*

40-49, Female, Black or African American, \$100,000-\$200,000, Own, Single-family home, High school degree or equivalent (e.g., GED), Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *I don't feel anything would make me more likely to drink more tap water. Out of convenience and habit, my household tend to use bottled water over tap. My family doesn't like the taste of our tap water but it's fine to me.*

40-49, Female, White/Caucasian, \$100,000-\$200,000, Own, Condominium or townhome, Associate's degree, Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *I won't*

40-49, Male, Asian or Pacific Islander, \$100,000-\$200,000, Own, Single-family home, Bachelor's degree, Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *As long as it is filtered*

40-49, Male, Latino/Hispanic, \$50,000-\$100,000, Own, Mobile home, High school degree or equivalent (e.g., GED), Uninsured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *The gullible and your family is*

40-49, Male, White/Caucasian, Over \$200,000, Rent, Condominium or townhome, Doctorate or Professional degree (e.g., MD, PhD, JD), Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *I would like to know more about hard water and it's safe to drink without filtering.*

40-49, Female, Latino/Hispanic, \$50,000-\$100,000, Own, Single-family home, High school degree or equivalent (e.g., GED), Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Knowing more about the water first*

50-64, Female, Latino/Hispanic, Less than \$50,000, Own, Condominium or townhome, High school degree or equivalent (e.g., GED), Uninsured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Probably not much. I am accustomed to using a water pitcher filter to drink water and I also purchase sparkling water in cans. I used to buy tons of bottled water, but have stopped buying it.*

40-49, Male, Other, Less than \$50,000, Rent, Condominium or townhome, High school degree or equivalent (e.g., GED), Uninsured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *If it was tested to make sure it's safe*

30-39, Female, Multiracial, \$100,000-\$200,000, Own, Single-family home, Master's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *More information*

40-49, Male, Latino/Hispanic, Less than \$50,000, Rent, Apartment building, High school degree or equivalent (e.g., GED), Insured, Public water, HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Ninguna.. a principio de mes.. los noticieron decían que el agua de la ciudad de baltimore estaba contaminada con bacterias..*

40-49, Female, Latino/Hispanic, \$100,000-\$200,000, Own, Single-family home, Master's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *Stats comparing filtered water to tap.*

40-49, Female, Latino/Hispanic, \$50,000-\$100,000, Own, Condominium or townhome, Bachelor's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *A filter*

50-64, Female, White/Caucasian, \$100,000-\$200,000, Own, Single-family home, Master's degree, Insured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *N/a*

40-49, Male, White/Caucasian, Over \$200,000, Own, Single-family home, Master's degree, Uninsured, Public water, Non-HPSA

Question: What would make you more confident in and likely to drink tap water?

Answer: *I like to get this*
